Professional Software Training

NedSense NedGraphics helps clients to realize their goals. To do so, we use our expertise and know-how with regards to the textile & apparel market. With over 30 years of experience in the textile industry, NedSense NedGraphics is able to bring integration, tailored for your core business. An important part of our approach entails working in organized teams of different departments. We assist and help to integrate to achieve your goals. NedGraphics trainers are certified to give the training and are always up to date with the latest versions.

Industry: Textile Design for floor covering (Woven rugs)

Customer implementation contains:
- Learn how to create rug designs from scratch, manipulate scanned designs and rework existing designs.
- Develop rug designs within the restrictions of the production machinery in a fast way so you have more choice.

Training program contains:
- Set-up correct sizes for different rug qualities like reed and weft densities based on customers quality.
- Learning how to use specific tools to create Wilton rugs (repeats in borders, add/remove lines for borders, copy and mirror functions etc …)
- Changing colors on frames for colorways to be prepared for printing or cataloguing.
- Resize options to create different rug sizes.
- Cleaning options (different ways to handle/clean a design)
- Selection tools (selection motifs, mirror, rotate, etc …)
- The use of transparency and protect colors.
- Inserting motifs or designs in other designs/weaves (fill, copy, color wizard)
- Use of the drawing tools (circle, square, line, etc …)
- Special effect drawing tools (spray, gradient file, contour, conditional color change etc …)
- Optional double workers tool to handle frame combinations and double worker effects inside the design process.

Customer benefits:

- Control in-house of the rug design creation.
- Increase in creating different rug designs resulting in more choice.

Goals for Certification

A Nedgraphics Training Certificate will be issued for each participant having completed the following:
- Attended and followed the complete Nedgraphics training program.
- Assigned appropriate time and practice to deliver design and /or products suggested by the Nedgraphics Trainer.
- Demonstrated adequate competence using the recommended tools and workflow.
- Delivered a finished working product

NedGraphics
BY NEDSENSE
