bloc

Bloc is a UK designer and manufacturer of simple, clever and innovative roller blinds.

Made using fine fabrics and highly durable components, we create blind solutions for any window and any situation. From big windows, small windows or roof windows to cold and draughty living spaces and light sensitive sleeping spaces, Bloc has a roller blind to suit, giving you complete fabric consistency throughout your home.

Made to measure each and every individual window, all of our blinds are precision engineered to look great and last for years. They can be ordered in a wide range of whites, creams, colours and designs and can be created and delivered within days of placing your order. And thanks to the fact that we make everything right here in the UK, we can respond to any problems quickly and efficiently.

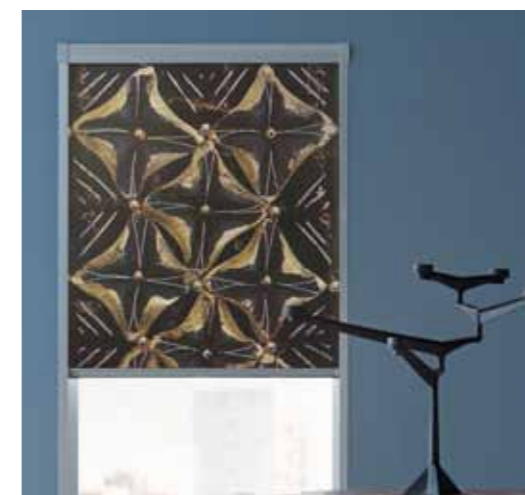

Blocs of colour

It might take a vibrant splash of colour to bring your home to life, or maybe it's just a subtle shade of white or cream that will give your windows the sophistication they deserve. Whatever look you're after, Bloc has the right fabric for you.

From heavy woven blackout and dim-out fabrics, to fly screens and privacy screens, we can create your ideal roller blind, quickly and easily.

Every design is one sided with a solar reflective white backing. This allows you to have any number of colours you like in your interiors, while retaining a sophisticated, consistently smart exterior.

Bloc Roller Blind

All roller blinds are supplied with a Sewn Pocket (1) with a colour matched thread.

Extendable plastic ends (3) allow for flexibility when measuring and a guaranteed perfect fit.

The optional Chain Tidy (2) prevents the chain from hanging loose and makes this a safer option for children. Available in white or grey.

(3)

(1)

(2)

Bloc Roller Blind + Pelmet

Our basic Bloc Roller Blind comes with the option of a Pelmet which neatly hides any fixings. Made from extremely strong materials and precision cut to fit your windows exactly, even this simple, smart roller blind will bring instant sophistication to your interior.

Bloc Cassette Blind with Slow Rise

This chain free design means there is no choke hazard, making it completely safe for use with children.

Bloc Cassette is a Bloc Roller encased in a streamlined aluminium holder. This cassette helps to hide the mechanical aspects of a blind and provides a smart, professional finish to any window. The cassette also provides sun protection for the rolled up blind, reducing fading and extending the life of the fabric.

The Bloc cassette can be recess mounted (1) edge mounted (2) or face mounted (3).

(4) it is available in three colours. White, cream or aluminium.

(5) The fabric is completely encapsulated reducing fading and extending the life of the fabric.

The Slow Rise motion allows a smooth retraction of the fabric and can be set to stop at any position.

(5)

A woman is sleeping peacefully in a bed, her head resting on a pillow. The room is dimly lit, creating a dark blue and black atmosphere. The woman's eyes are closed, and she has a serene expression. The background is a dark, textured wall, possibly a headboard or a wall with a patterned wallpaper. The overall mood is calm and restful.

blocOut

The energy
saving blind
that brings you
total blackout

BlocOut Light

BlocOut is a brand new, highly innovative roller blind system. It combines an aluminium cassette and precision engineered side rails to create a blind that can BlocOut light and draughts. This in turn provides significant savings on home heating costs and when combined with the right fabrics, can bring a space complete and total darkness. These possibilities bring this range of blinds an added functionality that is just not possible to achieve with any other blind currently on the market.

≤
The **Privacy Screen** is a simple addition to any BlocOut blind. It will stop prying eyes seeing into your living spaces while still letting light into the room.

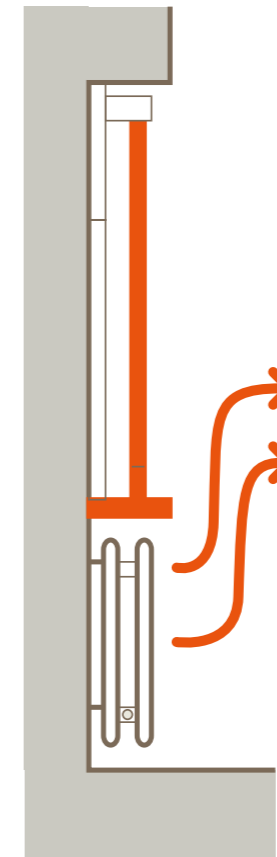

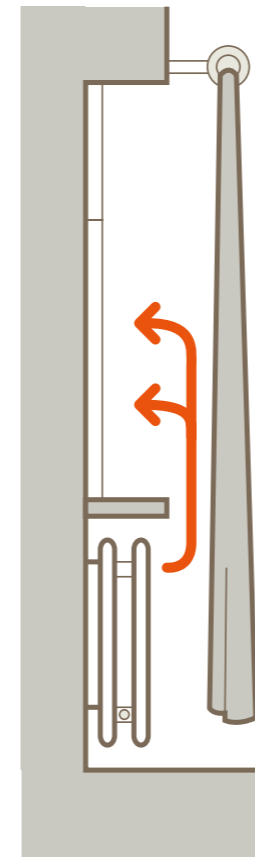

BlocOut Draughts

Curtains trap hot air and prevent it circulating a room. This can promote heat loss.

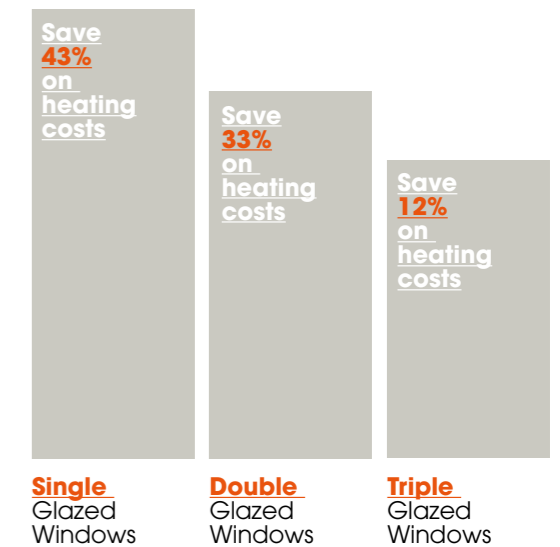

Bloc Out creates an energy efficient barrier that minimizes heat loss and leaves radiators free to heat a room more quickly.

≤ For people who want the energy efficiency of Bloc but who want some light to filter through into the room, we also offer a range of **Dim-Out fabrics.**

Windows may be a very effective source of light for a room, but they are also the most effective way to lose heat. In fact, regardless of whether you have single, double or triple glazed windows, no other part of your home loses more energy per square metre.

BlocOut's intelligent engineering allows you to help put a stop to energy loss. When positioned appropriately, your BlocOut blind will trap a small volume of air between the window and the blind. This creates a barrier that helps to avoid the warm air inside the room coming into contact with the cold surfaces of the window, so reducing the need for heavy curtains and allowing the room to heat up faster. **BlocOut is the first blind to have been independently thermally tested by the BBA and has been proven to save at least 25% on average heating costs.**

Your Savings Explained

Blind heat loss percentage tested independently by the BBA to BSEN12567-1:2000.

The values calculated are based upon a standard semi-detached 3 bedroom home. They take into account heat loss, thermal bridging and air leakage.

How BlocOut Works

BlocOut is capable of blocking light and draughts thanks to the exceptional quality of its individual components. Each part, from the brushed seals to the cassette holder and aluminium frames are designed to last a lifetime, leaving you free to change your blind fabrics as often as you like. Making it the blind system that will last for decades.

(1)

(3)

(2)

(4)

(6)

(7)

(8)

(1) BlocOut's rubber seal creates a barrier between the blind and the window sill, blocking out light and preventing heat loss by reflecting warm air back into the room.

(2) Brush seals offer the highest possible degree of light exclusion and draught prevention.

(3) The fabric is completely enclosed, reducing fading and significantly extending the life of the fabric.

(4) Clips are attached to the fabric ensuring the blind stays securely within the runners at all times.

(5) BlocOut's cassette and frame comes in a choice of three finishes: white, cream or aluminium to suit any interior wall or window colour.

BlocOut can be face (6), edge (7) or recess (8) mounted depending on your preference or the best solution to fit your window.

(5)

BlocOut for Roof Windows

BlocOut blinds can enhance the performance of all forms of roof window.

All BlocOut Blinds can also be provided with a solar powered motor, allowing you to operate the blinds remotely or to programme them to open and close when no one is home.

There is a choice of silver (1), white (2) or cream (3) channels on roof window blinds.

(4) All automated blinds feature a seamless handle without the need for a bar.

(5) A remote control is provided with all automated blinds.

(6) An edge mounted fly screen is also available to block insects without affecting the functionality of your roof window.

(1,2&3)

(4)

(6)

BlocOut Roman Blinds

BlocOut is also available as a Roman blind. This means that it has all the blackout and energy saving capabilities of Bloc Out, but functions as a Roman Blind.

(0)

BlocOut for Summertime

Using the same technology that blocks light and draughts, our custom made fly screen will stop flies from entering a building through open windows in the summertime.

(2)

(1) The Bloc Fly Screen can be used within a Single or Double Cassette set-up.

The Bloc fly screen can be recess mounted (2), face mounted (3) or mounted on the exterior of the window.

(3)

(1)

BlocOut for Kids' Bedrooms

There are plenty of fun colours and designs to choose from so you can create the perfect environment for your child and your family.

BlocOut's cord free design means it is completely safe for babies and children.

BlocOut for Bathrooms

BlocOut Moisture has been designed specifically for bathrooms. Its fabric is impregnated with mould resistant fibres, making it ideal for saving energy or bringing total blackout to high moisture areas.
