

CardExchange® Software

CardExchange® is simple to use software for the creation, design and management of ID and access cards, including magnetic stripe and MIFARE™.

Issuing new ID cards can be completed in just a few seconds; gathering and sending information to and from relevant databases is simple.

KEY BENEFITS

- Quick, easy and secure production of cards
- Flexible design including images
- Powerful multiple database integration
- Save time and money

KEY FEATURES

- Flexible and easy design of cards
- Bar codes, images and logos are all simple to add
- Cards can be printed single or double sided
- Compatible with many card systems including magnetic stripe ISO standard and MIFARE™
- Easy to add personal information entered at creation point of from one or more existing databases
- Seamless, quick two-way communication with multiple data sources using proprietary connector software (not reliant on ODBC)
- Mathematical logic can be applied to incoming data to derive information for storage on cards (e.g. age calculated from date of birth data)
- Three tier access control on data display for added security
- MIFARE™ cards can be programmed

IDEAL FOR

- Education and academic establishments
- Public sector and NHS
- Corporates

Choose the level
