

REACH Statement

REACH, Registration, Evaluation and Authorisation of Chemicals is the regulatory system for controlling chemicals in Europe. It became law on 1 June 2007.

The aim of REACH is to improve the protection of human health and the environment through better and earlier identification of the intrinsic properties of chemical substances. The legislation places a duty on Suppliers to communicate information to users to enable the safe use of supplies.

Products such as LED emitters, PCB substrates, heatsinks, lenses, electronic control gear, modules and luminaires are designated by REACH as "Articles" and not subject to registration.

None of the products supplied by Holders Components contains >0.1% of any substance in the European Chemicals Agency (ECHA) candidate list of "Substances of Very High Concern (SVHC)" published on 12th January 2017. This list can be viewed on the ECHA website under <https://echa.europa.eu/candidate-list-table>.

This product information is based on our current knowledge and experience. We cannot accept liability for any factors outside our control.

Enquiries from customers concerning REACH compliance should be addressed to headoffice@holdersgroup.com
