

Mobile solutions for niche audiences: Enterprise solutions and specialist communications

Jiggster

Jiggster is a market-leading mobile-first solution for the Android gaming community. We designed and developed this mobile-commerce marketplace for gamers to sell or exchange games on their Android devices. A database of nearly 20,000 console game titles was successfully integrated into the application via third party APIs, enabling the network of gamers to buy, sell, or exchange their games through a secure and moderated environment.
