Frome Community Hospital | Case Study

The Somerset Partnership NHS Foundation

Somerset
Partnership

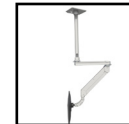

The Frome Community Hospital required full installation of Patient TV equipment to its newly refurbished wards. From the outset clinical staff wanted to minimise wall mounted items and therefore identified ceiling mounts as the ideal solution.

The T2 Elite series of ceiling mounted hospital monitor mounting solutions are designed for ease of use by both patients and clinicians alike. Each T2 Elite ceiling mount provides 360° of screen swivel and 90° downward tilt. This enables patients to view TV whilst sitting or lying in bed and also whilst seated in an adjacent chair. As a fully cable managed monitor mounting solution the arm is ideal in hospital and dental environments.

ErgoMounts worked closely with the architect and main contractor Laing O'Rourke and carried out a full site survey of the new wards and it was agreed that the T2 Elite series would both benefit and exceed all the criteria. ErgoMounts carried out the installation of the 28 solutions and have been regularly servicing them since.

Part List:

EMT2EQ-C8X24-QG

T2 Elite
Ceiling Mount
Light Grey
