

## **Course Syllabus**

### **COSHH – (Control of Substances Hazardous to Health)**

This course is aimed at all personnel who work or come into contact with Hazardous Substances within their working day.

The aim of the course is to;

- Raise awareness of COSHH within the Manufacturing industry.

By the end of the session candidates will be able to:

- Describe the legislation surrounding COSHH
- State the relation between the legislation and the organisation they work for
- Identify the range of products and substances that are covered by COSHH
- State the forms that Hazardous Substances can take
- Identify the routes of entry of hazardous substances into the body
- Describe the hierarchy of control measures that are used when dealing with hazardous substances
- List suitable PPE that could be used when using hazardous substances

A certificate of attendance will be awarded to all candidates who successfully complete this course.
