### About the company

Founded in 1991, CEI has built up a workforce of more than 50 qualified engineers with a strong reputation for quality. We're trusted to do what we say we'll do.

Working throughout the UK from our Head Office in Southampton and our Satalite Office in Lewes.

This is underlined by key organisations in our industry including NICEIC, GasSafe, ECS, City & Guilds to name a few.

### Who we work for

As an approved partner of Hampshire, Surrey, East and West Sussex and Southampton Council, we install maintain and service all electrical and mechanical systems.

Our customers include private developers, defence organisations, builders, contractors, industrial and commercial businesses.

We have installed world-class systems for major football clubs and other sports arenas.

### The CEI team

We have strong and long-lasting relationships with customers all of which trust us to deliver high quality results.

All our engineers are fully qualified and hold CSCS cards with our senior site engineers holding SSSTS or SMSTS qualifications.

We take pride in delivering all our projects to the highest of standards giving you the assurance of quality and experience.

### Our Capability

We work on projects of every scale in every kind of premises - schools, offices, banks, domestic houses, large hotels, sporting facilities and industrial premises.

We've built up a strong reputation for doing what we say we'll do and doing it the way our customers want.

This pedigree is recognised through accreditation by the important organisations in our industry.

### European Computer Head Quarters

A full design and build project for both incorporating mechanical and electrical, taking the employees requirements into account and developing them to provide a high-tech office and excelent example of quality and future systems. With scene setting controls including audio visual intergration combined with advanced temprature control systems.

### Veterinary surgery

Fully equipped veterinary surgery for all types of domestic pets. Distribution of medical gasses throughout including supplies to surgery and clinical rooms. With a ventillation package coupled with a Building Management System gave the end users complete control over the installed systems.

### Southampton University

World leading refurbishment of teaching and learning areas which provide education in coding and electronic controls. Intelligent emergency lighting which tests and automatically reports direct to the maintenance team. Advanced control systems intergrated in audio visual equipment.
