## HOME ASSESSMENT REPORT

JULIAN OWEN ASSOCIATES  
ARCHITECTS

- ▶ Do you want to help save the environment or simply reduce your homes running costs? Then **Julian Owen Associates Architects** can help to make your existing home as energy efficient as possible. As chartered architects experienced in a wide range of residential projects, we are well placed to advise clients on the many practical options for green home improvements. After making a visit to the property, we will then provide a detailed report addressing the client's requirements and proposing cost effective solutions.

For a fixed price the report can include information such as:

- ▶ **Green appraisal of the property**
- ▶ **Likely planning constraints**
- ▶ **Suggested improvements**
- ▶ **Outline design proposals**
- ▶ **Typical builders work costs**
- ▶ **Example renewable technologies costs**
- ▶ **Relevant legislation**

Should you wish to proceed with the proposed improvements, we can also arrange for a reputable local contractor and/or specialist suppliers of energy efficient technology to visit and provide more detailed quotations.
