FORENSIC SCIENCE FACILITIES AS AN IMPORTANT AID

Our Forensic Science Facilities are an important aid in both civil and criminal matters. They include photography and video enhancement, handwriting and finger print analysis, mobile phone and computer examination, as well as DNA profiling including Paternity Testing. Our highly qualified consultants using the most modern debugging equipment provide advanced electronic 'sweeps', ensuring that your premises are 'clean' of electronic spies. Nationwide Investigations Group is one of the few companies in the UK that provide polygraph (lie detector) examinations. Although a polygraph test may not convict the guilty in a Court of Law, the results are often used to confirm innocence rather than guilt, which can help dispel the very unpleasant aura of suspicion.

PROVIDING VERY EFFECTIVE SOLUTIONS

Product Fraud is estimated to cost the legitimate owners millions of pounds each and every year. Forgers, imitators and counterfeiters do not just confine themselves to luxury products of international fame, such as watches, cigarette lighters, leather goods, clothing, perfumes and recorded music – motor car parts, aircraft components, pharmaceutical products and computer software programs are all very suitable products for the international imitator and counterfeiter. Nationwide Investigations Group, supported by our agents and associates around the world, help companies to protect their names and profits by not only obtaining the physical evidence, but also the necessary information of manufacture and distribution logistics – therefore providing very effective solutions concerning product fraud, imitations, forgery and counterfeiting problems.

If you feel that the services of a Professional Private Investigation Organisation could help solve your problem, why not give us a call now? You will find us understanding, helpful and of course totally discreet – and there is no obligation to proceed further!
