	Continent for sa														
Year 8		Migration in the 21s													
Year 9	The developme	nt crisis - is History o	r Geography to blame?				3. THE ISSUE OF DESERTIFICATION.								
							3.1 What is desertification?								
							3.2 Which physical processes								
							operate in arid regions that								
							make them vulnerable to								
							desertification?								
							3.3 To what extent does								
							human activity contribute to								
							the problem of desertification?								
							3.4 How can environments that								
							are vulnerable to								
							desertification be managed? 4.								
							River processes and landforms.								
							4.1 What are the processes								
							active within a drainage basin?								
							4.2 How do geomorphological								
							processes contribute to the								
							development of distinctive								
							fluvial landforms?								
							4.3 What landforms are								
							produced?								
							4.4 What physical and human								
							factors contribute to cause river flood hazards?								
							4.5 What effect does flooding								
							have?								
							4.6 How can river flooding be

Lesson Content/ Objectives	Homework
2. Ecosystems continued from	
Term 1a. 2.2 How do	
ecosystem processes benefit	
people?	
2.3 How does human activity	
affect physical processes within	
ecosystems?	
2.4 How can ecosystems be	
managed sustainably?	
Write up of Enquiry: Introduction	n / Methodol

 $\label{thm:condition} \textit{Write up of } \overline{\text{Enquiry: Introduction / Methodolo}} \textit{gy / Data Presentation / Data Analysis / Conclusion and Evaluation}.$

Lesson Content/ Objectives	Homework
5. Coastal processes and coastal management. 5.1 How	
do geomorphological processes	
contribute to the development	
of distinctive coastal	
5.2 What landforms are	
produced?	
5.3 Why do coastal processes	
need to be managed?	
5.4 How are coastlines	
managed?	
5.5 Why does coastal	
management create	
controversy?
