**PRODUCT DESCRIPTION**

The Randall Planstore Rolled Filing System is a unique way to store extra long drawings such as seismic sections, geological prints and full scale drawings in the motor industry.

Drawings are rolled-up and stored in the individual holders and secured by coloured end caps. The number of holders per unit is 300 and the average number of drawings per holder is 5 (dependent on weight and length of drawing).

**FEATURES**

- Large Capacity storage
- Index Referencing caps
- Steel body for strength

**BENEFITS**

- Maximising storage per cabinet footprint
- Easy to use
- Can be dismantled and re-assembled
