Modular Event Display System

Inspiring, reconfigurable displays for
events & exhibitions

ub

Event Displays & Exhibition Stands

Creating inspiring, reconfigurable stands and spaces, our modular system is one of the easiest to use solutions on the market.

Set apart by its simplicity, and as robust as it is versatile, our system allows for the simple creation of complex, bespoke structures, suitable for a vast range of event and exhibition applications. In any sized space.

Modular System

Combining a comprehensive range of extruded aluminium profiles, connectors, tension fabric graphics, LED lightboxes and accessories, our modular exhibition stands consist of hundreds of individual elements, offering a virtually endless amount of options – limited only by the imagination of your designer.

What's more, our modular system can also be reconfigured and used time and time again, lowering the overall cost of exhibiting.

Unibox partnered with WRG to provide a bespoke solution for the Adidas Marathon Expo.

The challenge was on a grand scale and involved the construction of a 28 metre long wave, which we created using the Unibox modular system. To achieve the desired result, a total of 42 different profiles were precisely curved within our HQ.

Due to our advanced manufacturing skills, in-house machinery and experienced team of employees, Unibox was ideally placed to partner with WRG on this project.

**Wolf
and
White**

After a successful previous collaboration, Wolf & White approached Unibox to assist in creating a ceiling-hung display for Tangle Teezer.

With the challenge of creating privacy areas as well as high profile hanging banners, the Unibox design team responded with a creative solution.

Combining in-house curved aluminium profiles, with thin strips of suspended fabric, areas were created that concealed the busy walkways of the exhibition hall, in addition to a 3D tension fabric system banner.
