

HOW TO PRODUCE THE PERFECT SEAL – QUBE IPSA

1. CREASE

- Fold the right panel over to cover the centre panel of the card
- Crease the folded edge using your fingers

2. ALIGN & PEEL

- Open out the card
- Place the right panel over the foam template & line up the holes
- Line up the blister with the card holes and place inside the card and template
- Smooth over the top of the blister with your hand
- Peel off the cover paper to reveal the adhesive on the middle panel
- **IMPORTANT** - peel the backing paper from LEFT to RIGHT

3. FOLD & TURN

- Fold the left and centre panel over
- Rub over the back using your hand to prepare for sealing
- Turn the card 45 degrees clockwise from portrait to landscape

4. SEAL

- Using the roller, roll from bottom to top applying pressure
- Repeat this to cover the entire surface
- Ensure you roll right over the edges of the card
- Turn the card 90 degrees clockwise from landscape to portrait and repeat the above steps.
