

Fully Self-Contained AUTOMATIC HARVESTER

AutoStack 3TM

As the newest and most refined, high-production machine on the market, the Trebro AutoStack 3 is the ultimate in turf harvesting production. Along with Trebro's industry leading reliability, economy and time-tested value, it has the combination of tried and true design along with many new features that set it apart from all other turf harvesters on the market today.

...the newest and most refined, high-production machine on the market

The state-of-the-art air-conditioned and heated cab uses curved glass on the front and rear for outstanding visibility of all harvesting and stacking functions. The entire cab is mounted on anti-vibration mounts for a smooth quiet ride. Powered by a 160 HP engine with all-wheel drive and large high flotation tires, the AutoStack 3 harvests through muddy and wet conditions with ease. When it turns hot and dry, the AutoStack 3 keeps harvesting thanks to its dual 24" cutting heads with dual adjustable down pressure, which produces an outstanding quality of cut with minimum waste. The Trebro AutoStack 3 quickly pays for itself thanks to its maximum productivity and sod quality with reduced waste and downtime. Turn your large-scale turf harvesting operation into a highly efficient one-man system. It's the original auto-stacking turf harvester and it's still the best. The future of turf harvesting is now!

**AUTOMATIC
HARVESTER**

24 inch cutting heads with dual adjustable down pressure

Excellent flotation

SPECIFICATIONS

- Width of Cut.....Two 24 inch cutting heads (2 X .61m)
- Length of CutElectronically variable up to 81 inches (2.06m)
- Thickness of Cut.....Hydraulically adjusted
- Pallet Size48 X 48 inch single faced (1.22m X 1.22m)
- Cutting KnifeOne piece with fingers
- SteeringArticulated with Dual Ultra Steer (automatic)
- Weight28,000 lbs. (12,701 kg)
- Width11 feet, 10 inches
- Length35 feet, 5 inches
- Height10 feet, 2 inches
- Tires54 X 31 inch high flotation (1.37m X.79m)
- Horsepower.....160 HP Cummins
- Transmission.....Infinitely variable hydrostatic drive
- All Wheel DrivePlanetary wheel motors
- Differential Lock.....Electronic anti-spin control

OPTIONS

- Palletless Forks
- Pallet lifter for double sided pallets
- Spare parts package
- 23 inch wide cut (58.42 cm)

View out of the rear window

High comfort cab

Improved dual 24" cutter heads

FEATURES *continued*

- Rear mounted camera
- The operator controls and console are conveniently positioned by the driver's seat that rotates 90 degrees putting the driver in the best and most comfortable position for harvesting
- Twin 24 inch floating heads with dual adjustable down pressure for improved sod quality
- Blade changing is easy and convenient with the cutting heads in the raised position
- Articulated steering for outstanding maneuverability; even in smaller fields
- Dual ultra automatic steering allows harvesting in both directions
- High flotation tires produce a light foot print minimizing marking and compaction
- Improved powered roll-up system with on-the-go automatic flap positioning
- The exclusive Trebro roll-up system is easy on the turf and produces consistent tight rolls
- Stacker rotate uses a durable, low maintenance rotary actuator
- Improved accumulator scrap dump for on the fly scrapping
- Front to back stacker has 88 spears that gently transfers 10 rolls at a time to the pallet
- Simplified stacker uses hydraulic cylinders to activate the pick up spears
- Can be easily set to stack flat top or pyramid pallets of turf up to 9 layers high
- On-the-go automatic pallet injector with 20 pallet capacity
- Adjustable stacker delivery pressure for tight stable pallets
- Proven Plus 1 Control System
- Telematics remote access system
- Powered by a Cummins 160 HP Diesel Engine
