

# READY TO USE

## D a m p e n i n g A d d i t i v e s

### **DESCRIPTION**

Special product “ **READY TO USE**” substitute of the traditional dampening solution.

**READY TO USE** is particularly indicated for small and medium sized sheet-fed presses.

**READY TO USE** is a formulation indicated for set-ups without automatic dosage of additive, capable to obtain always an optimal dampening solution.

### **PRINCIPLE CHARACTERISTICS**

**READY TO USE** grants to the printing process a high chromatic quality.

**READY TO USE** is formulated with nano-filtrated water, a FOGRA certificated dampening additive and with a small percentage of Isopropyl Alcohol.

**READY TO USE** contains special components that avoid the oxide deposit on the rollers, improving the balance speed between water and ink.

### **ADVANTAGES/BENEFITS**

1. Dampening solution efficient and stable in time, with consequent reduction of regeneration costs
2. Total absence of oxide on the rollers and blankets
3. Drastic reduction of start-up times and of the waste copies
4. Sharper and brilliant printing
5. Better ink setting
6. Elimination of ink build-ups on blankets and dampening rollers
7. **Minor environmental impact**

### **INSTRUCTIONS FOR USE:**

Use **READY TO USE** as it is, adding, if necessary, Isopropyl Alcohol depending on the type of the press in use.

# READY TO USE

## CHEMICAL-PHYSICAL CHARACTERISTICS

Appearance	Celestial liquid
Odor	Mild characteristic
pH (as it is)	4,9
Density	1,00 g/cm <sup>3</sup>
Water soluble	Complete
Solvent soluble	Not soluble

Indicated data are characteristic and typical of the product and do not constitute specifics.

## PRECAUTIONS FOR USE AND STOCKING

*Chemical product, for professional use only.*

*It is recommended to use the personal protective equipment indicated in the MSDS, while manipulating the product, especially protective glasses and gloves as well as adequate clothing.*

*Do not store the product on temperatures below 0°C.*
