

POWYS, WALES | WATERS & SOFT DRINKS

Having read Agriculture and Food Marketing at Newcastle University, William Watkins returned to the family farm in 1988 and twelve months later decided to diversify the farming business by packing mineral water into cuplets for the airline industry. In 1995 the business installed their first bottling line and began this incredible journey!

Radnor have a passion for making the simplest of things taste great and now produce a wide range of products in plastic, glass and tetra cartons including their very own pure spring water, fruit juices, flavoured water, healthy children's drinks and premium adult presses.
