Computer Cleaning

I.

Service Description

Computer cleaning is a professional cleaning service carried out by specialists. It is the physical cleaning of your computer and related equipment, using anti-bacterial solutions to help guard against the most common germs.

Increase the longevity and performance of your computer equipment with **regular cleans**.

2.

Service Benefits

- **Eliminate Germs**

We offer protection from germs such as e-coli, salmonella and listeria. Our cleaning protects you from 99.9% of germs. These are all spread by illness in the office, eating at your desk, poor personal hygiene and hot-desking. Dirty keyboards & smartphones contain more germs than toilet seats.

- **Reduce illness and work/ educational absence**

Cleaning can protect against harmful outbreaks such as flu, colds and seasonal viruses. Regularly planned cleans will improve your staff/students' morale and performance.

A clean working environment promotes **well being** and can help to improve both morale and productivity.

- **Cost Savings**

Increase the longevity and performance of your computer equipment with regular cleans. Prevention of hardware failure protects you against unwanted budget expenditure.

- **Productivity**

A clean working environment promotes well being and can help to improve both morale and productivity.

Caring for your equipment is appreciated by staff, who enjoy working with clean equipment.

Quotations are fixed cost and easy to understand, enabling you to budget effectively.

Quotations are **fixed cost** and easy to understand, enabling you to **budget effectively**.

3.

Methods

We use an anti-bacterial agent in our cleaning solutions - one that is most effective against germs commonly found on keyboards and telephones.

We provide full generic or if required, site specific method statements and risk assessments, along with COSHH information, health and safety and environmental policies.

All staff are security cleared, many to SC level and undergo full in-house and on-going training. In addition, they are uniformed and carry ID passes.

We utilise a state of the art management and real time, tracking and scheduling system which allows us to deliver services in an efficient and timely manner, keeping customers constantly updated with details of service delivery dates, times and progress.

All designed to ensure complete customer satisfaction.

A State of the Art Management and Tracking System.
