

Efficiency without Compromise

HEPASilent™ Technology	Patented technology uses the principle of mechanical particle filtration and adds an electrostatic charge to the particles to achieve high efficiency (up to 99.97%) in capturing particles as small as 0.1 µm.
Particle filter	Designed for maximal removal of all particle matters. The perfect choice for removing pollutants such as bacteria, viruses, pet dander, dust mites and other kind of particles.
SmokeStop™ filter	Particle filter equipped with activated carbon recommended for use in rooms where there are heavy gaseous pollutants such as cigarette smoke or VOCs (volatile organic compounds found in household paints and cleaning products).
Carbon+ Filter	Optional extra activated carbon filter for removal of heavy gaseous pollutants.
Recommended filter exchange	6 months when used 24 hours per day

Innovated with Love in Sweden

Innovated with love in Sweden, the Blueair Pro family embraces protection against airborne health and wellbeing threats. Combining passion for everyone's right to breathe clean indoor air and technical skills we strive to create the best possible air purifier on the market. ** The CADR indicates how much filtered air is delivered (airflow) by the air purifier and how well the system removes tobacco smoke, dust and pollen pollutants from the air (efficiency). Tests are performed in accordance with ANSI/AHAM AC-1. The maximum possible CADR ratings according to this standard are: Tobacco Smoke: 450 cfm./ Dust: 400 cfm. /Pollen: 450 cfm.

*** Air change per hour is calculated on the recommended room size, assuming 8-foot (2.4m) ceiling. The air change rate per hour will increase for smaller rooms.
