HIGH-QUALITY CONVERSIONS

Established in 2005, we are now the UK's leading manufacturer of fridge van conversions, utilising our own bespoke design of insulated lining kits to create a superior quality and effective refrigerated vehicles.

With over 6,000 conversions completed over the last 11 years, we have specific knowledge of fridge van requirements in a number of market sectors, creating bespoke solutions to match customer requirements exactly.

Leading the way for quality of manufacturing and excellent customer service standards, our clients benefit from fast turnaround times, high payload capabilities, with a strong, durable and robust finished product ready to serve their business daily. With an after-sales customer support department also available, we are the one-stop-shop for quality assured temperature controlled vehicle solutions.

“ From a vehicle manufacturer's perspective, I have been involved with CoolKit temperature controlled vehicle conversions for many years. The fridge van conversions are engineered to a high standard to meet customer needs whilst respecting base vehicle requirements. The team are very experienced and always willing to help with customer specific requirements. I would recommend as one of the market leaders in the refrigeration vehicle conversion sector “ **Renault UK**

FRIDGE VAN CONVERSIONS

Our fridge van conversions are an arrangement of interlocking insulated panels which shields the load area of the van from the outside world. We use extruded polystyrene insulating boards to provide the highest manufacturing standards. This material has an exceptionally low thermal conductivity figure together with other appealing characteristics, including high tensile and shear strength, fire resistance and closed cell structure to prevent water absorption.

We like our customers to benefit from the qualities of payload, load volume, durability and functionality

LIGHT STRONG & DURABLE INTERIOR

We choose light, strong and durable GRP sheets with woven roving reinforcement as our regular interior surface, this way we can avoid the use of weighty timber elements in the wall construction, whilst not compromising on strength and durability. Load bearing floor panels benefit from additional reinforcements and a choice of finishes to suit a particular operation.

INDUSTRY-LEADING REFRIGERATION UNITS

A refrigeration unit is installed within the conversion to extract what unwelcome heat does penetrate the lining. We always assist our customers in specifying a suitable refrigeration unit so that the converted vehicle will effectively maintain the correct temperature in ambient environments of up to 30°C.

“ We have chosen CoolKit as our supplier of refrigerated van conversions for many years. They are very quick to respond, often taking less than a week from start to finish, but more importantly they are always top quality too, meaning that at Van Discount we can fulfil our customers orders quickly and with total confidence in CoolKit's high standards “ **The Van Discount Company**

FRIDGE VAN INSULATED LINING KITS

The insulated lining kits are fabricated in our UK-based workshop by a team of refrigeration engineers to meet exact customer requirements. Utilising 3D CAD software technology, we are able to create bespoke conversion kits for each of our customers, with superior attention to detail for an effective finished product which can be easily slotted into place by a trained fitter and perform to the best of its abilities in creating a temperature controlled loading area for a refrigerated vehicle.

We design & manufacture a vast range of insulated lining kits for fridge van conversions, covering all makes, models and variants of commercial vans

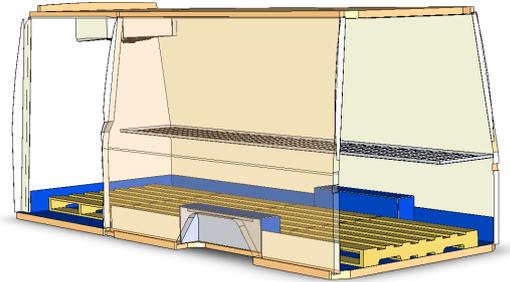

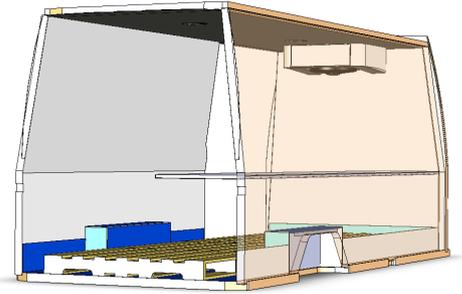

EASY INSTALLATION

Our insulated lining kits are designed and manufactured with ease of use in mind. A step-by-step guide will be provided at point of delivery or collection, together with a detailed parts list to follow during installation.

QUALITY ASSURED

We fabricate all the components for the kits in-house with the fastest production times possible through an investment in state-of-the-art machinery and manufacturing premises.

The products are developed in an ISO9001 environment using industry-leading CAD and CAM technologies. The assembly process goes through strict quality control procedures to assure the highest standard of service to the end user.

“ I have always found the CoolKit product to be finished to the highest quality without costing a premium. The team at CoolKit are all professionals with a 'can do' attitude. I have no problem with recommending CoolKit to anyone who is looking for a quality assured panel van refrigeration conversion “ **Lex Autolease**

COMPLETE REFRIGERATED VEHICLE

At CoolKit we hold large levels of new and used fridge van stock, facilitating the fastest order fulfilment in the industry. Upon receipt of the order, it is possible to have your fridge van on the road within three weeks, or as little as one week if the vehicle is in stock and has already been converted. Whether you require a chiller van, freezer van or a dual temperature controlled vehicle, we are sure to have exactly what you are looking for in stock or can factory order any make and model of commercial panel van required.

With over 6,000 CoolKit fridge vans on the road over the last 11 years, we are confident in our capabilities as a fridge van conversion manufacturer

SUPERIOR STANDARD FEATURES

Our fridge vans are converted in our UK-based manufacturing facility with hygienic GRP interior surface, reinforced resin floor and aluminium floor edge tread plates as standard, together with a 12 months' warranty on the refrigerated unit fitted within the conversion.

APPROVED USED FRIDGE VANS

At CoolKit we make sure our superior quality standards are consistent throughout our product offering, including our vast range of used fridge vans. With this in mind we always ensure we keep our used stock at a maximum of 2 years old with acceptable mileage. Each used van goes through strict quality control procedures, checking that everything is in correct working order and are converted with a brand new CoolKit conversion, including a new refrigeration unit with the same 12 months' warranty offering.

“ The CoolKit refrigerated conversion of our fleet was chosen because it offered the best payload after conversion with minimal compromise on build quality and temperature control. We were provided with comprehensive data across a range of vehicle options as well as access to existing CoolKit customers that assisted our decision on which make of vehicle would fit our requirements “ **Alpine Fine Foods**

Market Sectors We Operate In

Meat, Fish, Dairy & Poultry

Drinks Suppliers

Catering

Ice Cream

Pet Food

Flowers

Pharmaceuticals

Couriers & Transport

Contract Hire & Rentals

COMMITMENT TO OUR EXPERTISE

We always make time to research every market we operate in and understand customers' needs and expectations as they evolve with time. The expert knowledge we gain is clearly communicated across the business, so that every member of our team, from office based staff, to our manufacturing engineers, delivery drivers and even our suppliers feel valued within the business and strive to perform to the best of their abilities to match the respected reputation we hold within the temperature controlled transport industry.

We hold an unrivalled combination of attainments of ISO Standards, Investors in People and a range of Whole Vehicle Type Approvals

Business Users Only. CoolKit Ltd are authorised and regulated by the Financial Conduct Authority.

COMMITMENT TO QUALITY

As we strive to manufacture and supply an industry-leading refrigerated vehicle service, it is only fitting that we adhere to the world's leading quality management accreditation, ISO9001, committing to the satisfaction of our customers and value their repeat business. ISO9001 specifies requirements for a quality management system where we can demonstrate our ability to consistently provide products that meet customer requirements and also aims to enhance customer satisfaction through effective application of procedures.

COMMITMENT TO SERVICE

We value every aspect of the customer interactions with us, from initial enquiry, to the way we deliver our quotations, answer any questions a customer may have on the product, securing the order, processing the order through our in-house manufacturing facilities, quality checking the product before delivery, keeping the customer updated throughout the process, the delivery experience for the customer and the aftercare following the life span of our refrigerated vehicles. We see every interaction as an opportunity to enhance the customer experience which in return increases their loyalty and satisfaction, enhancing our reputation as a trusted supplier of refrigerated vehicles.
