

## Cleveland Row SW1

As part of the complete interior re-fit of this prime office behind St James' Palace, Calibre was contracted to provide new climate control equipment throughout.

Working within the tight confines of existing ceiling and floor voids, as well as a rapidly progressing programme, Calibre's excellence in project management came to the fore. Redundant equipment was stripped out, new systems designed and specified; we worked with other trades and high levels of security to ensure the client's vision was met. Beautiful joinery units conceal most of the fan coil units, with air distributed through architectural slot diffusers. ►

# Cleveland Row SW1

► The client has now moved into the new office space and is very happy with the finished result.

A Calibre bespoke maintenance programme will ensure that the equipment continues to perform at its best, and maintains the manufacturer's 7-year warranty for complete peace of mind.
