

CALYGRAIN[®]

Unique Filling Technology

HIGHER CROP STORAGE COMPLYING WITH ECOLOGICAL COMMITMENTS

- 1 MAXIMIZE THE STORAGE CAPACITY**
A homogeneous repartition of the grains gives a higher storage capacity (by 10% to more than 20 % increase)
- 2 INTENSIFY THE GRAIN CONSERVATION**
Thanks to a better ventilation, the bed homogeneity reduces the needs of pesticide
- 3 UPGRADE THE WHOLE CROP**
A resale price increased, thanks to homogeneity of the lots and absence of wastage

THE DENSE AND HOMOGENEOUS FILLING

CALYGRAIN® patented technology ensures a uniform loading of cereals inside silos

IMPROVED SILO FILLING SYSTEM

- Recovery of cereals from the belt-conveyor
- Distribution of grains as rain shower, thanks to the Calygrain® system
- Distribution of grains introduced at a rate of 200 tons per hour inside silos with up to 25 meter diameter

A SYSTEM MATCHING ALL MORE STRINGENT CONSTRAINTS OF PRESERVATION

This unique solution can be used for all types of grain
