

System 2.0 HD

**An unparalleled combination of
heavy-duty and responsiveness**

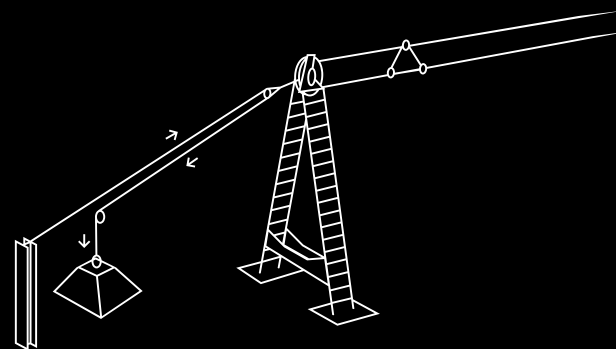

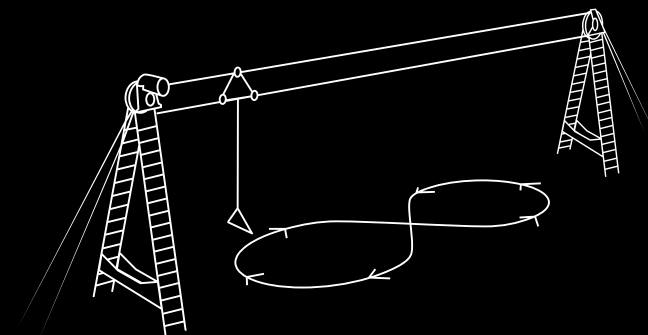

THE ULTIMATE RIDING EXPERIENCE

The Sesitec System 2.0 HD combines the flexibility of a System 2.0 with the smooth, high-quality riding experience of a Full Size Cable even over long distances.

SMOOTH.

The System 2.0 HD convinces pro riders as well as beginners with its extreme stable and calm pull. It neutralizes vibrations caused by the riders and thereby creates a riding experience comparable to the Full Size Cable.

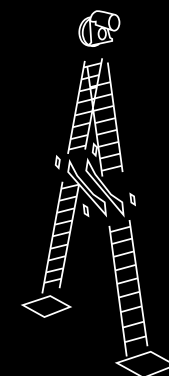

STRONG.

All the System 2.0 HD components are designed and manufactured for high utilization. Its robust wear parts are long-lasting and thus require less frequent maintenance. The powerful big electric motor contributes to the superior riding experience.

VERSATILE.

From permanent installments as a stand-alone wake park to temporary setups for high-class events, the System 2.0 HD accommodates a range of options. It can be installed on almost any ground including water and pleases all kinds of riders thanks to various personalizing options.

SMOOTH.

STRONG.

VERSATILE.

Top Features

Counter Weight

The counter weight ensures that the running cable is constantly under the same level of tension. Our engineers make sure that you get exactly the optimal counter weight in terms of dimensions and weight for your individual System 2.0 HD. Vibrations caused by riders are neutralized, giving an experience comparable to riding a Full Size Cable.

Direct Drive

Sesitec has a patent pending for its Full Size Cable direct drive. We used this expertise for the System 2.0 HD and developed a compact direct drive that contains less moving parts. Our customers benefit from the consequential reduced wear, longer lifespan, and minimal noise emission.

Individual Operating

We want you to be the independent boss of your System 2.0 HD. It is designed in a way that makes maintenance super easy. We teach you how to do maintenance, equip you with an extensive tool box, and include an iPad with special software for setting and changing all the operating parameters by yourself.

Big Motor

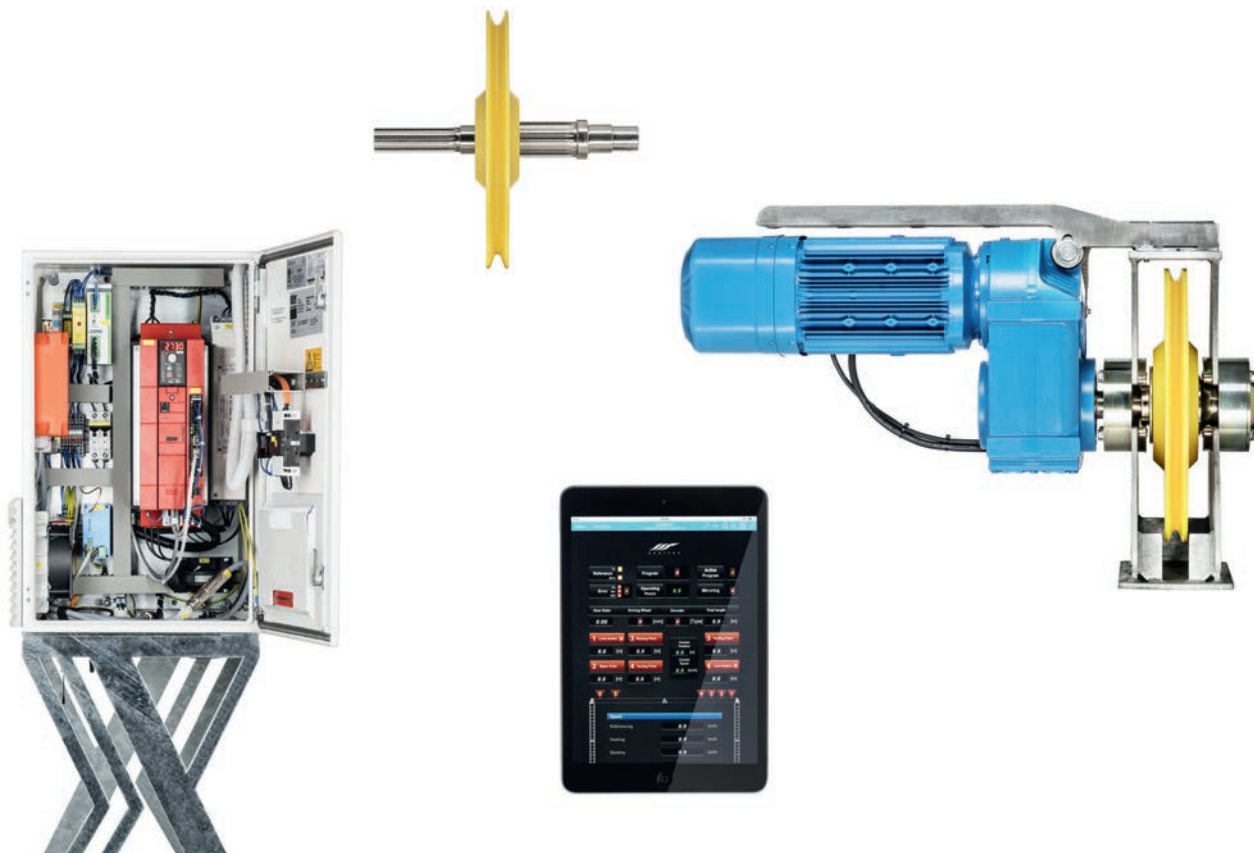

The System 2.0 HD electric motor comes with no limitations. It is designed for fast acceleration with the ability to go any speed desired. The motor's low rotation speed contributes to the System 2.0 HD's smooth pull, while its industrial strength gives a powerful pull. Even though the motor is big it is still easy to dismantle, which makes maintenance work and replacing wear parts convenient.

Robust Wear Parts

All wear parts are made from durable materials designed for high-use, heavy loads and longevity. The heavy-duty bearings are designed to easily handle the repetitive friction of the pull. Due to the big pulley the running cable is kinked less which extends its lifetime and gives you the smoothest ride.

Spline Shaft

The built-in spline shaft enables a direct transmission of the speed and torque. In interaction with other components, the load is evenly spread on the motor and pulley. This results in effectively reduced wear and a longer lifespan.

OPTIONAL FEATURES

Recon

Sesitec's wireless remote control allows the operator to stay up to 300 feet away from the control cabinet (depending on your location even more than 700 feet). This mobility enables the operator to stay close by the rider for more hands-on teaching.

Rental Equipment

Sesitec closely cooperates with leading manufacturers of rental equipment such as wakeboards, waterskis, life vests and helmets. We offer an individually compiled set of rental equipment for your wake park on request.

Park Features

Park features, such as rails and kickers, will make your wake park more attractive for advanced riders, and incentivize repeat riders with the potential to continually advance. Sesitec collaborates with UNIT Parktech, the Germany based market leader for park feature manufacturing. We will help you selecting the best features for your park and target group from their wide product range.

SERVICE

Individual Project Planning

It is our mission to build the most successful wake parks in the world. For us, every new wake park is a unique project with different goals and different challenges. We take into account the environmental conditions and our customers requirements and advise from the early planning phase onward.

Install & Training

Our installers are well-trained and have set up many System 2.0s and System 2.0 HDs. During and after the installation they will share their wakeboard and cable park knowledge, and train you in operating and maintaining your System 2.0 HD. We are there for you from start to finish.

Customer Support

We see our customers as partners who share our standard of high quality excellence and our passion for wakeboarding. With our well-trained and experienced international team we provide personal and immediate service via telephone, e-mail or on-site. No matter how complex or complicated your problem may seem, we will find a solution.

Spare Part Online Shop

Sesitec operates an extensive online shop where our customers can purchase all their spare parts directly. We dispatch orders within 24 hours on working days, and offer express shipping on demand.

WE BUILD DREAMS Est. 1992

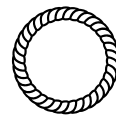

Sesitec is your wake park partner from the early planning until ... forever. We support you in developing a unique recreational facility that attracts your target groups and brings you high return on investment. Together we resolve obstacles that may arise along the way. With over 80 Full Size Cable and over 430 System 2.0 installations worldwide, we're constantly evolving – always with our mission in mind: We build the most successful wake parks in the world.

All our actions are based on our values:

Living Water

Wakeboarding is our shared passion. Motivated by a desire to build exceptional wake parks, we come to work each day with a smile. Our company consists of keen wakeboarders, who know what wakeboarders want, and former wake park managers, who know how to successfully run a wake park. It's our calling to bring wakeboarding to the world and make it more accessible for everyone.

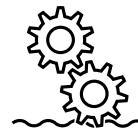

One Team

Teamwork makes the dream work. We are united by an enthusiasm to bring new and innovative projects to life, which feeds into our larger goal of expanding the sport of wakeboarding. Friendly and dependable relationships both with each other and with our customers is the essence of our company. We work together as one and can rely on each other 100 percent.

First Lap

We have never settled for the status quo and push ourselves daily to continue progressing our passions. Catering to the first time rider or pushing the limits of what's capable in our industry is what we're made for. We ride, we work, we innovate, and we evolve. This is in our blood from the first lap to the last.

Flowing Perfection

Quality is our trademark. Our parks are fun, durable and safe. Everything that we do, every part that we produce and install, is handled and tested with the utmost care. The high standard of our work, longtime experience, competence and passion are what makes ours a premium product.

A wake park is more than just a cable, and that is why we advise our customers on all aspects of running a successful business. **360°**
