Axor Citterio E
The **ESSENCE** of *LUXURY*

The *charm* of **Axor** Citterio E lies in the fact that it is a combination of **functionality**. This collection is a perfect combination of timeless water is celebrated and treated as something special.

The new collection, which **Axor** developed in conjunction with everyday items. Including the bathroom itself. It's a collection for wash integrated into any *classic* or **modern** ambience - making

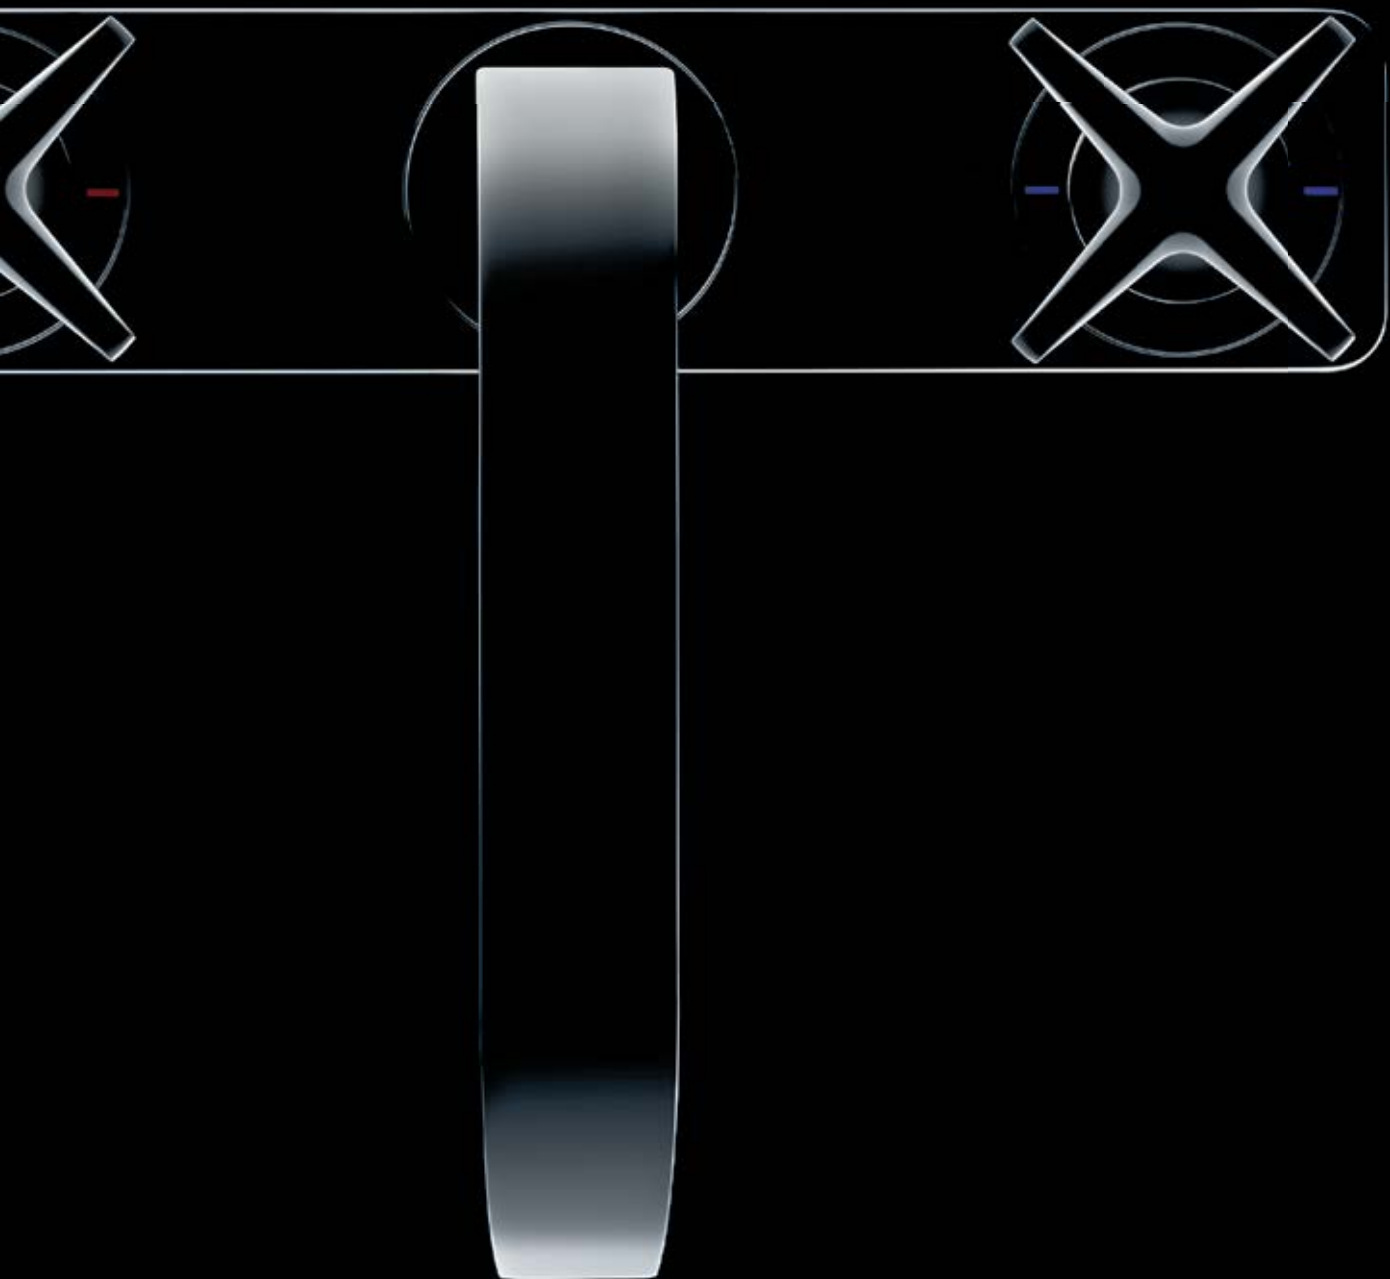

of the familiar and the brand new, of classic appeal and **modern high quality** and *refined elegance*. The day-to-day use of

Antonio Citterio, the Italian 'Gentleman of Design', also enhances basins, showers and bath tubs, and the products can be seamlessly them ideal for both city apartments and art nouveau villas.

How is it possible for a wash basin to adequately reflect the sheer opulence of water? Through the use of precisely-formed surfaces and edges which, together with gentle curves, make this collection soft and harmonious to the touch. Not to mention classic forms like the elegant, iconic handles. Has a mixer ever been such a joy to use?

/ Around the wash basin /

Elegance and ease of use are combined in this single lever basin mixer. Precise surfaces and edges, combined with soft shapes and SoftCube design elements, as well as the slimline joystick handle all demonstrate exceptional quality. The elegant Axor Universal Accessories perfectly complement this product.

/ Around the wash basin /

The 3-hole basin mixer features the iconic star handles. These are ergonomic and contoured with soft curves, so that they sit comfortably in the hand and are easy to operate.

/ Around the wash basin /

Axor Citterio E

Even in a bright space - such as a hotel bathroom with an abundance of white marble - the single lever basin mixers look extremely elegant around the wash bowl. Particularly extravagant in red gold, an elegant surface finish which is manufactured exclusively in the Axor manufacturing department, Axor Manufaktur.

Twelve exclusive special finishes are available through Axor Manufaktur, who use a modern, environmentally-friendly PVD method, making them particularly elegant and high-quality. Thanks to their high scratch resistance, durable surface sheen and high resistance to cleaning products and corrosion, these refined products are exceptionally durable and ideal for projects such as hotels where enduring quality is required due to increased levels of use.

/ Around the wash basin /

Sophisticated design makes showering easier for us: we have the diverter handle, featuring clear symbols, to intuitively control the outlets and the iconic star handle to conveniently control the water volume. The temperature is regulated via the cylindrical thermostat handle. In the elegant shower set with double railing, the ergonomic, smooth slide helps with adjusting the height of the shower.

/ In the shower /

There are virtually no limits to the possibilities when it comes to customising the design: the thermostat module 38 x 12 can be installed horizontally or vertically - with individual escutcheons for 3 outlets or with a plate for 2 outlets. When used in combination with the base set, which follows the modular principle of the tried and tested Axor ShowerCollection system, installation is simply and perfectly accurate with consistent 10 mm spaces between items for a structured, well-ordered appearance. With the motto "Just mix it!", the modular system and 12 x 12 product range offer greater opportunities for incorporating more individuality and creativity into the shower design, for example using the shower module or the porter unit. Matching Axor Universal Accessories for the shower can also be used to complete this elegant picture.

/ In the shower /

/ In the shower /

The Select technology makes showering easier and more convenient. Particularly in a hotel bathroom, where the guest needs to be able to operate the mixers intuitively. The outlets are easy to control, at the simple push of a button. The shower set's multi-functional slide also makes it easy to adjust the spray angle of the hand shower to suit the height of each individual user.

This timelessly classic design, featuring precise edges and soft shapes, is also continued in the bath tub, for example the star handles on the floor-standing bath tub thermostat. Switching from bath filler to hand shower using the integrated diverter is effortless – even with soapy hands.

/ Around the bath tub /

The 4-hole thermostatic rim-mounted bath mixer is an elegant product for the bath tub. What's more, its handles can be operated conveniently and intuitively: the temperature is regulated via the cylindrical handle, and the water volume via an ergonomic star handle.

/ Around the bath tub /

Axor Citterio E

The floor-standing thermostatic bath filler is a prominent eye-catcher in the room. The simple manual shower features two jet types, the elegant star handle controls the water volume and the temperature can be safely adjusted via the thermostat.
