Reduces the volume of rubbish by up to 50%

Industrial Waste Compactor Features

- Structural stability
Sturdy and reliable design
- Durable
Constructed from a high-quality steel
- Meet high safety requirements
To ensure the safety of your operating staff
- Low-noise
Reducing disruption to workers
- Ease of operation
Very easy to use
- Versatile
By removing the compacting arm, the LiftPress can also be used to lift, load, unload and transport

The HanseLifter waste compactors available at Bluetruck are an easy and economical way to reduce your waste management costs by up to 50%.

This clever commercial waste compactor is fully mobile and suitable for use with 800 litre or 1000 litre industrial wheelie bins.

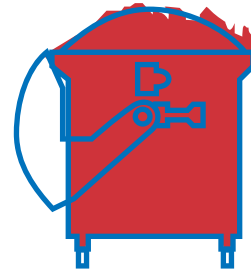

The industrial waste compactor compresses waste by lifting the wheelie bin against the compressing arm therefore not damaging the bin or wheels. It applies a force of 1000 kg compacting the waste by up to 70%.

The HanseLifter waste compactor is a cost-effective solution to your waste management as it is operated manually. The industrial wheelie bin rubbish compactor is ideal for hotels, restaurants, schools, campsites and all businesses who wish to reduce their waste collection charges.

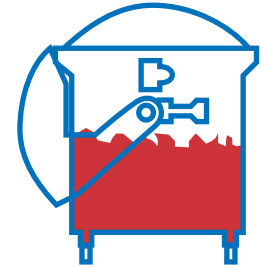

Save on wheelie bin collection charges or simply reduce the number of wheelie bins you have on site.

The commercial waste compactor compressing arm can easily be removed so the rubbish compactor can also be used to lift or transport pallets.

Un-pressed: the garbage bin is full

1 x compressed: waste volume reduced by approx. 50%!
