

"We supply the shelving, you supply the rest"

Painting the Shelfstore system.

One of the most frequent questions we are asked about the Shelfstore System is **"Can I paint the system?"**

A: Yes, you can but first use an adhesion primer. See the link for further details.
<https://www.prideandjoy.me/buy-primers-online/> *

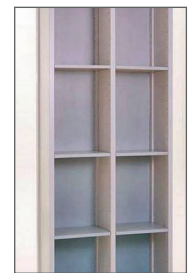

1. Apply a coating of adhesion primer to ensure the topcoat adheres well to the surface to be painted.

There is no need to key the surface prior to applying the adhesion primer.

Before

After

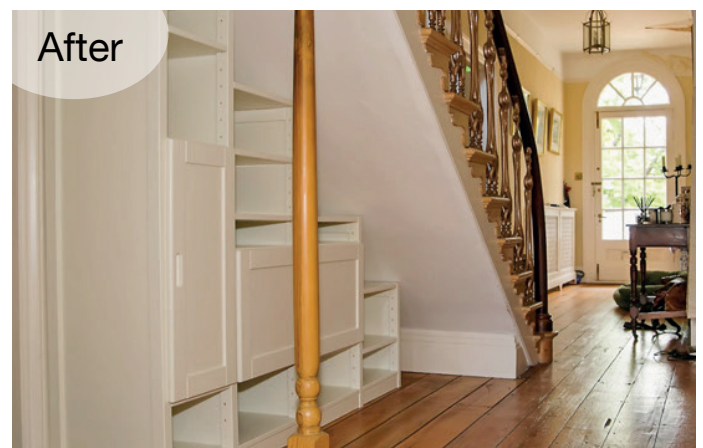

2. After the adhesion primer has dried, you are ready to apply the paint colour of your choice. Why not try just painting the uprights but keeping the shelves in their natural wood finish to add a special accent.

Or try a combination of colours for a dazzling two-tone effect. The decision is entirely up to you. We would recommend painting the components prior to assembly.
