Eastland

COMPOUNDING

WORLD LEADERS IN RUBBER COMPOUNDING

Eastland Compounding is a leading custom rubber compound manufacturer based in Manchester, Great Britain. We have the right mix of knowledge, expertise and technological capabilities to deliver the highest levels of quality and service every time.

At Eastland Compounding, your bespoke compound is supported by our complete range of services:

- **Flexible Delivery Schedule**
- **Technical Development Centre**
- **Individual Technical Support**

We are committed to the highest standards of integrity and this core value plays an essential role in our daily business activities.

Eastland Compounding prides itself in creating unique solutions that enable customers to reduce total production costs.

TECHNICAL EXCELLENCE:

Whatever your technical specification Eastland Compounding has the team to turn your requirements into reality.

A dedicated Technical Sales Manager is here to help you from your initial enquiry through to post production.

Our support doesn't end at delivery, our technical team are available for reformulations, production improvements and trial batches.

We value all of our customers, and aim to develop strong partnerships to create the best environment for success, in every project; no matter how big or small.

PRODUCTS:

With over 2,000 live formulations available, we are sure to have a solution to meet your needs.

Eastland Compounding can help you to develop new custom compound formulations, to meet your exact specification, tailored to your individual process needs.

We have a number of approved formulations meeting various specifications:

- **EPDM: Including EN681-1WA & WRAS**
- **approved**
- **NBR: Including BS52751**
- **NR: Including BS1154**
- **CR: Including BS2752**

We aim to keep you one step ahead by continuously improving and revalidating your compounds.

MIXING CAPABILITIES:

With three intermeshing and tangential mixing lines Eastland Compounding have the technology to produce highly bespoke custom compounds:

- **Fully automated Farrel K5 intermesh with inline straining**
- **Two fully automated tangential mixing lines**

Our off-line capabilities also include:

- **Cold Feed Extrusion**
- **Calendering**
- **A Slitting Facility**

All three lines have twin automatic strip packaging capabilities and our finishing department can offer all forms of compound presentation.

In addition we can ship the finished compound in any specified packaging requirements you may have.

HEALTH AND SAFETY

Health and Safety is central to everything we do at Eastland Compounding. We are committed to ensuring the health, safety and welfare of our employees, visitors, contractors, neighbours and the general public.

ACCREDITATIONS

Eastland Compounding has worked to a British Quality Standard since 1985 and have gained the following accreditations.

2002 - ISO 9001

2003 - Health and Safety Standard ISO 18001

2005 - Accreditation to TS16949

Upcoming – We are currently working towards attaining the environmental standard ISO 14001
