We are looking for a Freelance Creative Designer / Developer to join the team and assist in covering various projects as and when needed.

Role Responsibilities:

The successful applicant will be responsible for designing, coding and modifying web-based assets including web apps, websites and other online based media.

As well as a proficiency in coding, you will also need to have strong communication and creative skills so that you are able to help specify, design, illustrate and build digital assets from conception to delivery.

You will be expected to problem solve and work on your own initiative as well as part of a team.

Role Duties:

- Regular exposure to business stakeholders, including applying your expertise to many interesting technical problems.
- Communicating regularly with colleagues and stakeholders.
- Planning and delivering software platforms used across multiple products and organisational units.
- Testing and finalising programs and digital assets.
- Accurately estimating timescales, costs and plan work.
- Delivering on time to tight timelines.
- Following company policy in terms of project confidentiality, producing and archiving product documentation, as well as any reports and recommendations.
- Providing guidance where requested.

Essential Skills

- Web Programming Skills (with cross-browser compatibility):
  - *JavaScript*
  - *JQuery*
  - *CSS (all versions)*
  - *HTML (all versions)*
  - *PHP*
- Software Skills:
  - *Adobe Illustrator*
  - *Adobe Photoshop*

- Object-Oriented Design
- Multimedia Content Development
- Leveraging API's (including Vimeo API) and frameworks.
- Applicant must have a strong understanding of UI/UIX, cross-browser compatibility, general web functions and standards.
- Strong grasp of security principles and how they apply to online applications.
- Deep expertise and hands on experience with Web Applications and programming languages such as HTML, CSS, JavaScript, and JQuery.

Desirable Skills:

- Working knowledge of E-learning, SCORM and LMS systems.
- Digital Video Editing and Animation using Adobe After Effects and Premiere.
- 3D Design and Animation skills using 3D Studio Max.
- Deep functional knowledge or hands on design experience with Web Services (REST, SOAP, etc.) would be beneficial.

Qualifications:

We require you to have a relevant degree or diploma qualification, and/or a strong demonstrable portfolio of experience, for this role.

Relevant subject areas include:

- computing and computer science
- fine art/visual art
- graphic and media design
- multimedia/interactive technology/design/animation
- software development/engineering
- web development
- 3D design and animation

Rates:

This is a freelance opportunity and hourly/day rates are to be agreed.

Working Hours / Terms:

We operate our core business hours Monday – Friday between 9:00am – 5:00pm. However, the amount of time you will be required to work will be negotiated on a project by project basis and you will largely be responsible for keeping track of those hours and delivering on time. You may be expected to work outside of regular business hours in order to deliver some projects.

You will work remotely however you may be expected to physically attend meetings in the UK, from time-to-time. Regular online conference meetings will be conducted regularly, as part of ongoing project work.

How to apply:

If you are interested in this role, please apply, in writing to info@pixel-spark.com, with the following:

- Covering Letter
- Up-to-date CV
- Portfolio / Examples of past work that is relevant

UK Residents only, no agencies please.
