

12mm Worktops – Planning ahead

With the increasing demand for the popular ultra thin modern worktops, there are important factors to be considered when planning and designing a kitchen...

- Sufficient room to allow depth of appliances
- Allowing a minimum of 5cm between each cut out or edge
- Drainer Grooves/ Recessed Drainers
- Overhang limitations
- Support for internal and external areas of units/worktop

*Please check all products specifications and limitations

Product limitations and specifications

Please read all product guidelines for guidance on limitations.

Ensure that all base units and sufficient support are installed prior to template in relation to the specified product.
