

**Pre-school classes (for 5 years olds), 2018**  
 learning the Khmer alphabet through singing and drawing; learning numbers up to 100; singing times tables, learning addition and subtraction with leaves, and object; learning shapes & colours and learning respect and discipline

**Sinking wells in the villages, 2001**  
 NKFC provided materials and guidance from professionals to sink simple concrete ring wells, but the villagers helped dig the wells that are now providing safe potable water for themselves and their families

**Basic healthcare, vaccinations and dentistry, 2013**  
 Young boy's first visit to the dentist. Dental hygiene is a key part of the overall health and hygiene programme which also includes vaccinations and risk awareness

## 20 years of activities, changing the lives of 2,868 families in 14 destitute villages of Banteay Srei

For the past twenty years, we have been working at grass roots level, with an entirely local Cambodian staff and pledging the support of various suppliers so as not to waste funds, continuously assessing each of our projects to maximize the impact on local families.

**1999-2000: c.\$550k**

Of money raised

**82%**

Of children enrolled in primary education

**90%**
