The Secure, Reliable and Hassle-Free way to take payments in A & E, Maternity or other hospital departments; the L10 is a self service payment kiosk for taking payments for prescriptions and other chargeable items in hospitals and health centres. Many emergency departments have no way to collect payments when the pharmacy is closed. This kiosk prevents the loss of vital hospital revenue. It accepts all types of payment and gives change with a payment receipt. With many types of connectivity options, it can be managed remotely via management software or kept as a stand-alone unit.

Features

- Takes payments by cash or card 24/7
- Accepts notes and coins and gives change
- Prints both a receipt and a voucher
- Chargeable items: prescriptions, deposits, photos, nappies, milk etc
- Easy to use touchscreen for selection of payment type
- Flexible configuration for many payment types and amounts
- Interfaces to network for upload and download of data.
- Remote management via web browser
- Fully accredited PCI-DSS compliant chip & pin card payment solution
- Compact wall or floor mounted machine.
