

Case Study

Customer: Major Food Group

Location: Hatfield Peverel Dairy

Task: Working with hazardous waste company Alchemize Ltd to empty, clean, gas free and make safe chemical, fuel and effluent plant tanks prior to demolition. Subsequent removal and dispose of all chemicals within the site boundary.

- Mechanical isolation of the tanks.
- Emptying (of fuel/chemicals including acids and alkalis, sludge's and effluent), cleaning and gas freeing Ph testing where necessary of all tanks on site.
- Flushing of all fuel and chemical lines on the site to make them safe for handling and removal.
- Removal and disposal of all hazardous waste produced during the above operations.
- Packing of all chemicals on site prior to removing from site for disposal via Malary's licensed disposal facility.
- Preparation of quality documentation and hand over of the tanks and CDM Files to the operator post works.
