

K3 additions

Nominal Account Restructue helping you to get more from your Sage solution.

Sage 200

Nominal Account Restructure from K3 is a great addition to Sage 200 giving you all you need to amend or merge existing Nominal Ledger account codes.

Tailor your Nominal Account Restrucuture codes on what you want to see. Once amended, all references to the account throughout the Sage 200 system are updated.

Business benefits

- Easy to use with minimal training needed
- Customise your purchase order entry screens
- Provides users with the ability to edit fields quickly
- Ability to change codes to suit your preferences
- Amend codes individually, or import from a CSV file
- Opportunity to amend two or more Purchase Ledger accounts.
- Notification to update waiting postings

Whether it's a relatively small step forward, or an ambitious change of direction, we'll be the partner to deliver systems which meet your exact needs.

Specialising in ERP, CRM, BI and Managed Service solutions we have offices in England, Wales, Ireland and worldwide helping over 800 customers reach their goals.

Amend your account codes quickly and easily

Say goodbye to...

- Lack of visibility on previous orders
- Time wasted on manual order entry

Ease of Adding Codes

There are two options available for users. The Nominal accounts can be entered individually or imported from a CSV file . You can select a single existing Nominal Ledger account and enter a new code to replace the selected Nominal Ledger account.

You can also amend two or more Nominal Ledger accounts by importing a CSV file consisting of six required columns. You can export the list of account codes to change from Sage 200. Pressing OK will allow you to select your saved CSV import file and you will receive a confirmation of the changes made to the account codes.

K3. Experience Applied.
