## DualUV™ End of Press on CD102

### Benford Dual UV©

Every Benford UV system is supplied as “Dual UV” as standard. This provides a conventional UV system plus a single Benford **ecoUV™** lamp cassette that can be interchanged with one of the end of press conventional UV cassette.

With this in place, and using the latest low energy UV curable inks, users can print at normal press speeds, dramatically decreasing electrical consumption.
