

The Complete Collection

Quality reigns supreme

One of Britain's much-loved brands... From humble beginnings in 1890, Valor has grown to become one of Britain's much-loved brands and today, we are one of the most recognised names in home heating. A reputation built on reliability, trust and safety stems from our unswerving commitment to create energy efficient heating solutions that surpass the needs of today's modern lifestyles.

Our advances in gas fire technology are legendary... Dedication and commitment, combined with pioneering technology, is the reason we've always been steps ahead of the competition. Not only did we revolutionise the market with the first ever living flame gas fire and the first ever balanced flue fire, the Valor Dream still ranks as the best-selling inset gas fire EVER!

One of the largest portfolios of fires and stoves... In recognition of our endeavours to reduce carbon emissions and running costs through ground-breaking gas fire technology, we received the prestigious Queen's Award for Enterprise: Innovation in 2009 for our best-selling Homeflame gas fire range. With this heritage it's no wonder we have one of the largest portfolios of fires and stoves available in the UK today.

Fires and fires galore... Meticulously designed to suit the many different requirements of UK homes and chimney configurations, our latest collection of fires boasts a range of installation options and designs styles to suit every need, pocket and lifestyle. Take our gas collection. Featuring a wide variety of living flame effect fires in a range of different styles, colours and options - including fuel beds, control types and installations – these models are available in high efficiency, decorative, inset, balanced flue, outset and radiant options - to name but a few.

Meanwhile, when it comes to electric, it's easy to see why Valor is a number one choice. 100% efficient at the point of use, which means no heat is wasted, these high efficiency LED electric fires benefit both the environment and help reduce energy bills. Our premier range of Dimension fires also provide an unrivalled degree of realism.

Trust us, we have it covered... As one would expect from a leading manufacturer, all Valor gas and electric fires are quality tested to rigorous standards and in the case of gas fires, this even includes a gas soundness test. All our gas fires come complete with a flame safety device that cuts off the gas in the unlikely event that the pilot light becomes extinguished and an equivalent is also featured across all our electric models.

When you purchase a Valor fire, you do so with the utmost confidence that it will serve you for many years to come. With Valor, there can be no mistaking - quality reigns supreme.

A simple guide

for choosing the correct fire for your home

With the many advancements in fire technology it is easy to get confused. We have laid out the Valor range options in an easy to view matrix, so you can compare the product offers and pick the one perfect for you and your home.

Generally fires are powered by mains gas, LPG, electricity or solid fuel, the options for selecting a fire may start here. If like many homes in the UK you have access to gas, electricity and solid fuel, your next consideration is likely to be the availability of a chimney or flue.

Pick the perfect Valor fire for your home

What type of chimney does your home have?

Look at the pictures and decide which one best matches the chimney at your home then, when you're reading through our brochure and find a fire you like, simply check in the features section of the page under 'Chimney Required', to see if it's suitable for the chimney at your property.

No Chimney (NC)

Even if you have no chimney or flue we have a selection of fires for you. Our balanced flue and electric fires are the solution here.

Brick Chimney (BC)

Suitable for all fires. The classic brick built chimney can handle fires with a deep fuel bed right through to shallower slimline styles.

Pre-fabricated Flue (PF)

Suitable for most fires, dependent on the full depth and diameter

Pre-cast Flue (PCF)

Suitable for a wide range of slimline fires

Radiant

Efficiency: 72%

High Efficiency

Valor have a range of products that lead the way in the effective use of energy - good news for the environment and great news for you as this means they are cheaper to run.

Gas Collection

Our Homeflame range is 38% cheaper to run and up to 89% efficient. With the shallowest slimline on the market they are universally* applicable.

Electric Collection

- 100% at point of use
- LEDs - less energy consumed
- Regulators switch off heat output when room temperature is achieved

Stoves Collection

- Up to 80% efficient
- Wood burning is carbon neutral
- Technology that helps secondary combustion and burns less fuel

* Flue boxes can vary. Always check with a qualified installer prior to purchase.

Range options and chimney types

Technology

that provides better economy, quality and function

Controls

Manual Control

Can be found discreetly behind the fender of Inset gas fires. Located on top or side of outset fires

Fireslide

FireSlide®

Turn on/off or up/down from easy to use sliding control.

Remote

Control from the comfort of your armchair. Available on some gas and Dimension models.

Activeheat™

Fires with Activeheat™ give out radiant heat but also draw in cold air from the room, pass it through a heat exchanger to warm it up and then circulate it back around the room. The result is that the room is heated much faster than by radiant heat alone.

Valor Centre 3 Year Guarantee

When you purchase a Valor fire, you do so with the utmost confidence that it will serve you for many years to come. Such is the confidence in our products and in our exclusive stockists, that we are able to offer an exclusive THREE-YEAR guarantee when your fire is purchased from a Valor Centre stockist - providing the fire is serviced annually in accordance with Valor guidelines. This gives you an additional two-year's peace of mind over and above our standard guarantee, and you can relax in the knowledge that your fire has been recommended, supplied and installed by professionals and to the highest standards.

Product Code	Model	Colour Option
0504521	Brazilia F5	Beige
5110284	LPG Conversion Kit	

Brazilia F5 Wall Heater

Brazilia F5S

Brazilia F5S has all the benefits of the F5, but with a choice of mahogany or oak effect side panels. Available for Natural Gas (optional LPG conversion kit is available).

Features:

Max Heat Output: 1.5kW

Nett Efficiency Rating: 86%

Gas Type: NG

Control Type: Manual

Dimensions: (HxWxD) 391 x 450 x 128mm

Chimney Required: No chimney required

Product Code	Model	Colour Option
243160	Brazilia F5S	Beige & Oak
5110284	LPG Conversion Kit	

Brazilia F5S Wall Heater

Brazilia F8S

For larger rooms the 2.3kW heat output of the Brazilia F8S is up to the task and like the smaller Brazilia F5S, this heater comes with a choice of mahogany or oak effect side panels and 3 heat settings. Available for Natural Gas (optional LPG conversion kit is available).

Features:

Max Heat Output: 2.3 kW

Nett Efficiency Rating: 86%

Gas Type: NG

Control Type: Manual

Dimensions: (HxWxD) 430 x 516 x 152mm

Chimney Required: No chimney required

Product Code	Model	Colour Option
243164	Brazilia F8S	Beige & Oak
5110285	LPG Conversion Kit	
243857	Flue 381– 483mm (15-19")	
243848	Flue 520 – 610mm (20½-24")	

Brazilia F8S Wall Heater

Brazilia F8ST

If you want greater control over the temperature of your room, then the Brazilia F8ST is the model for you. Its thermostatic 'comfort control' system allows you to adjust the warmth between 0.8kW and 2.3kW. The ignition and settings are on the front of the heater to enable easy operation. This model is available in country beige finish with oak effect side panels.

Features:

Max Heat Output: 2.3 kW

Nett Efficiency Rating: 86%

Gas Type: NG

Control Type: Manual

Dimensions: (HxWxD) 430 x 516 x 152mm

Chimney Required: No chimney required

Product Code	Model	Colour Option
0504811	Brazilia F8ST	Beige & Oak
243857	Flue 381– 483mm (15-19")	
243848	Flue 520 – 610mm (20.5"-24")	

Brazilia F8ST Wall Heater

Surrounds

Once you have chosen your Valor fire you can choose from our range of surrounds to create the perfect look for your room.

Calista

The Calista is available in two finishes and is suitable for gas and electric fires.

Dimensions: (HxWxD) 1084 x 1230 x 190mm

Product Code	Colour Option
05070C1	Mahogany
05070B1	Oak

Mahogany

Oak

Clarissa

Finished in Oak Veneer the Clarissa is an extremely versatile surround that would look great with any of our gas or electric fires.

Dimensions: (HxWxD) 1097 x 1230 x 190mm

Product Code	Colour Option
05070A1	Oak

Northcote

A simplistic surround with curving lines, the Northcote surround is available in Oak Veneer and is suitable for both gas and electric fires.

Dimensions: (HxWxD) 1038 x 1220 x 185mm

Product Code	Colour Option
05070D1	Oak

Wellington

The Wellington surround is available in Medium Oak veneer. Suitable for both gas and electric fire options.

Dimensions: (HxWxD) 1040 x 1195 x 190mm

Product Code	Colour Option
05070R2	Oak

Important notice: All dimensions stated within the specification table are intended as guidance only. Please consult installation instructions before commencing any building work. The right to change specification without prior notice is reserved. No liability is accepted for problems caused by poor installation or misuse of product.

Key to technical table

Hearth & WM Can be hearth or wall mounted - ashpan is not separate

Hearth Can be hearth or wall mounted. If wall mounted the fire would require a small plinth to support the fret/ashpan which is not attached to the main fire.

NB: Please note that the fires which are highlighted as 'Hearth' are intended for floor level installation with a back panel and hearth. If raised some of the inner workings of the fire may become more visible than intended.

† These fires are suitable for most pre-fabricated flues dependent on the flue depth and diameter. Please refer to the installation instructions to ensure that this fire is compatible.

> Balanced flue fires can be installed inset/semi-inset into the wall cavity with the 3" spacer, or flat against the wall with the 5" spacer.

Note: Due to the sheer number of varying flue boxes and pre-cast flues it is not possible to advise on which fires are suitable until the existing fire has been removed. If the width at the rear of the pre-cast flue starter blocks is less than 300mm wide the minimum depth of the opening will be not less than 154mm.
