

# ONELAN

## Data Collection Engine (DCE)

The number of business systems organisations depend upon is ever growing. Many of these systems hold information/data which would be valuable for a range of people yet only a few users actually have access to it.

### Benefits:

- ◆ **Dynamic** - bring content to life with fresh and always up to date information
- ◆ **Engaging** – get your message heard using rich multimedia content
- ◆ **Relevant**– don't leave relevant data hidden away in inaccessible systems, give your users information which really matters to them
- ◆ **Consistent** – using your digital signage network to share data gives you ultimate control over how, where and when it is presented
- ◆ **Simple** - DCE is a Windows application which can be installed on a PC or server on your network

### Example application

ONELAN use the DCE to present manufacturing statistics in their manufacturing facility in the UK

Andersen House, Newtown Road, Henley-on-Thames, RG9 1HG, UK  
T: +44 (0)1491 411 400 F: +44 (0)1491 579 254 E: sales@onelan.com

### DCE Connectors:

- ◆ Microsoft® Excel®
- ◆ SQL Database (ODBC compliant)
- ◆ Text
- ◆ XML
- ◆ Web Capture
- ◆ Micros® Opera
- ◆ Newmarket International® Delphi®
- ◆ Avaya and Cisco™ automated call distributors

Please contact us for projects requiring other platform integrations.
