

Improve efficiency, profitability and safety
with automated warehouse solutions

vero
Solutions

Make every pallet move 10-15 seconds faster

Increase efficiency with automated identification and data collection (AIDC)

Cut operational costs

Save up to £110K for every excess forklift truck you operate

Eliminate manual scanning

Save 4 hours for every 1,000 pallets moved

Increase inventory accuracy

Stop wasting time checking inventory or looking for lost stock

Reduce the risk of forklift accidents

Prevent accidents, resolve incidents and highlight risk areas

➤ Get true control of your operations

Vero is a suite of automated solutions from Harland Simon, proven to increase productivity, enhance efficiency and improve safety in busy and complex warehouse, distribution and logistics environments.

Using highly accurate real-time location systems (RTLS), Vero provides access to critical location data on your assets, including your pallets, Material Handling Equipment (MHE) and people.

“ Vero has provided a complete step change on how we manage and improve the operations in our warehouse. Our trucks are far better utilised and we are seeing some real cost benefits. ”

Dave Snook, Site Manager, Yeo Valley

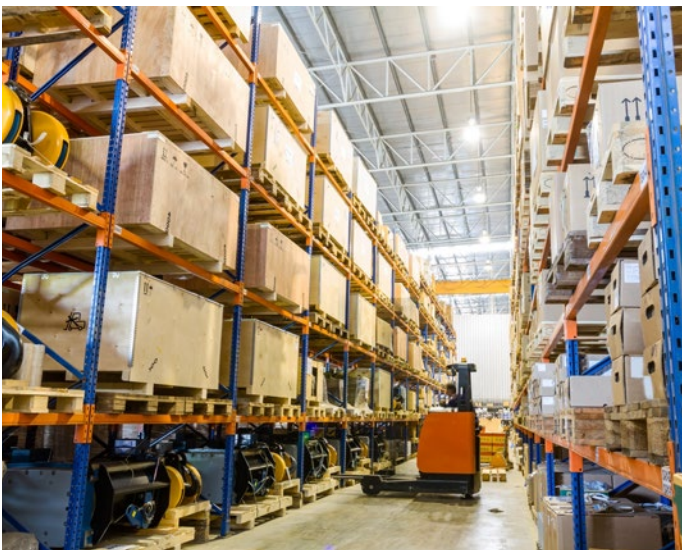

Track and trace MHE and people in real time

Using highly accurate, location-aware technology, Vero delivers a clear and current picture of where and when your people, inventory and vehicles are moving.

- Improves productivity through the monitoring of people and MHE
- Encourages better staff behaviours through site-wide monitoring
- Informed strategic decisions for improvement and operational gains
- Enables managers to make quick decisions with near-time performance dashboards

Move every pallet 10 – 15 seconds faster

As an automatic identification and data capture (AIDC) system, Vero eliminates time-intensive and error prone barcode scanning.

- Saves up to one hour of work time per 250 pallets moved
- Eliminates potential for data and scanning errors
- Increases inventory accuracy, with reduced inventory reconciliation efforts
- Accurate reporting and analysis of data for continuous improvement

Managing Reusable Transport Items (RTIs)

Using latest technology to track your RTIs, Vero delivers a quick return on investment by reducing the number of lost assets, optimising utilisation of your RTIs, streamlining transport for the collection of your assets, improving your service levels and automating paperwork associated with despatch and receipt of RTIs.

- Maximises use of available RTIs
- Helps to prevent your assets getting lost or stolen
- Reduces disputes between trading partners about asset locations
- Enables inventory checks to be performed in minutes rather than days
- Identifies shortages or oversized stock for better management

Intelligent 'location aware' safety

Vero uses the most intelligent and reliable location-aware technology to establish a safe zone around pedestrians and MHE.

- Live, accurate visual and audio potential collision alerts to stop accidents
- Eliminates common false alarm issues associated with proximity sensors
- Resolves incidents with record, rewind and replay function for a real perspective
- Total visibility of driving habits and black-spots to reduce accidents and near-misses

Solutions for your business

The Vero suite of automated solutions gives you a true and accurate picture of your business performance in real-time: Improving safety, efficiency and profitability in even the best-run warehouse, manufacturing, distribution and logistics sites.

Vero can interface with all leading warehouse management systems (WMS), company-wide enterprise resource planning (ERP) systems or even proprietary systems to use new and existing warehouse operational data to inform strategic and tactical planning. If required Vero can be backed by a 24/7 support service so you can get help when you need it.

About Us

Vero is brought to you by Harland Simon plc, a company with a century's experience in delivering real-world technology solutions to a wide range of industries. As a systems integrator we use our in-depth knowledge of different hardware and software technologies to create a solution that works for you. Our experience and technical know-how ensure you receive the very best advice from a supplier you can rely on.

For a working demonstration with your equipment on site, please contact us today.
