

**It's time to upgrade your phone system!**

# VoIP-Benefits

**Stands for Voice over Internet Protocol. It is a simplified phone network that uses the internet to reduce costs.**

- No telephone line rental costs which reduces call charges.
- Offers a number of useful features for free including conference, call waiting, call ID and call forwarding.
- The VoIP telephone has call handling with recording which helps staff to multi-task and stay productive.
- It is reliable and is being adopted by private companies, not for profit organisations and schools.
- Keyfort will specify and install your VoIP telephone system saving you time and money.

**VoIP phone is queuing and Analogue phone pushes in and sets up a tent.**

*VoIP: "What are you doing?"*

*Analogue: "I am just holding up the line!"*
