2016 Course Venues ●

# HSE Training

OPS Consultancy & Training provide proven training courses for UK and overseas clients, both corporate and individual, who are looking to further their understanding, awareness and skill set in the growing Health and Safety profession. OPS is accredited by **NEBOSH** to conduct **Occupational Health and Safety training and examinations** for:

## International & National General Certificate (IGC)

The certificate covers the principles relating to health and safety, identification and control of workplace hazards and the practical application of this knowledge.

The IGC syllabus takes a risk management approach based on best practice and international standards. The qualification also features a practical workplace assessment.

## International Oil & Gas Certificate (IOGC)

This qualification focuses on international standards and management systems, enabling students to effectively discharge workplace safety responsibilities both onshore and offshore.

The Certificate also highlights the importance of process safety management in the Oil and Gas industry. The syllabus takes a risk management approach based on best practice and international industry standards.

## International Construction Certificate (ICC)

It is likely to prove useful for those concerned with the management of buildings who may need to ensure that contractors are working safely. The Certificate is aimed at Supervisors, Managers and CDM coordinators who are required to ensure that activities under their control are undertaken safely.

## International Fire & Safety Certificate (IFC)

Covers the principles of fire and explosion, causes and prevention of fires, fire protection in buildings and ensuring the safety of people in the event of fire.

The practical element of the course ensures that participants can carry out, unaided, a fire risk assessment and prepare recommendations report for management.

# Technical Services

The experience of the OPS network means we have a clear understanding of the clients goals when it comes to recruitment. From our database of over **1,000,000 workers** we have built a network of qualified personnel with a broad range of skill sets guaranteeing availability upon demand. The workers we supply represent specialists from different nationalities, cultures, religions and academic backgrounds. **Our technical services cover short, medium, long and fixed term contracts.**

In order to provide the correct worker for our clients we undertake a thorough regulatory process to enable effective and quick deployment:

# Technical Services

Our experience in this sector provides a timely, cost effective means of **sourcing and mobilising labour**. From recruitment to entire logistical support and payroll compliance, we take charge of your crewing operations providing **specialists, professionals, technicians and craftsman** in the following operations:

## Engineering

OPS specialises in the maintenance of Oil and Gas field operations, construction and repair of pipelines, heaters, fire systems and all mechanical and electrical work. We provide professionals specialising in all areas of engineering including **mechanical, petroleum, pipeline, electrical** and **structural**.

## Support & Inspection

To ensure operations are carried out to the highest standard we provide skilled **construction, commissioning** and **project managers, contract administrators, planners, schedulers** and **mechanical, electrical** and **pipeline inspectors**.

## Craft & Design

The labourers we provide are highly skilled craftsmen in areas such as **welding, carpentry, electrics** and **masonry**. Specialist **CAD design engineers** and **electrical, pipeline** and **structural drafters/designers** represent a few of the broad range of skilled workers we source.

# Consultancy

With its head office based in Manchester, England, OPS can provide bespoke solutions throughout the **UK, Europe, Canada, Romania, North Africa, West Africa** and the **Middle East**.

We offer cost effective solutions with a customer based focus hands on approach to help your business and staff, whilst **increasing profits** and **lowering insurance premiums**. Our fully qualified and experienced consultants are on hand to provide guidance and advice in the following areas:

- Plant Safety
- Industrial Safety
- Refinery Safety
- Occupational Health & Safety
- Fire Prevention & Protection
- Quality Management Systems
- Environmental Protection
- Engineering Assistance

## Consultive Services
