

Shopfronts

The industry's best at a competitive price

The Connect a.d. range of Shopfronts is ideal for low to high volume pedestrian access in buildings such as retail outlets, shopping centres, hospitals, hotels and residential buildings.

Our Shopfront range has been designed and manufactured in-house for over 30 years to the latest best practise and fabrication techniques, using the industry's best components at a competitive price.

Better design and better made

Our traditional framed Shopfront comprises a non-thermally broken aluminium doorleaf or doorleaves, frame & screens with glazing.

Where high performance energy saving efficiency is required or where Shopfront sizes are greater than the limits of the non-thermally broken range, a thermally broken aluminium doorleaf or doorleaves and curtain walling with double glazing are fitted.

Our frameless Shopfront maximises the appearance of glass to create an elegant entrance and comprises a frameless doorleaf or doorleaves & screens in single glazing.

Roller Shutter

Curtain Walling

Hugh range of options

The combination Shopfront option comprises a frameless doorleaf or doorleaves with aluminium framed screens for a unique visual appearance.

The doors can be manual or automatic, typically supplied as a single or double doorset. Click [Doorsets](#) for the full range.

Colour options include satin anodised aluminium, polyester powder coating and stainless steel.

Numerous single & double glazing, handle, manual & electric lock options increase aesthetics and provide customisation.

Our Shopfronts can be combined with the [D110 Security Roller Shutter](#) from our sister company Mechdoors, also designed and built in-house.

Technical Sales & Support

Every enquiry is handled by our dedicated technical sales team who are focussed on providing the best and most cost effective solutions quickly and efficiently.

For every order we appoint a job manager who arranges all material, engineer and Health & Safety resources and scheduling required to carry out the work on time and on budget. Our in house team handle all calls and emails to ensure the smooth running of every job from first contact to completion.

A site meeting with the appointed job manager is held to review the work, confirm site details, to determine site restrictions and hazards, and plan dates for the work.

Our family of long serving and motivated site engineers provide a reliable service delivery of confidence and attention to detail.

Our in-house fabrication facility is also capable of handling all Commercial Entrance Doorset & Shopfront repairs and upgrades from any manufacturer.
