

SlipStop.®

Leaks in public spaces can create many health and safety risks for your visitors.

That's why we have created SlipStop.®. This simplifies the process of collecting dripping liquids and securing the affected area.

This innovative device simultaneously defines a hazardous area, while mitigating the slip hazard.

- ▶ **Keeps visitors safe**
Acts as a hazard control collecting water efficiently and out of sight.
- ▶ **Superior coverage**
Product can cover a wide area when used in conjunction with another.
- ▶ **Obstacle removal**
No need for additional signage or equipment to be used further to reducing trip hazards and cost.
- ▶ **High visibility**
Product is easy to spot in comparison to traditional methods, further improving visitor safety.
- ▶ **Reduced manual handling time**
Substantially reduced set up time means that we can respond quickly to hazard.
- ▶ **Visually more attractive**
Projects a more professional appearance.
