# 01. How to install theme MOTO

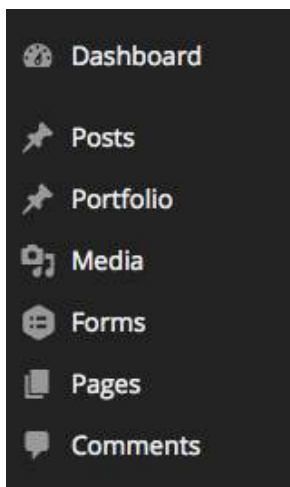

After purchasing theme MOTO, your download contains a zip-file with the file name: **“Moto – unzip me please”**. (unzip this file)

## Installing theme MOTO.

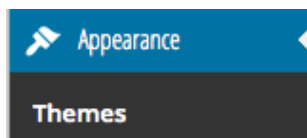

You can install MOTO using several methods. We use the easiest and fastest approach via your Wordpress dashboard.

1. Access your Wordpress account, and login.

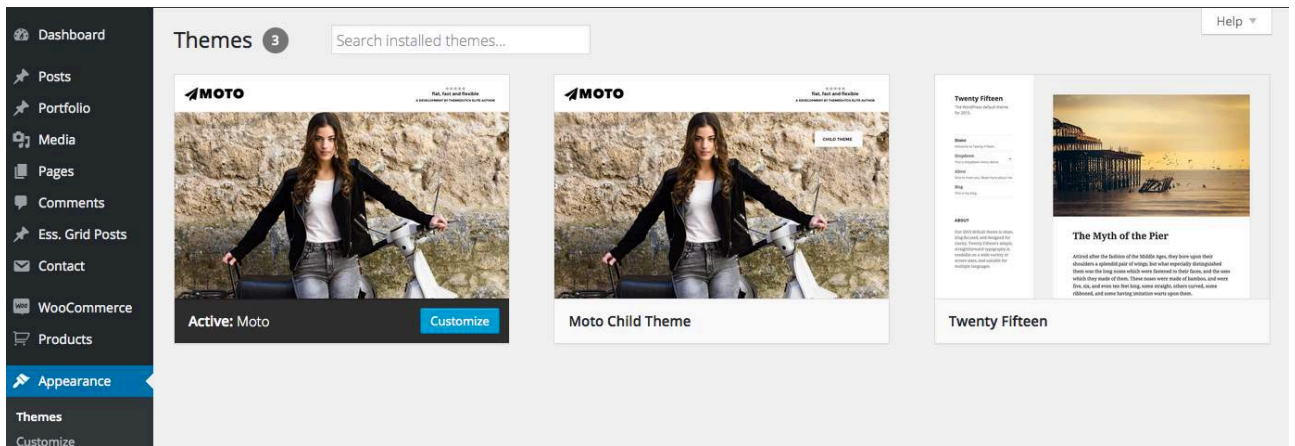

Once you’ve logged in, you’ll be directed to the dashboard.

2. Go to **Appearance** and click **Themes**.

3. Click the **Add New** tab.
4. Next, hit **Upload**.
5. Still remember the Moto folder you unzipped earlier? **Click the Browse button, locate the said Moto unzipped folder and then select it.**
6. Click **Install Now**.
7. Wait for the installation to finish and then hit **Activate** link. Then you’ll see this screen.

**NOTE:**

Theme MOTO is now activated.

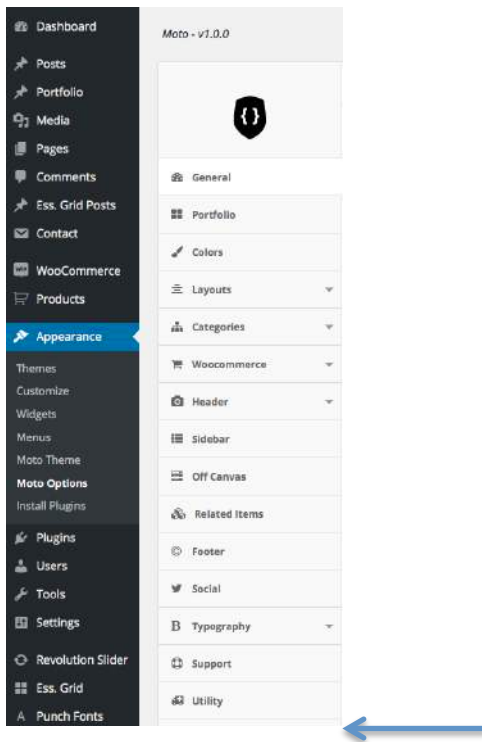

Please read all messages, which appear on your dashboard carefully, because they provide **important info about “required and recommended plugins”** for theme MOTO.

The Revolution Slider WP plugin and the Essential Grid plugin are built-in, and only need to be activated.

## 02. How to in stall dummy content.

The tab “**Utility**” within **MOTO Options** is created for importing Dummy Content, and/or export your MOTO theme options.

Please read all ‘IMPORTANT NOTICES FIRST’ before you install MOTO.

### IMPORTANT NOTICE: 1. HOSTING

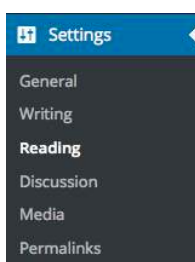

**Importing dummy content ‘may take some time’.** Installing dummy content will not cause problems If you have “good quality hosting”. In some cases the dummy content will not work, for example If you have a really bad hosting.

(You will also need to import the Revolution Slider demo content and Essential Grid demo content if you want to make use of the Revolution Sliders and Essential Grid)

\*See the MOTO Unzip me please file

### IMPORTANT NOTICE: 2. SETTINGS

1. After installing ‘dummy content’ you still need to assign menus to the main and footer areas yourself. Set your home page via Settings / Reading.

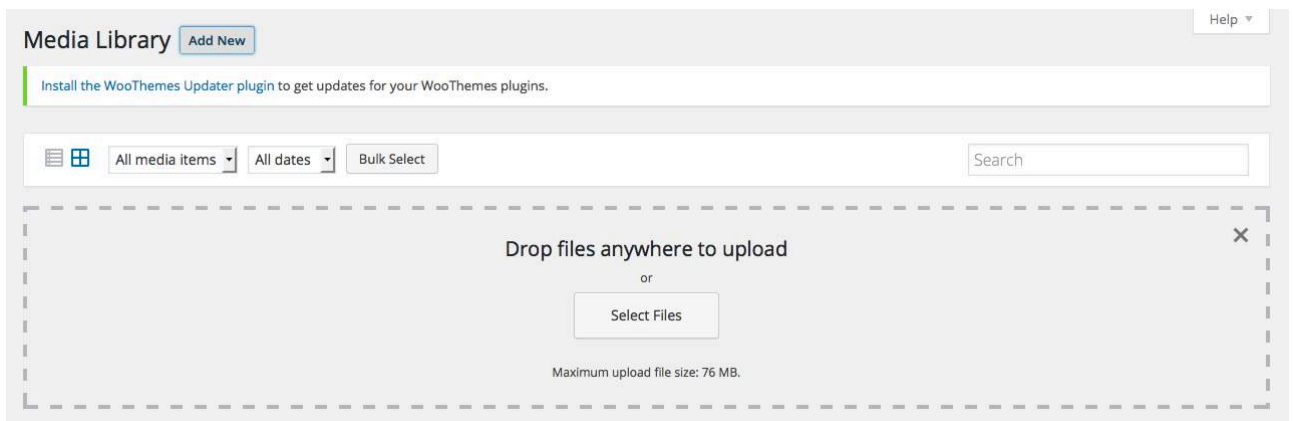

2. Sidebars and Widgets are not included in the dummy content. These you'll have to create yourself. You can read in the manual how to create Sidebars and Widgets.

3. When installing all Plugins that come with the theme, insure that no other caching Plugins are installed/activated.

### **IMPORTANT NOTICE: 3. MAXIMUM UPLOAD SIZE FILE**

Before installing 'dummy content' you need to check if your Media Library has a Maximum Upload file size of at least: 75 MB. If this not the case for example only 8 MB, the dummy content will not work!

### **How to increase the Maximum Upload file size?**

add this to top of wp-config.php  
`define( 'WP_MEMORY_LIMIT' , '75M' );`

### **Multi Site Maximum Upload file size?**

In case of a Multi site setup go to the Network settings/ Upload settings / Max upload file size.

## IMPORTANT NOTICE: 4.

All pages content from MOTO's 'Main Demo' is included in your theme files. This is the best way for having a flawless installation. We have not included additional demos. When you install one of the other demos, the content and images will be downloaded from our server directly. Unfortunately this may take some time, despite our effort to create all other demos as small as possible.

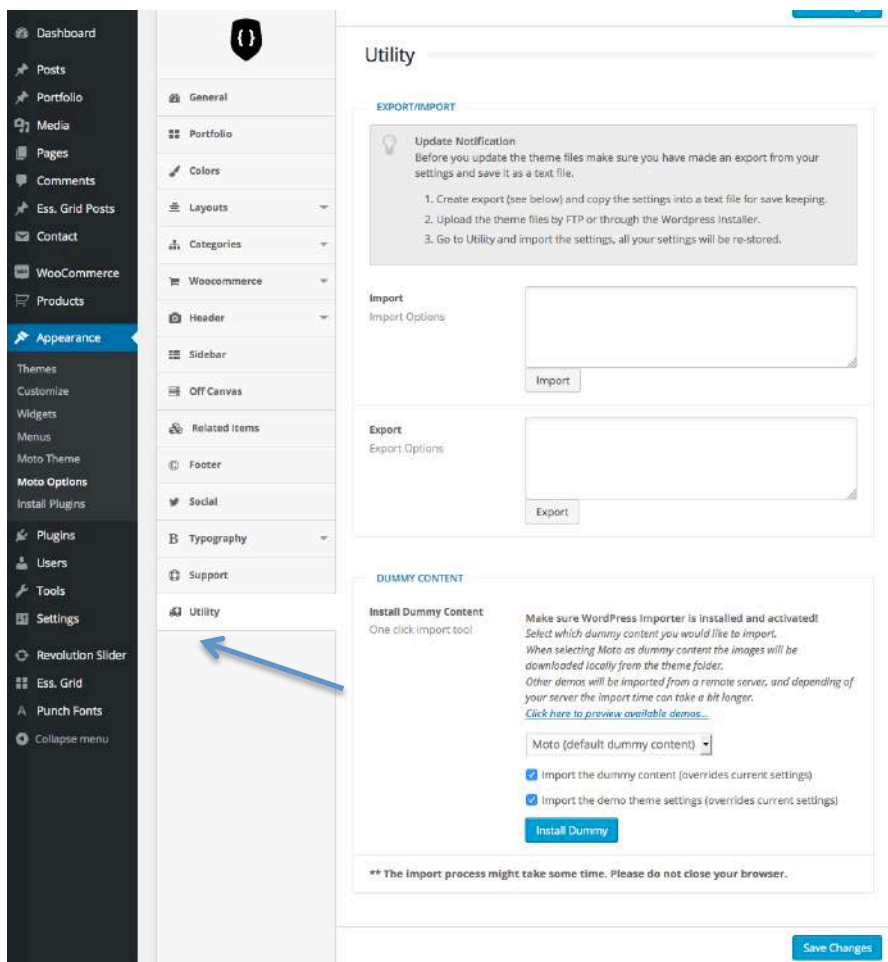

## IMPORTANT NOTICE: 5.

We've made sure our demo installer will work on most hosting platforms. However, we cannot be held responsible for installation problems caused by your server or settings.

It can be a time consuming process if we need to check your server settings and sometimes we even need to contact your hosting provider. That's why we offer affordable Installation services that are available via our website.

## Import Dummy content.

Hit the button 'Install Dummy Content' if you want to install the official MOTO preview website's content.

The screenshot shows the WordPress admin dashboard with the 'Utility' page open. The left sidebar contains a menu with 'Appearance' highlighted. The 'Utility' page has three main sections: 'EXPORT/IMPORT', 'EXPORT', and 'DUMMY CONTENT'. The 'DUMMY CONTENT' section is the focus, featuring an 'Install Dummy Content' button and a dropdown menu set to 'Moto (default dummy content)'. Two checkboxes are checked: 'Import the dummy content (overrides current settings)' and 'Import the demo theme settings (overrides current settings)'. A blue arrow points to the 'Utility' menu item in the sidebar.

**Utility**

**EXPORT/IMPORT**

**Update Notification**  
Before you update the theme files make sure you have made an export from your settings and save it as a text file.

1. Create export (see below) and copy the settings into a text file for safe keeping.
2. Upload the theme files by FTP or through the Wordpress Installer.
3. Go to Utility and import the settings, all your settings will be re-stored.

**Import**  
Import Options

**Export**  
Export Options

**DUMMY CONTENT**

**Install Dummy Content**  
One click import tool

Make sure WordPress Importer is installed and activated!  
Select which dummy content you would like to import.  
When selecting Moto as dummy content the images will be downloaded locally from the theme folder.  
Other demos will be imported from a remote server, and depending of your server the import time can take a bit longer.  
[Click here to preview available demos.](#)

Moto (default dummy content)

Import the dummy content (overrides current settings)

Import the demo theme settings (overrides current settings)

**Install Dummy**

\*\* The import process might take some time. Please do not close your browser.

**Save Changes**

**Note: please don't forget to read the 'Update Notification' before you update your theme to the latest available download version on the marketplace.**

Before you update the theme files make sure you have made an export from your settings and save it as a text file.

- 1 – Create export (see Utility) and copy the settings into a text file for safe keeping.
- 2 – Upload the theme files by FTP or through the Wordpress Installer.
- 3 – Go to Utility and import the settings, all your settings will be re-stored.

**Important! All photo material used in our demos is copyright protected.**

The images used in our preview website are intended for example purposes only. As they're copyright protected, you need to remove them from your media section, before your website goes online. Thank you very much for your cooperation and understanding.

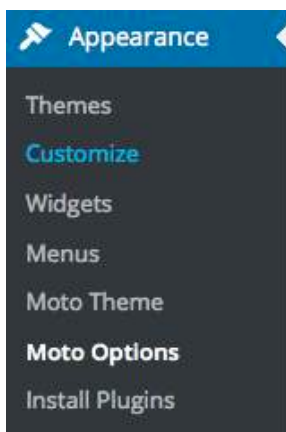

### 03. MOTO Options – Controls, settings, functionality.

The MOTO Options panel is one of MOTO’s most useful and powerful tools. Besides regular WP features, it contains almost all theme’s controls, settings, options and functionalities.

**OUR TIP:**

If you’re using theme MOTO for the first time, we advice you to focus on the MOTO Options Panel first. Learn all about its options and features. If you’ve a closer look at each tab, then you’ll have a good idea how the theme is build.

To access MOTO’s Option Panel, select **Appearance** menu, then **MOTO Options**.

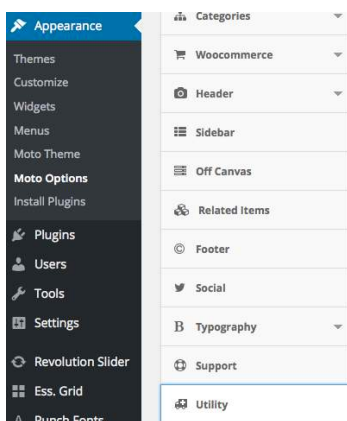

MOTO Option Panel contains ‘settings for most theme features’.

In here, you can change/set MOTO Options:

General, Portfolio, Colors, Layouts, Categories, Woocommerce, Header, Sidebar, Off Canvas (menu), Related Items, Footer, Social, Typography, Support and Utility.

**NOTE:**

MOTO Options tool ‘Utility’ can be used for installing dummy content, importing and/or exporting your MOTO Options from file, text or URL.

## 04. MOTO Options – General

Let's start with the tab **General** theme options.

In here you can upload your Favicon and Login Logo.

In here you enable and set general Media Settings (on/off), Featured Boxes (in px) and Featured Images (px), \*Media Overlay, Breadcrumbs (on/off), Page Loader (on/off), General background color and text color, and Smooth Scroll (on/off).

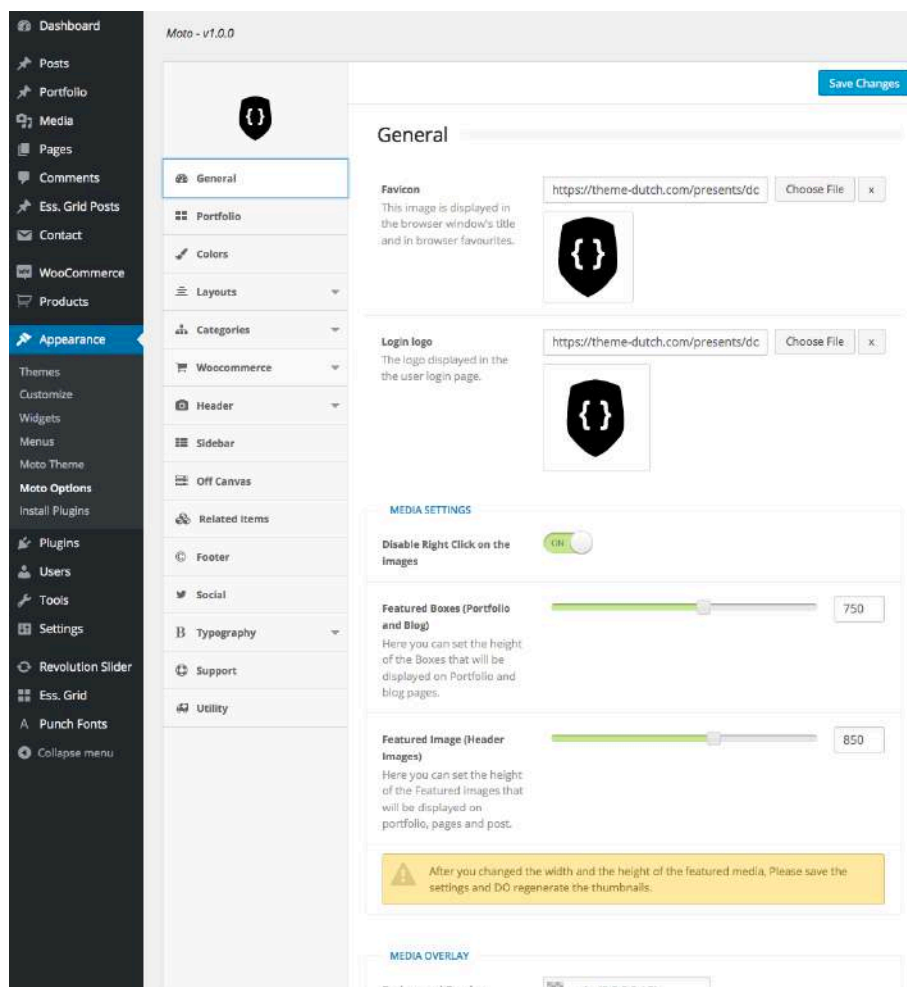

In here you also can place your Custom CSS Code, Tracking Code, and custom JS Code. All settings are self-explanatory.

### NOTE: Media Overlay

\*This option allows you to create a "dotted overlay" on top of your images in order to speed up the loading time of your site. You're even able to choose a specific color for background (screen) overlay.

**This option prevents using the "swipe-effect" on mobile and tablets though.**

Don't forget to read/follow the additional suggestions and info, and hit the button 'Save changes' when you're ready.

**JS Code**  
Place your custom javascripts here. If the JS code is invalid, other javascript libraries will not work as expected.

```
jQuery(document).ready(function(){
});
```

## 05. MOTO Options – Portfolio

The Portfolio feature is one of the most extended features in this theme. We did not use the portfolio feature in MOTO though. Since we did not create an extended portfolio in MOTO we'll skip this chapter completely.

This section requires a lot of explanation and screenshots that we do not have available in MOTO. If you would like to have an impression of how it can look like, please visit our JOHN portfolio demo:

<https://theme-dutch.com/presents/john/>

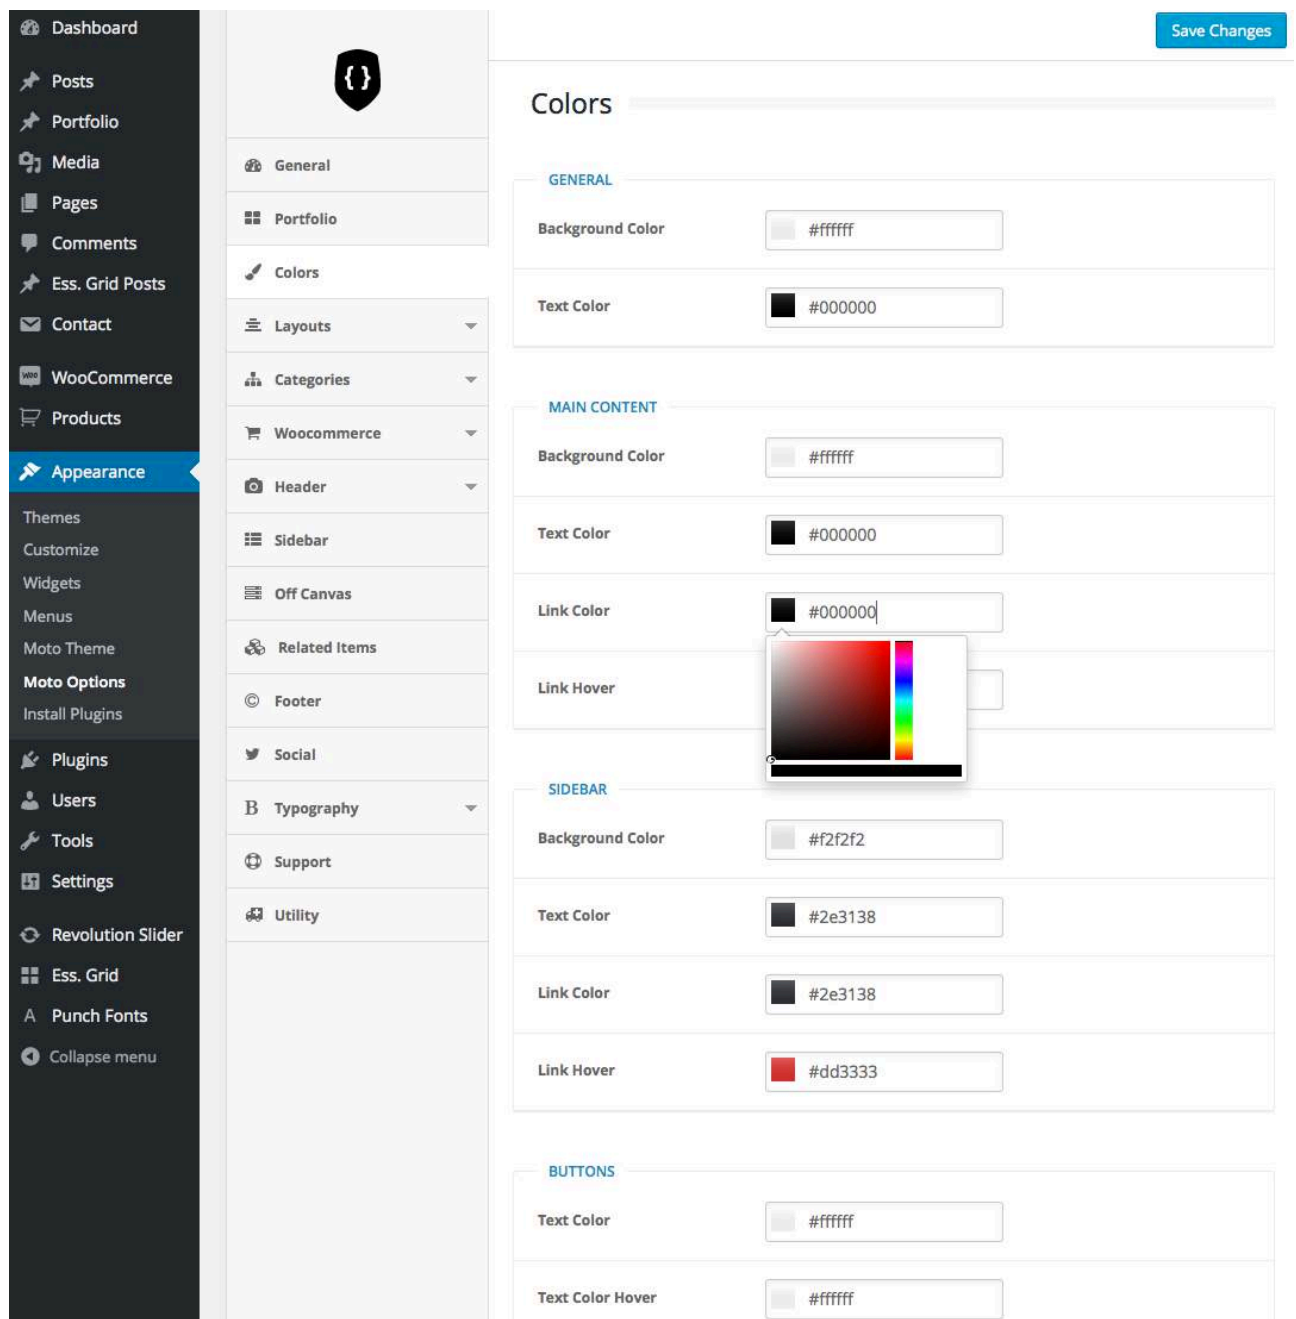

Here we used this portfolio feature on the home page. Hit 'Read more' below the title JOHN and excerpt text, and hit the Hamburger at the bottom on the right to have an impression of a full functional portfolio.

Moto is focused on e-commerce and not intended as a portfolio theme.

## 06. MOTO Options – Colors

In this Module, you can change / set the theme's colors. (General, main content, sidebar, buttons, and all Heading titles. All settings are self-explanatory.

You can add a color number or click in the field to open the color palette. Don't forget to save changes.

The screenshot shows the 'Colors' settings page in the WordPress dashboard. The left sidebar contains navigation options like Dashboard, Posts, Portfolio, Media, Pages, Comments, Ess. Grid Posts, Contact, WooCommerce, Products, Appearance, Themes, Customize, Widgets, Menus, Moto Theme, Moto Options, Install Plugins, Plugins, Users, Tools, Settings, Revolution Slider, Ess. Grid, Punch Fonts, and Collapse menu. The main content area is titled 'Colors' and has a 'Save Changes' button in the top right. The settings are organized into four sections:

- GENERAL**: Background Color (#ffffff), Text Color (#000000).
- MAIN CONTENT**: Background Color (#ffffff), Text Color (#000000), Link Color (#000000), Link Hover (color palette open).
- SIDEBAR**: Background Color (#f2f2f2), Text Color (#2e3138), Link Color (#2e3138), Link Hover (#dd3333).
- BUTTONS**: Text Color (#ffffff), Text Color Hover (#ffffff).

Text color = color of plain, general text

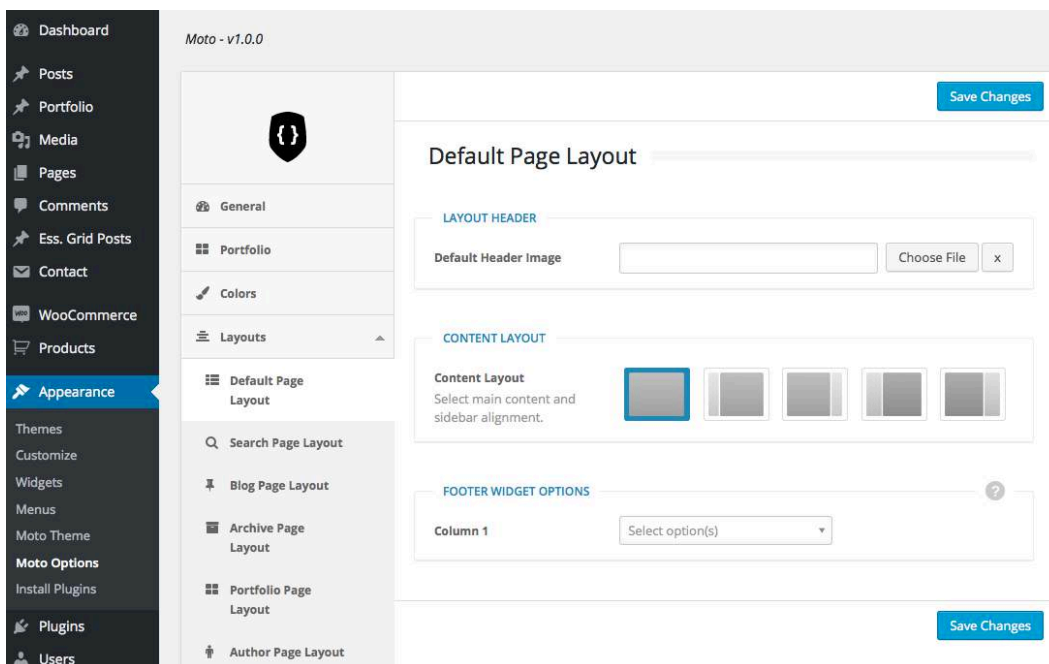

Link color = color of links you use within texts.

Link hover = color that appears when you hover a link text.

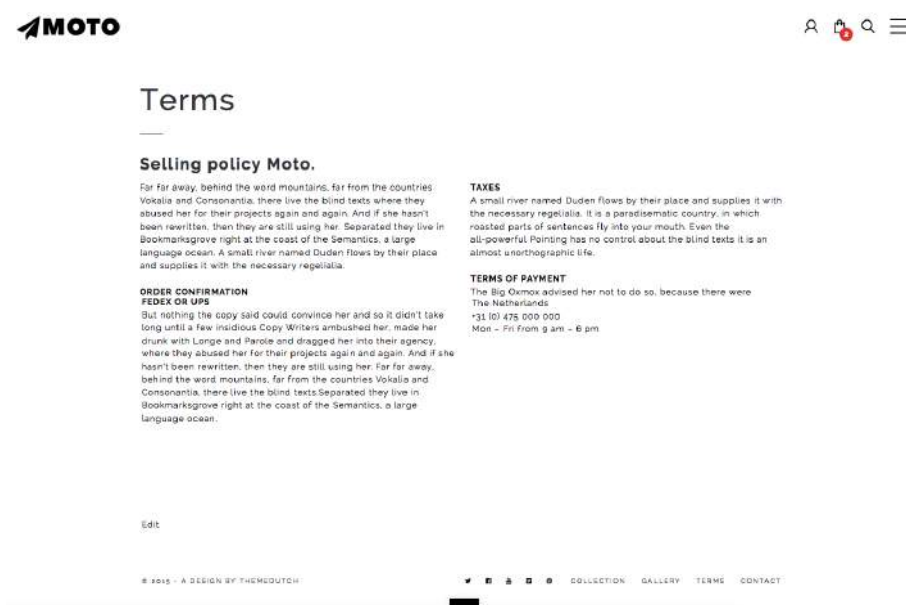

## 7. MOTO Options – Layouts pages

MOTO Options tool ‘Layouts’ provides ultimate freedom in designing your page layouts. Here you’re able to set a “**default page layout**” and different layouts for default and other pages, like: Search Page Layout, Archive Page Layout, Author Page Layout and 404 Page Layout. All settings are self-explanatory. Additional info is provided within the boxes.

Per example: choose a default layout (no default header image, no sidebar, no footer widget).

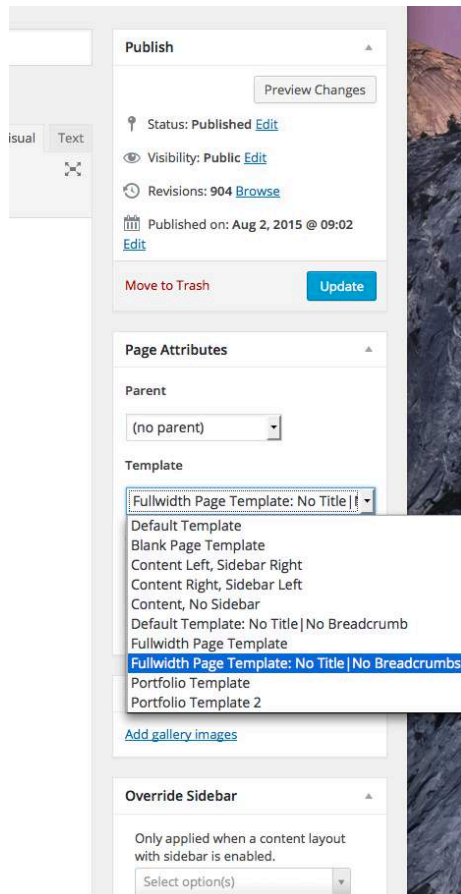

This is default page layout example at the front-end.

**Besides default page layouts, MOTO comes with lots of options for ‘custom’ page layouts.**

These options can be found on every page. In here you’re able to choose a different layout for separate pages that you don’t want to show like your default pages’ layout.

At **Page Attributes** on every page you’re able to select your favorite layout.

MOTO’S home page is a Fullwidth Page Template: No title | No Breadcrumbs.

**NOTE:**

Keep in mind when you select a **fullwidth page template** as page layout, you’ll have to insert a TD-section shortcode if you want your text to appear within a grid. Otherwise your text will show full screen.

**[tds-section background="#fff" textcolor="#000" opacity="100"]**

your texts, columns etc.

**[/tds-section]**

TD-shortcodes can be found at the icon bar on every page or post.

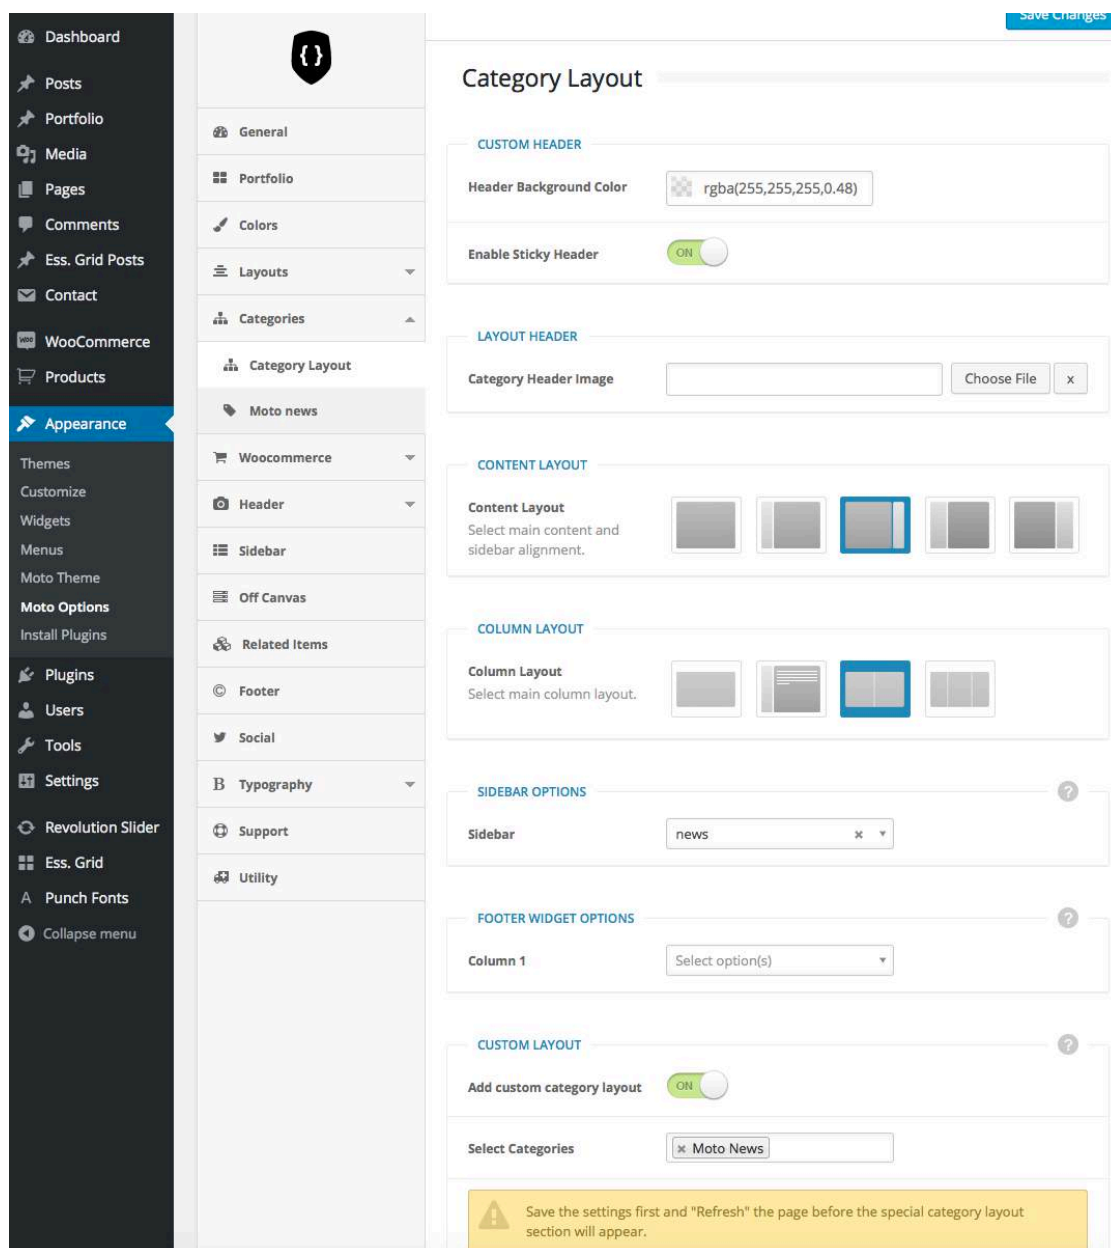

## 08. MOTO Options – Category Layout

This section allows you to create your category layout. You're able to set a custom **header background color (also transparent)**, and you can enable a **sticky header**.

You're able to select a **category header image** and **content layout** and **column layout**. Select your sidebar and footer (widget area).

Then **add custom category layout (ON)**, and select the specific category. We used category Moto New for our custom category (blog).

Example: Category Blog

The screenshot displays the 'Category Layout' settings interface. On the left is a dark sidebar menu with 'Appearance' selected. The main content area is titled 'Category Layout' and includes a 'Save Changes' button in the top right. The settings are organized into several sections:

- CUSTOM HEADER:** Includes 'Header Background Color' (set to rgba(255,255,255,0.48)) and 'Enable Sticky Header' (toggled ON).
- LAYOUT HEADER:** Includes 'Category Header Image' with a 'Choose File' button and an 'x' icon.
- CONTENT LAYOUT:** Includes 'Content Layout' with five layout icons; the third icon (a 2x2 grid) is selected.
- COLUMN LAYOUT:** Includes 'Column Layout' with four layout icons; the second icon (a 2x2 grid) is selected.
- SIDEBAR OPTIONS:** Includes 'Sidebar' with a dropdown menu set to 'news'.
- FOOTER WIDGET OPTIONS:** Includes 'Column 1' with a dropdown menu set to 'Select option(s)'.
- CUSTOM LAYOUT:** Includes 'Add custom category layout' (toggled ON) and 'Select Categories' with a dropdown menu set to 'x Moto News'.

A yellow warning box at the bottom states: 'Save the settings first and "Refresh" the page before the special category layout section will appear.'

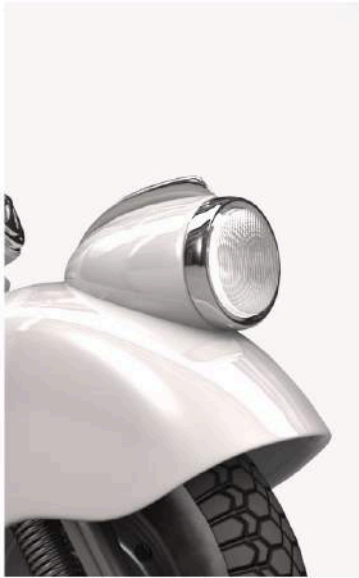

## Custom category layout “Moto news”

The screenshot displays the WordPress Customizer interface for the 'Moto' theme. The left sidebar contains navigation options such as 'Dashboard', 'Posts', 'Media', 'Pages', 'Comments', 'Ess. Grid Posts', 'Contact', 'WooCommerce', 'Products', 'Appearance', 'Themes', 'Customize', 'Widgets', 'Menus', 'Moto Theme', 'Moto Options', 'Install Plugins', 'Plugins', 'Users', 'Tools', 'Settings', 'Revolution Slider', 'Ess. Grid', 'Punch Fonts', and 'Collapse menu'. The 'Appearance' section is expanded, showing 'Moto news' selected under 'Category Layout'. The main area shows the 'Moto news' settings, including 'CUSTOM HEADER' (Header Background Color: rgba(255,255,255,1), Enable Sticky Header: OFF), 'LAYOUT HEADER' (Moto news Header Image: Choose File), 'CUSTOM CONTENT' (Content: This section will appear on top of the featured image (HTML, shortcodes allowed)), 'CONTENT LAYOUT' (Content Layout: Select main content and sidebar alignment), 'COLUMN LAYOUT' (Column Layout: Select main column layout), 'SIDEBAR OPTIONS' (Sidebar: news), and 'FOOTER WIDGET OPTIONS' (Column 1: Select option(s)). A 'Save Changes' button is visible in the top right corner.

This is how it looks like at the front-end:

<https://theme-dutch.com/presents/moto/blog/category/moto-news/>

- header background color
- sticky header: off
- no layout header image
- no custom content
- sidebar right
- 2 column layout
- sidebar widget: news
- no footer widget

## NOTE:

Sidebar (example sidebar: blog) can be created via MOTO Options - Sidebars. Widgets (for sidebars en footers) can be created via Appearance / Widgets.

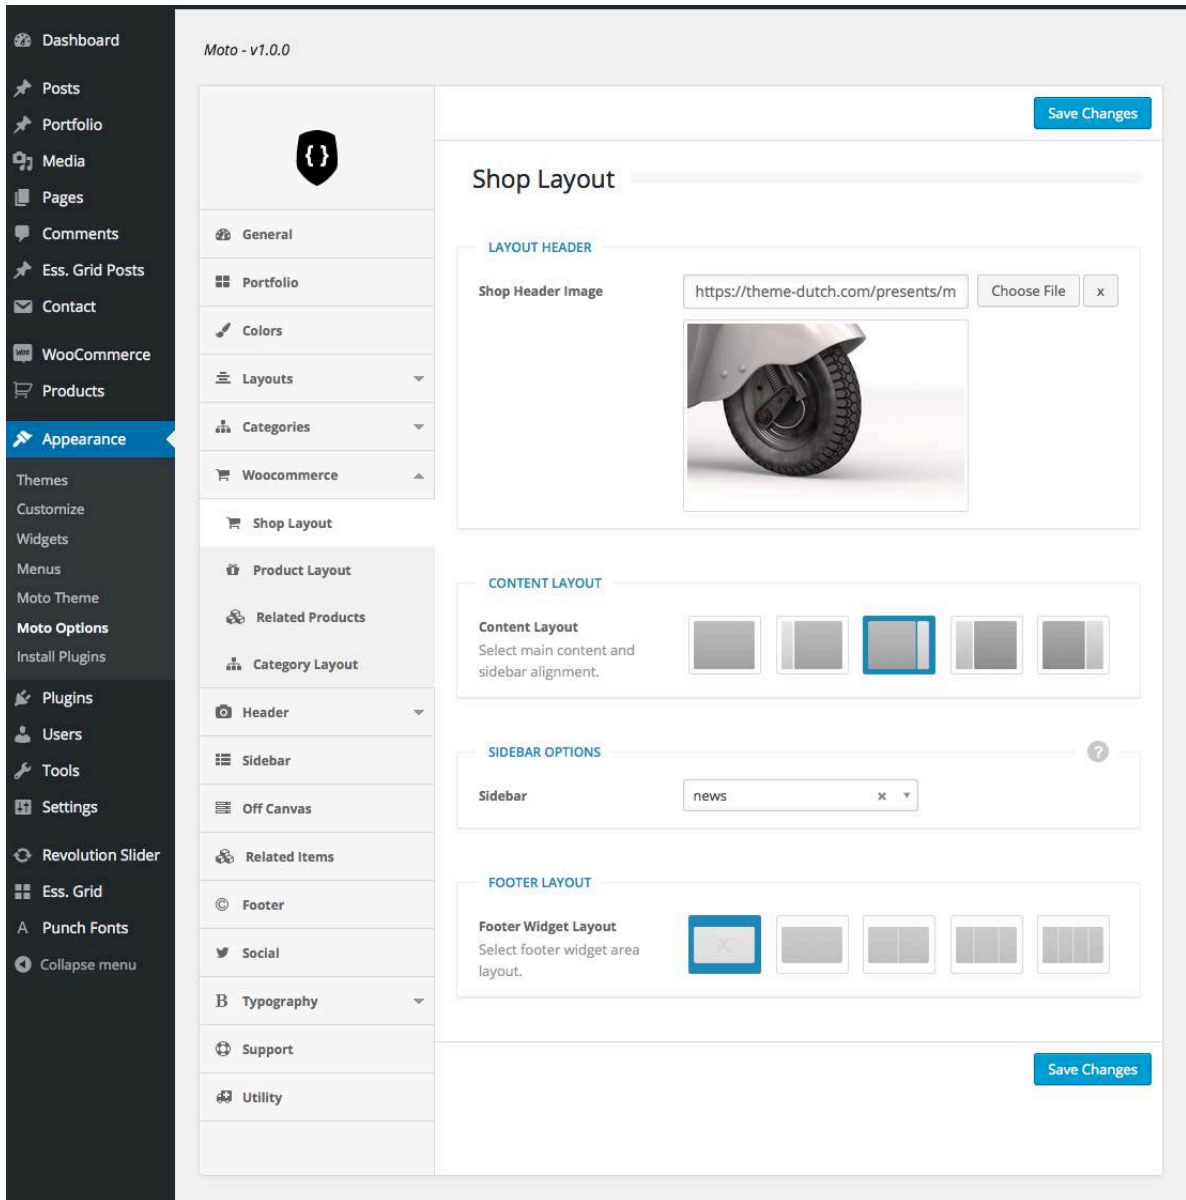

This is an example of a Blog page looks at the front-end of theme MOTO.

The screenshot displays the MOTO WordPress theme front-end. At the top left is the MOTO logo, and at the top right are navigation icons for user, cart, search, and menu. The main content area features a large image of a white scooter with a brown seat. Below the image is a blog post titled "Full store or single product" with a date of 11:55 / 20 SEP 2016, 1 comment, and an edit link. The post text is a Lorem Ipsum placeholder. A quote by Steve Jobs is featured: "My favorite things in life don't cost any money. It's really clear that the most precious resource we all have is time." Below the quote is a bio for Mike De Leeuw, stating "This author has yet to write their bio. Meanwhile lets just say that we are proud Mike De Leeuw contributed a whopping 0 entries." The sidebar on the right contains sections for "MOTO" (with address and hours), "FOLLOW" (with social media icons), and "LATEST NEWS" (with a list of recent posts).

## 09. MOTO Options – Woocommerce

Creating a Shop Layout works in a similar way. You're able to select a Shop Header image, and choose your preferred content layout, sidebar option and footer layout.

Next we've created a **Default Store** "page", and selected a **Default template**.

At custom Slider content we've added a title via the visual editor. You can add any text you want.

This is how MOTO'S Default Store looks like at the front-end.

## NOTE: INFO & UPDATES

For more information how to transform your website into a eCommerce store.

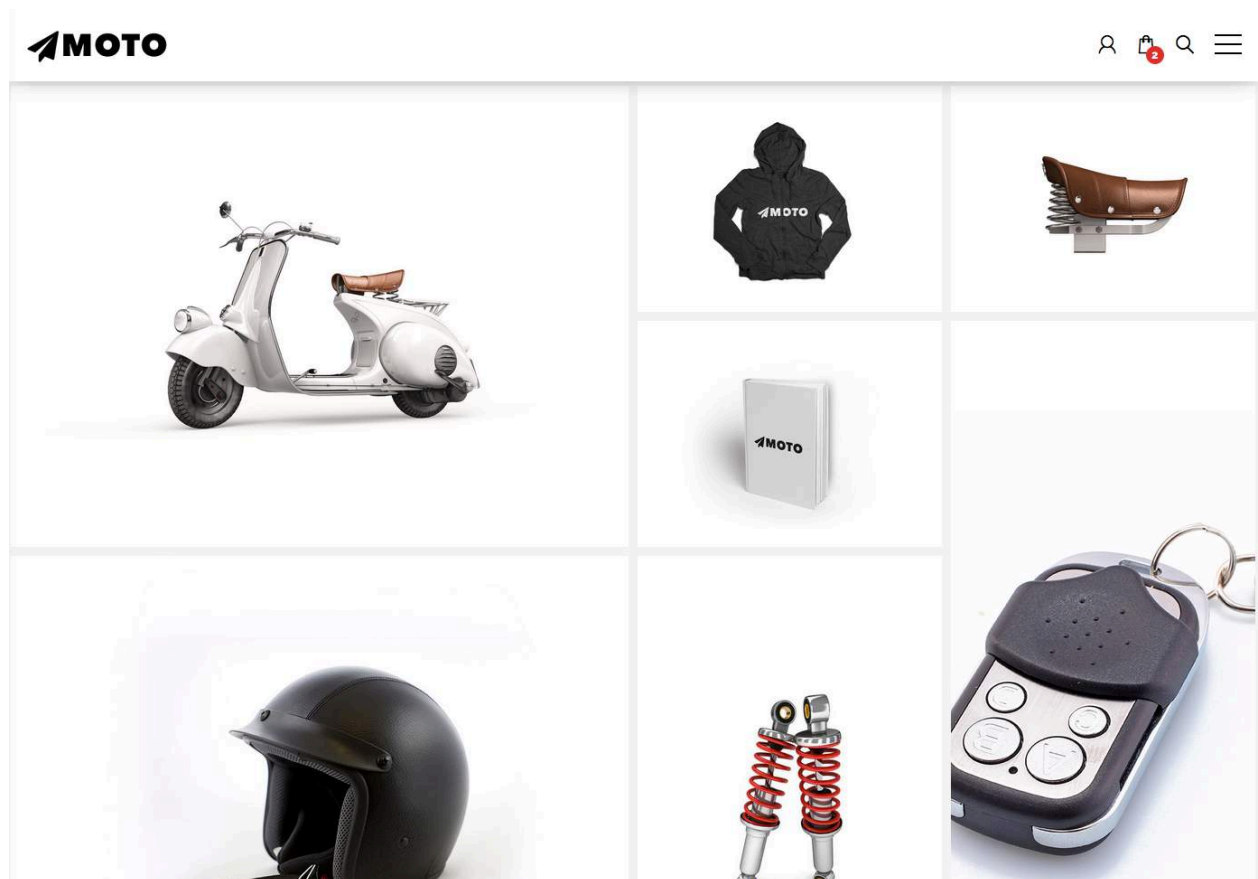

<https://support.woothemes.com/hc/en-us>

Please wait updating Woocommerce until an updated version of MOTO is available via your marketplace. This can prevent issues.

This is how **MOTO'S second store example** (Collection) looks like at the front-end of MOTO <https://theme-dutch.com/presents/moto/collection/>

We've created a 'page' and named it: **Collection**.

Then we've selected the page to be a **Fullwidth Template: No Title | No Breadcrumbs**, and added the **Essential Grid** shortcode: `[ess_grid alias="store01"]`

## NOTE: INFO & UPDATES

For more information about Essential Grid (how to use etc.) we refer to available information and instructions via ThemePunch.

Essential Grid is already built-in and comes with theme MOTO. Please wait with updating Essential Grid until we've released an updated MOTO version on the themes' marketplace. This prevents possible issues.

# 10. MOTO Options – Header

## 1. Styles:

In here you can set your header logo, mobile logo, and header layout.

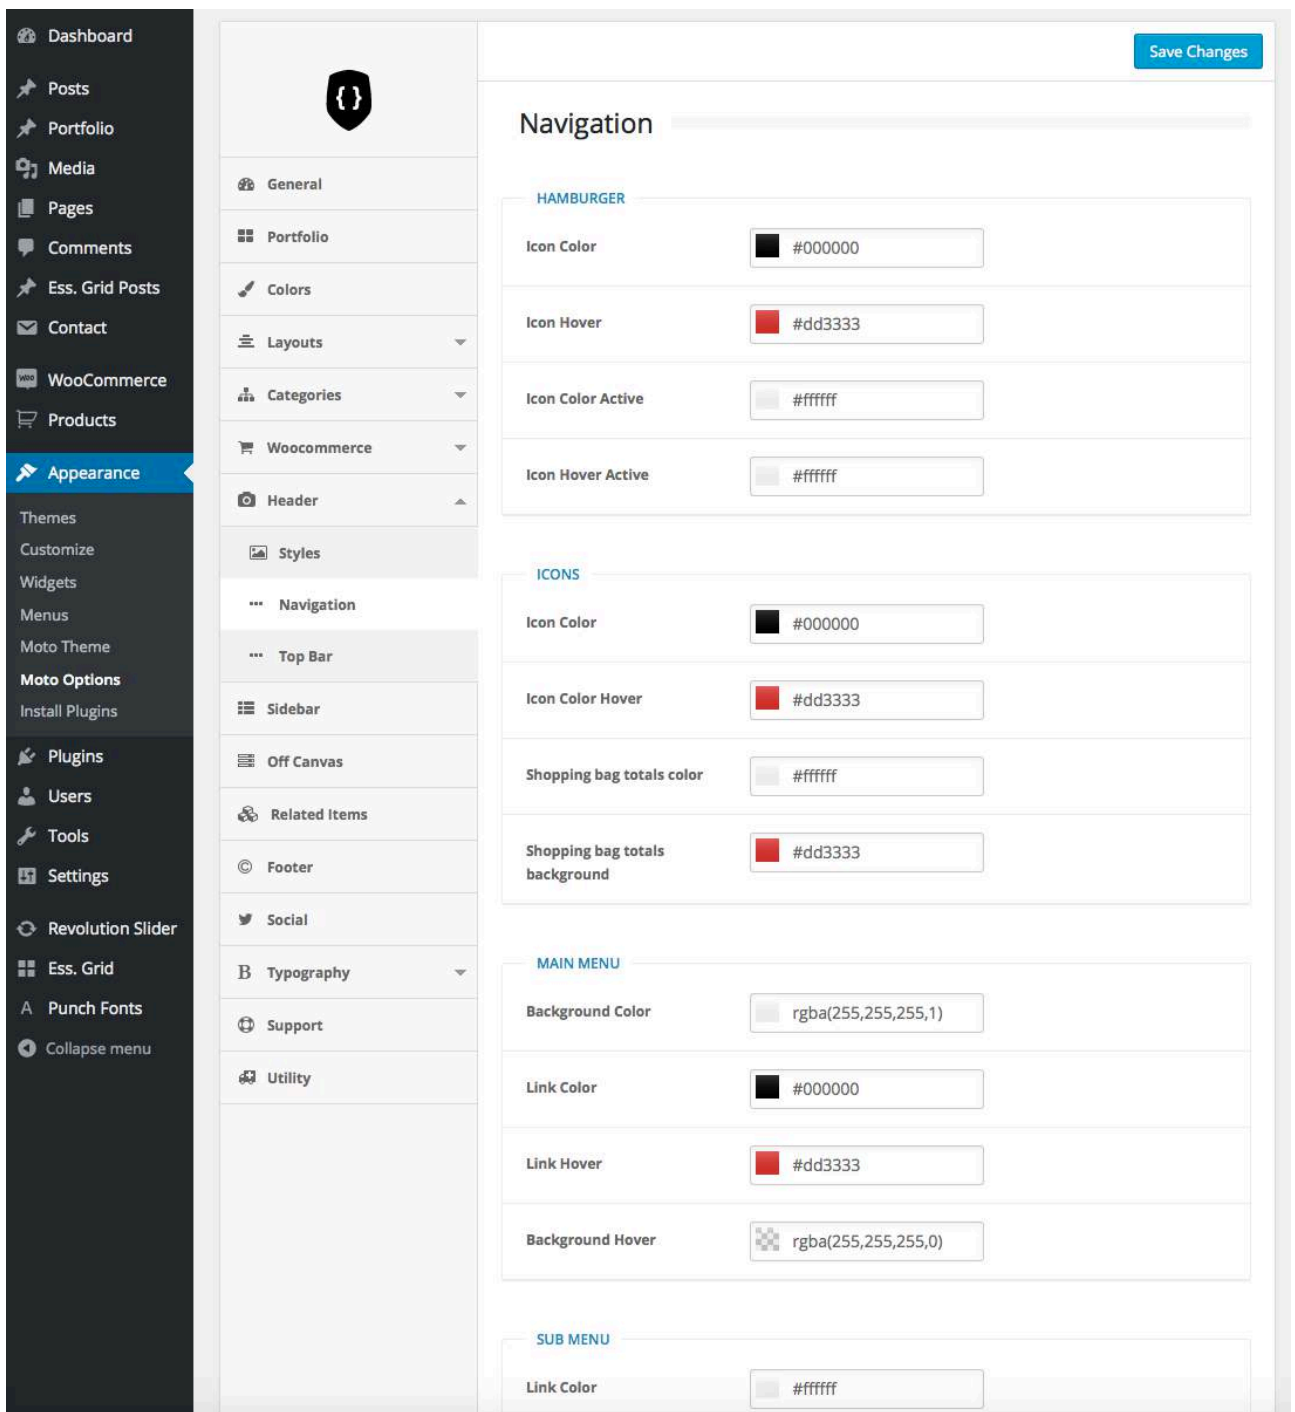

There are several header layouts available in MOTO

## 2. Navigation:

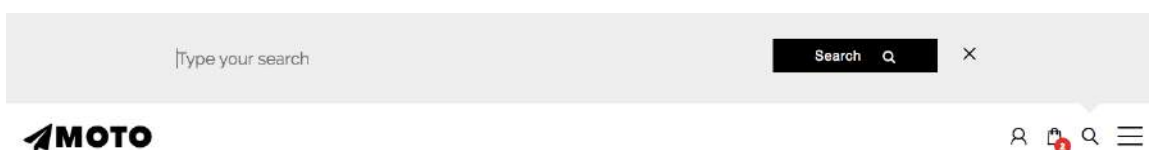

Here you're able to set the colors for Hamburger, Icons, your Main menus and Sub and Secondary sub menus.

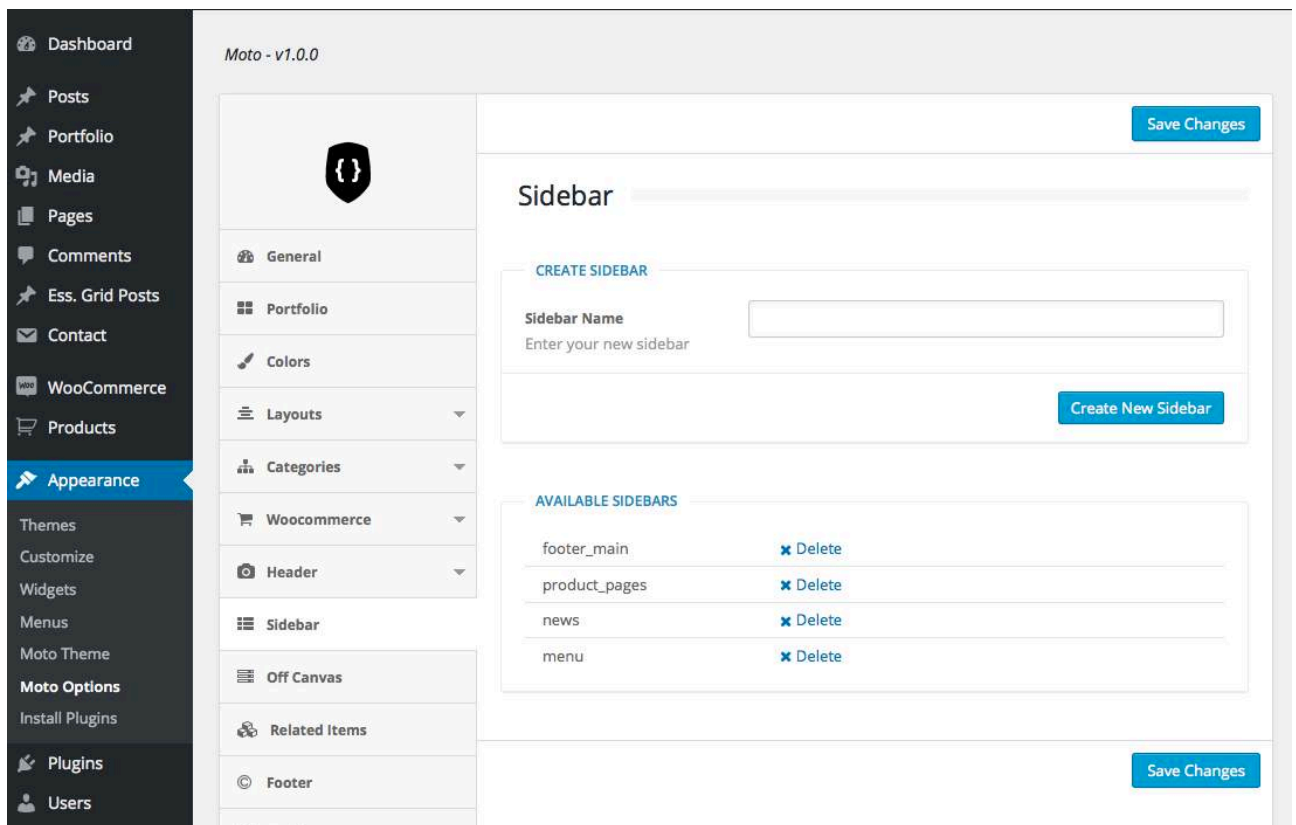

### 3. Top Bar:

You're able to show a "SEARCH" in your top bar menu. In here you can also set colors for Top Bar, Search button, and Social icons. This is how it looks at the front-end of theme MOTO.

# 11. MOTO Options – Sidebar

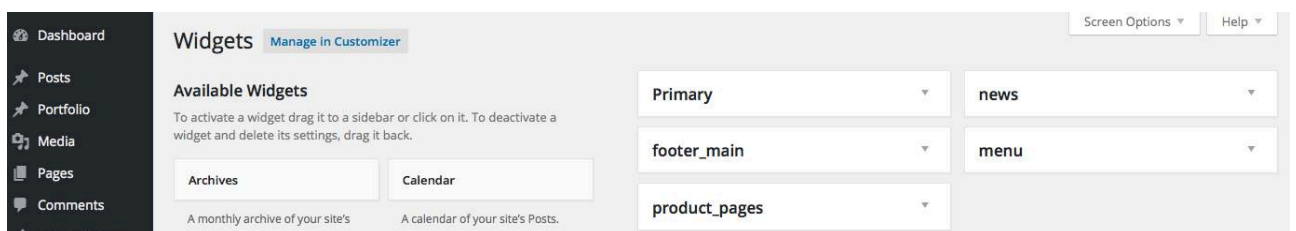

Here you're able to create your **sidebar “names”** (for usage on specific pages or sections). You can fill your sidebars with Widgets later on via Appearance / Widgets. Don't forget to hit changes once you're done.

## NOTE:

Prevent using punctuation marks when creating a sidebar's title. Don't use characters like: “, : \_ and so on in your sidebars titles. Using these characters in titles can cause issues, that are not caused by the theme, but can be caused by conflicts with MsqL and other used programs.

Widgets Sidebars: via Appearance / Widgets

Drag and drop the necessary widgets to your 'assigned' sidebars at the right and fill them with text or any other html content (text, images, video's).

**NOTE:**

To know more about Wordpress Widgets (how to add and activate widgets, and learn about its use etc.) please read these tutorial pages:

[https://codex.wordpress.org/WordPress\\_Widgets](https://codex.wordpress.org/WordPress_Widgets)

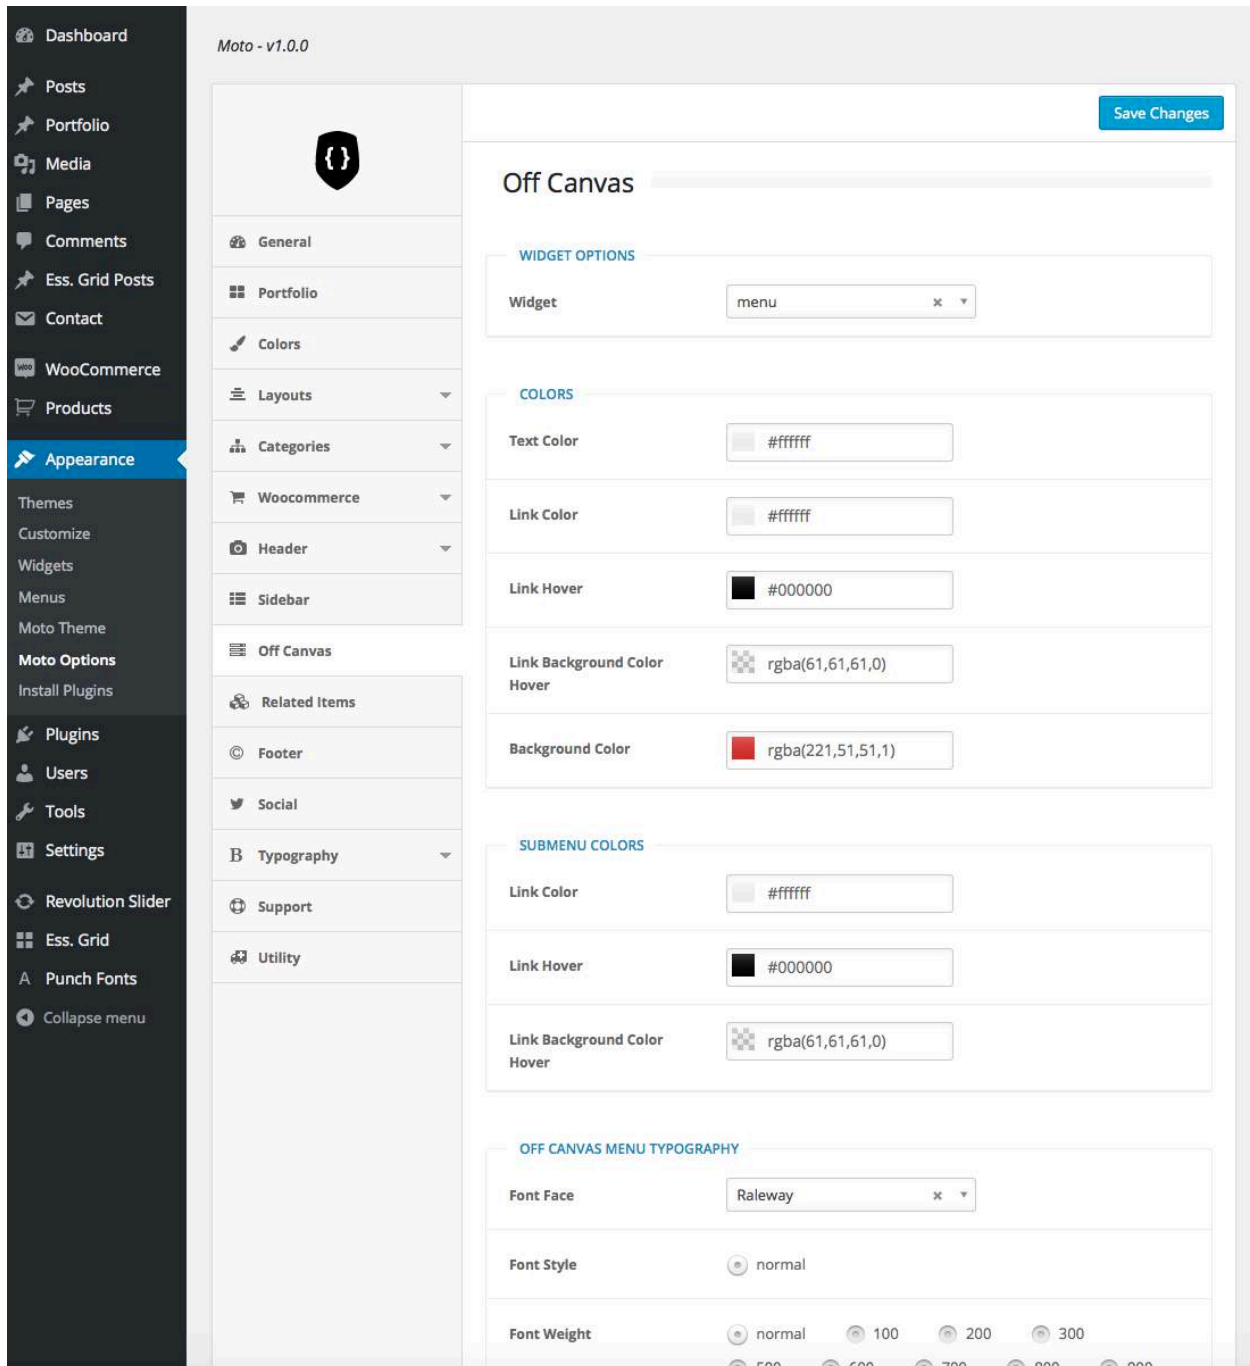

<http://en.support.wordpress.com/widgets>

This is how sidebars look like at the front-end of MOTO.

<https://theme-dutch.com/presents/moto/blog/category/moto-news/>

## 12. MOTO Hill Options – Off Canvas

Here you're able to set a widget, text color, link color, link hover color, background color for MOTO's off canvas menus. All settings are self-explanatory.

The screenshot displays the WordPress admin dashboard for the Moto theme (v1.0.0). The left sidebar shows the 'Appearance' menu expanded to 'Moto Options', with 'Off Canvas' selected. The main content area is titled 'Off Canvas' and features a 'Save Changes' button in the top right corner. The settings are organized into several sections:

- WIDGET OPTIONS:** A dropdown menu is set to 'menu'.
- COLORS:** Includes color pickers for Text Color (#ffffff), Link Color (#ffffff), Link Hover (#000000), Link Background Color Hover (rgba(61,61,61,0)), and Background Color (rgba(221,51,51,1)).
- SUBMENU COLORS:** Includes color pickers for Link Color (#ffffff), Link Hover (#000000), and Link Background Color Hover (rgba(61,61,61,0)).
- OFF CANVAS MENU TYPOGRAPHY:** Includes a dropdown for Font Face (Raleway), a radio button for Font Style (normal), and a set of radio buttons for Font Weight (normal, 100, 200, 300, 500, 600, 700, 800, 900).

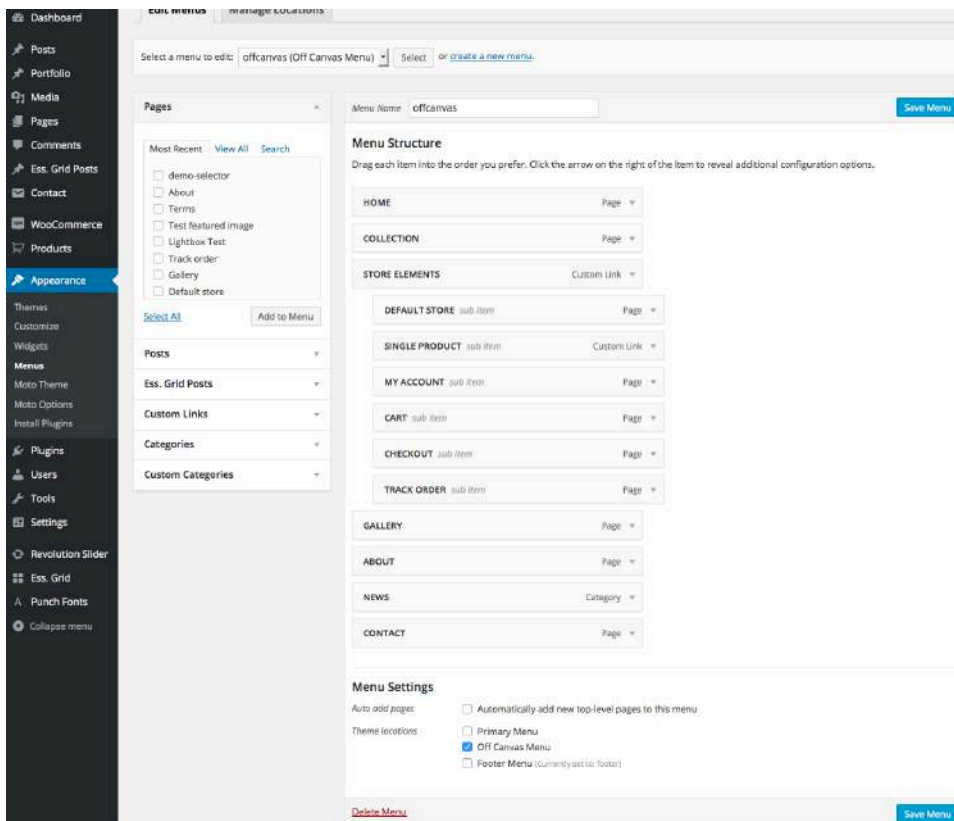

This is an example of how a Off Canvas menus can look at the front-end of theme MOTO. <https://theme-dutch.com/presents/moto/>

Discover the new *collection*  
Dutch by Birth. Rebel by Choice.

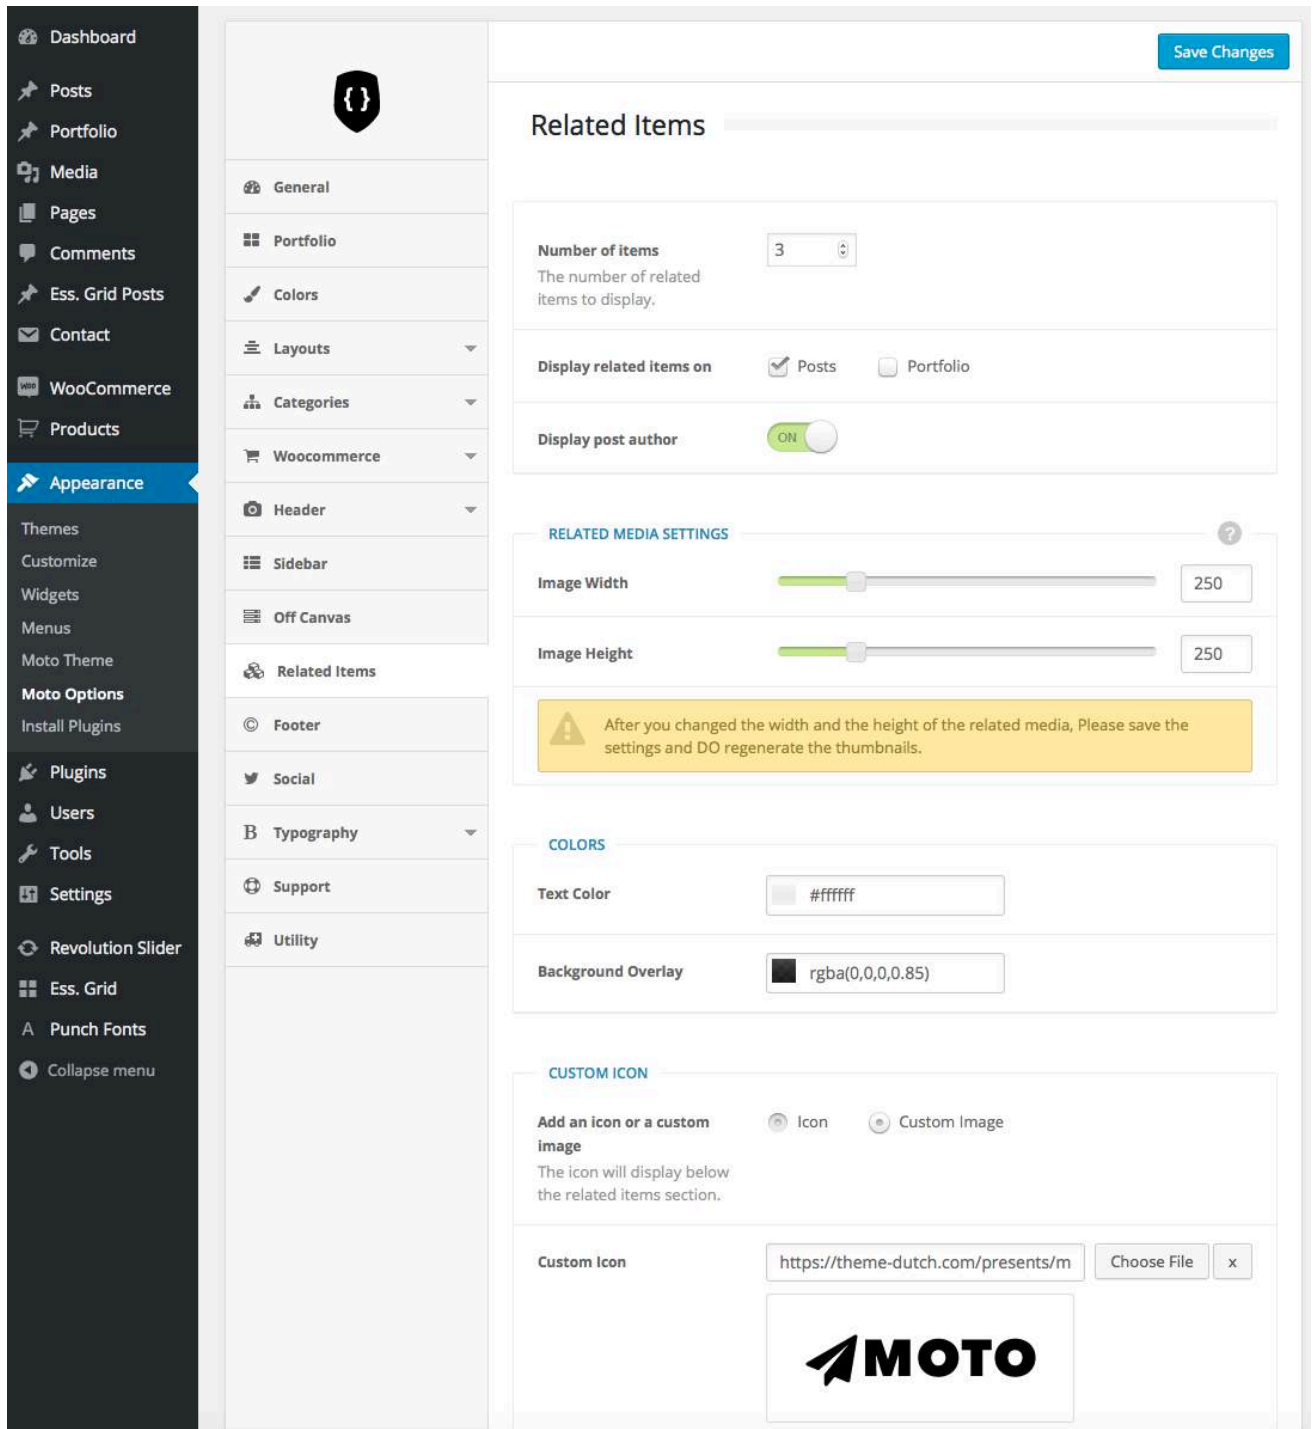

We've created an Off-canvas menus via Appearance / menus

## 13. MOTO Options – Related Items

This section allows you to set related items on Posts and Portfolios. All settings are self-explanatory.

The screenshot shows the 'Related Items' settings panel in the WordPress admin dashboard. The left sidebar contains the 'Appearance' menu, with 'Moto Options' expanded to show 'Related Items'. The main content area is titled 'Related Items' and includes a 'Save Changes' button in the top right corner. The settings are organized into several sections:

- General:** 'Number of items' is set to 3. A description states: 'The number of related items to display.'
- Display related items on:** 'Posts' is checked, and 'Portfolio' is unchecked.
- Display post author:** A toggle switch is turned 'ON'.
- RELATED MEDIA SETTINGS:** Includes sliders for 'Image Width' and 'Image Height', both set to 250. A yellow warning box below states: 'After you changed the width and the height of the related media, Please save the settings and DO regenerate the thumbnails.'
- COLORS:** 'Text Color' is set to #ffffff. 'Background Overlay' is set to rgba(0,0,0,0.85).
- CUSTOM ICON:** 'Add an icon or a custom image' has 'Icon' selected. A description says: 'The icon will display below the related items section.' Below, the 'Custom Icon' field contains the URL 'https://theme-dutch.com/presents/m' and a 'Choose File' button. A preview of the 'MOTO' logo is shown below the field.

NOTE:

We did not create a portfolio in MOTO, so there's no example of portfolio related items.

This is how **related items** look like at the front-end of a **post page**.

by: **Mike De Leeuw**

This author has yet to write their bio. Meanwhile lets just say that we are proud Mike De Leeuw contributed a whopping 0 entries.

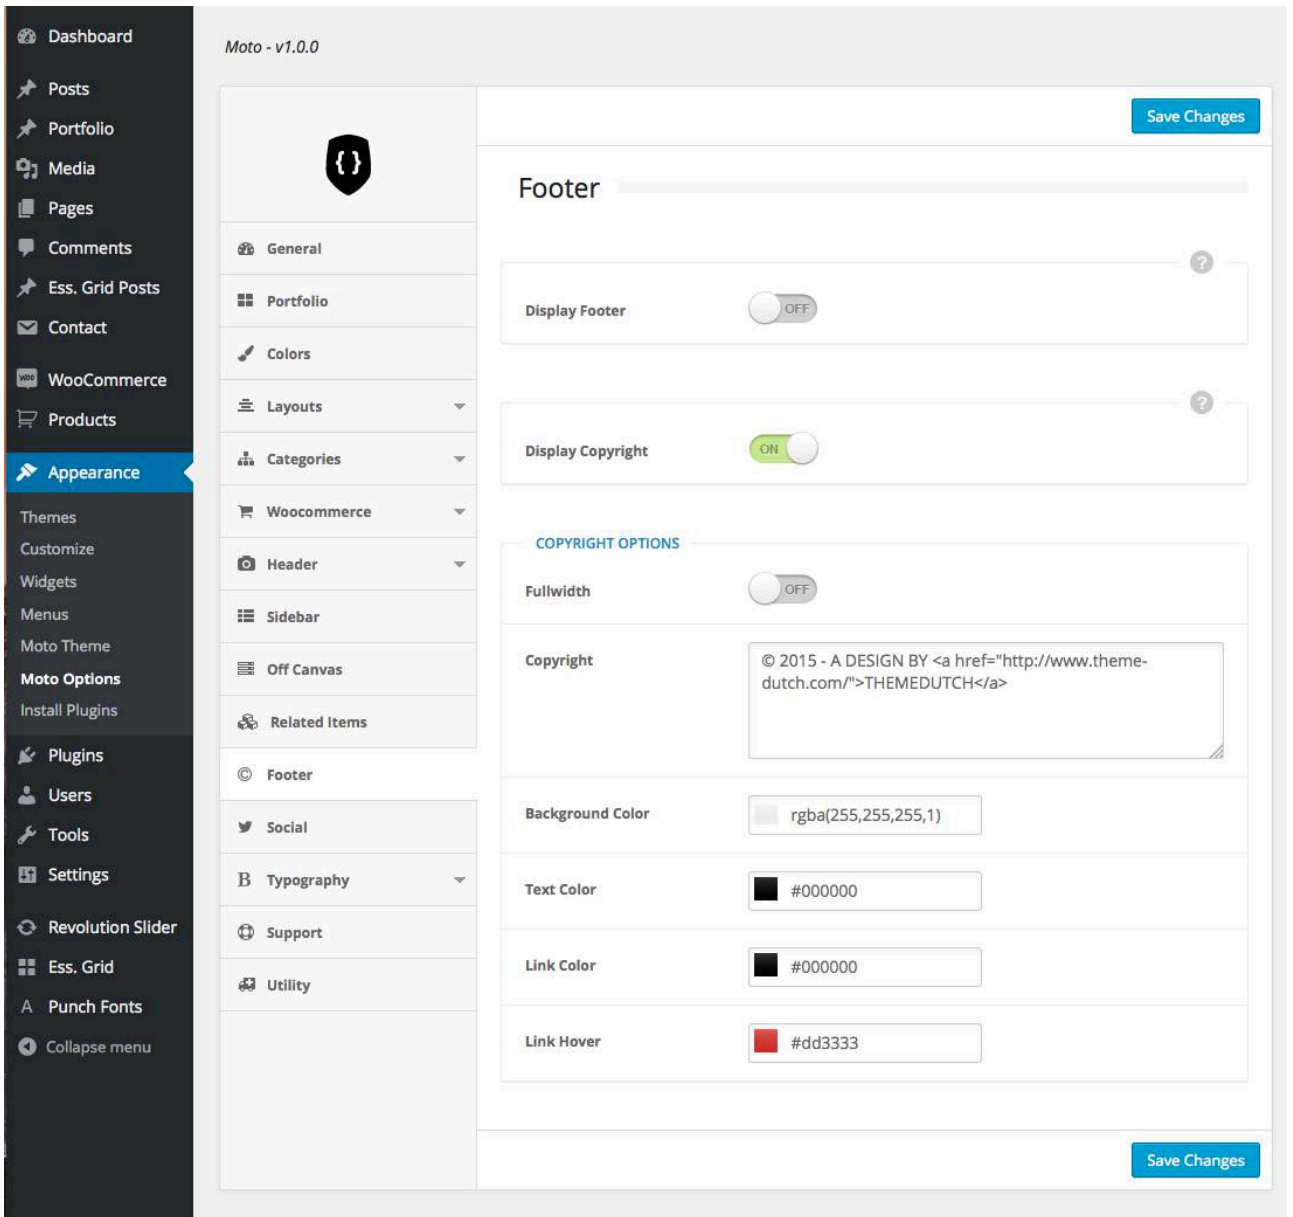

### Related Items

# 14. MOTO Options – Footer

Use this tab to define all your footer settings. All settings are self-explanatory.

This is how it looks at the front-end of theme MOTO.

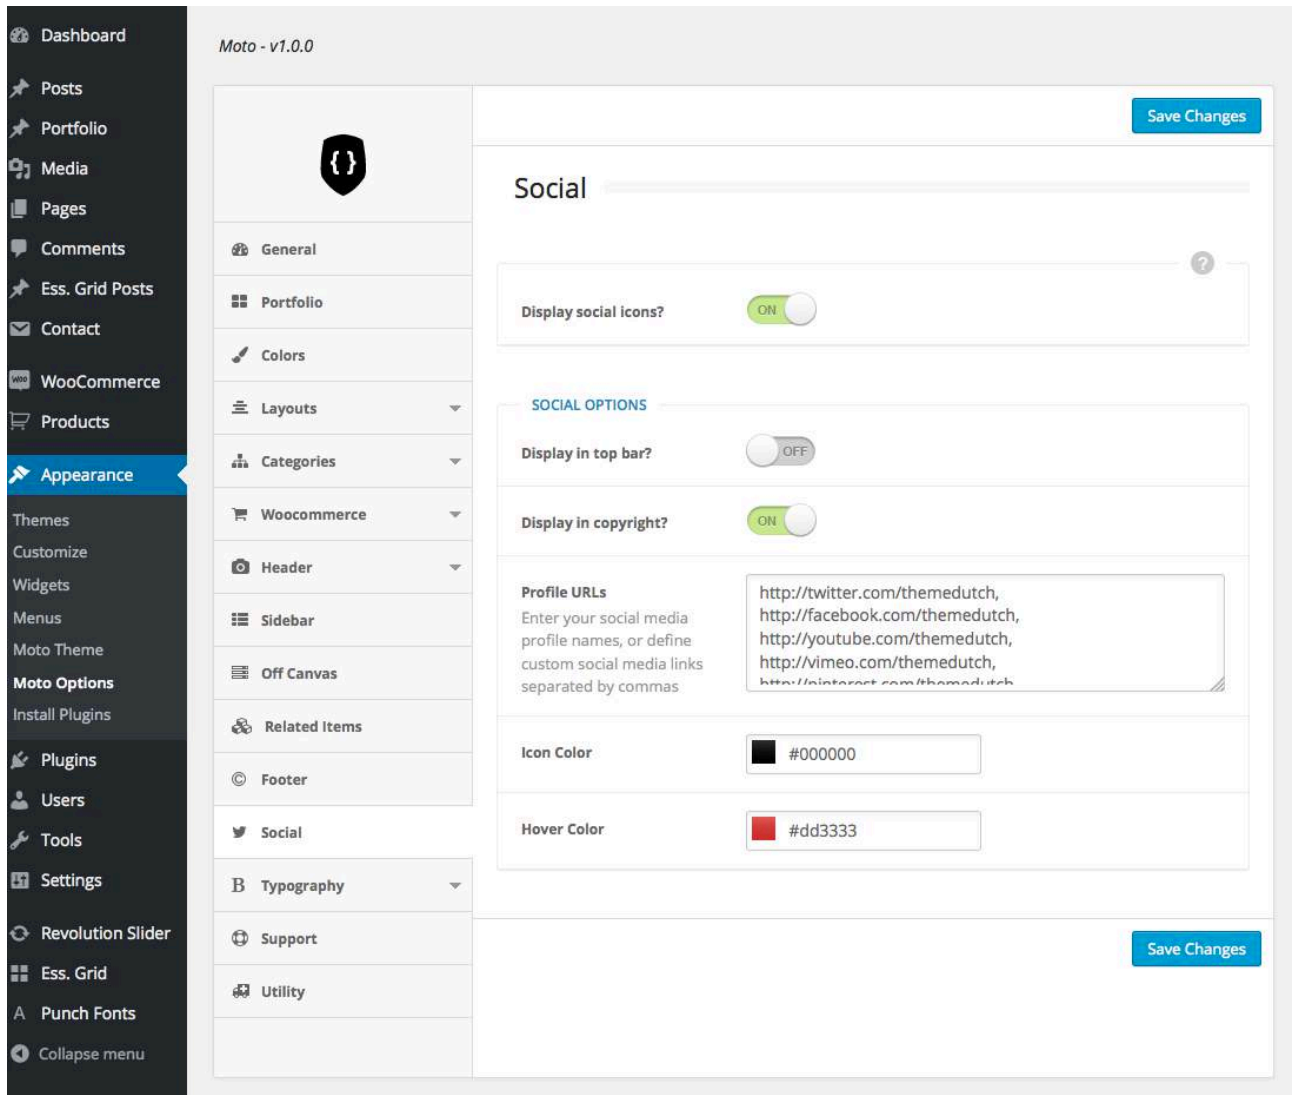

You can choose the footer (incl. footer widgets) to appear on grid or fullwidth.

## 15. MOTO Hill Options - Social

In here you can make use of social options, display social icons, and set the colors.

All used social icons will appear in your website's Top Bar and / or in copyright section. All settings are self-explanatory.

The screenshot shows the WordPress dashboard for the Moto theme, version 1.0.0. The left sidebar contains a navigation menu with 'Appearance' selected. The main content area is titled 'Social' and features a 'Save Changes' button in the top right corner. The settings are organized into several sections:

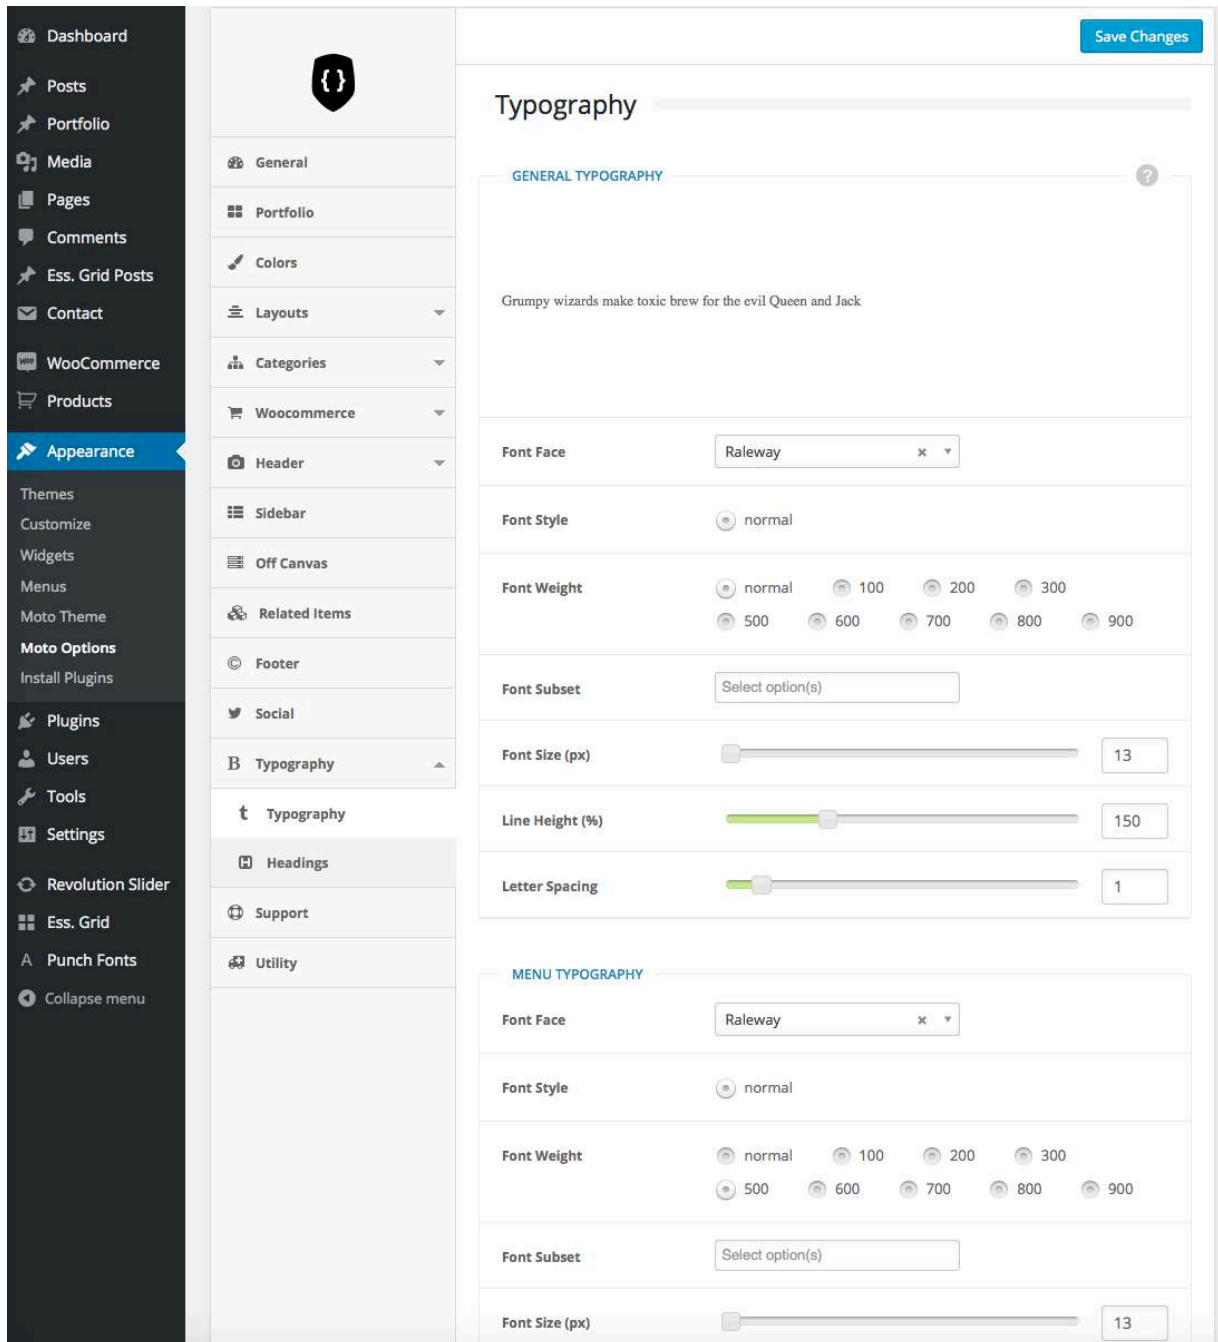

- General:** A toggle for 'Display social icons?' is set to 'ON'.
- SOCIAL OPTIONS:** Two toggles are present: 'Display in top bar?' is set to 'OFF', and 'Display in copyright?' is set to 'ON'.
- Profile URLs:** A text area contains the following links: `http://twitter.com/themedutch,` `http://facebook.com/themedutch,` `http://youtube.com/themedutch,` `http://vimeo.com/themedutch,` and `http://instagram.com/themedutch`.
- Icon Color:** A color picker is set to black with the hex code #000000.
- Hover Color:** A color picker is set to red with the hex code #dd3333.

A second 'Save Changes' button is located at the bottom right of the settings panel.

## 16. MOTO Options - Typography

In here you'll find all options for your websites' typography. (Google fonts): **Font face, font style, font weight, font subset, font size, line height and letter spacing.**

You're able to select different fonts for 1. Menu, 2. Sub Menu, 3. Secondary Sub Menu, 4. Sidebar, and 5. Footer.  
All settings are self-explanatory.

The screenshot displays the WordPress dashboard's 'Appearance' > 'Typography' settings page. The left sidebar shows the navigation menu with 'Appearance' selected. The main content area is titled 'Typography' and features a 'Save Changes' button in the top right corner. The settings are organized into two sections: 'GENERAL TYPOGRAPHY' and 'MENU TYPOGRAPHY'. Each section includes a preview of the text 'Grumpy wizards make toxic brew for the evil Queen and Jack' and controls for Font Face (Raleway), Font Style (normal), Font Weight (normal, 100, 200, 300, 500, 600, 700, 800, 900), Font Subset (Select option(s)), Font Size (px) (13), Line Height (%) (150), and Letter Spacing (1).

# Headings

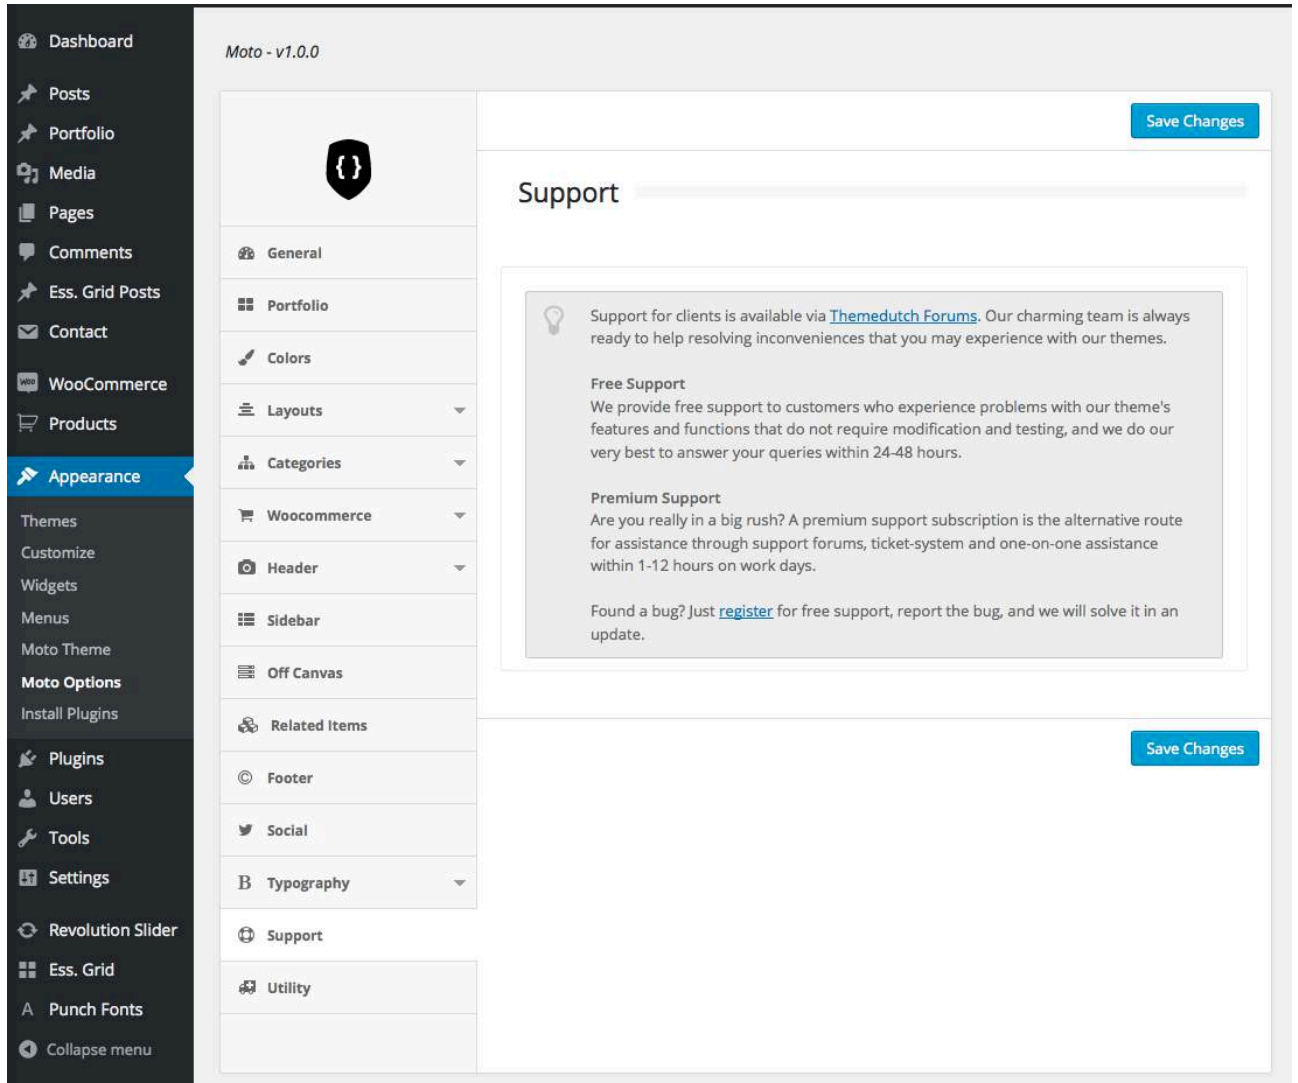

In here you can set the font face, style, weight, size etc. for all headings. All settings are self-explanatory.

The screenshot displays the WordPress dashboard's 'Appearance' settings, specifically the 'Headings' section. The left sidebar contains navigation options like Dashboard, Posts, Portfolio, Media, Pages, Comments, Form Builder, Appearance, Themes, Customize, Widgets, Menus, Theme Check, Dondo Theme, Dondo Options, Install Plugins, Plugins, Users, Tools, Settings, SEO, Revolution Slider, and Collapse menu. The main content area is titled 'Headings' and features a preview of the heading text: 'Grumpy wizards make toxic brew for the evil Queen and Jack'. Below the preview is a configuration panel with the following settings:

- Font Face: Raleway
- Font Style: normal
- Font Weight: normal, 100, 200, 300, 500, 600, 700, 800, 900
- Font Subset: Select option(s)
- H1 Font Size (px): 45
- Line Height (%): 130
- Letter Spacing: 5

# 17. MOTO Hill Options – Support

We provide free support through our forums only. Please read this before you contact Themedutch for support.

## 18. MOTO Hill Options – Utility (import dummy content)

The tab “Utility” within **MOTO Hill Options** is created for importing Dummy Content, and/or export your MOTO theme options.

Please read all ‘IMPORTANT NOTICES FIRST’ before you install MOTO.

### Import Dummy content.

Hit the button ‘Install Dummy Content’ if you would like to install the official MOTO preview website’s content.

The screenshot displays the WordPress dashboard's 'Appearance' menu on the left, with 'Moto Options' expanded to 'Utility'. The main content area is titled 'Utility' and features a 'Save Changes' button at the top right. Below the title, there are two main sections: 'EXPORT/IMPORT' and 'DUMMY CONTENT'. The 'EXPORT/IMPORT' section includes an 'Update Notification' box with instructions and two sub-sections: 'Import' (Import Options) and 'Export' (Export Options), each with an 'Import' or 'Export' button. The 'DUMMY CONTENT' section is titled 'Install Dummy Content' and includes instructions, a dropdown menu for content selection (set to 'Moto (default dummy content)'), two checked checkboxes for importing content and settings, and an 'Install Dummy' button. A note at the bottom of this section states: '\*\* The import process might take some time. Please do not close your browser.' A blue arrow points to the 'Utility' option in the sidebar.

## IMPORTANT NOTICE: 1.

**Importing dummy content 'may take some time'**. Installing dummy content will not cause problems if you have "good quality hosting". In some cases the dummy content will not work, for example if you really have bad hosting.

(You will also need to import the Revolution Slider demo content if you want to make use of the Revolution Sliders) See the MOTO Unzip me please file.

## IMPORTANT NOTICE: 2.

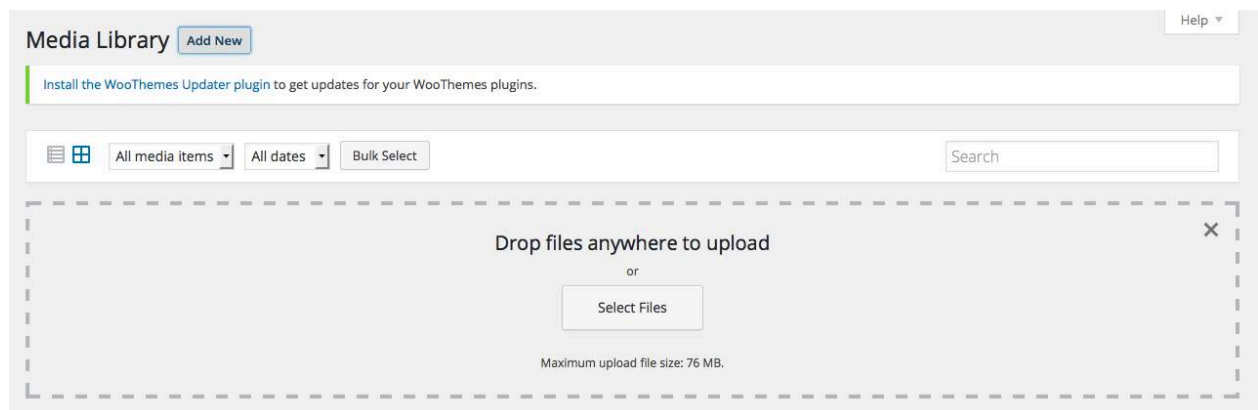

1. After installing 'dummy content' you still need to assign menus to the main and footer areas yourself. Set your home page via Settings / Reading.

2. Sidebars and Widgets are not included in the dummy content. These you'll have to create yourself. You can read in the manual how to create Sidebars and Widgets.

3. When installing all Plugins that come with the theme, insure that no other caching Plugins are installed/activated.

## IMPORTANT NOTICE: 3.

Before installing 'dummy content' you need to check if your Media Library has a Maximum Upload file size of at least: 75 MB. If this not the case for example only 8 MB, the dummy content will not work!

## How to increase the Maximum Upload file size?

add this to top of wp-config.php  
`define( 'WP_MEMORY_LIMIT', '75M' );`

## Multi Site Maximum Upload file size?

In case of a Multi site setup go to the Network settings/ Upload settings / Max upload file size.

**Upload Settings**

Site upload space  Limit total size of files uploaded to 100 MB

Upload file types   
Allowed file types. Separate types by spaces.

Max upload file size 78000 KB

**Language Settings**

Default Language English (United States)

**Menu Settings**

Enable administration menus  Plugins

[Save Changes](#)

#### **IMPORTANT NOTICE: 4.**

**All pages content from MOTO's 'Main Demo' is included in your theme files.** This is the best way for having a flawless installation. We have not included the other demos. When you install one of the other demos, the content and images will be downloaded from our server directly. This may take some time, despite our effort to create all other demos as small as possible.

#### **IMPORTANT NOTICE: 5.**

We've made sure that our demo installer will work on most hosting platforms. We are not responsible for installation problems caused by your server or settings. It can be a time consuming process if we need to check your server settings and sometimes we even need to contact your hosting provider. Therefore we offer affordable Installation services that are available via our website.

#### **Import Dummy content.**

Hit the button 'Install Dummy Content' if you want to install the official MOTO preview website's content.

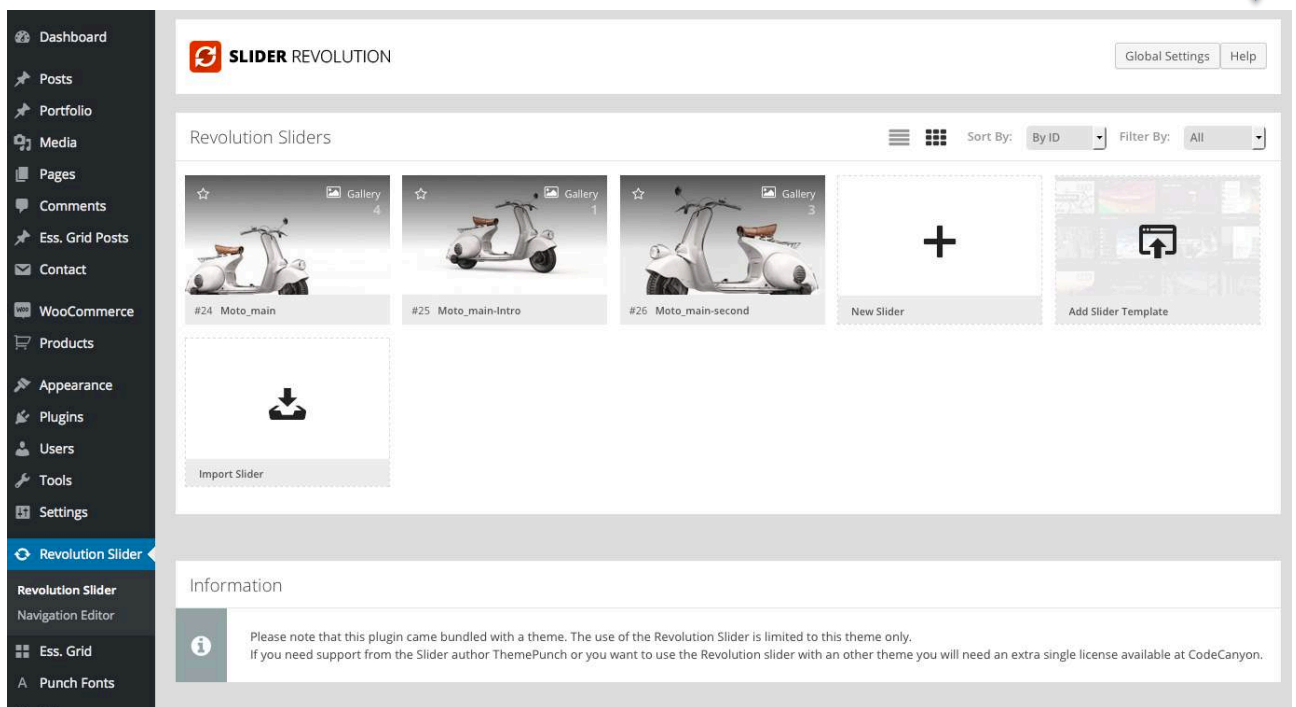

## 19. The Revolution Slider (Revolution Slider plugin)

You're able to install/activate this powerful plugin via your Dashboard.

### NOTE:

For support on Slider Revolution please 'check' the help button on the top right of the Revolution slider tab.

<http://www.themepunch.com/revslider-doc/slider-revolution-documentation/>

The screenshot displays the Slider Revolution plugin interface. On the left is a dark sidebar with navigation options: Dashboard, Posts, Portfolio, Media, Pages, Comments, Ess. Grid Posts, Contact, WooCommerce, Products, Appearance, Plugins, Users, Tools, Settings, and Revolution Slider (highlighted). The main content area is titled 'SLIDER REVOLUTION' and includes 'Global Settings' and 'Help' buttons. Below this, there's a 'Revolution Sliders' section with a grid of sliders: #24 Moto\_main, #25 Moto\_main-Intro, #26 Moto\_main-second, a 'New Slider' button, and an 'Add Slider Template' button. An 'Import Slider' button is also visible. At the bottom, an 'Information' section contains a note: 'Please note that this plugin came bundled with a theme. The use of the Revolution Slider is limited to this theme only. If you need support from the Slider author ThemePunch or you want to use the Revolution slider with an other theme you will need an extra single license available at CodeCanyon.'

On the MOTO home page we've added this shortcode:

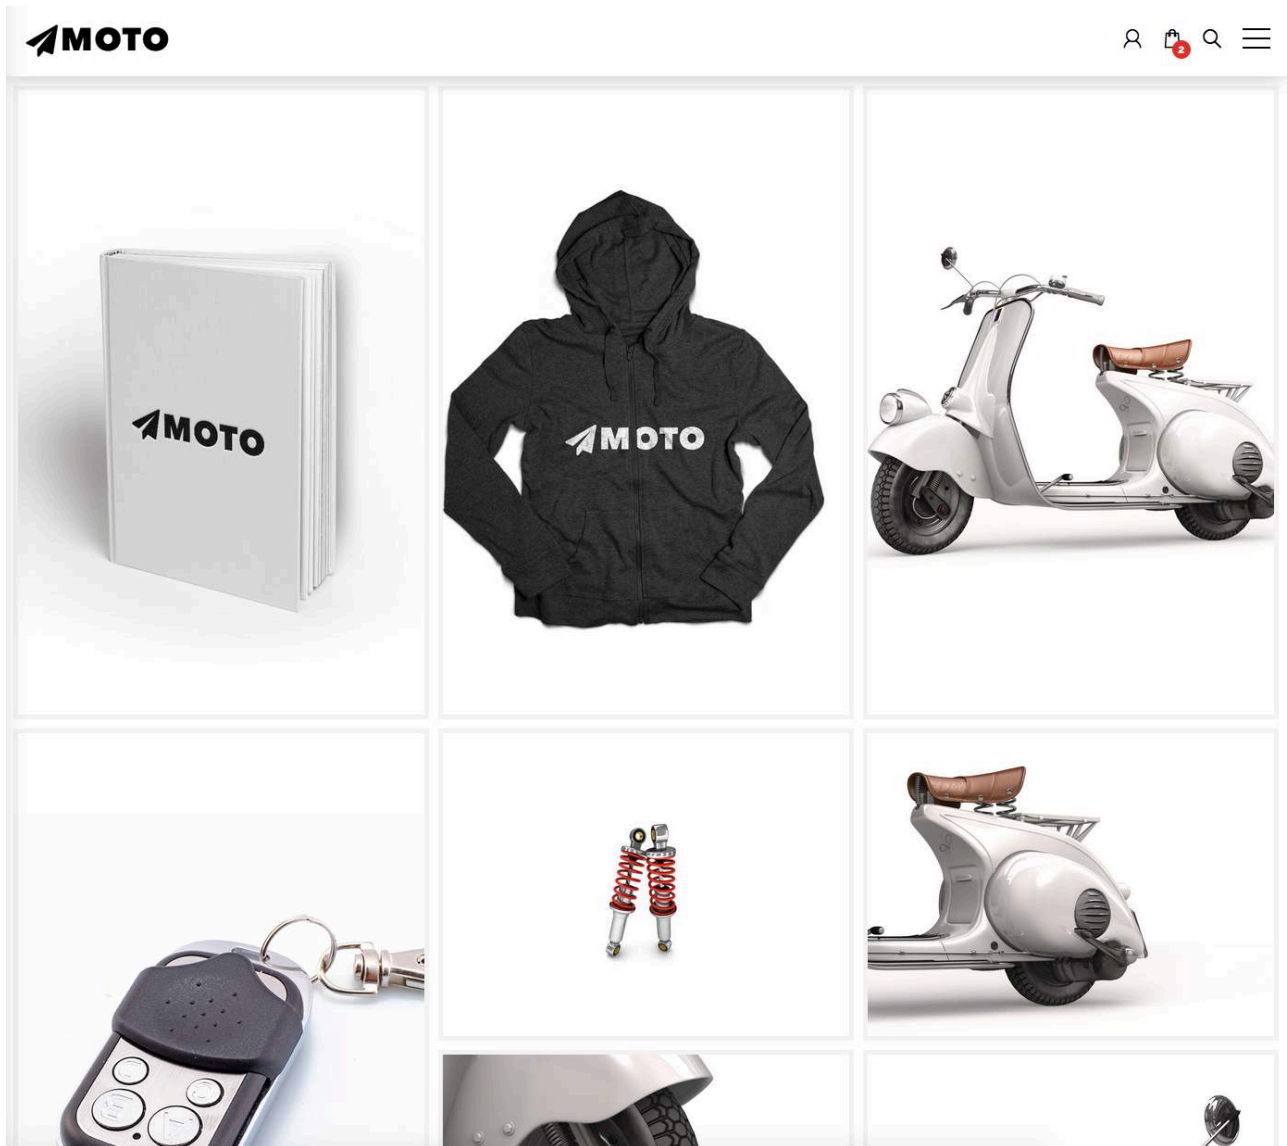

```
[rev_slider alias="Moto_main-Intro"]  
[rev_slider alias="Moto_main-second"]
```

### NOTE: INFO & UPDATES

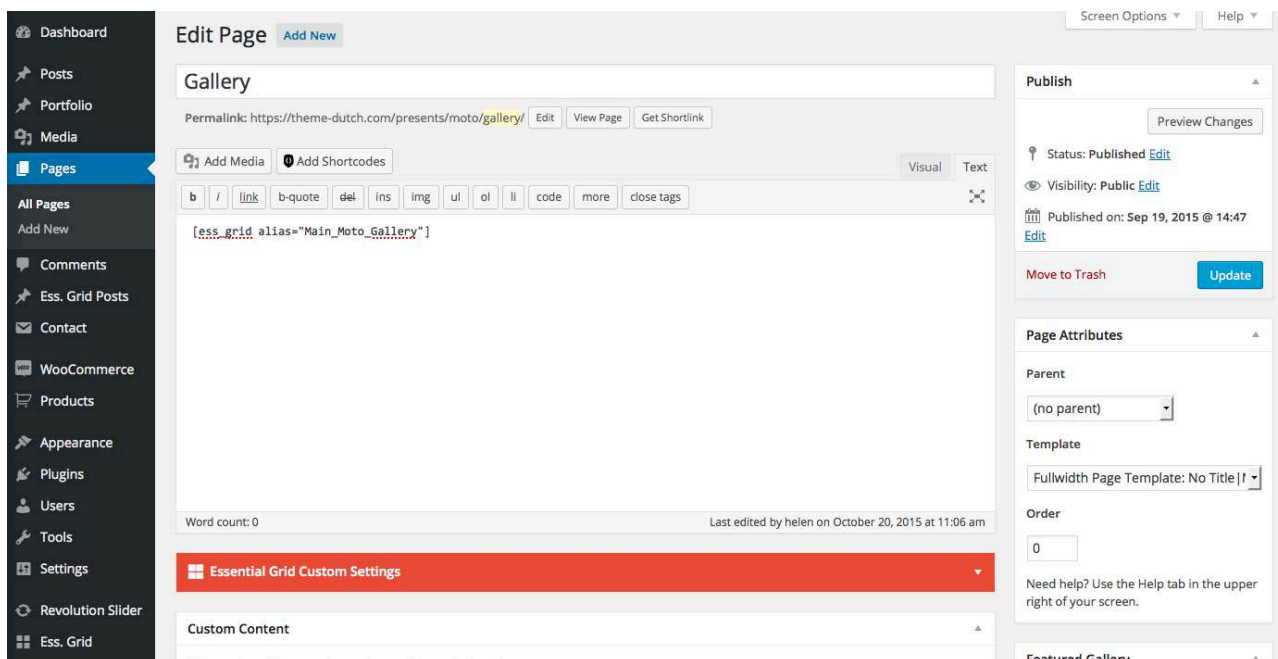

Slider Revolution is already built-in and comes with theme MOTO. Please wait with updating Slider Revolution until we've released an updated MOTO version on the themes' marketplace. This prevents possible issues.

## 20. MOTO Gallery – Gallery Essential Grid (Essential Grid plugin)

We used the Essential Grid plugin to create the MOTO Gallery.  
<https://theme-dutch.com/presents/moto/gallery/>

The Moto gallery comes with the demo content, and we've uses this shortcode on the gallery page: `[ess_grid alias="Main_Moto_Gallery"]`  
We've used a Fullwidth Page Template: No Title | No breadcrumbs.

## NOTE: INFO & UPDATES

For more information about Essential Grid (how to use etc.) we refer to available information and instructions via ThemePunch.

**Essential Grid is already built-in and comes with theme MOTO, and only needs to be activated. Please wait with updating Essential Grid until we've released an updated MOTO version on the themes' marketplace. This prevents possible issues**

## 21. Set up Pages

MOTO 'ABOUT US' page example

<https://theme-dutch.com/presents/moto/about/>

On your right hand beneath **Page Attributes** you have options to select your desired template into: default, blank full width and more.. This option is available on pages, not on post pages though.

You can create different layouts for each page. We selected 'Fullwidth Page Template: No Title | No Breadcrumbs

The screenshot shows the WordPress 'Edit Page' interface for the 'About' page. The page content includes sections for 'OUR STORY', 'Moto.', 'Philosophy.', 'Brand.', and 'Team.'. The right sidebar shows 'Page Attributes' with the 'Template' dropdown set to 'Fullwidth Page Template: No Title | No Breadcrumbs'. A blue arrow points to the template selection dropdown, and another blue arrow points to the 'Enable sticky header' checkbox in the 'Custom Header' section.

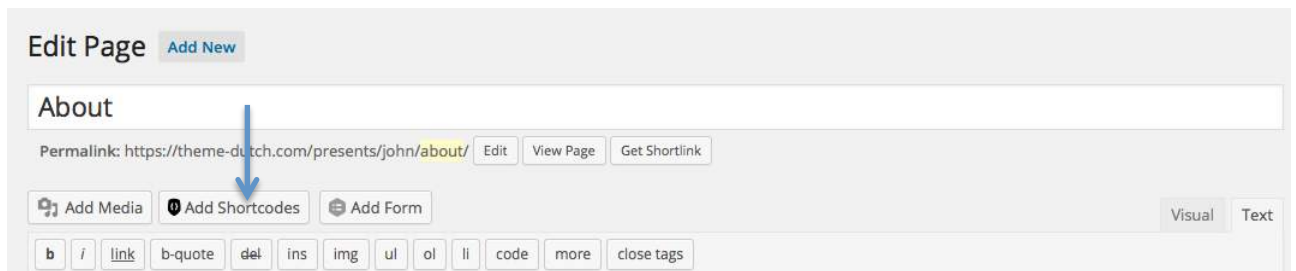

At Custom Header you can select a custom menu background color (per page if you like) and enable a sticky header (your menus).

(For your categories, like blog, you're able to select a default header background color: check Moto Options / Category layout)

**NOTE:**

**If you want to create full width pages including text content within the 1140 grid, make sure you create a "section shortcode" in which you add your content: columns, texts, images etc.**

There are several options for content within a section. You're able to create sections on a full width template, blank page template and portfolio templates.

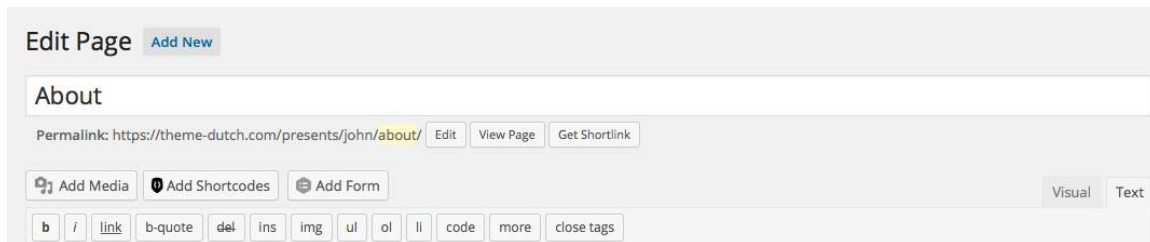

At the top of every page and post you'll find two tabs: **Add Media** and **Add Shortcodes**.

Via Add Media you're able to insert your favorite images from your Media Library into your posts and pages. Via Add Shortcodes you're able to insert TD-shortcodes (like columns, buttons, dividers, galleries and much more), which you can use to design your layout and spice up your pages

This is an example of all available section shortcodes in MOTO

TD Shortcodes		
Categories	Shortcodes	Description
Animated Icon Grid	Section Separator	
Animated Image	Section Separator Down	
Boxed Image	Section	
Boxed Slider	Section with a background image	
Buttons	Section with a background image and a parallax effect	
Caption	Section with a sequence background image and a parallax effect	
Code	Section Full Screen	
Columns		
Columns (divider)		
Columns (fullheight)		
Custom Height Columns		
Counter		
Dividers		
Dropcaps		
Headings		
Icons		
Image gallery		
Image Menu		

## 22. How to use TD-shortcodes (plugin)

On the icon bar above the content block of every page or post, you'll find the TD short code manager. **(Regulated via the TD-shortcode Plugin)**

The TD-shortcode manager provides lots of categories and options to make us of short codes to spice up your pages and posts via your **text editor**.

### EXAMPLES:

<https://theme-dutch.com/presents/moto/about/>

```
[tds-section background="#fff" textcolor="#2e3138" opacity="100"]
```

```
[tds-divider invisible thickness=100]
```

```
[tds-columns]
```

```
[tds-column full animation=fadeIn]
```

```
<h1>OUR STORY</h1>
```

```
[tds-divider invisible thickness=10]
```

```
[tds-divider solid color=#000 thickness=10 width=4% align=left]
```

```
<h2><strong>Moto.</strong></h2>
```

Far far away, behind the word mountains, far from the countries Vokalia and Consonantia, there live the blind texts. Separated they live in Bookmarksgrove right at the coast of the Semantics, a large language ocean. A small river named Duden flows by their place and supplies it with the necessary regelialia. It is a paradisematic country, in which roasted parts of sentences fly into your mouth.

```
<h2><strong>Philosophy.</strong></h2>
```

Even the all-powerful Pointing has no control about the blind texts it is an almost unorthographic life One day however a small line of blind text by the name of Lorem Ipsum decided to leave for the far World of Grammar. The Big Oxmox advised her not to do so, because there were thousands of bad Commas, wild Question Marks and devious Semikoli, but the Little Blind Text didn't listen. She packed her seven versalia, put her initial into the belt and made herself on the way.

```
<h2><strong>Brand.</strong></h2>
```

When she reached the first hills of the Italic Mountains, she had a last view back on the skyline of her hometown Bookmarksgrove, the headline of Alphabet Village and the subline of her own road, the Line Lane. Pityful a rethoric question ran over her cheek, then she continued her way. On her way she met a copy. The copy warned the Little Blind Text, that where it came from it would have been rewritten a thousand times and everything that was left from its origin would be the word "and" and the Little Blind Text

should turn around and return to its own, safe country. But nothing the copy said could convince her and so it didn't take long until a few insidious Copy Writers ambushed her

<h2><strong>Team.</strong></h2>  
Even the all-powerful Pointing has no control about the blind texts it is an almost unorthographic life One day however a small line of blind text by the name of Lorem Ipsum decided to leave for the far World of Grammar.

[/tds-section]

#### NOTE:

Basically all TD-shortcodes work the same, and 'live example' short codes you'll find on MOTO's Preview website. Install TD-shortcode plugin and 'dummy content' to see how most TD-Shortcodes are used in the backend. For more examples of TD-shortcodes visit: <http://theme-dutch.com/demo/> Select other preview websites or Theme Dutch themes to see how they can be used.

# 23. How to make your website multilingual

MOTO is WPML-ready. **Upload, install and activate the (WPML plugin).**

Then follow the instructions via your Wordpress admin.

**Need support to set up your own WPML site? Visit:**  
<http://wpml.org/documentation/> and <http://wpml.org/forums/forum/english-support/>

## 24. How to translate your website

### Translation Ready

English, Dutch, French, German or Spanish? Whatever your language is, we've got you covered. That's because we thought about the smallest details when we created MOTO. This theme's content can be translated to any major language you want.

We understand our theme will be sold worldwide. You can translate by using the pot file. Just follow the following steps:

- 1) Download Poedit from <http://www.poedit.net/>
- 2) Install poedit on your computer
- 3) Open poedit
- 4) Choose file > new catalogue from POT-file
- 5) Search your theme folder of MOTO > go to languages > Moto.pot
- 6) Press ok
- 7) Poedit will ask you where to save the .po and .mo files. Choose the same folder. Name the files your language zone (example: nl-NL for the Netherlands)
- 8) Translate all the options (not all needed)
- 9) Upload the .mo and .po file to the languages folder on your website.
- 10) Change you wp-config-file with your language-code

## 25. Theme Dutch Support

If you need support, have suggestions, concerns or you just want to ask a question, please go <http://theme-dutch.com/> and register your account. Don't forget to fill out the purchase code or Transaction ID of your Theme Dutch product, which you've received via our marketplace partner after buying our theme. **(We will verify your purchase before we provide support)**. After registering you'll receive an e-mail notification with username and password. Use these to login to your account and to be able posting your queries via <http://theme-dutch.com>.

### **IMPORTANT NOTICE:** PLEASE READ OUR BASIC FORUM RULES FIRST

Login in, and then you're able to access our FREE support forum for MOTO.

We DO NOT provide support via e-mail – only through our 'free' support forum and/or 'premium support forum including ticket system'.

If you have 'sales related' questions about customization jobs, installation programs or otherwise, you're welcome to send an email to [sales@theme-dutch.com](mailto:sales@theme-dutch.com).

**Our support team's goal is to handle every request voluntarily, quickly and correctly.** During office hours we will try to answer your queries immediately. Most of the time, questions are answered within 24-48 hrs. on Monday – Friday.

## 26. Services

Our team of web designers and web developers are standby if you want to make adjustments to your website. Check our website for WordPress **Installation plans** and **Customization jobs**. If you need additional info you also can contact us via the contact form on our website.

### Wordpress installation plans:

For more detailed information please visit: <http://theme-dutch.com>

### Customization plans:

For more detailed information please visit: <http://theme-dutch.com>

## 27. Warranty

Upon purchase of the theme, MOTO will be given to you as a download file. We guarantee a fully functional MOTO theme if you follow our advice, guidelines and installation instructions.

Updates for MOTO we announce via [www.facebook/themedutch](http://www.facebook/themedutch) and <https://twitter.com/themedutch>

You also can opt for receiving messages regarding updates via your marketplace profile page though.

## 28. Contacting Theme Dutch

Theme Dutch Limited is based in the Netherlands. Our office address is:

Theme Dutch Ltd.

Koningin Regentesselaan 44

6043 CM Roermond

The Netherlands

[www.theme-dutch.com](http://www.theme-dutch.com)

## 29. How to set up Permalinks

Editing your WordPress Permalinks is good for SEO purposes. You can make the URL of your website more readable for your visitors. Tweaking your permalinks can also give you an advantage to search engines such as Google, Bing and Yahoo. This way your content can be easily found and indexed.

For more information and details on how to customize your permalinks, please visit:

[http://codex.wordpress.org/Using\\_Permalinks](http://codex.wordpress.org/Using_Permalinks)

## 30. Wordpress information

For all WordPress-related questions, inquiries and concerns (such as; how to create pages or posts, how to disable comments etc.), please visit:

[www.wordpress.org](http://www.wordpress.org)

## 31. MOTO – Update Notification

**Before you update the theme files make sure you have made an export from your settings and save it as a text file.**

- 1 – Create export (see Utility) and copy the settings into a text file for save keeping.**
- 2 – Upload the theme files by FTP or through the Wordpress Installer.**
- 3 – Go to Utility and import the settings, all your settings will be re-stored.**
