CROSSVILLE®

## About Laminam by Crossville

A tile that's measured in feet—not inches, yet is only a few millimeters in thickness and can be installed in places tile was never previously an option? **Yes!** Laminam by Crossville's innovative porcelain tile panels are changing the way the world sees—and uses—tile. Manufactured with unique technology, Laminam collections are ideal for skinning surfaces in sophisticated, nearly uninterrupted style. The panels' outer dimensions of 1M x 3M and very lean profiles (just 3+mm for walls and 5.6mm for floors and walls) are versatile and flexible with the performance characteristics expected of porcelain tile. This results in design-forward, low maintenance looks that will stand the test of time for floors, walls, and other surfaces in commercial and residential settings, inside or out.

# Large Format Porcelain Tile Panels - Table of Contents

Fashion and performance driven, Laminam by Crossville clears the way for modern style and technical innovation. The porcelain tile panels are available in three collections: Foundations, Natural Inspirations, and Urban Influence. From the more traditional textures of Foundations, to stone and wood influences found in Natural Inspirations, to the beat of the city found in Urban Influence, each series in the collections is available in 1M x 3M. These large format porcelain tile panels bring uninterrupted, flawless beauty to space and form.

## Opificio Mediceo

5.6mm Special Order Only  
Porcelain Tile Panel LF

The Opificio Mediceo series resurrects the incomparably precious alberese stone, no longer found in nature, in enduring Laminam by Crossville® porcelain. Now guarded in the historical archives of the prestigious Opificio delle Pietre Dure of Florence, alberese graced the residences of Italy's ancient noble classes before being coveted into oblivion.

## I Metalli

3+

### Porcelain Tile Panel LF

I Metalli brings the look of aged metal, but with the ease of maintenance only porcelain can bring. With texture evoking diamond plate, the distressed, oxidized look is both industrial and luxurious thanks to tones of iron, brass, copper, and bronze. Changes in gloss refract light for a multidimensional surface sure to bring interest to any space.

## Applications

Laminam® is suitable for many interior and exterior applications:

### BUILDING SECTOR

Floor and wall coverings, partition and storage walls, false ceilings, surface finishes and restoration, insulated panels and tunnels.

### INTERIOR DESIGN

Surfaces of kitchen and bathroom tops, cupboards, tables, desks, doors and furnishings in general.

### SHIPBUILDING SECTOR

The lightness and high technical properties of Laminam make it suitable for walls of cruise ships and sports crafts.

### COMPOSITE AND STRUCTURAL PANELS

The porcelain tile panels can be placed over other materials to create extremely light and particularly resistant composite and structural panels suitable in all those cases that require high resistance and reduced weight load on the surface.

## Technical Specifications

### LAMINAM 3+ & 5.6MM

Laminam porcelain obtained by wet grinding of clayish raw materials, granite and metamorphic, feldspar-containing rocks and ceramic pigments. Compacted by a special shaping in compactor and sintering at 1200°C, with controlled firing.

## Technical info

### LAMINAM 3+

Laminam 3+ is made up of the basic tile panel with the structure reinforced with fiberglass matting applied on the back using special adhesive. Thickness: 3mm plus .5mm fiberglass mesh.

Use of Laminam 3+

- Interior and exterior wall coverings

### LAMINAM 5.6MM

Laminam 5.6mm is the tile panel without reinforcing mesh, thickness 5.6mm

Use of Laminam 5.6mm

- Interior floors below, and slab on interior floors above grade concrete and interior and exterior wall coverings. (See Laminam Technical Guide for more information).
- **Polished finishes require a penetrating sealer prior to grouting. Please Note: Due to DCOF value, these tile panels are not recommended for applications in wet areas or areas where standing water may occur.**
- **Due to the grooved texture, when rail cutting Laminam Satori Beige, Crossville® recommends scoring face down.**

*Information listed here is subject to change. Please refer to [LaminambyCrossville.com](http://LaminambyCrossville.com) for the latest, most accurate information.*

**Third party certified, pre-consumer, recycled content certificates available on website.**

## Edge Finishing Techniques

Laminam 3+ and 5.6mm  
Using Profiles

Laminam 5.6mm  
Field Applied Bullnose

Laminam 5.6mm  
Back Mitered and Epoxied

## Distinctive values

### MAIN FEATURES

Dimensions 1000mm x 3000mm  
 Perfectly Flat  
 3+: 52 lbs / pc  
 5.6: 94 lbs / pc

### CHEMICAL RESISTANCE

Laminam resists organic and inorganic solvents, disinfectants and detergents. It can be easily cleaned without affecting its surface characteristics; the only product that can attack the tile panels is hydrofluoric acid.

### WEAR RESISTANCE

Laminam is highly scratch proof and resistant to deep abrasion. The properties of the tiles remain unchanged even after intensive use and frequent cleaning.

### HIGH FLEXURAL STRENGTH

Laminam has a high modulus of rupture. 3+ and 5.6 are both 50 MOR which are high values. Typical porcelain value is 35-37.

### FROST RESISTANCE

Laminam's average water absorption is 0.1% therefore it is frost resistant and suitable for any weather condition.

### FIRE RESISTANT

Laminam does not contain organic material therefore it is resistant to fire and high temperatures. In the event of fire it does not release smoke or toxic substances.

### ENVIRONMENTAL STATEMENT

Laminam by Crossville collections are excellent choices for those seeking green surfacing solutions for design projects. Laminam porcelain tile panels are responsibly made with natural raw materials in one of the most advanced, environmentally sound manufacturing facilities in the world, located in the heart of Italy's renowned tile production region. Reflecting global standards in sustainability, the Laminam manufacturing process uses leading edge technology and recycling practices and incorporates innovative methods to minimize waste and generate energy without depleting the earth's resources.

Laminam products, created to meet Green Building Council standards, support specifiers' goals for durable, healthy environments. The porcelain tile panels do not release emissions or substances into the environment and require minimal maintenance, contributing to indoor air quality and providing ease of cleaning long term. The panels' superior performance characteristics lead to long product lifecycles—reducing the need for replacement. However, should panels be removed, they can simply be separated from their mesh, milled, and recycled back into the tile production stream.

As porcelain tile panels' popularity grows, the green innovations at the Laminam manufacturing facility advance, as well. The plant's recently installed photovoltaic roof has already produced 1 GWh of energy and is capable of generating an estimated 1.387 GWh within a year, cutting the CO2 emission into the atmosphere by 617 tons and empowering the Laminam plant to self-generate 15% of its energy requirements.

Distributed exclusively in the U.S. by Crossville, many Laminam porcelain tile panel collections are stocked on American soil. This not only allows for prompt order fulfillment, but it also aids in minimizing fuel and energy consumption related to international shipping and transportation.

### CHROMATIC PROPERTIES

Laminam does not contain organic pigments and is resistant to UV rays. Even if subjected to severe climate changes, the colors remain stable.

### GRAFFITI

Laminam is a graffiti resistant ceramic surface; it is easy to clean and even the strongest paints can be removed.

### SUSTAINABLE

- The use of hybrid kilns that combine gas and electricity significantly reduces CO2 emissions in the atmosphere
- Laminam has led the way to a photovoltaic system being installed on the roofs of its two Fiorano Modenese plants
- Over a year, this photovoltaic system guarantees the production of around 1,050 GWh, thereby enabling the company to produce 10% of its energy requirements
- In terms of CO2 reduction, Laminam's photovoltaic roof system eliminates the release of 525 tons of CO2 into the atmosphere annually
- Member of the Green Building Council Italia, this Italian association of manufacturing leaders strive to transform the building market towards environmental sustainability and to build livable communities. Partners of GBC Italia promote environmental, economic and social responsibility by innovating the way in which buildings are designed, built and used.
