

Water Storage Tanks (GRP)

Carter Pumps have been installing water storage tanks of all types for many years. Whatever your application we are sure we can help.

One piece tanks

An economical option for cold water storage. Sizes range from 43 litres to 24,000 litres

- Pre-insulated one piece tanks are available with insulation in varying thicknesses
- Options include raised service box, screened overflow / spill weir, multiple connections
- Fully self-draining one piece tanks are available
- All one-piece tanks comply with all relevant British Standards and Water Regulations
- All materials used have been approved by WRAS (Water Regulations Advisory Scheme)
- Can be supplied as Two-Piece for restricted access

Sectional cold water tanks

Ideal for the storage of large volumes of water and for applications where access is restricted. Available for storage up to 1,300,000 litres.

Available with plain or insulated panels. Uninsulated water tanks are used for storage of process water. Insulated tanks are supplied with suitable connections in compliance with WRAS for storage of potable water.

Multi-part / knockdown tanks

A quick assemble water storage solution comprising six panels - four sides, base and cover. Suitable for either permanent installation or alternatively it can be dismantled and re-used for another application. Manufactured from glass reinforced polyester, the tanks have an integral foam core, which provides insulation help to maintain water quality.

Multi-part tanks can be custom made to your order and are an ideal solution where access is restricted to a standard doorway

Ancillary Items

Carter Pumps supply and install a full range of ancillary items such as full flow valves, fittings, screened vents and overflows.

Carter Pumps can also help with . . .

Civil works. Casting of concrete base.

Ground works. Undertaking all types of ground works including trenching of pipes and cables.

Electrical works. Installation of low level floats / alarms.

Cleaning out, refurbishment and sterilisation of old tanks. Carter Pumps engineers are confined space trained.
