

New Mobile Hard Drive and High Security Shredding Truck

October 2016

Paper Shredding Services has invested in cutting edge shredding technology with the acquisition of the only dual purpose mobile shredding truck in Scotland.

Now our customers can get hard drives shredded at the same time as high security document destruction to DIN level 6 (particle size) with the added convenience that we come to your place of business.

As one of the most advanced high security mobile shredders in the world our new truck not only shreds hard drives but many other types of digital storage devices such as SSD drives, USB flash drives, DVDs and more.

You or your staff can witness the destruction of your paper documents or hard drives beyond retrieval and you will and receive a Certificate of Destruction upon completion.
