

Leemic are proud to introduce:

Sharp BIG PAD Interactive Table

Early Years Edition A dynamic tool at your fingertips to plan more stimulating lessons that inspire learning

Suitable for all educational needs

Sharp's BIG PAD Interactive Table: Early Years Edition provides a wealth of collaborative learning opportunities using the very latest PCAP touch technology, offering 10 point touch and the ability to write, draw and annotate directly onto the screen using either your finger or the included 2mm tip touch pen.

The Interactive Table can be easily tilted and locked into position, allowing preschoolers to interact together around the table. Alternatively, the table can be tilted further to 75 degrees before being locked into place to enable children to use it more comfortably whilst sitting or if they are playing on their own.

The Early Years Edition is suitable for individual or classroom learning at all stages of the nursery curriculum and encourages children to socialise, learn, share and communicate.

Self contained solution for learning

- Full HD resolution for the highest visual clarity.
- Intuitive, interactive and responsive with a 10 point PCAP touchscreen.
- Tiltable and lockable screen makes viewing and touching more accessible for children of all ages.
- Self contained and future proofed solution.
- Sharp Pen Software for easy annotation over any displayed content.
- Sharp Touch Viewing software ideal for collaborative learning.
- Sharp Display Connect for the latest BYOD wireless collaboration and live screen content sharing.
- Everything you need from a collaborative learning space in one engaging, mobile solution.

Unlock learning potential

- A fully built-in Android PC saves you having to connect an external device for uploading and displaying content.
- Pre-installed nursery education and sensory apps that cover all educational needs and inspire learning.
- Freely download further apps directly to the table via the App Store or the Play Store, such as Online Journal.
- Games consoles can be plugged into the table for any after schools clubs.

Natural user experience

- Sharp's professional touch screen display technologies bring enhanced speed, accuracy & ease-of-use to your classroom.
- Smooth Pen on Paper touch experience thanks to Sharp's tough and durable glass writing surface.
- Write, draw and annotate directly onto the screen using either your finger or with the included 2mm tip touch pen.
- Consistent and intuitive user interface helps to reduce training time.
