Each and every product has not only its part to play but serves to improve standards for all.

# Polystatic Mops *PCM403, PSM400*

**Dust care and control is fundamental to the majority of public area cleaning programmes, as is spot cleaning when appropriate. The PolyStatic DISPOSABLE mop system, offers the best of both worlds whilst being fully cost controlled.**

The PolyStatic dusters cling to the special PolyMop 40cm cleaning head, held firmly in place by our special Xtra Grip Dust mop holder. The mops are 100% polyester, generating electrostatic precipitation by the movement over the surface being cleaned, the more you use it the better it works. It really does act as a dust magnet which is exactly what you want. Eventually the mop will be dirty and need replacing, just throw away the old and put on the new.

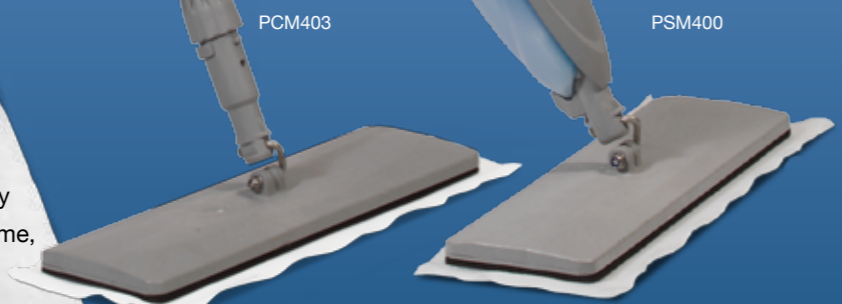

The PolyStatic system has equally been extended to spot cleaning where damp cleaning is necessary to ensure the removal of marks such as coffee spills, soft drinks, wet feet, etc, something MORE than just dust.

PolyStatic is our original electrostatic dust control material, 100% polyester, no added chemical impregnations and the more you use it the better it works but with no chemical residue left on the floor surface.

For dust control sweeping the PolyMop holder is both efficient and exceptionally convenient, anybody can use one anytime, so as and when time permits clean, dust free floors are quick and easy to achieve and are really an extra bonus for everybody.

Easy Velcro mop attachment

Standard Specification						
Model	Bottle	Pad Size	Mop Type	Fixing	Weight	Dimensions (H)
PCM403	-	400mm	PolyStatic	Velcro	1.1kg	1400mm
PSM400	400ml	400mm	PolyStatic	Velcro	1.1kg	1400mm

See page 26-27 for full mop kits, holders and mops

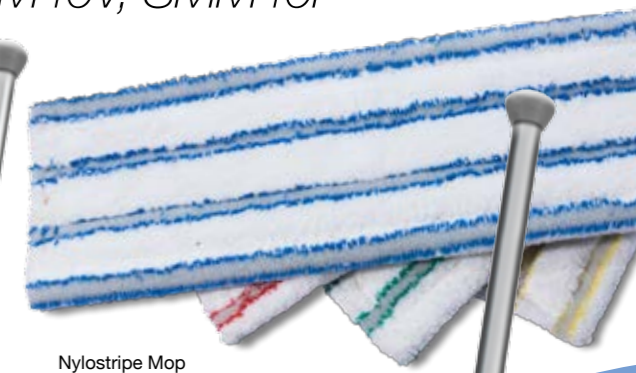

# Spraymop Master *SMM40V, SMM40P*

**There are an increasing number of applications for spot or maintenance mopping, dedicated to keeping a visually good appearance to floor surfaces in high profile environments.**

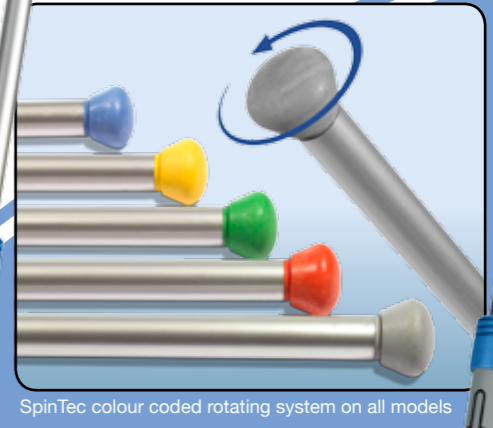

The Spraymop Master starts with pre-wetting the clean mop before use and simply using the on-board liquid spray system to maintain the level of dampness needed for the specific application.

The correct flat mopping technique is to always work backwards toward the exit so as not to immediately walk over the newly cleaned surface. The SprayMop sprays behind the mop head (so it is absorbed as it passes over the liquid). This is the correct way to spot clean.

Two systems are available for either Velcro (SSM-40V) or pocket (SMN-40P), Nylostripe mop heads both achieving the same high standard of performance.

Nylostripe Mop (10 pk blue PN:629090)

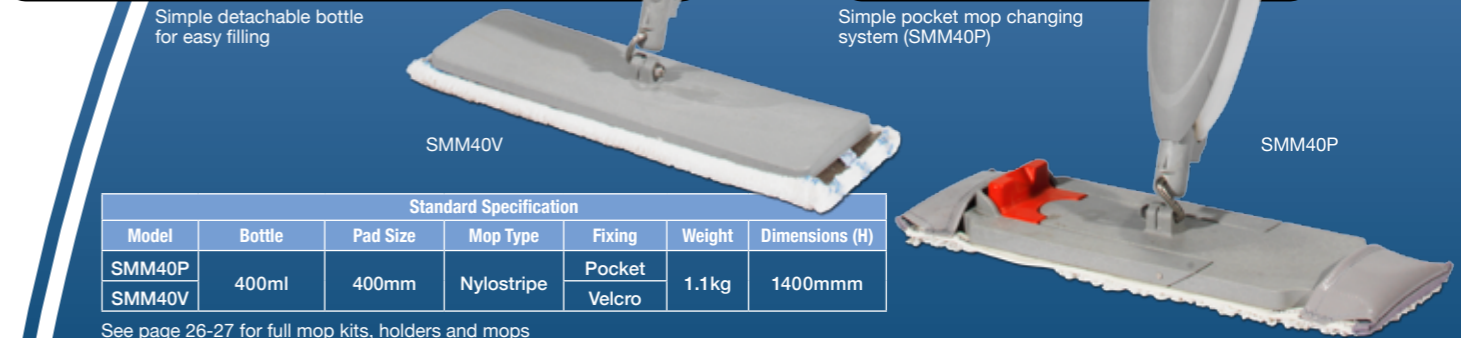

SpinTec colour coded rotating system on all models

Simple detachable bottle for easy filling

Simple pocket mop changing system (SMM40P)

Standard Specification						
Model	Bottle	Pad Size	Mop Type	Fixing	Weight	Dimensions (H)
SMM40P	400ml	400mm	Nylostripe	Pocket	1.1kg	1400mm
SMM40V				Velcro		

See page 26-27 for full mop kits, holders and mops

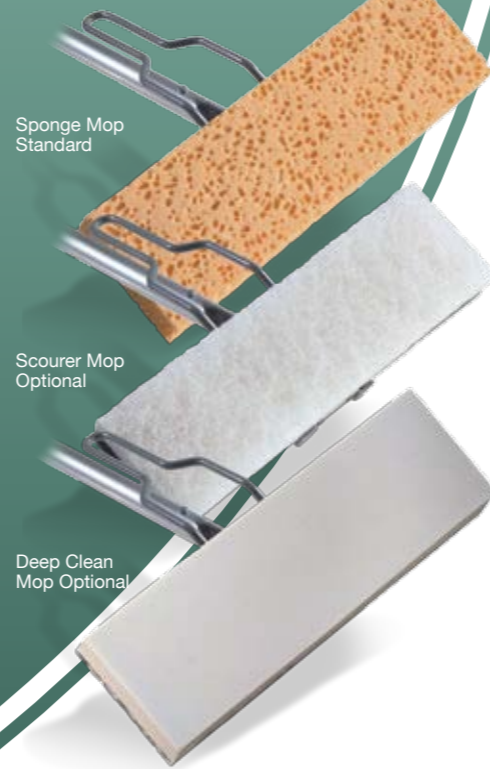

# MultiMop MM30

Super clean floors... twice as fast... not to mention walls or even ceilings. Yes the professional MultiMop is one of the simplest, most effective smaller area mopping systems you will ever use but, like all the best ideas, it is the totally thoughtful design concept that makes it so outstanding.

A unique giant 35cm (14") sponge mop that will really out perform the rest. The sponge absorbs more than 10 times its own weight in liquid so you can really put plenty down and pick it all up again and to cap it all, its very operational design makes it virtually self cleaning.

The 30 litre pail runs on 4 twin-wheel castors, so no more lifting buckets all the time - where you and your mop go, the bucket goes with you... on its wheels. This is professional convenience mopping.

Optional Mops

Sponge Mop Standard

Scourer Mop Optional

Deep Clean Mop Optional

MM30	30L	350mm	Sponge	4x50mm	340x475x320mm

# Hi-Bak HB1812

The HB1812 represents a super compact, truly professional dual compartment mopping unit.

Our unique parabolic separator allows a generous 18 litre front clean water container and 12 litre dirty water section to the rear.

The 60% / 40% split in container capacity is genuinely practical, allowing larger areas to be cleaned before emptying and refilling is required.

For smaller applications the separator may be reversed and the press placed in its lower mounting position, resulting in a truly extra compact system. In the event of a single 30 litre bucket requirement, the parabolic separator can be easily removed.

HB1812 Low press mounting

HB1812 High press mounting

Mop Kit DTK1

Folding sturdy handle

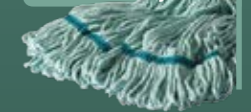

Parabolic water separator

Colour coded buckets

DTK2 Pocket

DTK11 Hang-on

See page 26-27 for full mop kits, holders and mops

# MidMop *MMT1616 & B, MMT1616K & B*

The MidMop is always on hand and easily stored, the compact design provides a go anywhere twin bucket mopping system.

What is important about the MidMop design is that the mop press is conveniently mounted in the middle and above the clean and dirty water buckets with the very real advantage that you have full access to both buckets all of the time but, equally, the press is in the optimum position to be used without continuously bending down.

An additional advantage of the mid-mounting is that both of the 16 litre pails can be removed and replaced without moving the mop press.

The integrated water diverter ensures all dirty water is directed into the red dirty water bucket at all times ensuring a good and adequate mop rinsing facility before using the blue clean water bucket.

When a mopping system is easy to use with everything in its place it plays a major part in improving the standard.

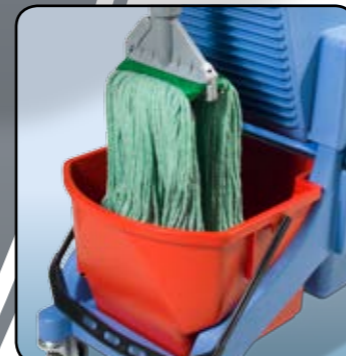

MMT1616B Standard

Mop kit DTK11

The RIGHT EQUIPMENT for the RIGHT JOB is the RIGHT WAY to go.

Standard Specification							
Model	Capacity Clean	Capacity Dirty	C/W Handle	C/W Foam Pad	Press	Castors	Dimensions (WxLxH)

MMT1616K			Yes				
MMT1616KB			No				

Compatible with Kentucky or flat mops

# MidMop *Create the unit you need*

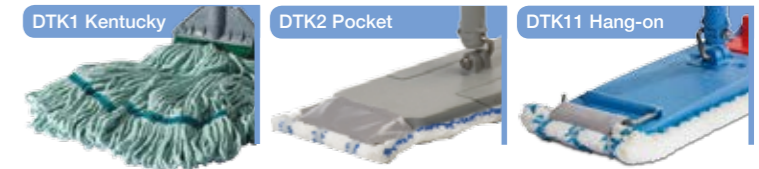

A range of accessories allow the user to create a MidMop unit that precisely suits the environment to be cleaned.

Automatic water separation (MMT1616/B)

Internal water discharge diverter keeps your clean water... clean, as it should be. Dirty water is simply diverted to the 16L red dirty bucket. The new Nylo Twin 40 Flat mop is reversible so can be used on both sides giving two mops in one. The 5L Swing Pail can be added to carry those extra cleaning essentials creating a versatile cleaning system.

The clever on-board mop storage keeps everything neat and tidy when in transit and when stored. Suitable for Kentucky or Flat mops the Midmop is ready to work. Access to both buckets is easy whichever mop you choose to use.

See page 26-27 for full mop kits, holders and mops

# TwinMop™ TM2815, TM2815W

The TwinMop series was a world first, being compact in size, robust in construction and incorporating our unique AWS (Automatic Water Separation) system.

AWS means you only work from the front, oversized, 28 litre, clean water bucket, with dirty water automatically discharged into the rear, red dirty water pail.

The 2815W has all the features of the 2815 but incorporates a clever on-board 30 litre lidded waste bin and deep storage tray allowing increased scope within the cleaning regime.

# VersaMop VMV2222, 2215W, VMM2214

The VersaMop chassis is a rugged Structofoam concept, but by virtue of its designed simplicity it is able to accept three different cleaning systems as standard.

The VersaMop chassis is compact in design and strong in construction but equally important, it is designed to accommodate 3 full size mopping kits to cover larger areas totally without compromise.

Additional optional accessories are easily added transforming the unit into a comprehensive cleaning module with on board waste and storage facilities as required.

The VMV2222 with the Allmops press provides a full 22 litre dual bucket system suitable for both Kentucky and Flat mops.

The VMV2215 incorporates our Wide Press System for Pocket or Velcro mops.

The VMM2214 MopMatic System allows for pre-prepared or pre-impregnated mops to be used and disposed of after use.

Optional 6 litre pail and caddies

Optional Twin 5 litre swing pails

Allmops press

Optional 30 litre waste kit

# NPT System *NPT1405, NPT1415, NPT1605*

The NPT janitorial trolley design has never been better and simpler in design or construction.

## Small NPT1405

The NPT1405 is the extra compact trolley designed to provide full mopping and waste facilities together with our added twin 5 litre swing and removable pail modules and the quick-fit lidded waste system accepts universal 120 litre (700mm x 1100mm) Poly waste bags.

The universal mopping system incorporates our Allmops press, which can be used with both Kentucky or Flat mops, together with generous twin 17 litre coloured coded pails.

Allmops press

Allmops press

## Medium NPT1415

The mopping system is second to none with our Allmops press and 17 litre colour coded mopping pails, allowing the use of both Kentucky or Flat mop systems. The quick-fit waste system accepts universal 120 litre (700mm x 1100mm) Poly Waste bags. The two top pails are a generous 6 litre capacity.

The storage trays themselves are designed to accept a series of useful hooks and attachments (see accessory catalogue).

Rotating buffer protectors

Twin 17 litre buckets

DTK1 Kentucky

DTK11 Hang-on

DTK2 Pocket

See page 26-27 for full mop kits, holders and mops.

## Large NPT1605

The NPT1605 is the larger model within the NPT range, providing all the features of the NPT1415 but with yet more additional storage capacity and twin 10 litre, colour coded top pails on board as standard. A twin 17 litre colour coded mopping system for Kentucky or Flat mops. The quick-fit waste system allows use of universal 120 litre (700mm x 1100mm) Poly Waste bags.

Optional 70L twin waste system

Optional 5L swing pail (1405)

Accessory hooks (1415/1605)

NPT1415					2x6L		570x1090x580mm
NPT1605					2x10L		570x1090x580mm

# VersaClean VCN1404, VCN1414

The VersaClean program of janitorial trolleys is just about as classic as you can get, providing a full range of sizes, small, medium large and AT (all terrain).

All models are available with optional kits suitable for Allmops Press, wide press or MopMatic and supported by a comprehensive range of mop systems and accessories to suit all needs. The important part of any cleaning concept is to be sure that the size, the facilities and the function are exactly right for the specific application.

Standard Universal Dual Waste System 120L / 2x70L

The VCN1404 is the smallest most compact model shown here with BK2 and DTK1 kits.

VCN1414 with BK3 and DTK2 kits

The VCN1414 has added storage facilities and is shown here with BK3 and DTK2 kits.

Optional mop kits

See page 26-27 for full mop kits, holders and mops.

# VersaClean VCN1604, VCN1606 Twin Box

The VersaClean 1604 series is, without doubt, the most complete and popular model within the VCN range.

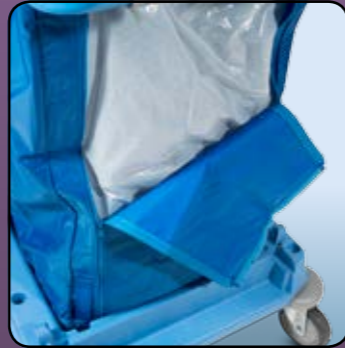

Plenty of storage capacity, a choice of mopping kits and available in both the fully open and also the twin box closed drawer design, which is favoured in many high profile areas allowing for more discreet storage of the cleaning materials but with instant access.

Optional 5 litre Swing pails

# VersaClean VCN1804, 1806 Twin Box

The VCN-1804/1806 models have been developed from the ground up, giving priority to exceptional mobility, constructional integrity and usability.

The fundamental difference between the 1804 and 1806 is the change between "Open" design and "Closed" design to cater for a number of higher profile applications where a more enclosed look to the trolley is considered an advantage without loss of usability.

The construction of both models is our well established Structofoam specification equipped with 200mm (8") heavy duty super quiet castors equally suitable for outside use, rotating corner buffers and soft side wall protection.

Fully secure lockable compartment option

Optional Coverall waste bag cover

Standard Universal Dual Waste System

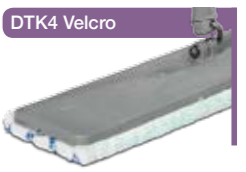

DTK1 Kentucky

DTK2 Pocket

DTK11 Hang-on

DTK4 Velcro

See page 26-27 for full mop kits, holders and mops.

The 1806 system uses sliding Drawer type containers of a generous size and capacity allowing easy access to the contents at all times from either side of the trolley.

# VersaClean *SPN1804, SPN1806 Twin Box Battery Power*

We have taken three of our most popular trolleys and added our 24V PowerDrive technology, resulting in easy drive models that will seriously improve operator efficiency especially where long hours and heavy loads are involved.

The VCN1804 is an all terrain, heavy duty Structofoam janitorial trolley, built to work hard, for long hours in big areas. This is for this reason that we selected this model to become the SPN1804 and to be equipped with the ServoPower 24V PowerDrive system, bringing the highest degree of convenience and operational efficiency when required, with a "runtime" of 3 hours or 10 miles between battery charges and a user friendly, simple, forward and reverse, single button control module.

# Mopping Kits BK2, BK3, BK10

**Mopping, incorporating today's advanced technology, is both effective and efficient.**

It is imperative you select the correct mopping kit and mop design to suit the individual application. The type of floor to be mopped and the frequency of floor maintenance are crucial in the selection procedure and time spent in reviewing the options is time well spent.

## Allmops Allmops Press Kit BK2

**This kit incorporates the unique, patented Allmops Press unit and twin 22 litre red and blue clean and dirty water pails.**

It is vitally important to decide between Kentucky Mopping and Flat Mopping at the very onset of the equipment selection. The press design is such as to accommodate both 400gr/450gr Kentucky Mops or our range of 40cm Flat Mops with equally good results in use.

Hang on mop

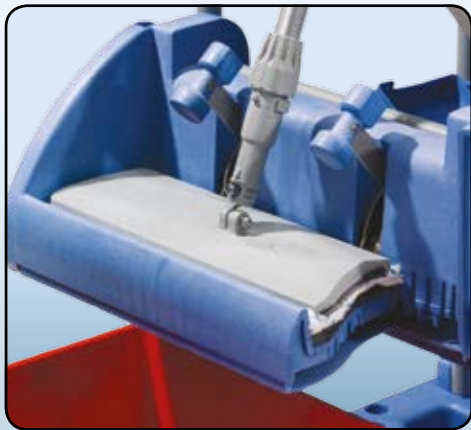

Kentucky mop

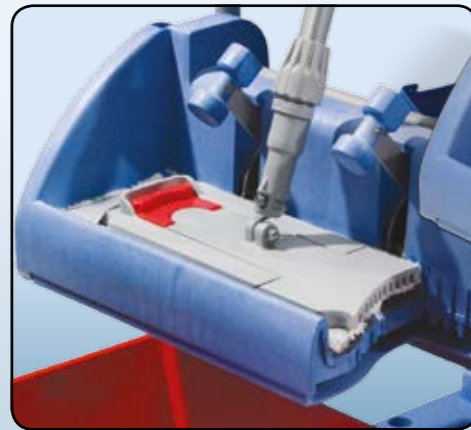

## Wide press Kit BK3

**The wide press is designed to be used exclusively with our Flat Mopping Systems.**

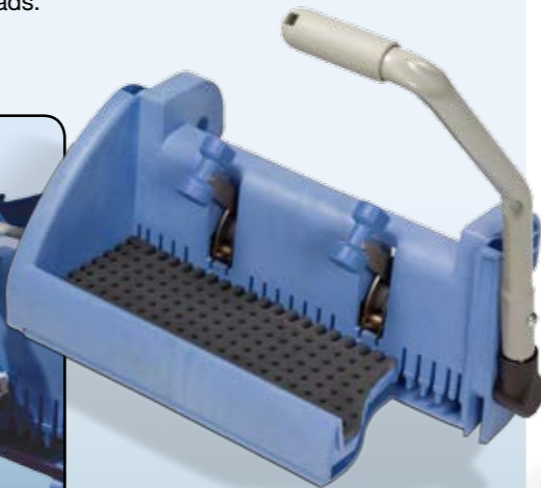

By virtue of the unique power press operational concept this is just about the most convenient and effective wide press design available, and can be used with our full range of Pocket or Velcro backed mop heads.

Velcro mop

Pocket mop

## MopMatic Kit BK10

**MopMatic is a unique mop preparation system, allowing operators to have an almost constant supply of ready to use pre-prepared mops.**

- 1 Load the mop box with 10 clean mop heads...
- 2 Pour the solution into the automatic dispensing reservoir...
- 3 Snap on lid and leave for 15 minutes...
- 4 ... then turn over and leave for another 15 minutes...
- 5 Remove lid, take one mop head and attach to mop, replace lid...
- 6 After use place dirty mops in red bucket and replace lid

Red bucket can hold approximately 20-25 dirty mops with or without net insert.

# Mop Holders *DTK1, DTK2, DTK11, DTK4*

Firstly choose a mopping system that suits your needs and the areas to be cleaned.

**SprayMops** for spot cleaning smaller areas with the big advantage of being fully self-contained and self-cleaning.

**Kentucky mops** for floor washing plenty of water down and plenty up again.

**Flat mops** for high efficiency fast floor cleaning, covering large areas in double quick time.

# Mops

Over the years substantial improvements have been achieved not only in the fabric and efficiency of mop heads but also in the applications and mopping techniques.

The PolyStatic Disposable Mop System provides an answer to electrostatic dust control and general floor maintenance. Used more and more as a daily discipline and equally used damp for spot removal where appropriate.

As far as fabric mops are concerned the specific individual requirements must be taken into account in the selection of the appropriate specification for the floor areas to be maintained. The Kentucky mop is long established and used extensively in warmer climates. The Loop Pocket or Velcro Flat mop provides all the convenience of flat mopping with a moderate water-holding capacity.

The Nylostripe Microfibre mop represents the best of all worlds with good water-holding capacity and excellent cleaning performance by virtue of the active nylon cleaning bar design, allowing floors to be cleaned quicker, with less liquid, thus providing a shorter drying time.

## Polystatic Disposable Mop Dusters

# NuClean NC3000 & AT, NC4000 & AT

## A highly compact professional cleaning system, with a range of 4 'Lock on' detachable modules.

A major advantage of the NuClean system is the easily detachable, and conversely attachable, professional, independent mopping units able to be used in either mode but with added manoeuvrability and usability in detached operation - especially in congested areas.

In addition to the detachable modules for both Allmops Press and Wide Press systems there are two detachable waste modules of 120 litre and 240 litre capacity.

Non-detachable kits are also available where removable units are not required allowing the trolleys to be customised to suit the needs of each application.

## NCK100/200 & AT, NCK300/400 & AT

The NuClean attachment and detachment system is simplicity itself but by the unique interlocking design each arrangement is exceptionally stable and robust, be it in the attached or detached mode.

The NC-3000 master module is equipped with an enclosed 120 litre pedal waste system and storage.

Simple and quick 4 point attachment system

### Waste Modules

### On-board Kits

# ProCare PC100 & AT, PC200 & AT

## Not only looking after public places and spaces but also looking after the public.

The ProCare models are designed to provide all the basic features and facilities to support a dedicated programme of maintenance in larger open areas such as airports, bus stations, railway stations, exhibition halls, etc, where continuous use by the public generates the need for a well-disciplined maintenance procedure in order to LOOK CLEAN at all times.

Fully secure lockable compartments

Coverall waste bag system

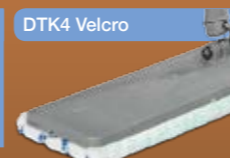

Colour coded lids for area control

**PC100**  
The PC100 module is compact and designed to be selectively equipped in order to be a self-contained mobile work station.

Large storage capacity

Optional mop kits

See page 26-27 for full mop kits, holders and mops

### PC200 & AT

The PC200 is of larger proportions and designed to be equipped with a range of on board mopping facilities or the detachable MidMop twin 16 litre mobile mopping unit which can be used conveniently independent of the PC200 "Mother Ship".

Optional 5L swing pails on PC200

PC200 Kit BK5

PC200 Kit BK4

PC200 Kit MM16

**BK4 Allmops Press Kit**  
Twin 22 litre mopping kit includes clean and dirty water buckets and highly efficient Allmops press.

**BK5 Wide Press Kit**  
Flat press mopping kit comprises a wide 22 litre red dirty water and rinse bucket and matching 15 litre blue clean water facility.

**MM16 MidMop Kit**  
Can be used ON or OFF board. Suitable for Kentucky or Flat mops.

# Compact Range *XC0, XC1, XC2*

The Compact series provides sufficient space and facilities in a small, mobile unit for all the cleaning paraphernalia that staff require when going about their duties.

Each model is based on our heavy duty Structofoam chassis, fitted with rotating protectors to each corner. Two models provide a choice of convenience mopping facilities for spot cleaning, all have a full 120 litre lidded waste unit and a pair of pails. The XC3 provides maximum storage space for material movement.

NSX240

## Designed to provide space saving answers in super strong but smaller sizes.

Twin waste, twin linen, twin laundry modules have always been the most popular in commercial establishments and due to the common dual end design, twin splits are also possible incorporating waste/laundry or laundry/linen, etc...

LLT200

**Twin Sax (NSX240)** A compact mobile twin 120 litre waste trolley, fully lidded providing excellent capacity for normal waste collection and disposal.

**Twin Linen (LLT200)** The same Structofoam chassis and lidded superstructure but designed to take two full 100 Litre washable linen laundry bags. Bags can be easily colour coded.

**Twin Bags (NBT200)** There are 101 applications where mobile bags are required, especially within the hotel and care-home environment.

**Big Bags (NB3002)** For large laundry volumes the NB-3002 has a 200 litre and 100 litre bag (300 litre) to which can also be added a further 2 x 100 litre bag extensions, providing upto 500 litre in 4 detachable bags.

NBT200

NBT200	4x200mm	1x200+1x100L	665x1110x1115mm
NB3002			

## Big in use, small in storage, the Servo-X trolley range will always find favour in the many locations where space is at an absolute premium.

All Servo-X trolleys can be easily folded for storage and the laundry bags themselves can be removed, incorporating drag handles and our top closure system.

Servo-X uses all the same bag sizes as NuKeeper and NuBag units, providing total uniformity and allowing a fully integrated and co-ordinated professional approach to system planning.

X fold design for compact storage

# NuKeeper *NKC10 & AT, NKS11FF, NKS12FF*

The NuKeeper Compact 10 is a genuine exercise in downsizing from the outside without downsizing the inside.

The NKC10 provides a full 10 room capacity both in terms of clean linen and towels but, equally, with two full capacity 100 litre laundry bag extensions as standard.

The NuKeeper single module is based on the full NuKeeper Structofoam All Terrain chassis incorporating large full size 200mm soft ride castors and all around soft bump and corner protection. The storage compartment is generous in capacity incorporating our unique FlexiFront cover, a 100 litre in-situ laundry bag and an optional second can be added as required.

NKC10

NKS11FF

NKS12FF

NKC10 Top storage trays

Optional Spraymop tray kit

Easily locates back or front

Flexi-Front

The NuKeeper flexi-front pull through system is classic in both design and use. Always there when you want it, equally not there when you don't.

## The most generous model in the NuKeeper range providing plenty of shelf space and internal drawer storage.

The three sided panel style is neat, tidy and professional which is complemented by the simple Numatic original pull through front cover system, it stores in the back out of sight during use but is instantly available when needed.

All NuKeeper modules are available with short or long shelf interiors and can all be equipped with one or two on board 100 litre laundry bag extensions. For larger areas used often for extended hours, battery powered models have proven to be of great value and cost effective.

Each bag unit is easily foldable for compact storage.

6L Drawers

NKL15FF

SPT22FF

24V Power supply

## ServoPower 24V PowerDrive System

The SPT22FF model is equipped with our ServoPower 24V PowerDrive system, with easy to use single button forward and reverse operation and 3 hours or 10 miles runtime between charges which, in many cases, means up to 1 week.
