Supplying UK Manufacturers for
Over 60 years

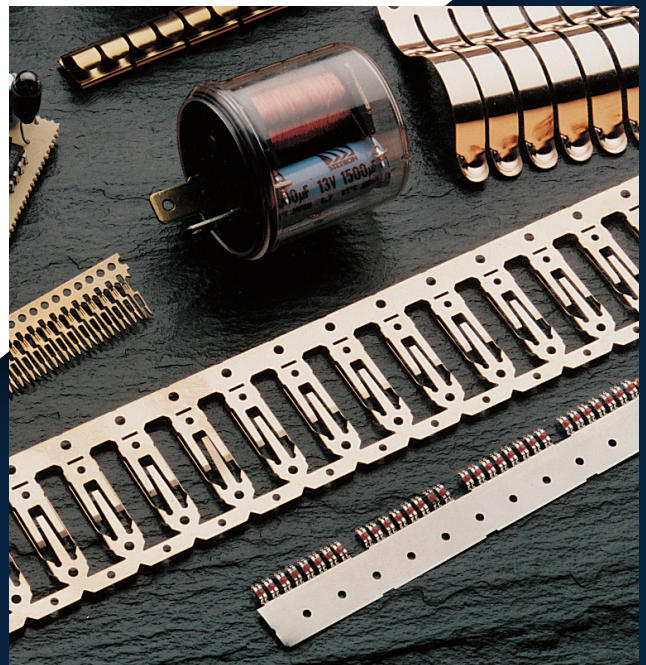

Sterling

SPRINGS & PRESSINGS

...firmly at the forefront of spring and pressing technology

Sterling Springs is one of the most innovative spring suppliers and metal pressings manufacturers in the UK. We have been at the forefront of custom springs and pressings technology for over 60 years, and with our dedicated toolroom we manufacture all our press tools and any jigs and fixtures required to manufacture your metal pressings in house. We can produce both high and low volume components in our press shop and carry out assemblies and manufacture samples in our small order section. This enables us to manufacture your metal springs and pressings to your specific requirements. At Sterling Springs we're dedicated to quality and are accredited to ISO 9001:2015, we demand the highest performance from our skilled workforce, a workforce committed to giving you a complete range of engineering services at the lowest price.

DEVELOPMENT

From the initial concept and design stage, through to manufacture, Sterling Springs can provide technical expertise in all types of materials used in the manufacture of springs and pressings.

Our in-house design capability enables us to minimise lead times and maintain high quality standards throughout the manufacture of any component.

MANUFACTURE

The Company has a comprehensive range of press and manufacturing equipment. Our highly skilled personnel have the experience to manufacture small quantities of components where no tooling is required for pre-production runs, prototypes and very small batches.

It is the Company's policy to have total control of all tooling required to manufacture production components. Our experienced tool makers manufacture all types of progression tooling and jigs and fixtures in our well equipped tool room and development area, thus minimising production problems and reducing lead times whilst maintaining a high quality standard.

WHAT WE OFFER YOU

Custom Tooling for Flat Springs, Clips and Metal Pressings

Sterling Springs make all the tooling for your metal pressings, custom flat springs, clips and wire forms in our own state-of-the-art facility.

Business Partnership for your Spring Requirements

We see our businesses as a true partnership so we'll also work with you to develop prototype samples springs and clips for new products. With the benefit of decades' experience in the industry, Sterling Springs produce sophisticated custom springs, clips and pressings requiring little or no tooling.

Complex Tool Design for Springs and Clips to your Specification

And even if we don't have exactly the tool we need, Sterling Springs' in house technology enables us rapidly to design and make complex tools, allowing us to offer more competitive prices.

Quality Control

Sterling Springs operates a quality system in accordance with BS EN ISO 9001: 2015, and consistently supplies a range of quality components to all sectors of industry. The Company also operates a continuous Quality Improvement Policy. All Sterling's employees are aware that this is crucial in winning new customers and achieving repeat business.

Add to this Sterling's commitment to Customer Care, and end users are ensured of a complete and comprehensive service.
