# **DESIGNER VISIONS FOR YOUR BATHROOM.**

COLLECTIONS  
AND SOLUTIONS  
THAT OFFER FRESH  
PERSPECTIVES ON  
THE BATHROOM AS  
A LIVING AREA ARE  
DEVELOPED IN  
COLLABORATION  
WITH THE WORLD'S  
BEST DESIGNERS.

# WHAT MAKES A GOOD BATH- ROOM?

Philippe Grohe,  
head of the Axor brand  
and grandson of the  
company founder,  
in an interview.

**When it comes to technical innovation, Hansgrohe is a company with a long-standing tradition. When did the area of design become part of this? Was it a logical consequence?**

Axor was established in 1993, but even before that time Hansgrohe had already produced technically impressive products including Showers and mixers. Of course, these also looked good. In other words, design has always been a key area at Hansgrohe. By exchanging ideas with other designers we wanted to complement our ideas on the bathroom of the future with visions, lifestyles and trends that go beyond the product. That gives life and emotions to the room. This is something that we cannot do alone. And it is something that cannot be achieved by just one designer. We therefore trust in several creative designers.

**You have already utilised the services of many prestigious designers. Do you appoint a new designer for each collection?**

We now partner with multiple international designers and architects with whom we hold regular open discussions. Some have already developed two or three collections with us.

**How much freedom do you give the designers?**

We put our full trust in our designers' visions and powers of innovation. When we first spoke to one of the most famous designers of our time, we truly experienced the big bang. The first complete bathroom with mixers, showers, wash basins, bath tub and WC was created from a single source. Philippe Starck's bathroom. It was a revolution.

**Since then, has it been about more than just mixers?**

That's right. It's about the entire room, an atmosphere and above all, a new way of looking at life and how we use water in the bathroom. This way, it's

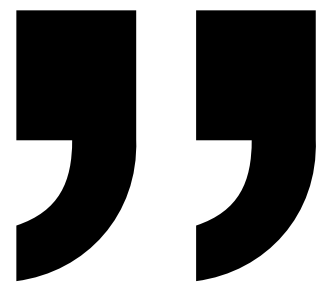

advantageous if our designers are also interior designers or architects. In addition to the mixers and showers, we also work with them to develop the wash basins, bath tubs, accessories and, of course, general bathroom solutions.

**You look for designers with different, sometimes even highly conflicting, styles and attitudes. What do you regard as fruitful cooperation with creative minds?**

For Axor, the designer's vision is at the fore. Designers should develop their own personal bathroom. We do not regard them as suppliers, but as creative partners with whom we can exchange ideas as equals. During this process, each of the partners offers their own expertise. From our perspective, this is our water and industrial bathroom expertise as well as a certain design culture.

**To what extent have the requirements for bathrooms changed over the last few years and decades?**

The bathroom is changing from a place of hygiene to a place for living. This is partly attributable to our lifestyle habits. In the past, we had extremely close ties to nature. Now, our lives are dominated by an urban world and hectic everyday situations. We therefore have a growing need for a sense of tranquillity and a natural experience. More and more people are discovering the bathroom as a place for relaxation and wellbeing. And it is not without a little pride that we believe we have made an important contribution to this. Antonio Citterio once said that we only have to stand under the shower for 30 seconds to get clean. So why do we shower for three or five minutes? Because it changes how we feel afterwards. Showering is like doing an hour of yoga. However, wellbeing also means using a great deal of water, which naturally poses a major technical challenge for us. After all, one thing is clear: we have to conserve the precious commodity of water. And so, we are certainly not going to get bored.

# AXOR IN DIALOGUE WITH INTERNATIONALLY RENOWNED DESIGNERS.

## ANTONIO CITTERIO

- Architect and designer
- Born in Meda, Italy, in 1950
- Opened his first office in Milan in 1972
- His partners include B&B Italia, Vitra, Kartell, Arlinea, Artemide and Flos
- Projects: Bulgari Hotels & Resorts in Milan and Bali, W Hotel in Milan
- Cooperation with Axor since 2001

## PHILIPPE STARCK

- Interior and general designer
- Born in Paris, France, in 1949
- Founded the company "Starck Product" in 1979
- His partners include Kartell, Alessi, Duravit, Triade, Fossil and Cassina
- Projects: Yoo Apartments, motor yacht A, Café Costes in Paris, Hotel St. Martins Lane in London
- Cooperation with Axor since 1992

## PHOENIX DESIGN

- Founded in Germany in 1987 by Tom Schönerr (born 1954) and Andreas Haug (born 1946)
- Product design studios in Stuttgart and Tokyo
- Their partners include Loewe, Sharp, Siemens, Miele, Lamy, Gira and Duravit
- Cooperation with Hansgrohe for 40 years

### JEAN-MARIE MASSAUD

- Designer
- Born in Toulouse, France, in 1966
- Founded the Studio Massaud in 2000 together with the architect Daniel Pouzet
- His partners include Cassina, Porro, Cacharel, Poliform and Poltrona Frau
- Projects: Chivas football stadium and Life Reef apartments in Guadalajara, Mexico, Tanabe House in Fukuoka, Japan
- Cooperation with Axor since 2004

### RONAN & ERWAN BOURoulLEc

- Designers
- Born in Quimper, France, in 1971 and 1976
- Joint studio in Paris since 1999
- Their partners include Vitra, Kvadrat, Cappellini, Ligne Roset, Kartell and Alessi
- Projects: Floating House, exhibits in the Galerie Kreo in Paris, Kvadrat Showroom in Stockholm and Copenhagen, Restaurant Dos Palillos in Casa Camper in Berlin
- Cooperation with Axor since 2004

### PATRICIA URQUIOLA

- Architect and designer
- Born in Oviedo, Spain, in 1961
- Own design studio in Milan since 1998
- Her partners include Moroso, Molteni, B&B Italia, Triade, Flos and Emu
- Projects: Mandarin Oriental Hotel in Barcelona, W Hotel Vieques Island in Puerto Rico
- Cooperation with Axor since 2004

# MAK- ING OF

**HOW A  
COLLECTION  
IS CREATED.**

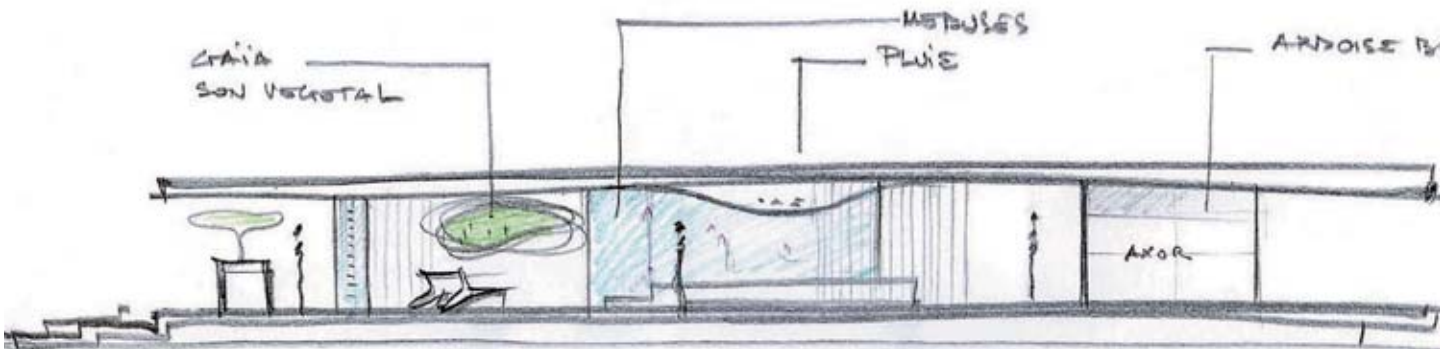

USING AXOR  
MASSAUD AS  
AN EXAMPLE.

▲ **JEAN-MARIE MASSAUD**

The French designer is among the leading representatives of the nature-inspired design. He often finds the models for his designs and architecture in nature. There is no disputing that the "Truffle" lounge chair resembles a natural truffle. His latest masterpiece, the Mexican "Chivas" football stadium, harmoniously blends in to the volcanic landscape.

▲ As far back as 2005, Jean-Marie Massaud realised his ideal vision of a bathroom within the scope of the Axor WaterDream. For him, this is a symbiosis of the natural elements of fire, water, earth and air.

08  
09

#### **AXOR WATERDREAM® – MASSAUD'S BATHROOM DREAM.**

All new Axor collections start with a personal vision. For Jean-Marie Massaud, the bathroom is a living space in which technology disappears and the focus instead falls on emotional experiences and the associated comfort and convenience. In describing his WaterDream project, initiated within the scope of Axor 2005, he commented: "I visualise a lake in the heart of the countryside. I want to feel like I'm sitting by a camp fire,

listening to music and sipping champagne, and simply clear my mind." A feeling of complete relaxation..

Jean-Marie Massaud starts by considering the room in which his occupier is residing. He defines wellbeing as a holistic concept and lets water, man and space melt into one.

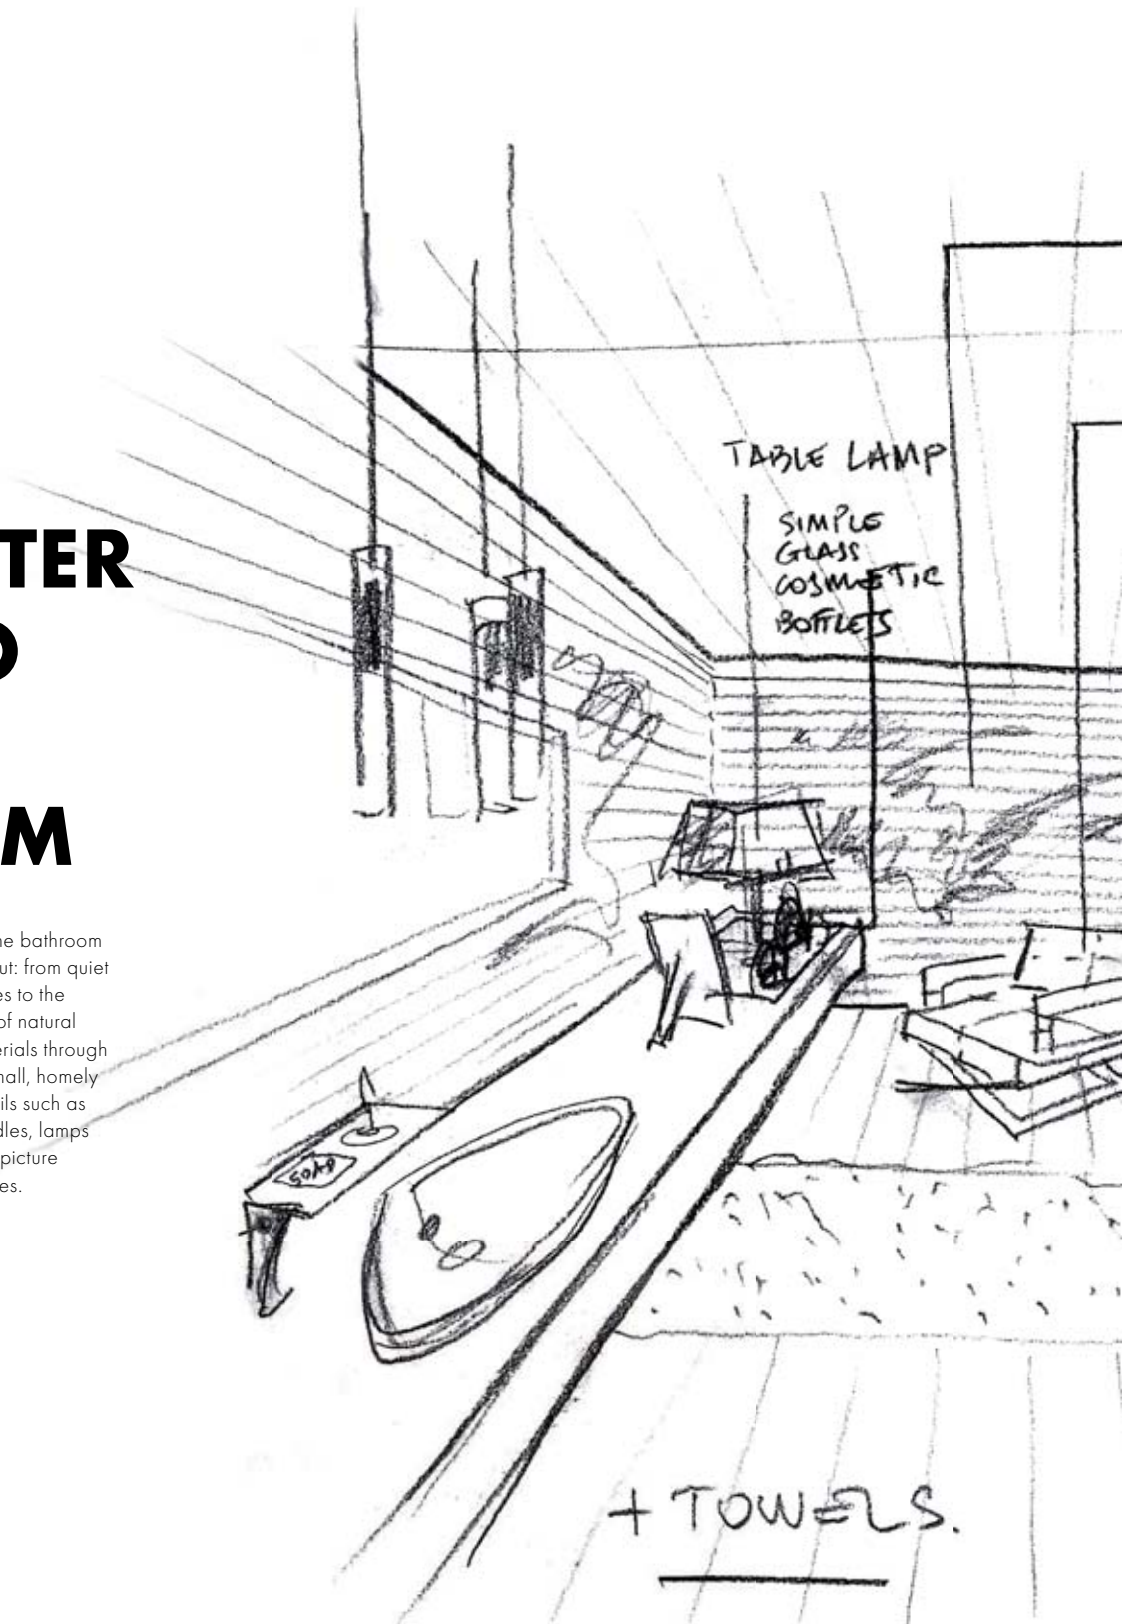

WARM END OF THE DAY

# FROM WATER DREAM TO A DREAM BATHROOM

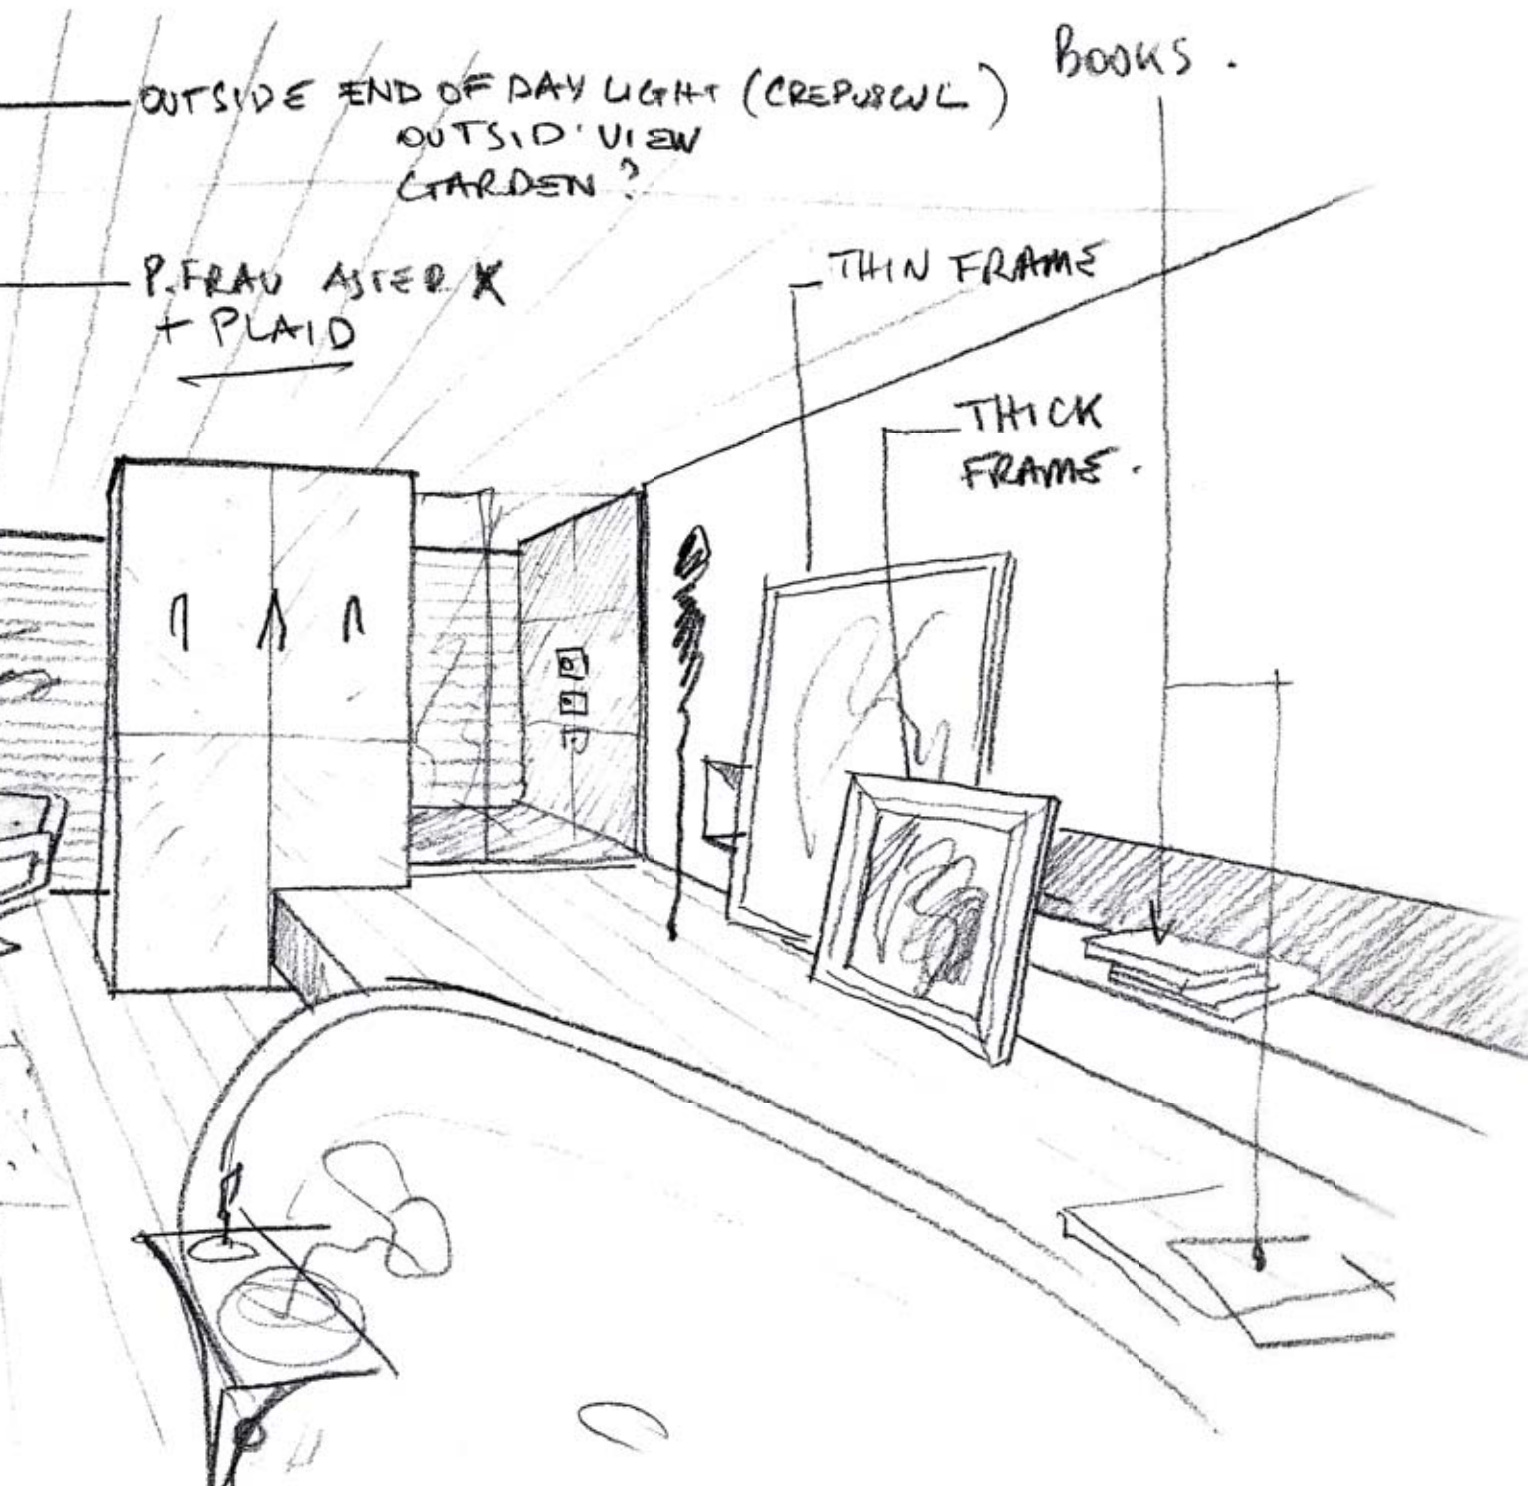

During the design process, the vision of the dream bathroom develops into a harmonious work that combines architecture, materials, lighting and bathroom products.

All the creative partners that work with Axor think beyond the actual product and its pure functionality for personal hygiene purposes. Through discussions between the designers and architects, Axor develops different concepts for the room and its use.

► The bathroom layout: from quiet zones to the use of natural materials through to small, homely details such as candles, lamps and picture frames.

# LIGHT + CANDLES

10  
11

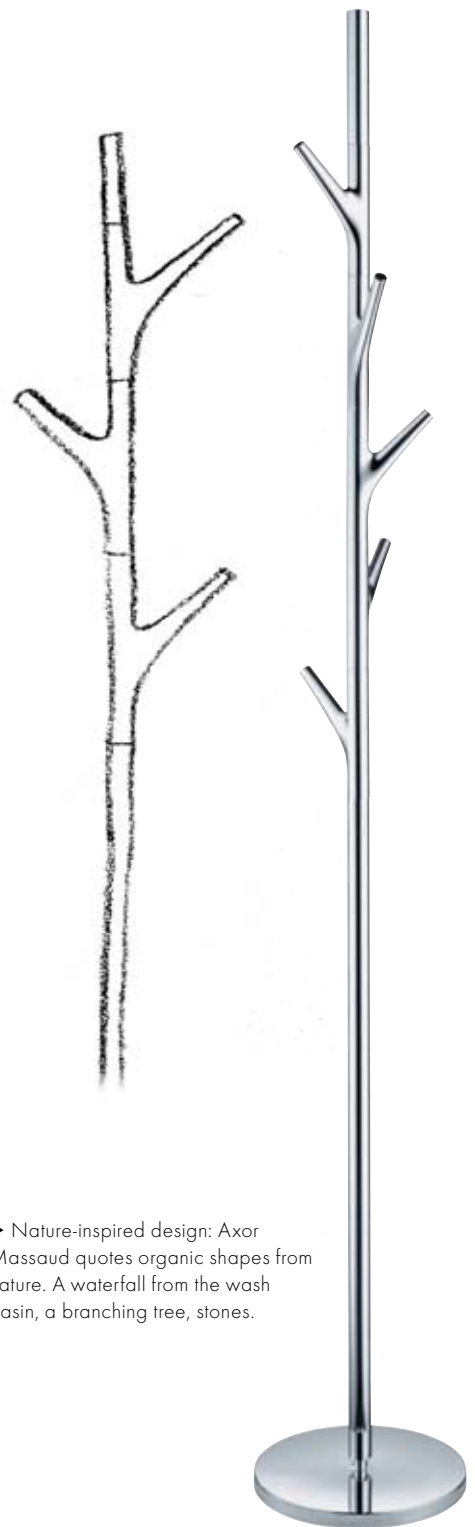

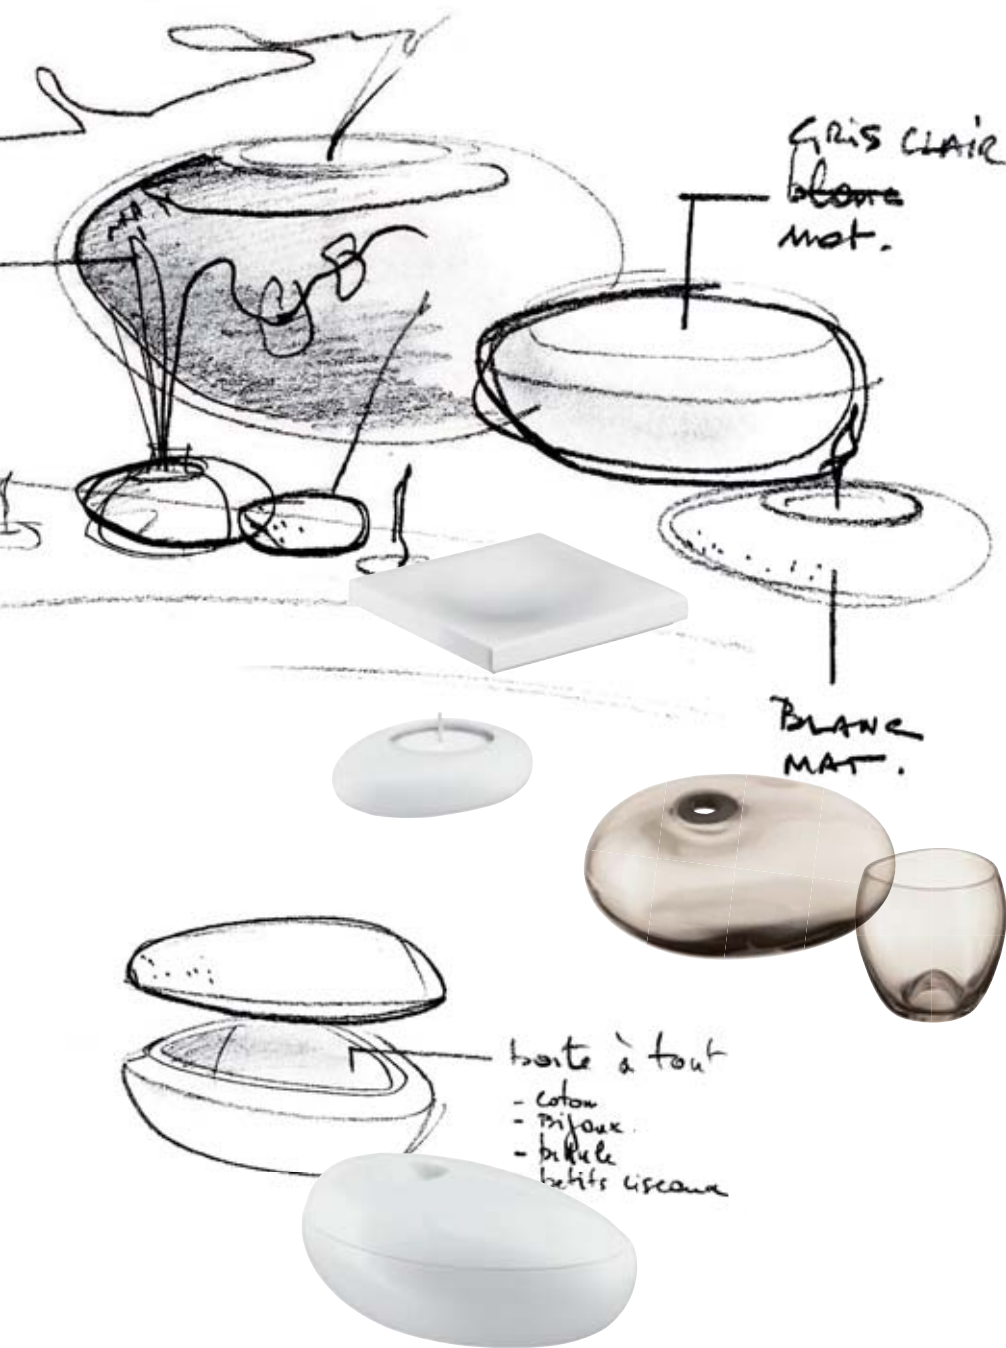

Does a dream bathroom have to be large? "Not at all" insists Philippe Grohe in contradiction of the prevailing opinion that designer bathrooms cannot be created without a sizeable room. "It is not the size of the bathroom that determines the quality, but the basic elements that convey the idea of the room concept." The designers' central room and usage

concepts can also be realised in small rooms and thus consider people's highly individual needs. There is good reason why most of the creative minds are also architects or interior designers and work with Axor to develop solutions and planning aids for small areas.

# NATURE-INSPIRED DESIGN – FROM MIXERS TO TOWEL RACKS.

◀ Jean-Marie Massaud creates harmony between organic lines and geometric shapes.

► Nature-inspired design: Axor Massaud quotes organic shapes from nature. A waterfall from the wash basin, a branching tree, stones.

In Jean-Marie Massaud's idea of the perfect bathroom, the resident brings the experience of nature into the home. In this regard, the designer first designs the room and then, in a second stage introduces the products whose design complements the idea of the nature-inspired room. The complete bathroom collection has therefore been designed in the characteristic organic style: pebbles, branches, logs and grass inspire an extraordinary collection. The body of the most striking product, the single lever mixer, resembles a blade of grass. Together with the archetypal shelf,

the mixer becomes a functional sculpture. In addition to the mixer, wash basin and bath tub, nature has also provided the inspiration for the accessories. Axor has developed a vanity box, candlestick, soap dish, vase, toothbrush tumbler and towel holder in line with the French designer's sketches and desires. The towel holder cites Massaud's philosophy as a branching tree, the vase celebrates the ritual use of water and the box and the candlestick resemble pebbles that would caress the hand.

# “CLEAR, PURE AND BEAUTIFUL LIKE A NATURAL WATERFALL.”

In the Axor WaterDream, Massaud manifested the philosophy that a mixer’s technical aspects should be hidden in the background. He moves away from pure control units while also wanting to provide an additional benefit. So what does a mixer look like if it is more than just a tap?

“What Massaud presented to us”, commented Philippe Grohe, “was absolutely futuristic and a little crazy.” But most of all, it was simply brilliant. Axor therefore did everything it could to turn his idea into a reality. “To

make the water flow quietly and smoothly out of the mixer’s spout, we had to completely re-design the interior workings of a mixer”, Horst Flieger, Head of the Hansgrohe Research and Development department, remembers. “Creating the optimum spray pattern was extremely fiddly.” To create this elegant water jet, the experts at the Hansgrohe spray laboratory had to incorporate highly sophisticated technology into the extremely flat plate. The result is clear: a mixer from which a beautiful waterfall flows; a particularly pleasant haptic experience that uses little water.

**1** The water runs evenly along parallel tracks.

**2** Small bridge pillars slow the flow rate of the water jet

**3** Stabilisation rims on the outer right and left prevent the eddying of the gentle flow

**4** A silicon lip makes it easier to thoroughly clean the mixer

The wash basin's geometry has been precisely tailored to the water jet.

▲ The designer Jean-Marie Massaud and the Axor development team were involved in intensive discussions for months on end. They regularly met for coordination meetings. After a development period of more than three years, Axor Massaud was finally launched on the market.

# AXOR MASSAUD. FROM THE BLACK FOREST TO THE WHOLE WORLD.

Design is not the only thing that shimmers. Every mixer and every shower is based on the roots of the company Hansgrohe, the demands of an innovative global player and a commitment to ensuring the best quality and manufacturing in Germany.

The designer brand's specially designated plant is located in the heart of Hansgrohe's head office site. The Axor plant in Schiltach, one of five production sites in Germany. Here, German engineering meets years of tradition to create the more than 5,000 different products in the Axor collections. Workmanship marked by design and technology.

A brief glance at the production processes quickly shows onlookers that the plant does not manufacture mass-made products. In the two-floor hall, employees work on the designer products in several shifts. It takes a great deal of handicraft to turn the designers' visions into reality.

Their high requirements give rise to many different production stages. For example, these include precisely casting and cutting the mixers or subjecting the square-edged surfaces to even more intensive processing to ensure that they are optimally chrome-plated. The moulding blank is refined like a raw diamond in many individual stages until the final aesthetics are achieved. Even the base of the Axor Massaud mixer is hand-polished until it acquires a brilliant shine.

◀ **Axor** Massaud

At a first glance at the end product, the laborious manufacturing process is not evident. The designer item undergoes numerous individual stages and quality controls before it finds its place in an Axor Massaud bathroom.

◀ The start of an Axor Massaud mixer: currently still a raw and inconspicuous brass bar, the raw material melts in the furnace at almost 1,000 degrees. The liquid metal now takes on its typical form.

▲ The route into the polishing department: the as yet unrefined mixer is polished by hand. To ensure that the surface has an impressive shine, all flat surfaces and edges are manually smoothed.

◀ The mixer is placed in an electrolytic immersion bath: the body is still made from brass. In one of the most modern galvanic systems, Axor Massaud now receives a brilliantly shiny chrome layer that ensures that the mixer remains hard-wearing and durable. To this end, it bathes in several galvanic baths for up to an hour.

▼ A single Axor Massaud mixer comprises almost 30 individual components. In the end assembly department, the specialised Axor Massaud employees put all the parts together to create the finished product: the hoses and the cartridge – known as the mixer’s “motor” – disappear into the body, the complete jet former

is screwed into the metal plate and the handle is adjusted. No product leaves the factory on its worldwide travels without first being tested for leaks and an optimum spray pattern.

# **“WHAT MATTERS IS CREATING HARMONY BETWEEN MAN AND WATER, THE ELIXIR OF LIFE. LUXURY IS USING LESS WATER AND LESS ELECTRICITY.”**

JEAN-MARIE MASSAUD

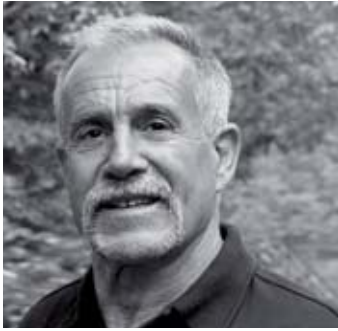

Jean-Marie Massaud's philosophy of "nature-inspired design" is based on the idea of harmony between man, water and space. However, the interaction of design, technology and the careful use of our resources shapes every project. In this regard, we at Axor value the precious commodities of water and energy. It is no wonder that this is also why the designers chose to work with Axor.

Sustainability is a central topic that covers multiple aspects, including ecological, economical and social responsibility. A bathroom in which the resident should enjoy a sense of wellbeing for more than 20 years has high demands in terms of sustainability: a design that will outlive all fashion trends, durable materials and excellent innovative strength in matters of quality and technology.

It is most likely our location in the Black Forest that teaches Hansgrohe to respect nature, on which we have always been reliant. It is therefore extremely natural for us to responsibly use the elements of water and energy. In this regard, Hansgrohe has always regarded itself as a crusader of environmental protection - long before "sustainability" became a corporate buzz word.

Klaus Grohe, son of the company founder and long-standing Chair of the Supervisory Board, awakened the company and its employees to the need to use water responsibly: "Water is far more than just a consumer good. It is an elixir of life. It therefore deserves all of our respect and our consideration." He was one of the first people in the industry to promote water-saving technology. He personally tested the pilot system for water treatment, on which the Pontos recycling system was based in 2001, in his own home. Used shower and bath water, known as grey water, is treated to become clear water and then made available for reuse for flushing toilets or in washing machines.

During galvanisation, for example, the production department in Schiltach is setting the standard regarding the respectful use of resources. The water and chemical consumption levels have been successfully reduced. Thanks to a special filter method, 90% fewer surfactants infiltrate the waste water. This also notably and continually reduces our energy consumption and pollutant emissions. The company's own solar power plant has generated 147,000 kWh of electricity every year since 1994 - enough energy to supply 45 single-family houses.

▲ Klaus Grohe, son of the company founder and long-standing Chair of the Supervisory Board, awakened the company and its employees to the need to use water responsibly.

▲ In the heart of the Black Forest, the primordial element of water is all around.

► The solar tower constructed in 1994 is a sign of Hansgrohe's environmental management.

**EXAMPLES OF OUR GREEN COMMITMENT:**

**1987**

Hansgrohe develops the first water-saving shower, which uses 50% less water than previous showers.

**1993**

Hansgrohe puts into operation Germany's largest photovoltaic plant and produces its own solar power.

**1994**

Hansgrohe generates its own electricity from its solar tower in the Offenburg plant and is a pioneer in eco-architecture.

**2001**

The Pontos grey water recycling system treats shower and bath water, making it reusable, for example for toilet flushing.

**2008**

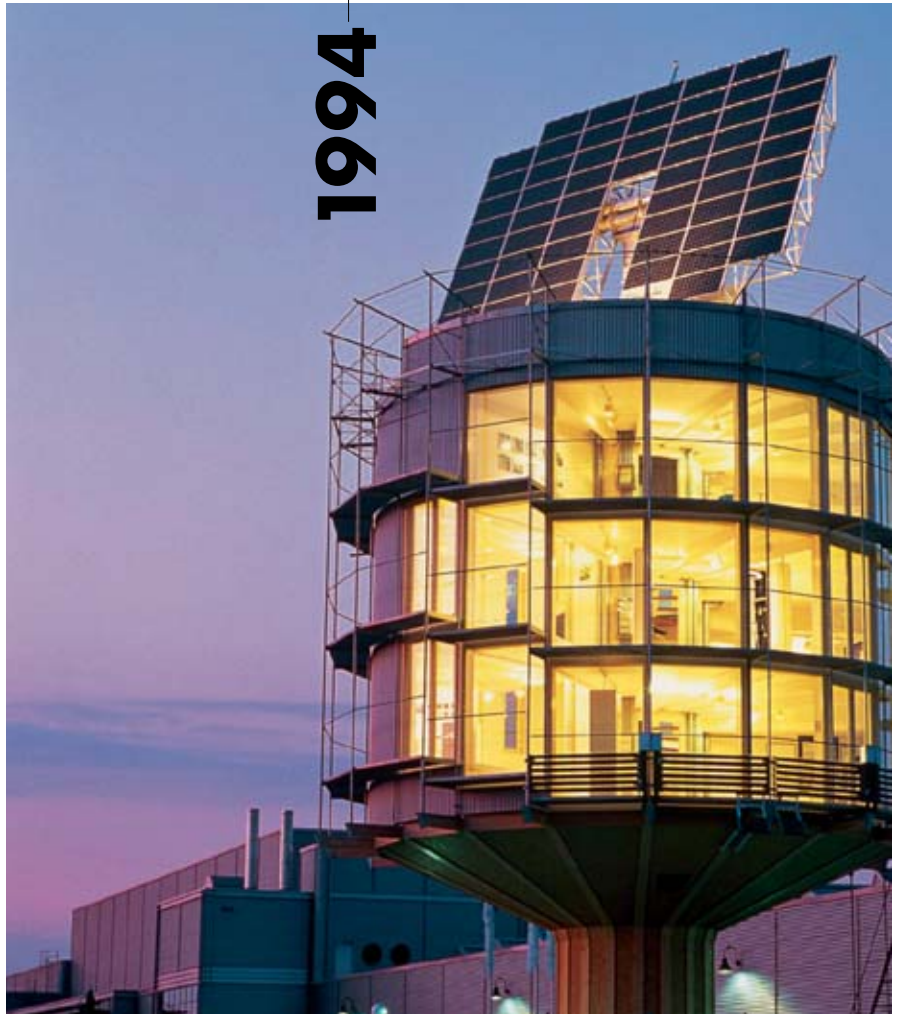

The first Hansgrohe water symposium takes place. Experts, scientists and practitioners examine a broad range of water-related topics in lectures and workshops.

**2009**

Eco-Smart technology reduces the water consumption of all Axor mixers from 7 to 5 litres per minute through a pressure-independent flow limiter.

**2010**

Axor forum in Kochi, India, on the topic "The added value of design with regard to sustainability" with the designer Jean-Marie Massaud as a guest speaker.

# AXOR AROUND THE WORLD

## AXOR'S LATEST PRESTIGIOUS ADDRESSES, INTERNATIONAL DEMAND FOR DESIGN AND IMPRESSIVE BATHROOM WORLDS

No two bathrooms are the same. Further to architectural differences, bathrooms also adapt to the style of their occupants, the cultural area and, in all cases, personal values and desires. For many years, the collections of several designer styles have been incorporated into outstanding architectural projects all over the world. Truly impressive architecture that can be truly summarised by the motto "higher, further, more exclusive". In top-class hotels and office buildings in the world's metropolises, in luxury

yachts on the high seas, in private places of retreat, such as in the African bush, or in other international projects. Types of properties that could not be more different, yet all have several things in common: a high demand for quality, innovative designs and a respectful use of water. The next few pages provide inspiring insights into impressive architectural achievements, which have only recently been fitted with Axor collections.

**Height:**  
828 m

**Storeys:**

**Mixers:**  
Axor Starck

**Architect:**  
Adrian Smith, Chicago USA

### **AXOR STARCK AT HOME IN THE TOWER OF SUPERLATIVES**

#### **◀ BURJ KHALIFA, DUBAI**

The prestigious architectural work towers over the Gulf metropolis like a native six-leaf desert flower. When the Khalifa Tower was inaugurated in January 2010, it broke all records. Currently the highest building in the world, it has 189 storeys, 900 apartments, 37 office levels and houses the Armani Hotel with 160 rooms and suites. More than 5,000 Axor Starck mixers play their part in the record.

# MANDARIN ORIENTAL HOTEL

## PATRICIA URQUIOLA DESIGNS THE NEW ADDRESS FOR EXCLUSIVE ACCOMMODATION IN BARCELONA

Opened in 2010, the Mandarin Oriental is located on the elegant Passeig de Gràcia shopping street, just a stone's throw away from Gaudí's famous Casa Batlló. The architects Carlos Ferrater and Joan Trias de Bes converted the 17,000 square metre site of the former Banco Hispano Americano into a luxury oasis. The limestone facade of the nine-storey building is largely retained thanks to extensive efforts. Only the entrance was given a more hotel-like architecture with a sense of moving along a hallway into the inner of the atrium. The former bank trading floor now houses a lounge and restaurant as well as the "Bankers' Bar". On the roof, the 600 square metre terrace provides a spectacular view over the European metropolis.

The Spanish-born, award-winning designer Patricia Urquiola was responsible for the hotel's interior design. She emphasises the Asian roots of the Hong Kong hotel group and re-interprets the details with her European perspective. Her characteristic style fusion can be seen in every corner: abstract flowers blossom on an orange silk rug. Gold leaf clouds adorn the ceiling of the "Moments" restaurant. Golden grilles resemble the wrought-iron grilles found throughout the city and glimmering white wardrobes resemble Japanese hand-painted boxes. All 98 rooms and

suites are decorated in cream and white tones. Oak floorboards combined with soft plush carpets and designer furniture creates a refined, homely atmosphere - always with a little variation so that each room is unique.

### **POETRY RIGHT THROUGH TO THE BATHROOM**

Patricia Urquiola stands for open-plan room design and the harmonious merger of the bedroom and bathroom. The Spaniard also uses a feminine touch to implement this philosophy in the Mandarin Oriental. Satin-finished glass walls act as screens without separating the areas too harshly. Organic shapes combined with the use of woods create a lively yet sensual atmosphere.

On the second basement level, the oriental spa offers 1,000 square meters of pure luxury. Far-eastern and oriental accents are harmoniously embedded into the purposefully dimly lit environment between the relaxation suites, Thai massage treatment rooms, several hot water baths, a sauna area and a Hammam.

▼ **WARMTH AND SECURITY**

The rooms are decorated with natural materials, light oak floorboards and subtle colours.

◀ **BATHROOMS WITH A FEMININE TOUCH**

The Axor Urquiola collection harmoniously blends into sensual bathrooms.

- Architects: Carlos Ferrater and Joan Trias de Bes, Barcelona/Spain
- Interior designer: Patricia Urquiola, Milan/Italy
- Collection: Axor Urquiola

## SUNSEEKER YACHTS, POOLE

The Predator 130 is among the world's most highly refined luxury motor yachts. At a length of 38.62 m and with a capacity for up to 17 people, it is the flag ship of Sunseeker, the British icon of exclusive yacht construction. The spacious interiors are tailored to the needs and desires of their owners. Each yacht is unique. The individuality of the Axor Starck ShowerCollection and the exclusivity of Axor Massaud make them the ideal collections for the bathrooms of the luxury Sunseeker yachts.

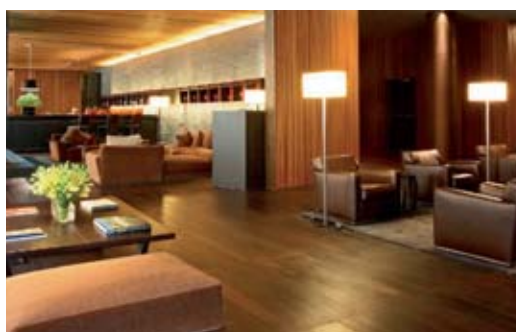

- Shipyard: Sunseeker International Limited, Poole/UK
- Collection: Axor Starck ShowerCollection and Axor Massaud

## BARVIKHA HOTEL, MOSCOW

In the Barvikha luxury village, located in one of Moscow's most exclusive suburbs and in close proximity to numerous prominent brands, is the latest showpiece of the Russian hotel industry. The luxury resort with a stylish spa was designed in line with traditional Russian wooden architecture: refined and natural materials are combined with warm colours to create a stylish atmosphere. The bathrooms in the 65 rooms and suites are elegantly fitted with Axor Citterio products.

- Architect: Project Meganom, Moscow/Russia
- Interior designer: Antonio Citterio and Partners
- Collection: Axor Citterio

**HOUSE BUYS, LEOPARD CREEK,  
SOUTH AFRICA**

Modern African bush house design: the architects combine an exciting new appearance with modern simplicity that celebrates the African experience. The modern interpretation of a classic veranda provides a clear view out across the Krüger national park; raw African crafts are used to furnish the bathroom area. The organic design of the wash basin and mixers from Axor Massaud underline the connection with nature.

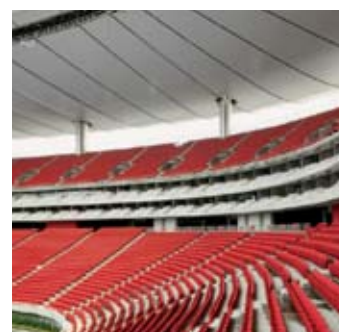

- Architects: Silvio Rech and Lesley Carstens Architecture & Interior Architecture, Johannesburg/ South Africa
- Collection: Axor Massaud

**ESTADIO CHIVAS,  
GUADALAJARA, MEXICO**

The volcano-shaped, multi-purpose stadium blends into the landscape. Instead of designing a typical architectural structure, Jean-Marie Massaud designed a new human and economic system that respects the landscape and the environment. Cars are banished beneath the stadium. The multi-use stadium, with a seating capacity of 45,000 and children's play areas, beauty salons, a climbing wall and roller blade track is becoming a meeting place for families. The nature-inspired architecture is also reflected in the design of the Axor Massaud collection.

# Philippe Starck

"If design has nothing to say then it should not exist."

Philippe Starck is the enfant terrible of designers and one of the best known creative minds of today. The Frenchman was launched to fame with a lemon squeezer in the form of a spider. He first made the headlines when he designed the private rooms of then French President François Mitterrand. Many people regard him as having a streak of genius, which regularly provokes with its playful, often spectacular style. Starck is quite simply Starck.

**Axor** Starck

**Power**  
uncompromising

**original**

The aesthetics of minimalism. In today's hectic world, people yearn more and more for tranquillity and simplicity. The Axor Starck bathroom collection focuses on the basics, the enjoyment of water. The principle of reduction can be seen in the basic shapes and clear functions. There are no distractions. The result: a timeless bathroom collection that will never go out of fashion. Like a fountain that springs up from the depths of the earth, we can draw from Axor Starck and refresh our bodies and minds in a bathroom that offers tranquillity and relaxation.

A place of retreat from our hectic world. Homely accents such as wooden floorboards, an open fire and the bath tub, which is spaciouly positioned in the room, make the bathroom a place of wellbeing.

The discovery of simplicity: the mixer's shape is inspired by a simple water pump.

The shower column with plate overhead shower has minimalist traits: clear, functional, timeless.

In designing the dual handle mixer, Philippe Starck took inspiration from two interflowing waterways.

Axor Starck is available with two different handle options: a completely cylindrical version and the cylindrical-organic version with a feather shaped handle.

Axor Starck X has an almost sculptural design language. The square plate seems to weightlessly hover above the wash basin.

The Waterwall beautifully integrates all key shower elements: mixers and shelves, a plate overhead shower and side showers.

**Axor** Starck ShowerCollection

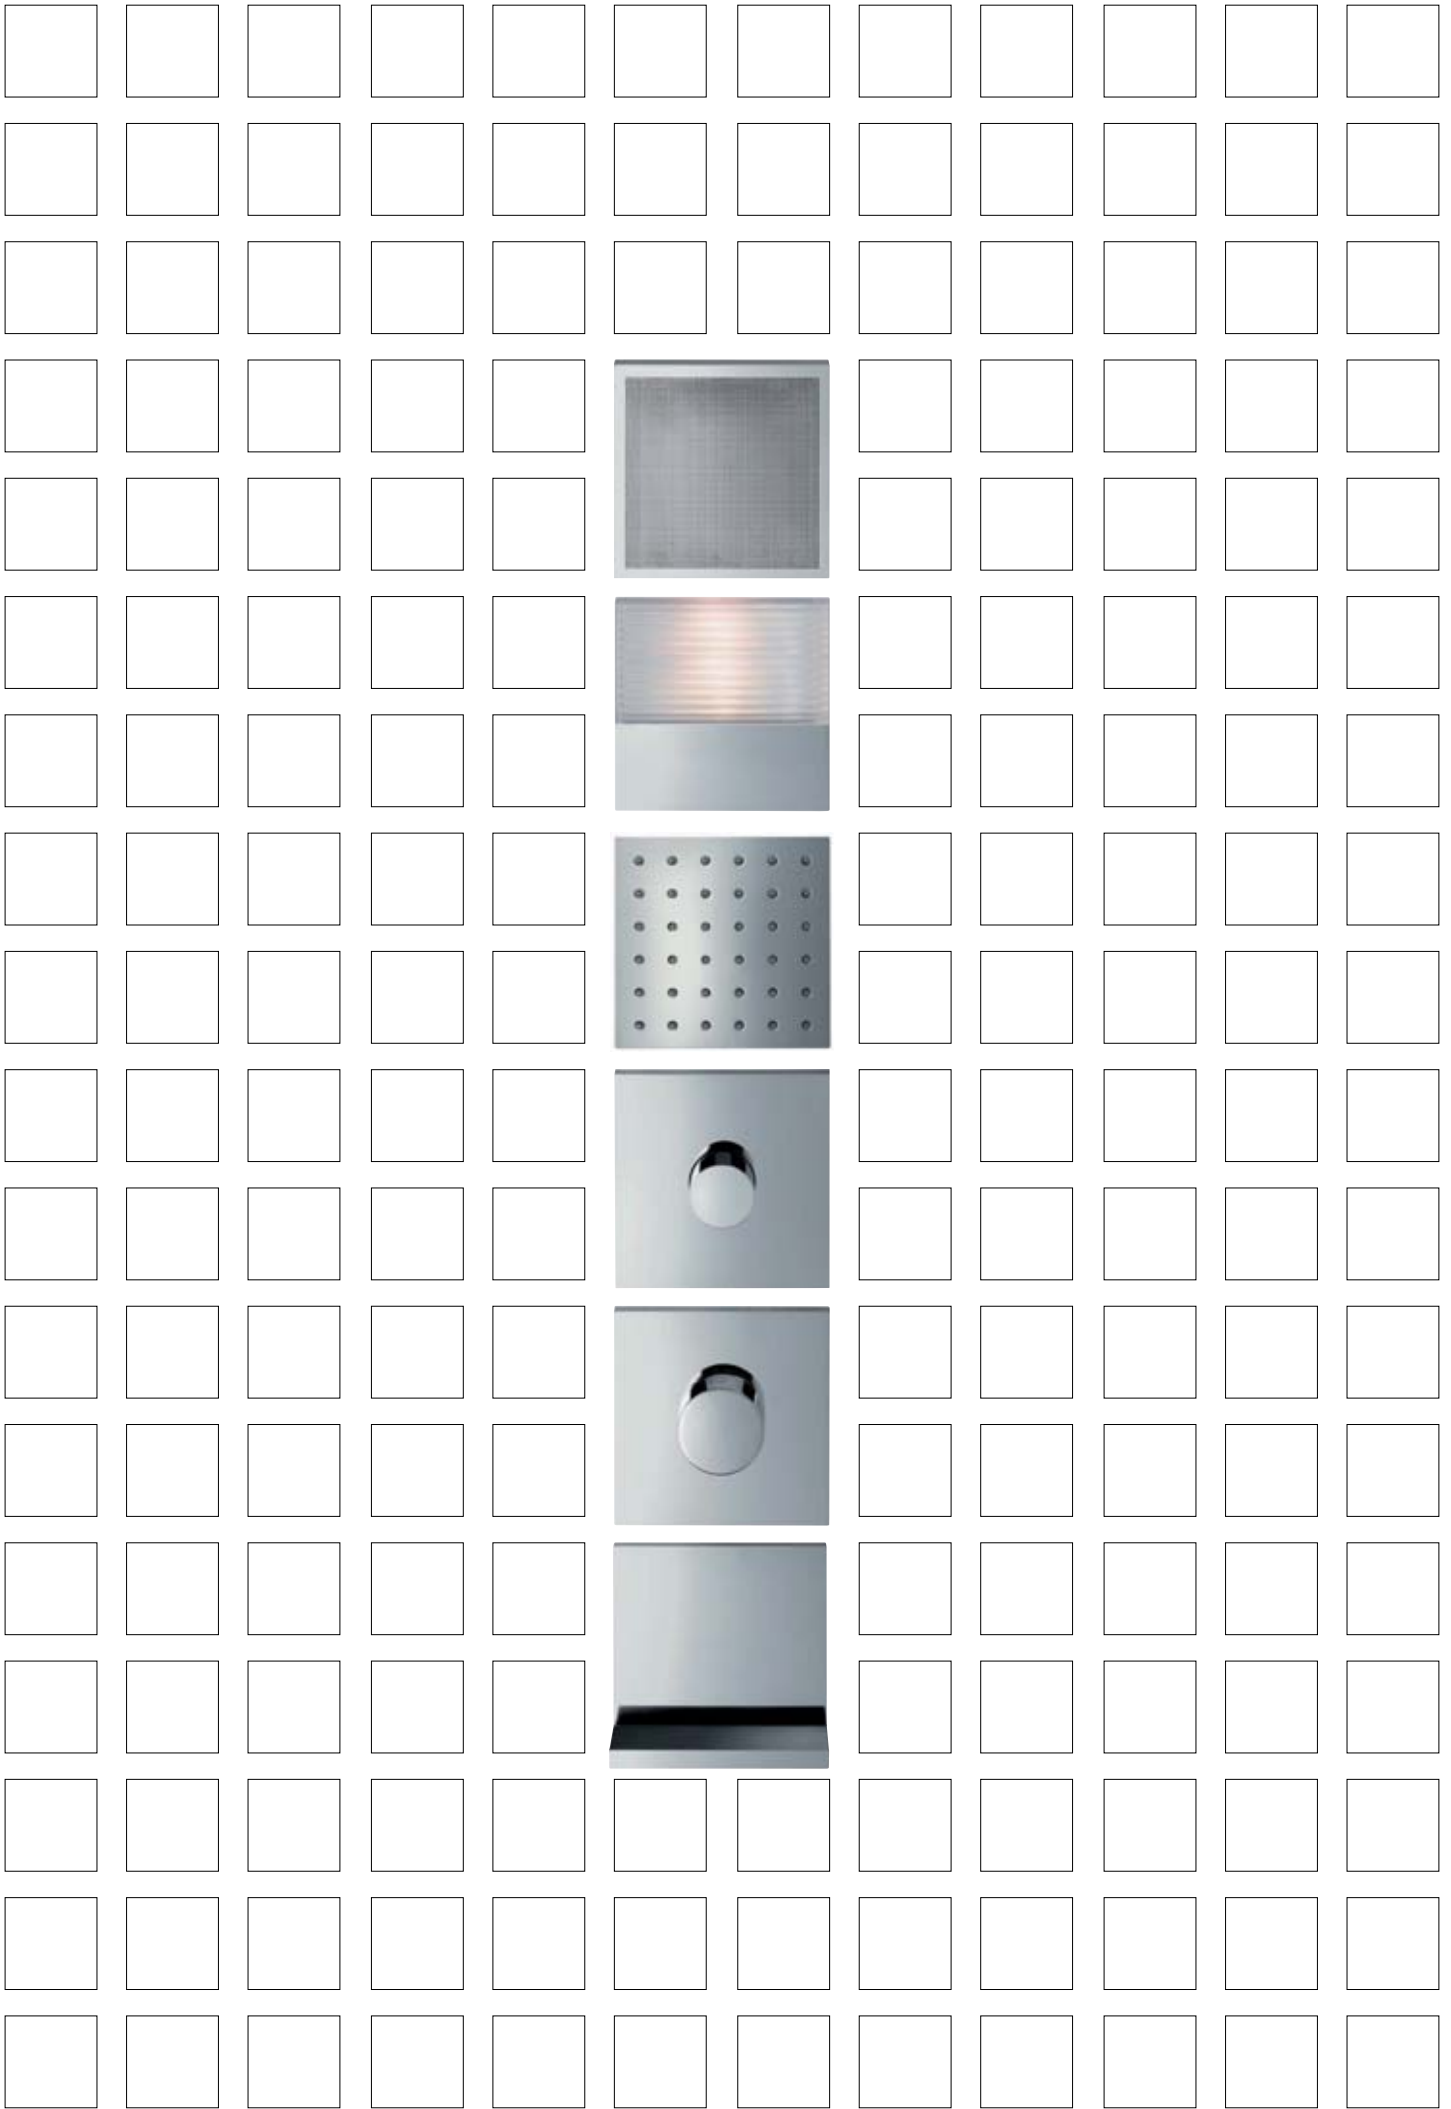

**12  
12X**

"Just mix it" is the motto of the Axor Starck Shower-Collection. The modular design can be used to transform the shower into a tailored-made spa. The simple, customisable system comprising shower heads, mixers and accessories provides almost endless design freedom. 12x12cm squares can be arranged in line with our visions: whether in a linear or a free pattern - anything is possible.

A vertical shower panel is mounted on a light-colored wall. It features four cylindrical control knobs stacked vertically at the top. Below them is a square showerhead with a grid of small circular nozzles. At the bottom of the panel is a square valve with a single cylindrical handle. To the right of the valve, a handheld shower wand is attached to a vertical bar. Two hoses hang from the bottom of the panel. The background is a blurred glass shower door.

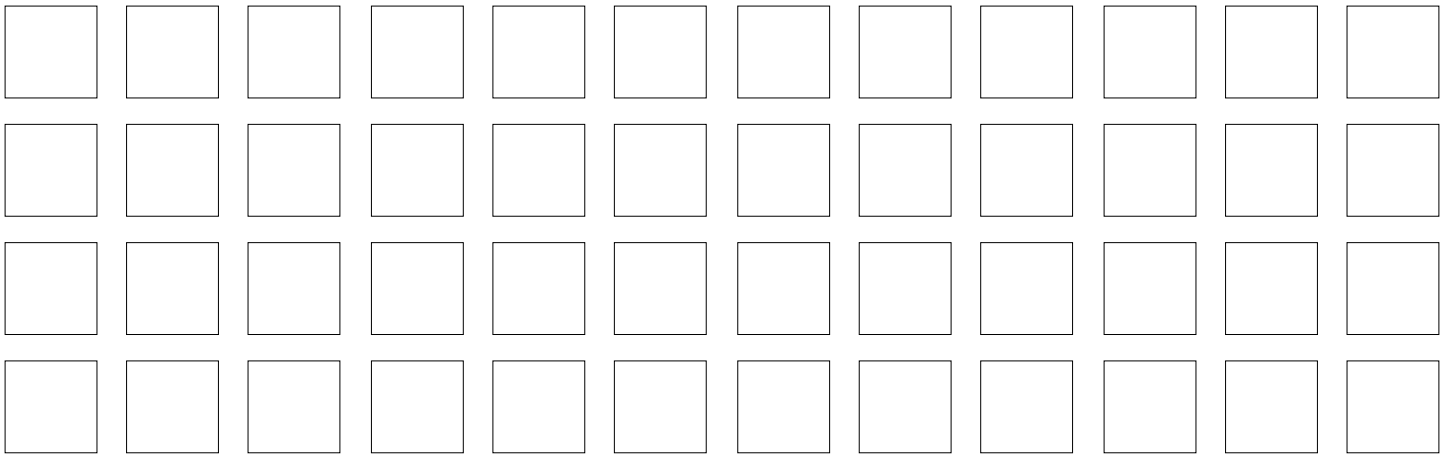

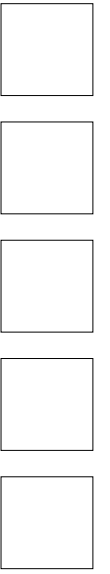

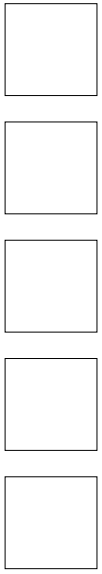

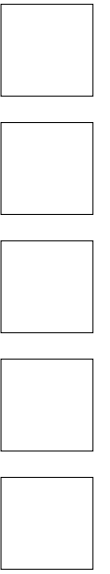

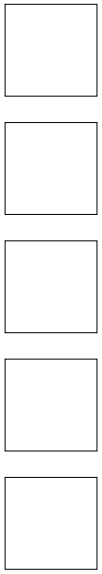

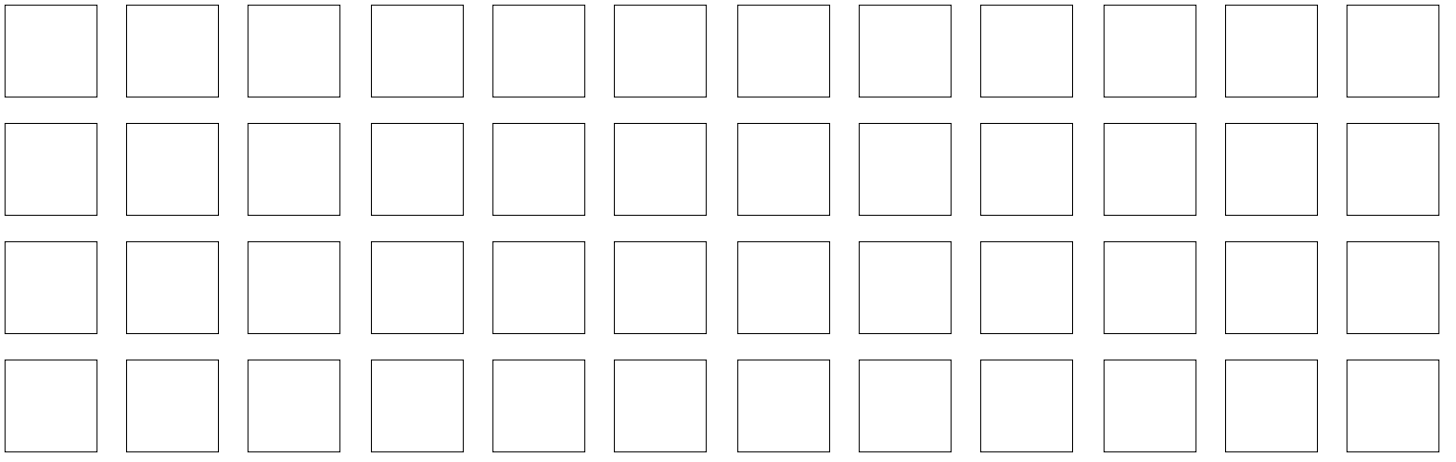

The individual functional modules such as the hand shower, side shower, valve and thermostat can be flexibly combined to form an intelligent shower system.

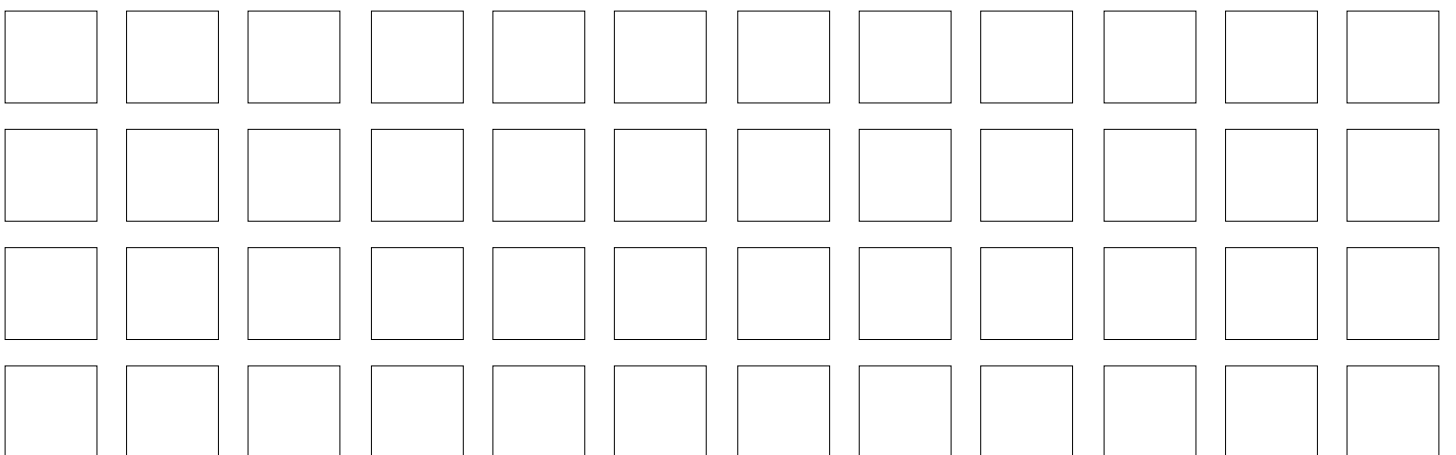

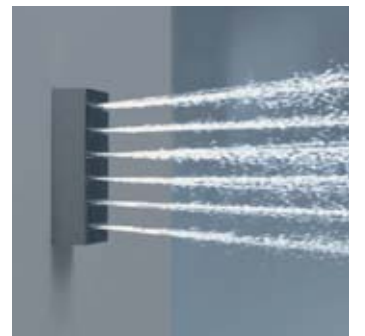

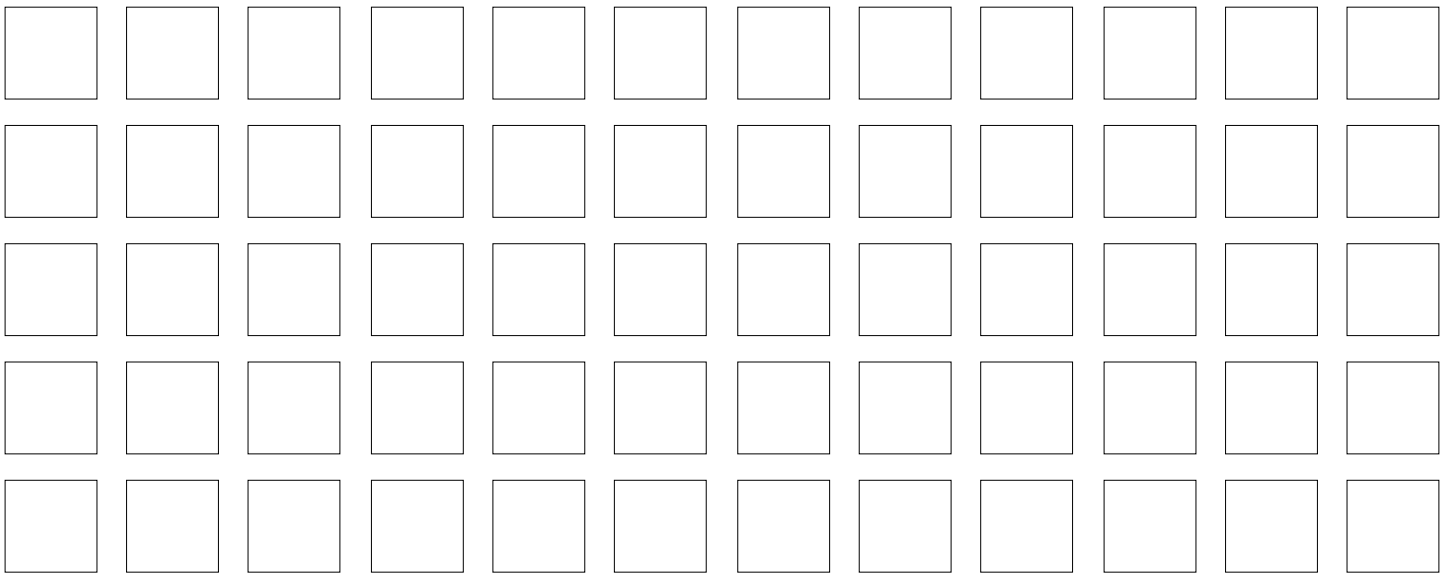

Haute Couture in the bathroom.  
The luxurious Axor Starck  
ShowerHeaven overhead  
shower with three different jet  
types is the finishing touch for  
a perfect shower.

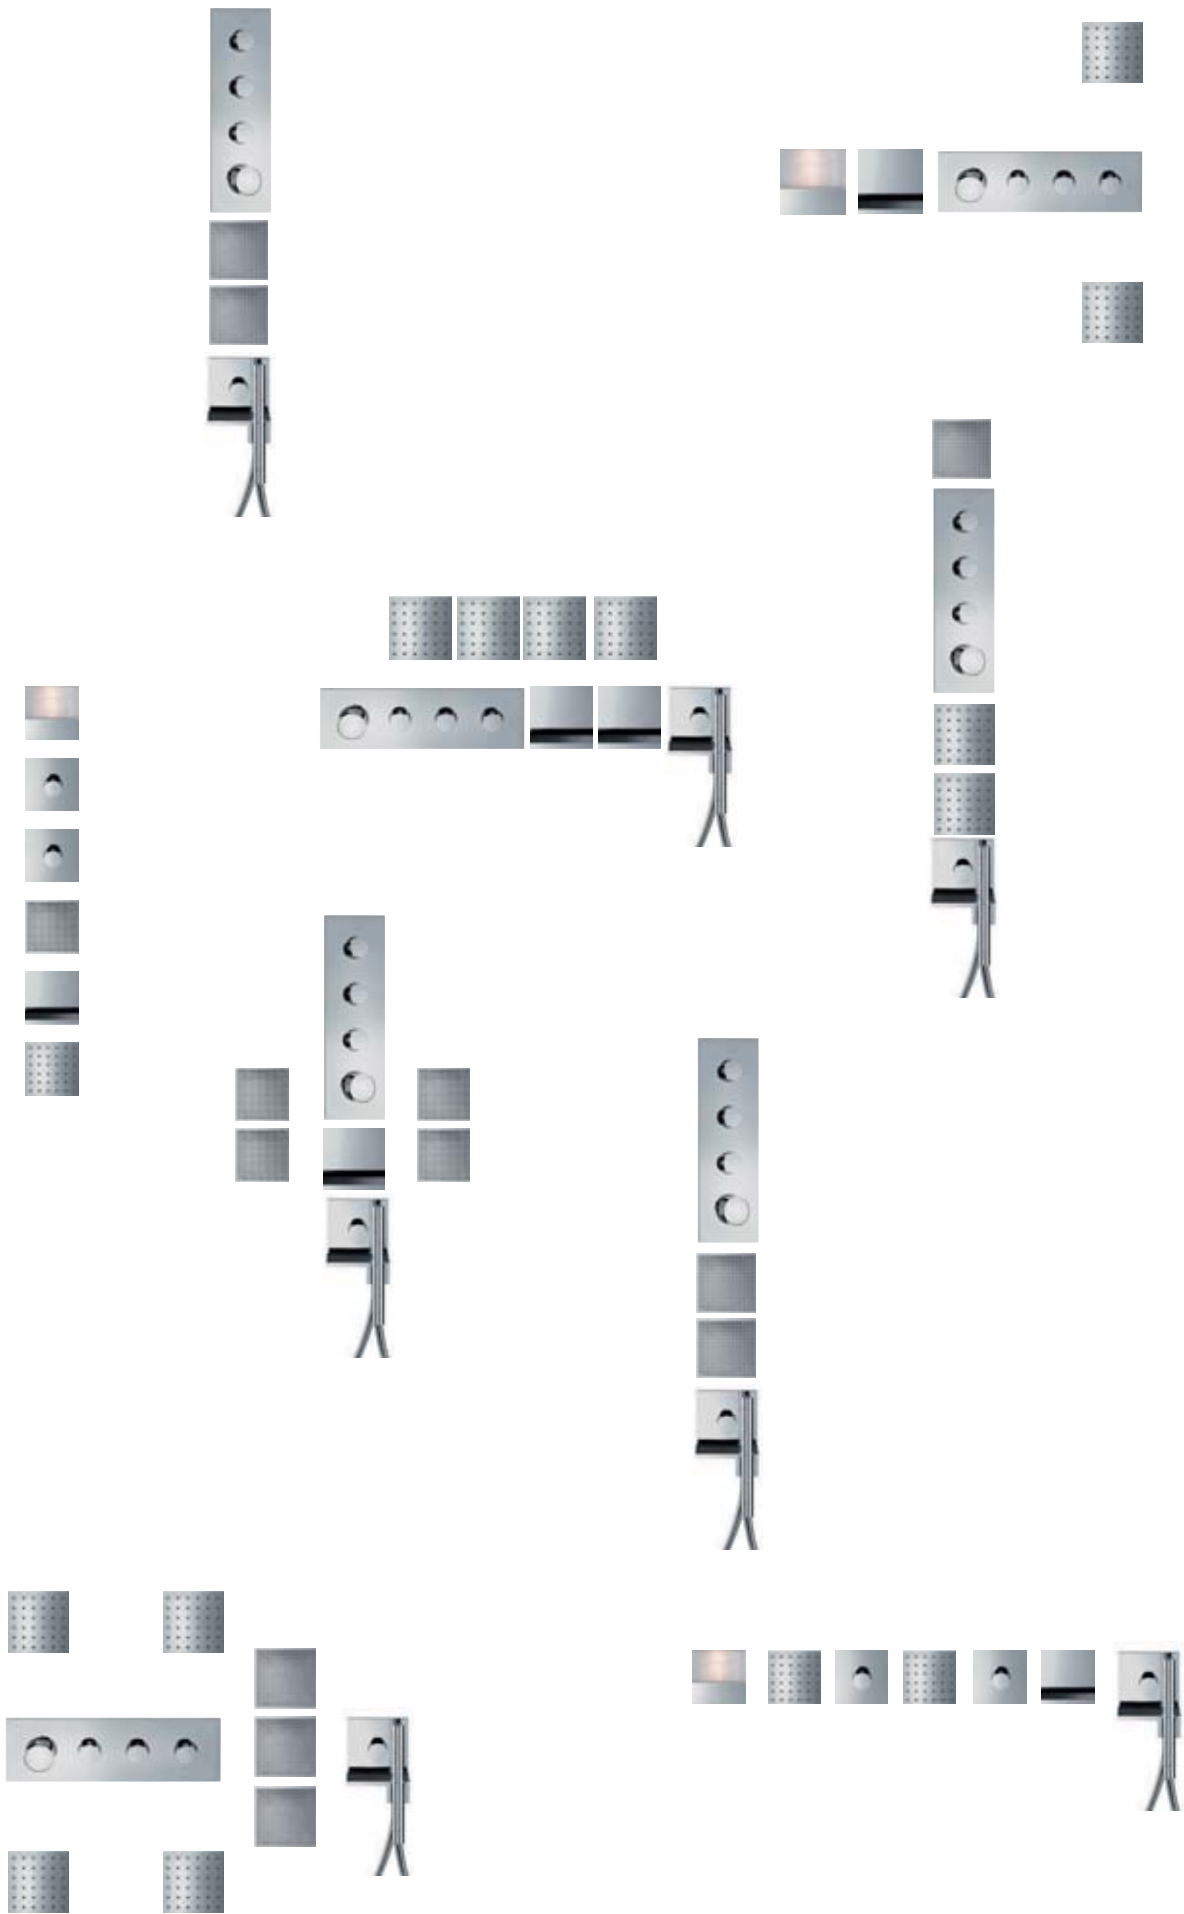

Convenience modules enhance the showering experience: from lighting to loudspeakers to shelf options.

# ANTONIO CITTERIO

## THE GENTLEMAN OF ITALIAN DESIGN

### **Antonio Citterio shapes international design like few others.**

The Milan-based architect and designer's creations are usually based on existing styles. "Above all else, I am an architect", commented the analytical spirit, who takes his inspiration from modern life and living in the world's cities. Citterio's top priority is therefore always the space. The product comes second.

### **At 13, he designed his first piece in his father's furniture workshop.**

At 18, he received a design award for a hand-made cupboard. At the age of just 22, he opened his first office, even before completing his architecture studies in Milan. Today, some fifty employees work on international architecture, interior and design projects: from the Milan metro to offices and hotels. Citterio's work also stands for modern living design. In 2007, he received the title "Royal Designer" from the British Royal Society.

**Axor** Citterio

**“Those who enjoy celebrating the daily ritual of**

**washing should do so with beautiful products.”**

**ANTONIO CITTERIO**

Antonio Citterio pays tribute to the element of water with a particularly elegant, minimalist collection. Axor Citterio lets us truly enjoy the time we spend in the bathroom. With his most precisely formed surfaces and edges and his beautiful details, the richness of which becomes clear on a second glance. In a bathroom in which living and personal hygiene are intentionally cultivated.

Axor Citterio mixers are characterised by their straight edges with hints of elegance and class. These features can be found in all mixer versions - from the single lever mixer to the classic 3-hole mixer.

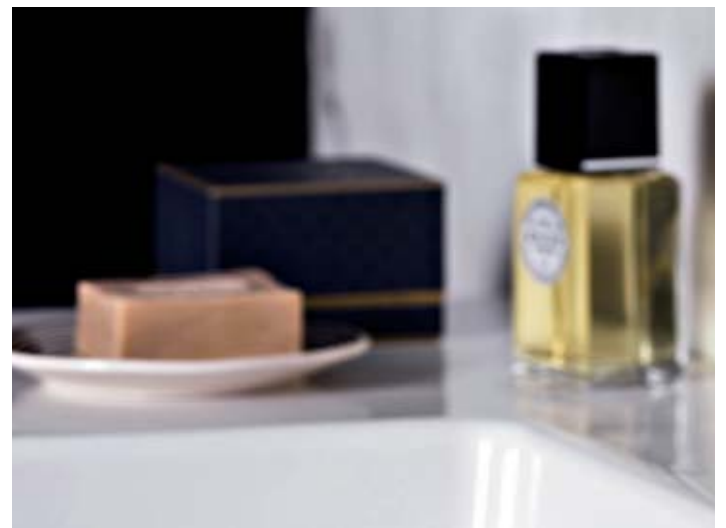

Antonio Citterio designed the elegant, slender cross head handles on the mixers in tribute to the Italian architectural style of the 1930s. The bath tub also stems from the Italian designer's pen.

72  
73

A modern shower system is mounted on a white marble wall with brown veining. The system includes a rainfall showerhead at the top, a handheld shower wand on a vertical bar, and a horizontal bar with a black handle. A circular mirror is mounted on the wall next to the handheld shower wand. To the right is a black-framed window with a grid pattern, reflecting the outdoor scene. In the bottom left corner, a small black stool holds a bar of soap and a sponge.

Luxurious showering comfort at its best. Whether as an exposed or concealed installation.

**Axor** Citterio M

What does a bathroom collection inspired by modern city life look like? It reflects the fine art of timelessly modern design. Axor Citterio M is characterised by eye-catchingly slender shapes.

The "M" stands for modernity, metropolis and Milan - the home city of the designer Antonio Citterio. A collection that adeptly fits in to the most different of lifestyles with its unique lightness.

# MILANO METROPOLIS MODERNITÀ MODERNITÀ

Urban chic. Antonio Citterio takes his inspiration from modern city life. A bathroom collection full of minimalism and elegance, clarity and Italian charm.

The elegant, towering mixer is particularly suited with free-standing wash bowls.

The characteristic Citterio design is also found in the shower and the bath tub.

*Patricia URQUIOLA*

is the Spanish architect and designer  
with a propensity for the decorative.

The master of **STYLE FUSION**

wonderfully merges old and new,

*floral, folkloric* and *fantastical*.

All of her creations

share a **FEMININE**

**TOUCH**. Her masterpieces

include chairs and armchairs that  
she developed for prominent  
furniture manufacturers.

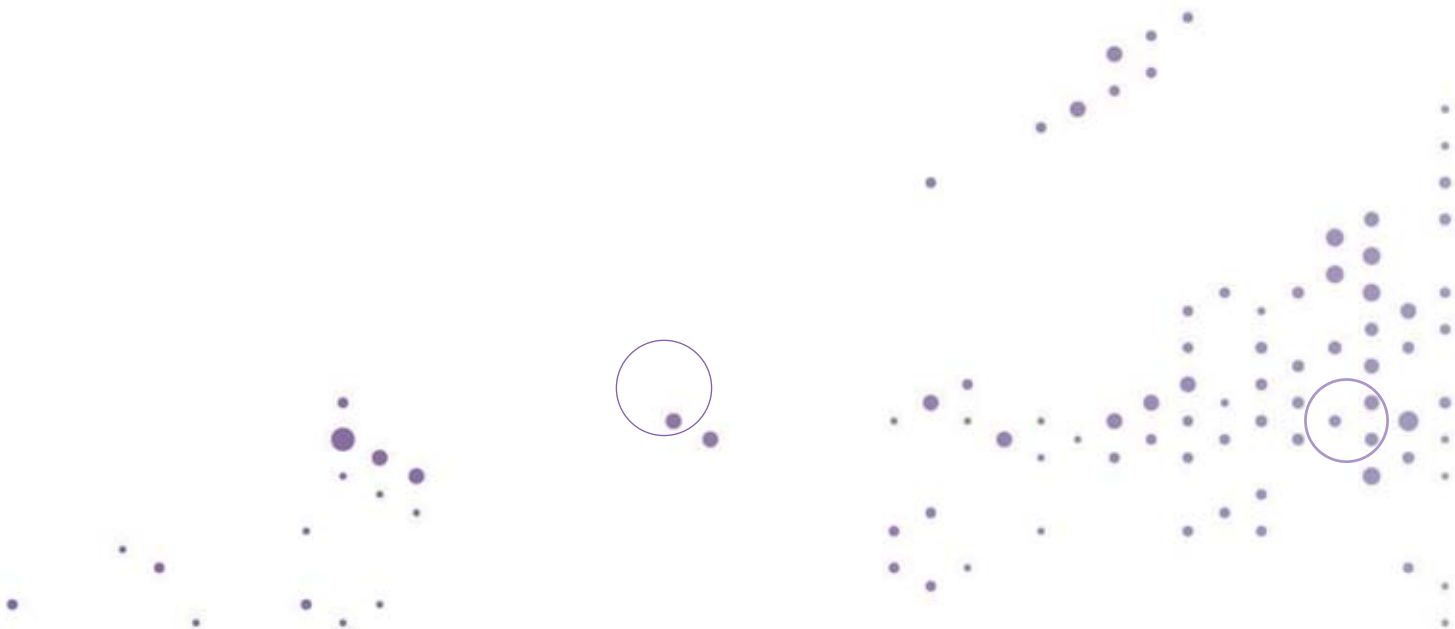

The international press has

already named her **BEST  
DESIGNER**

in recognition of the refreshing  
momentum she has given to the market.

# **Axor** Urquiola

Can a **BATHROOM**  
tell a *story*? Yes. Let us *dream*,  
**REMINISCE**

and be surrounded by all the things we love  
that we have accumulated over our lifetime!

*Patricia Urquiola* loves  
mixing different style and shapes.

She wonderfully *merges* old and new.  
Each individual element possesses its

own *charm* and combines with  
the other items in the room to create a homely unit.

Instead of stylised rooms, we experience

real **LIFE**. The master of  
style fusion takes her

*inspiration* from people and  
their desires. "I want people to approach

my products and *feel* the urge to *touch*  
them rather than just look at them."

The BATHROOM that  
*awakens* our SENSES.

106  
107

EVERYONE should have  
a certain *amount of privacy*.  
The typical dual wash basin  
therefore makes way for  
*two* separate basins.

PLANTS play an *important role*  
for the Spanish-born designer.  
They offer *privacy*  
and enhance **QUALITY**  
**OF LIFE.**

110  
111

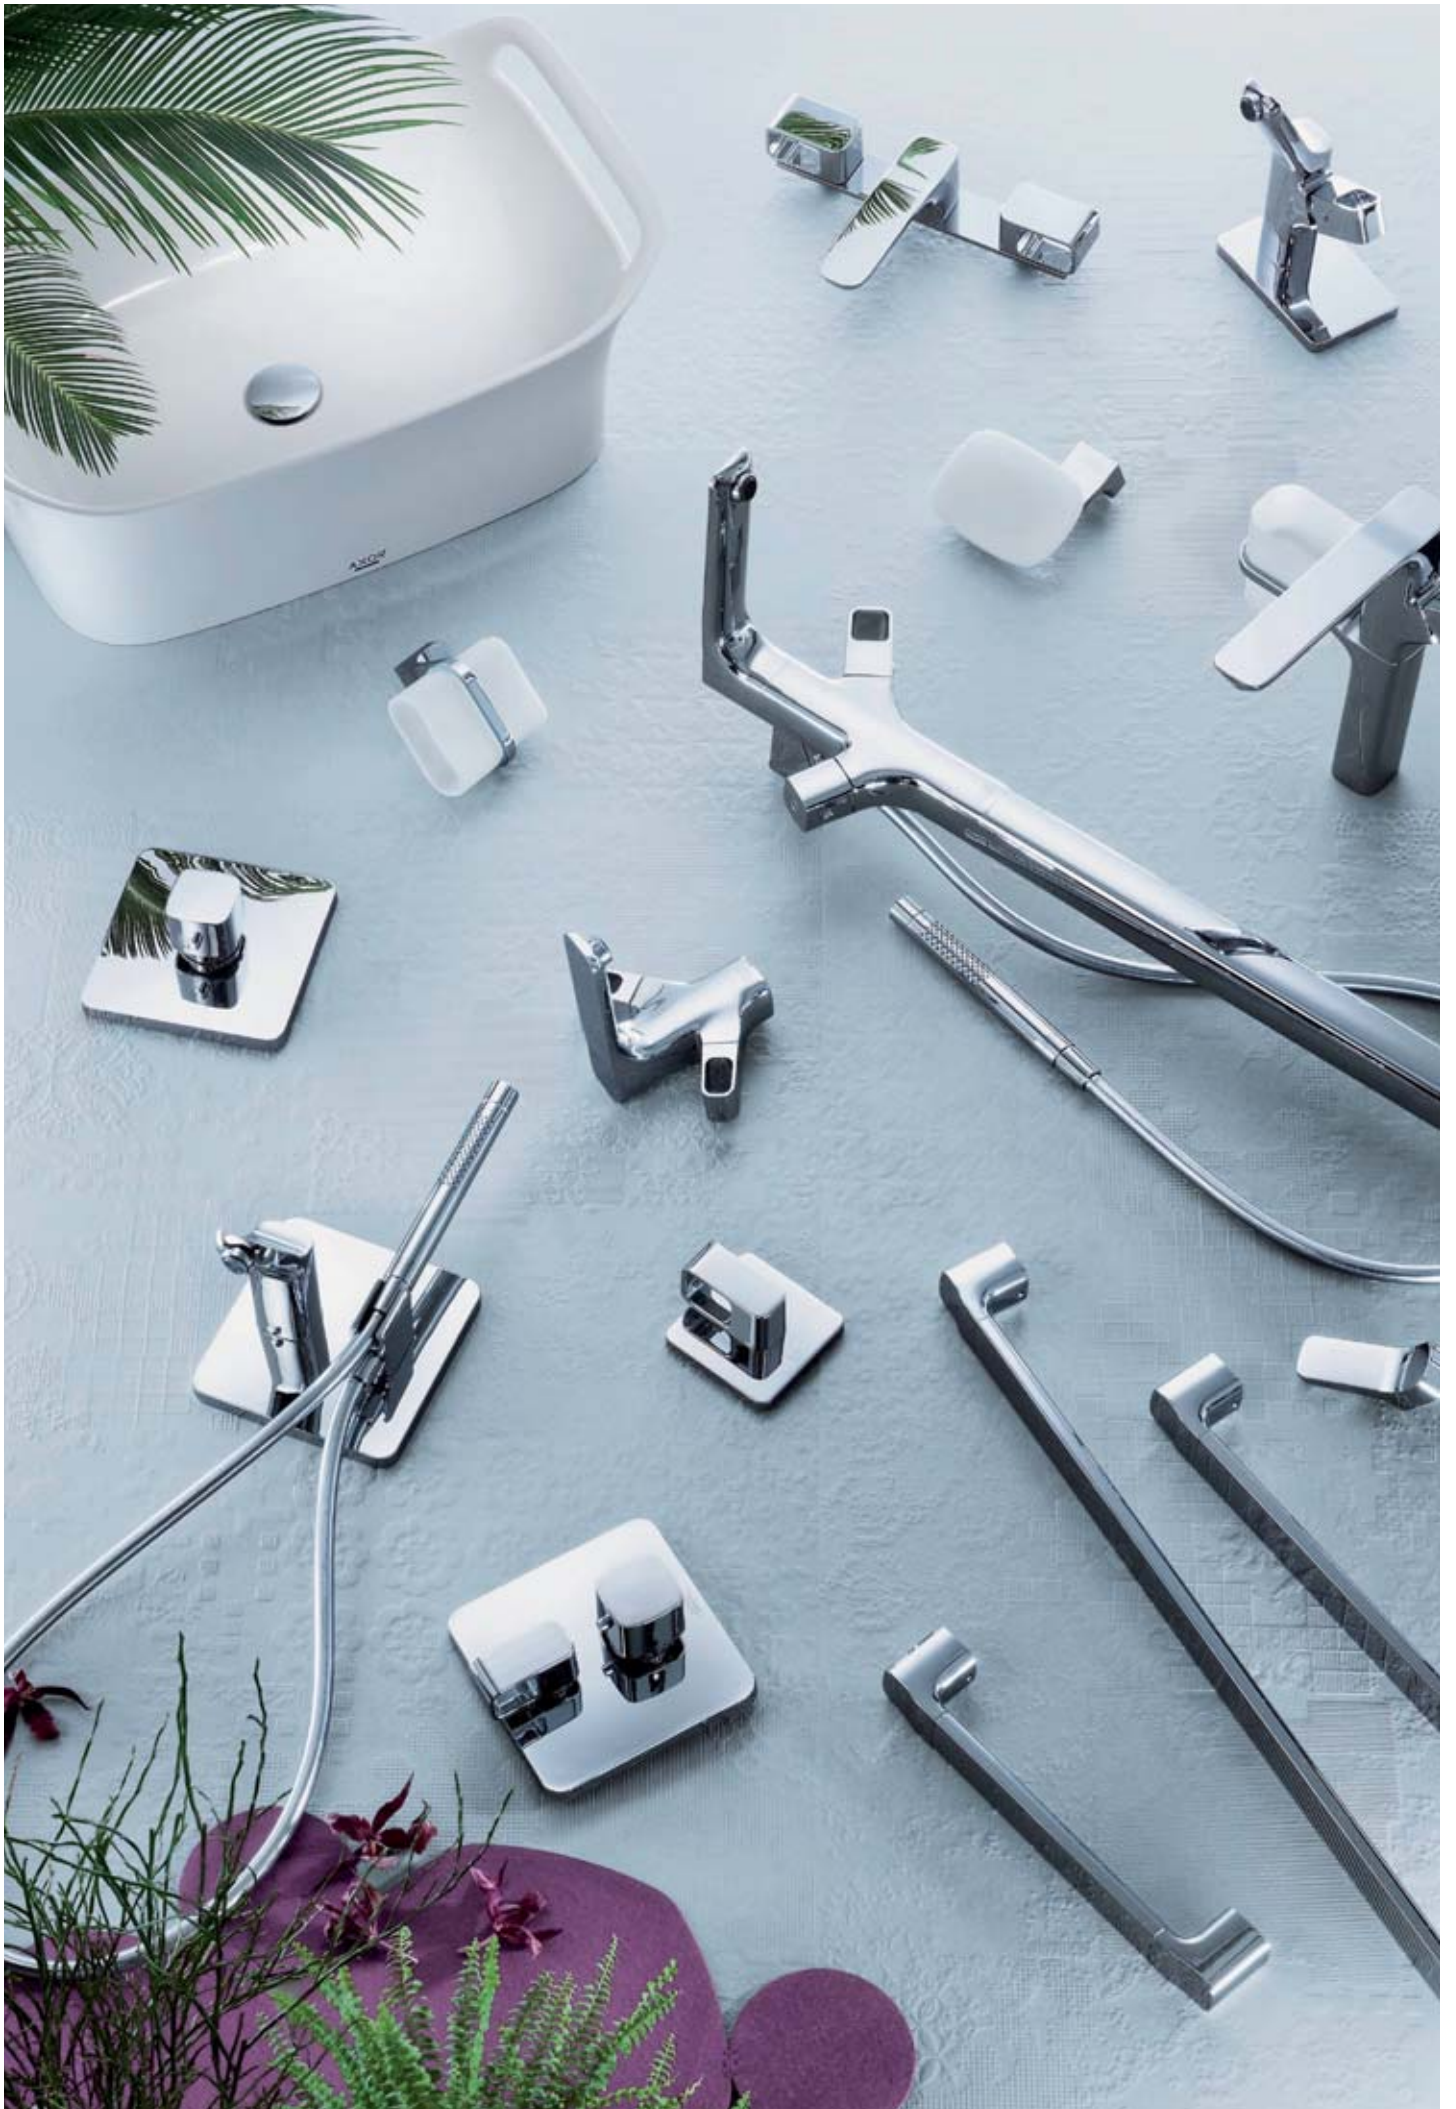

NOSTALGIC *bathing*  
in a modern *WASH TUB.*

\*\*For stability reasons, two paravent elements are usually required for free-standing installation

“It is  
not  
radiators  
we  
need,  
but  
warmth.  
It is  
not  
lamps  
we  
need,  
but  
light.  
It is  
not  
mixers  
we  
need,  
but  
water.”  
In  
searching  
for  
our  
true  
needs,

**Jean-Marie Massaud**

goes  
back  
to  
our  
origins.  
The  
French  
designer  
is  
among  
the  
leading  
representatives  
of  
nature-inspired  
design.  
He  
is  
led  
by  
this  
philosophy  
in  
all  
of  
his  
work –  
whether  
designing  
a  
sofa,  
hotel  
or  
football  
stadium.

**Axor** Massaud

Jean-Marie  
Massaud  
brings  
nature  
into  
the  
home.  
With  
Axor Massaud,  
he  
gives  
us  
a  
sensual  
experience  
of  
water.

126  
127

A  
torrent  
of  
water  
pours  
out of  
the  
mixer  
like a  
waterfall.  
Yet  
behind  
the  
seemingly  
voluminous  
spray  
is  
sophisticated  
water-saving  
technology.

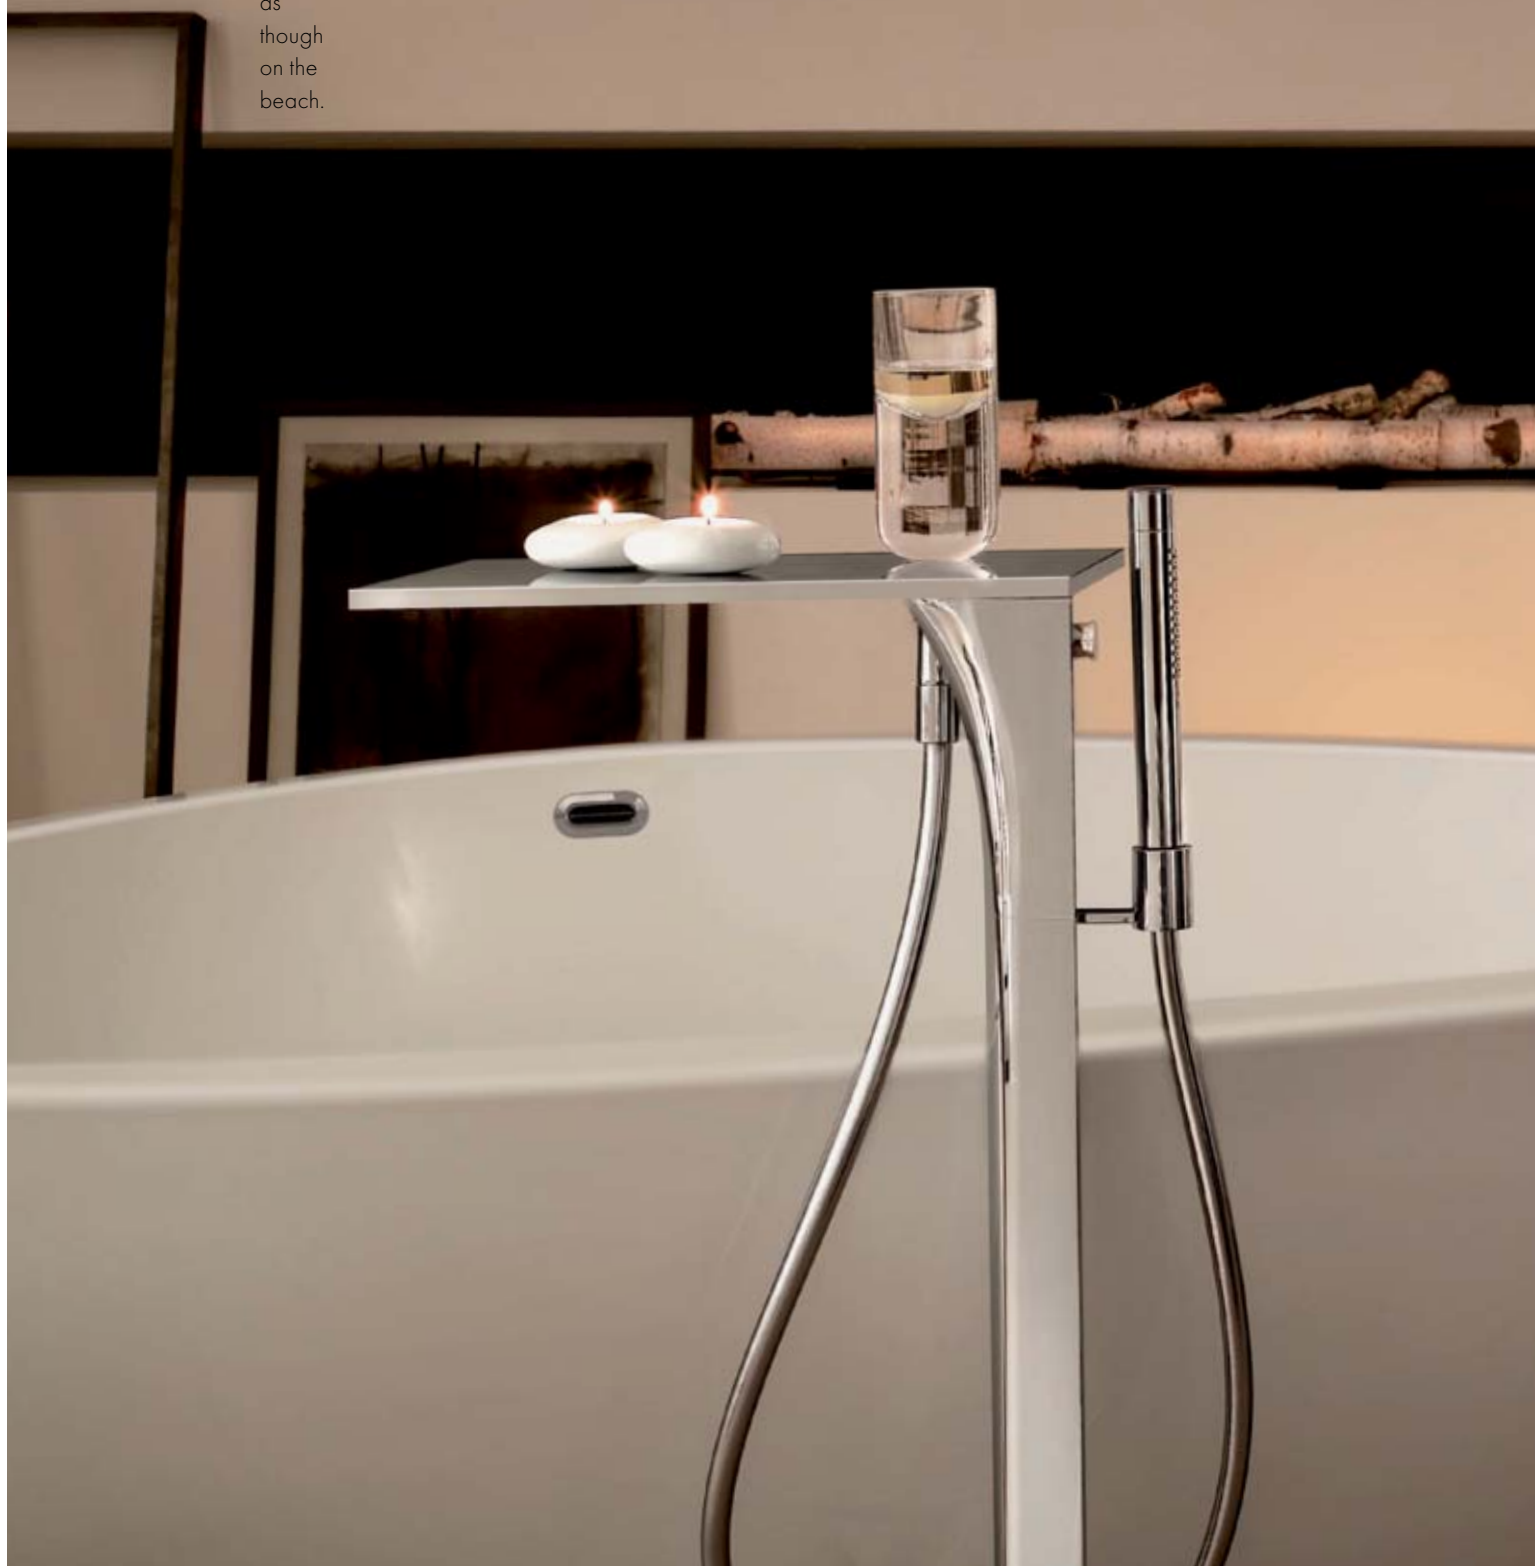

Organic  
naturalness  
and  
geometric  
surfaces  
come  
together  
in a  
harmonious  
design  
language.

The towel holder resembles the boughs of a tree.

Like  
a day  
by  
the  
sea:  
immerse  
yourself  
in a  
natural  
pool  
or  
relax  
on a  
wooden  
platform  
as  
though  
on the  
beach.

\*This fitting features a surge spray which underlines the natural aspect of water as a vital element for life. As a surge spray involves a spray to which no water is added, we recommend using the Axor Massaud or extra-deep wash basins to avoid splashwater.

Bouroullec

The two French brothers Ronan and Erwan Bouroullec let users decide what to do with their products. Their creations are based on the individualistic approach that products should simply fit into their user's life.

Ronan and Erwan Bouroullec have worked together since 1999 in their Parisian studio in the "Belleville" creative quarter where they create award-winning products for the international furniture sector.

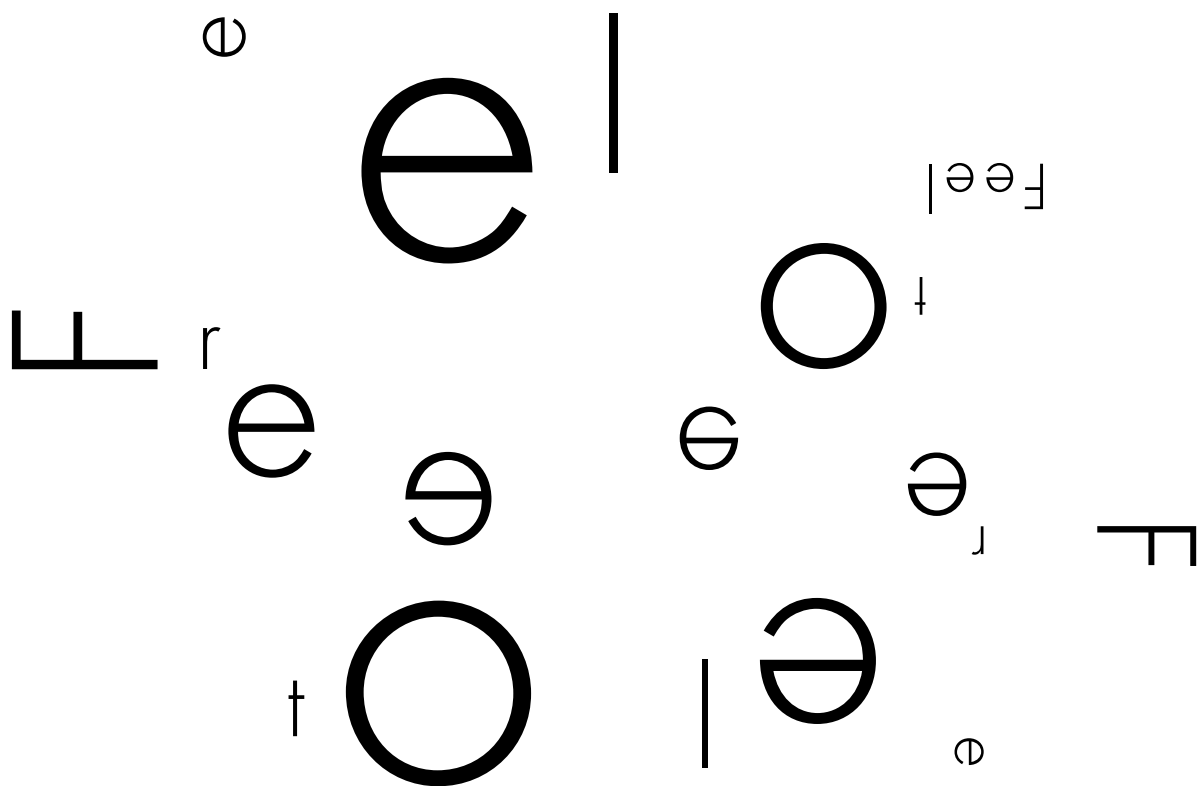

Their highly successful designs are already exhibited in both MOMA in New York and the London Design Museum.

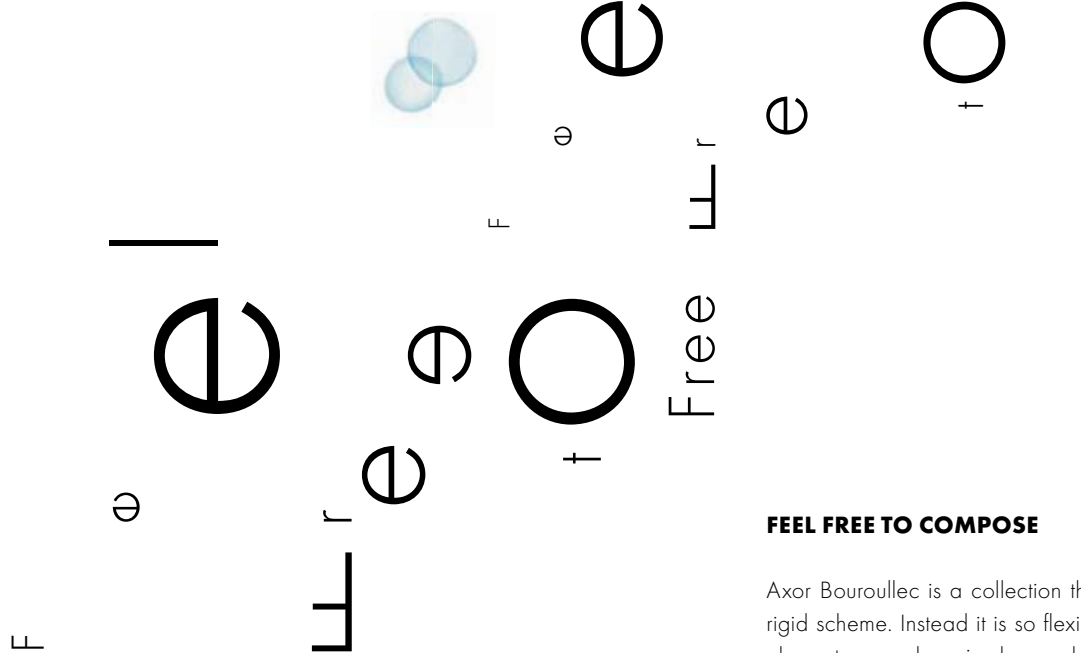

**Axor** Bouroullec

F

Compose

**FEEL FREE TO COMPOSE**

Axor Bouroullec is a collection that is not based on a rigid scheme. Instead it is so flexible that the individual elements can be simply combined. Their organic, elegant design remains in the background at all times. A collection of more than 70 products that offers us the chance to tailor the bathroom to our needs, our aesthetic desires and our space like never before. We can feel free to compose.

**OPTIONS BECOME MULTI-OPTIONS.**

The individual mixers can be positioned at various different points above, on and around the wash basin. In line with our tastes and our needs.

Two wash basins for individualists: the position of the mixer is completely based on personal preference and requirements.

146  
147

Shelves are a characteristic element of Axor Bouroullec. In the form of space-saving accessories for the wall or the console, as a mixer base or storage surface on the wash basin, or even as an exposed installation mixer, which can move through all bathroom areas.

148  
149

The Axor Bouroullec Showerpipe with integrated shelf offers space in the bathroom.

Feel Free to Compose: two shelf areas offer the free choice of where to position the mixer.

# Phoenix Design

An interview with Andreas Haug and Tom Schönherr about logic, morality and magic.

They named their design office after the mythical phoenix, which burst into flames before rising from the ashes. Andreas Haug and Tom Schönherr have been designing the broadest range of products since 1987: from writing instruments to gymnastic competition equipment, mobile telephones to shower heads. They have received more than 400 design awards for their work.

## **What do you believe defines a good bathroom design? And what is bad design?**

**Andreas Haug:** Bathroom design is comparatively complex as it involves installed and durable products. If you compare these requirements to the short life of a mobile telephone, for example, bathroom products should function for a longer period and still bring joy to their users even after many years. The "sustainability" of the design and the use of water therefore play an important role. Bad design is anything that is non-functional and disingenuous.

## **What principles do you follow?**

**Tom Schönherr:** We have developed three basic values. The first is logic.

This means that designs must offer a good ease of use and functionality. Good design must also be sensible, sustainable and durable - this is our value of morality. The third value is magic - a design that is fascinating and desirable. For us, successful design is therefore the symbiosis of these three aspects.

## **To what extent have mixer design requirements changed? Do bathroom products today speak a different language to those in the past?**

**Andreas Haug:** Bathrooms underwent a fundamental change fifteen years ago and design started to play a greater role: mixers were no longer just functional objects; users also wanted them to be visually appealing. Mixers can take on a solo role and draw attention to themselves.

## **What is your connection to water?**

**Andreas Haug:** As a swimmer, I have an extremely personal connection to water. And as a designer, I ask myself: how can we save water? How can we use water carefully? Bathing has no great importance for me. I prefer showering. This has become far more convenient and far more relaxed.

◀ Andreas Haug

**What do you like about working with Axor?**

**Andreas Haug:** We have been working with Hansgrohe for 40 years and the excitement never ends. Hansgrohe has a sophisticated design culture that is continuing through the next generation. Philippe Grohe is a great sparring partner with an excellent understanding of design. We value the company's innovative strength and enjoy the design freedom that is extended to us.

**You have designed screens, fountain pens, laptops, mobile phones, printers, watches, glasses and even nut crackers. For which sector would you still like to design something?**

**Tom Schönherr:** As I do a great deal of sport, I am particularly excited by sporting equipment and products for the outdoor sector. Our "Phoenix Academy" enables us to freely design such items independently of actual assignments.

**Is there a typical German (product) design?**

**Tom Schönherr:** Of course. The design "Made in Germany" still embodies the design virtues that were coined by the Bauhaus and Ulmer

schools. However, the strict functionalism demanded by these institutions is now passé. German design today also represents emotional values and has become more sensual.

**What do you see as the future of bathroom design?**

**Andreas Haug:** The intelligent use of electronics is the topic of the future. For example, the use of electronics will eliminate the need to manually control hot and cold water. Water can be used in a more targeted manner whereby intelligent showering will be possible as we have no sense of how long we stand under the shower. We find it exciting that people experience this sense of ease and that it is of such high quality.

► Tom Schönherr

**From nostalgia to modernity.  
From stainless steel to emotion.**

From Axor Uno<sup>2</sup> and Axor Steel to  
Axor Carlton and Axor Montreux –  
designed by Phoenix Design.

164  
165

**Axor** Uno<sup>2</sup>

166  
167

Axor Uno<sup>2</sup> is a mixer collection with high, slender basic forms that can be incorporated into any bathroom environment. As a minimalist classic, it gives people the space to develop their own personalities.

The understated style of Axor Uno<sup>2</sup> is based on a clear, geometrical design.

**Axor** Steel

176  
177

Axor Steel is the high-tech collection. The brushed stainless steel combines the benefits of a highly hygienic material with a modern, cool appearance. The clear, purist design also adds to the look and feel.

Unmistakeable design from a single source: whether as a 3-hole wash basin mixer, a single lever mixer on the wash basin or in the shower.

**Axor** Carlton

186  
187

With its sweeping shapes, Axor Carlton is reminiscent of the days of the glamorous grand hotels of the 1920s. A nostalgic collection that survives all trends.

Retro design with the comfort and convenience of a modern mixer.

**Axor** Montreux

196  
197

Axor Montreux is a stylish bathroom collection that sends us back to the early 20th century and captures the Zeitgeist of the Belle Époque with its romantic spas. It is both a homage to the sophisticated spa resort on Lake Geneva and a modern collection.

The mixer's characteristic features: the bridge mixer based on traditional industrial design.

## **ADDED VALUE**

THERE ARE MANY DIFFERENT WAYS TO ORGANISE YOUR LIFE.

THERE ARE NOW MORE AND MORE OPPORTUNITIES FOR YOU TO CUSTOMISE YOUR BATHROOM TO A GREATER DEGREE THAN EVER BEFORE.

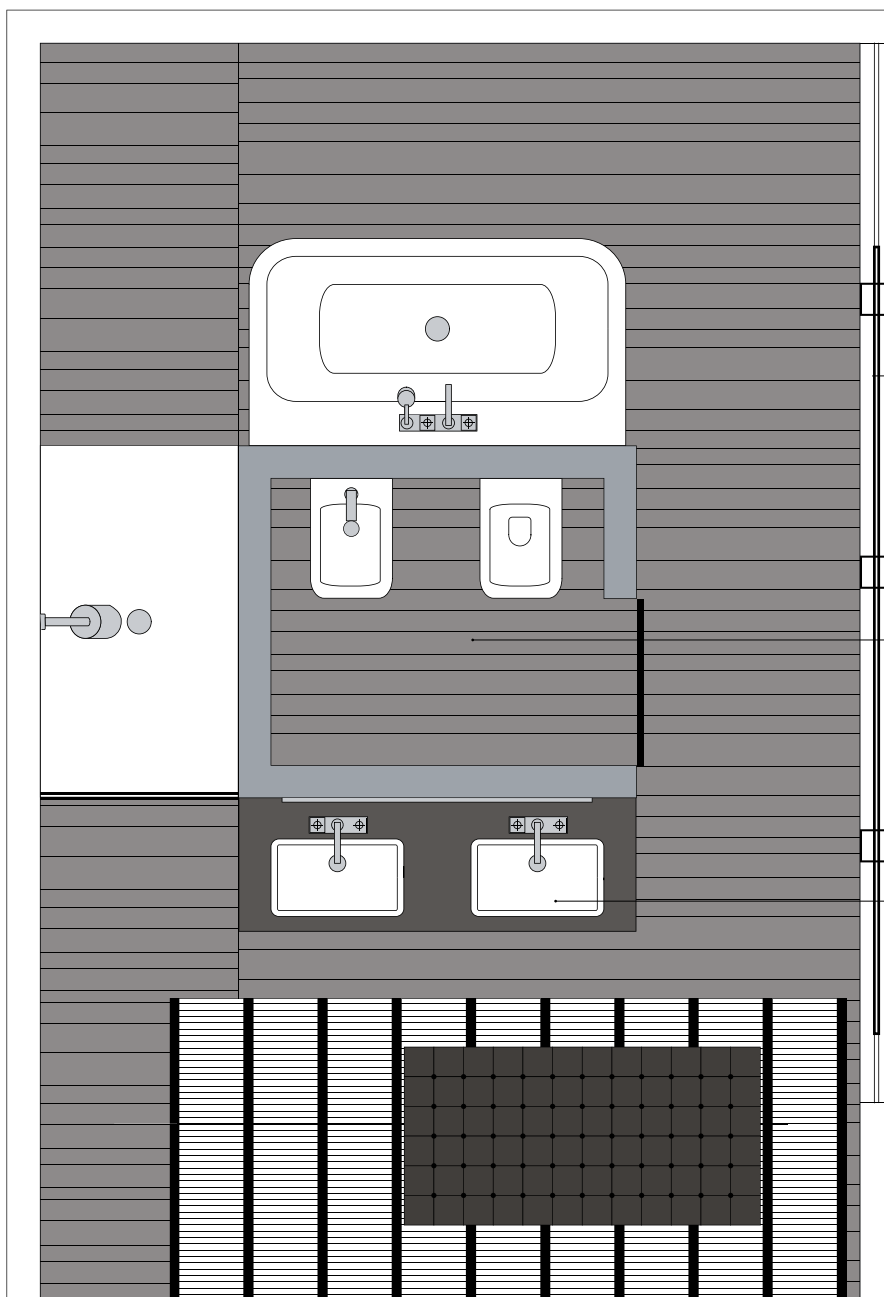

**INSPIRATION? GLADLY. WITH OUR BATHROOM PLANNING PROPOSALS AND THE AXOR MANUFACTURING TEAM.**

# DIVIDING INTO FEEL-GOOD AND FUNCTIONAL AREAS

## How can a bathroom be transformed into an elegant feel-good area?

With relaxation and well-being the overriding incentives, the bathroom needs to offer a better quality of life, it should be the ideal place to spend time. It is moving away from being a purely functional room, where it's not just about getting clean, and moving more towards being a source of relaxation, a place where the soul is also cleansed. Dividing the bathroom

into functional and feel-good areas creates a sense of architectural calm and allows us to experience the richness of water. Transparent doors and large window fronts make for useful division and create a cosy ambience. Antonio Citterio has effectuated this room concept with the Axor Citterio collection (pp. 68/69).

### Window front

Large window fronts let lots of natural light into the bathroom.

### Room-in-room

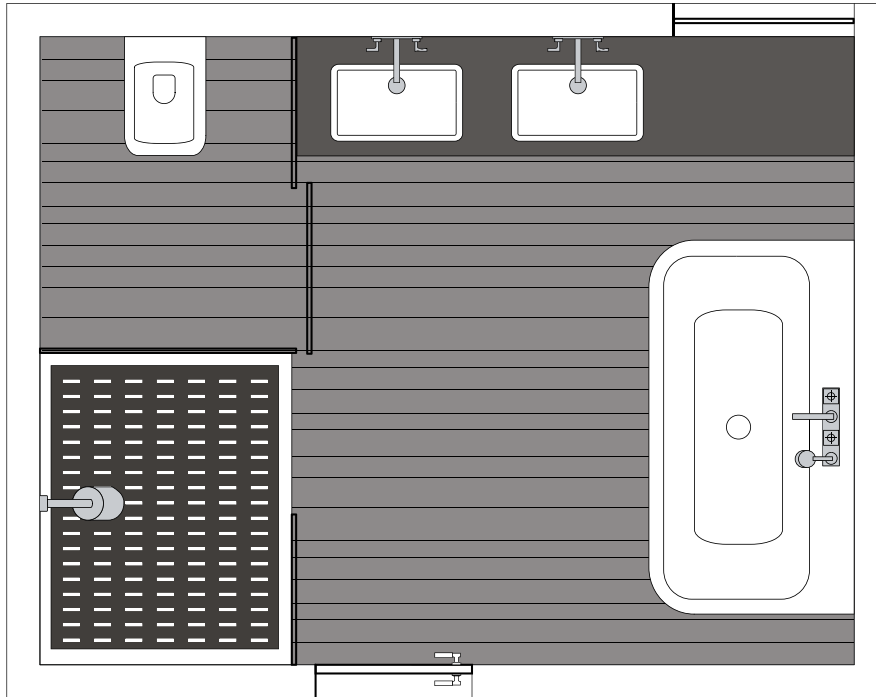

The functional area including toilet and bidet is situated in the centre of the bathroom and this is also where the bulk of water-carrying installations are located. A transparent glass sliding door separates this from the feel-good area.

### Feel-good area

Double wash basins are integrated into the living area, offering ample opportunity to celebrate water and to relax.

**Bathroom area: approx.  
15 square metres**

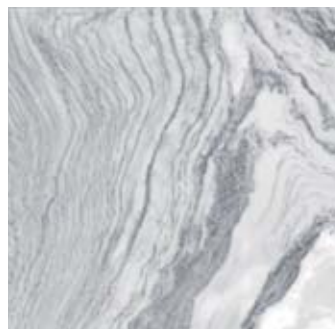

**The spatial concept of the separate feel-good and functional areas can also be implemented in the case of small floor plans:**

The segmentation concept can be implemented easily on small floor plans too. Transparent wall and door elements help with this. These divide the areas and help the room retain its sense of spaciousness.

**Bathroom area: approx. 11.4 square metres**

**What other materials and accessories emphasise the elegant character of the bathroom?**

The use of noble materials, such as black and white marble, gives the room a timeless elegance. Noble home accessories make for a cosy ambience and give the bathroom that special effect - whether the floor plans are large or small.

# THE FUSION OF BATHROOM AND BEDROOM

## A retreat for many different personalities

Opening up the bathroom to the bedroom creates free space that can be used in a variety of ways. The result is one spacious entity with fluent transitions - smoothly separated by a screen, which provides intimacy even with the opened-up space. A communicative space, providing a place where people can live side-by-side in harmony, yet at the same time offering an opportunity to retreat to somewhere private.

Separate areas within the bathroom cater to the individual needs of different personalities: Instead of the classic double wash basin, individually furnished wash basins facing each other provide the necessary privacy.

In the two separate bath tubs, each person can adjust the temperature to whatever is ideal for their personal taste - while still being able to communicate with the other person.

Plants play an important role in this feel-good bathroom: as a privacy screen and a feel-good barometer.

Patricia Urquiola has implemented this fusion of bathroom and bedroom in her Axor Urquiola dream bathroom (pp. 106/107).

### Filter area

The boundary between outside and inside is blurred by large windows and lots of plants.

### Bathroom/living environment

Chill-out and relaxation area merge into a harmonious retreat.

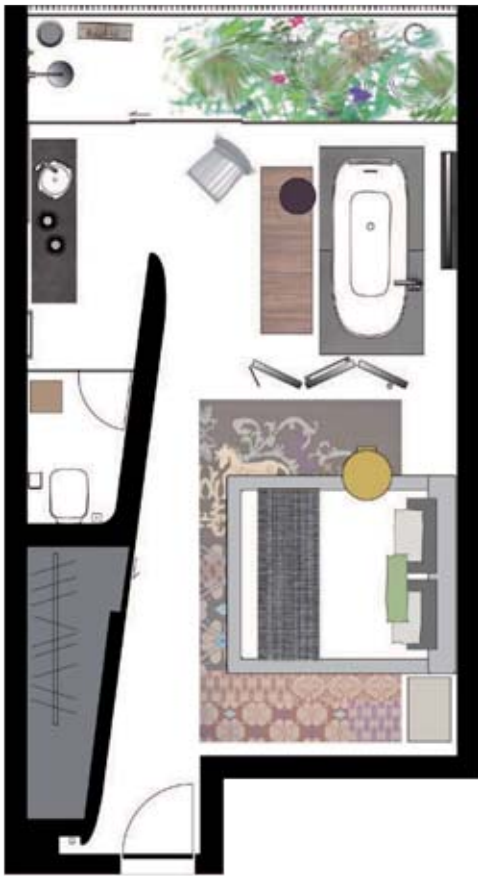

### Room dividers

A paravent serves as a privacy screen and constitutes the casual separation of bedroom and bathroom.

**Bathroom area: approx. 40 square metres**

### Privacy

Two bath tubs and separate, individually furnished wash basins provide both intimacy and individuality, enabling both people to share the bathroom at the same time.

The fusion of bedroom and bathroom can also be implemented for small floor plans. The filter area incorporating the shower is flooded with natural light, and the plants give it the aura of a conservatory. The paravent serves as a privacy screen with the added function of a radiator.

**Bathroom area: approx.  
16 square metres**

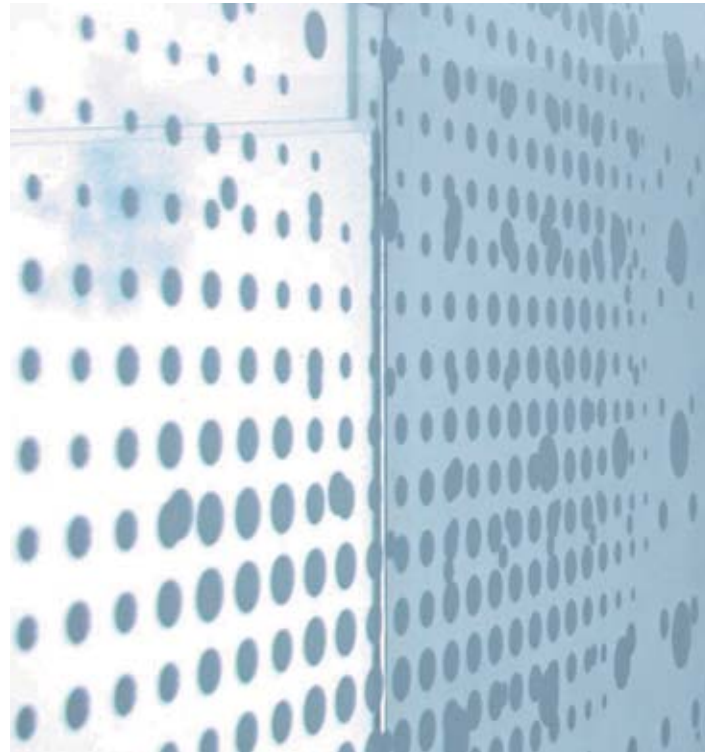

**Which aspects emphasise the nature of the retreat?**

**Plants**

Foliage plants are the feel-good barometer within the bathroom and the natural point of contact with the outside world.

**Glass**

Glass surfaces with graphical patterns serve as privacy screens. They also stimulate the imagination of the viewer and are playfully relaxing.

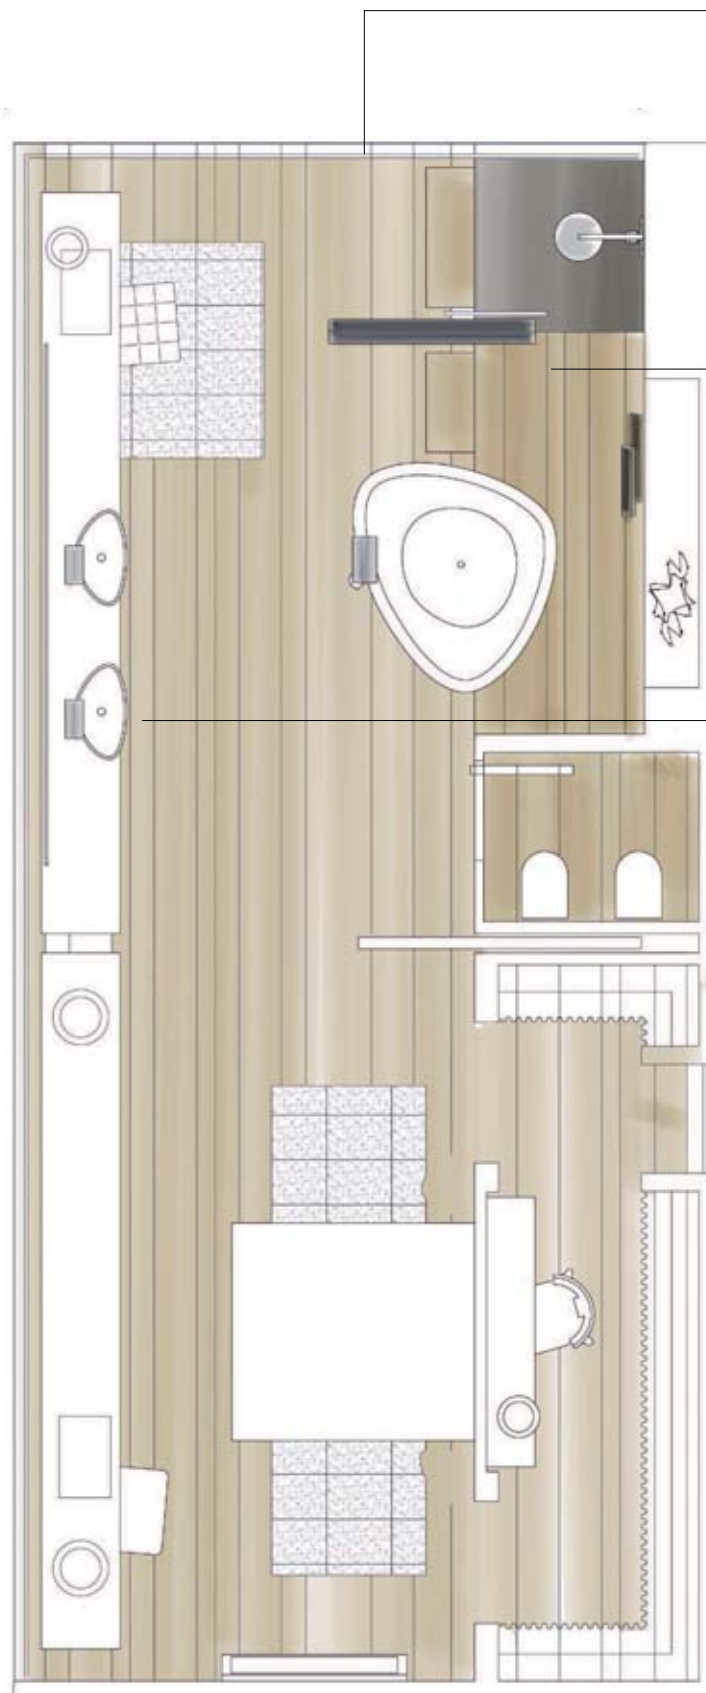

# THE BATHROOM INSPIRED BY NATURE

## Harmony between man, nature, space and technology

The bathroom is transformed into a living environment. Here we can feel good. It is integrated into the rest of the home and is in harmony with the bedroom, both forming a single entity. Separated by a sliding door, both rooms merge seamlessly into one another. Users can enjoy an intimate experience with nature and water, in a spacious bathing and living environment. The free-standing bath tub evokes the sensation of floating on a lake. Wooden platforms make it appear as if you are on a beach, inviting you to linger a while. Natural materials on floor and wall bring a natural feel to the architecture of the room.

Jean-Marie Massaud was inspired by nature for his Axor Massaud bathroom. You can find the Axor Massaud bathroom on pp. 126/127.

**Bathroom area: approx.  
33 square metres**

### Window front

Wood blinds will ensure that daylight forms a natural part of the room design and atmosphere.

### Communication and relaxation area

Relax by the lakeside - the wooden platform next to the bath tub invites you to sit.

### Home accessories

Candles, picture frames, carpet, books and armchairs all create a cosy ambience in the bathroom.

### Convenient wash basin area

The spacious wooden console with two generous double wash basins provides lots of room for storing personal belongings and for make-up.

**The small nature-inspired bathroom**

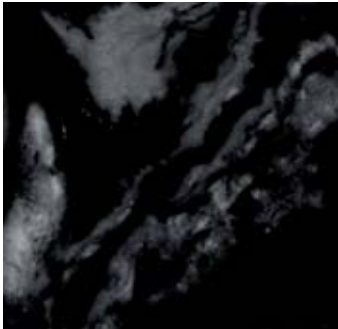

This nature-inspired bathroom concept can also be effectuated in the case of small floor plans, such as a hotel bathroom: A glass pane behind the bath tub creates the impression of open space going towards the bedroom, and plenty of wood conveys a warm, natural feel.

**Bathroom area: approx.  
13 square metres**

**What materials bring the natural world into the bathroom?**

**Natural materials**

Standstone and dark marble in the wet area

**Floor, platform, console**

Solid wood for a feeling of being close to nature

**Textile**

Large, soft carpet for a cosy ambience

**Felt stones:**

A soft river bed in the bathroom

# THE BATH OF ALMOST LIMITLESS POSSIBILITIES.

## PLENTY OF SCOPE FOR INDIVIDUALISTS

The beginning of the 21st century is characterised by creativity. More than ever before we are feeling the need to customise, and subsequently we also want to design our bathrooms in accordance with our own personal ideas. A bathroom world that offers as much freedom as possible, so that users can find the best solutions to suit them. A clearly structured ambience with bright, friendly colours and lots of warm, natural light provide the user with the opportunity to be completely themselves.

### Space to develop freely

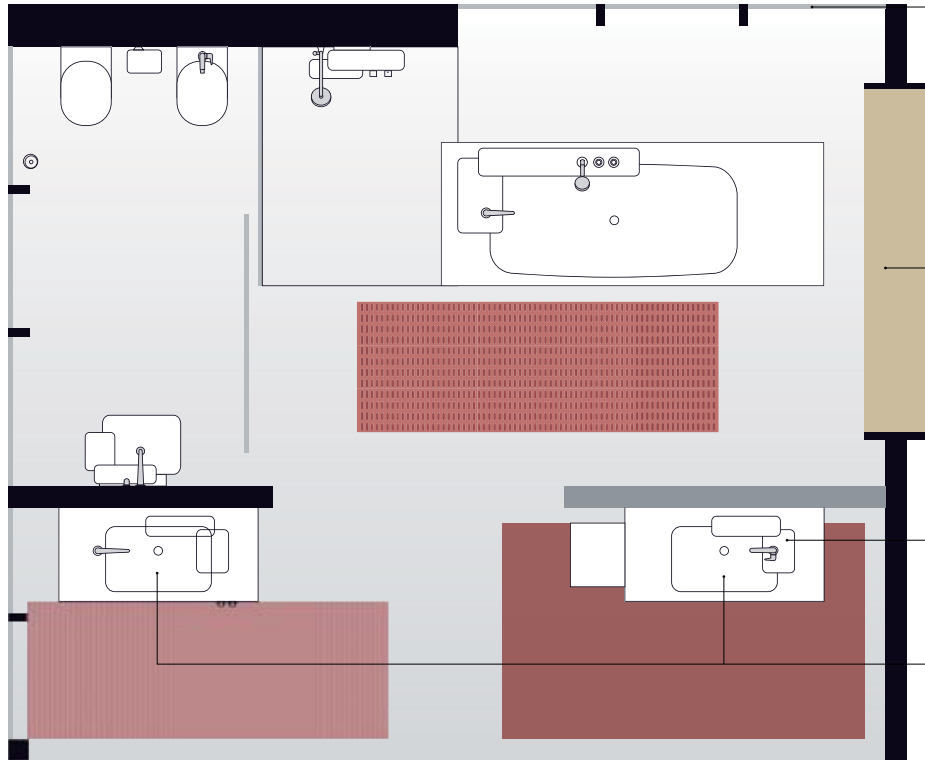

When the bathroom is structured into different areas, the space appears to be more open. Half-height walls, wash basin furniture, a bench and the bath casing provide lots of storage space, thus offering users the opportunity to develop freely.

### Light colours and materials impart peace and tranquility

- Light-coloured wood brings warmth to the bathroom
- White Corian walls give the room tranquility and elegance
- Windows with frosted glass guarantee privacy

**Bathroom area: approx. 33 square metres**

**Frosted glass**

Lots of natural light streams through the large window front made of frosted glass, which serves as a privacy screen.

**Open transition**

The spacious entrance area connects the bathroom to the bedroom in elegant fashion.

**Wash basin furniture and bench**

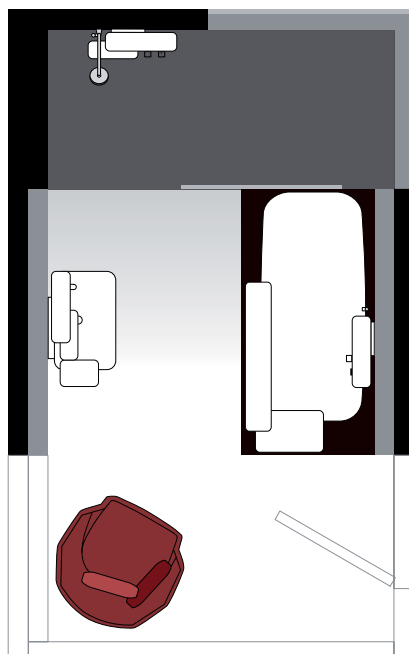

Add to the homely atmosphere and offer further storage space.

**Two separate wash basins**

Depending on user needs, the wash basins can be individually customised and furnished

214  
215

**Bathroom area: approx. 9 square metres**

**Plenty of storage space even in a small room**

Offset curtain walls provide another space to store items, and divide up the space horizontally. The exposed installation products in the collection offer the possibility of additional storage space for smaller rooms.

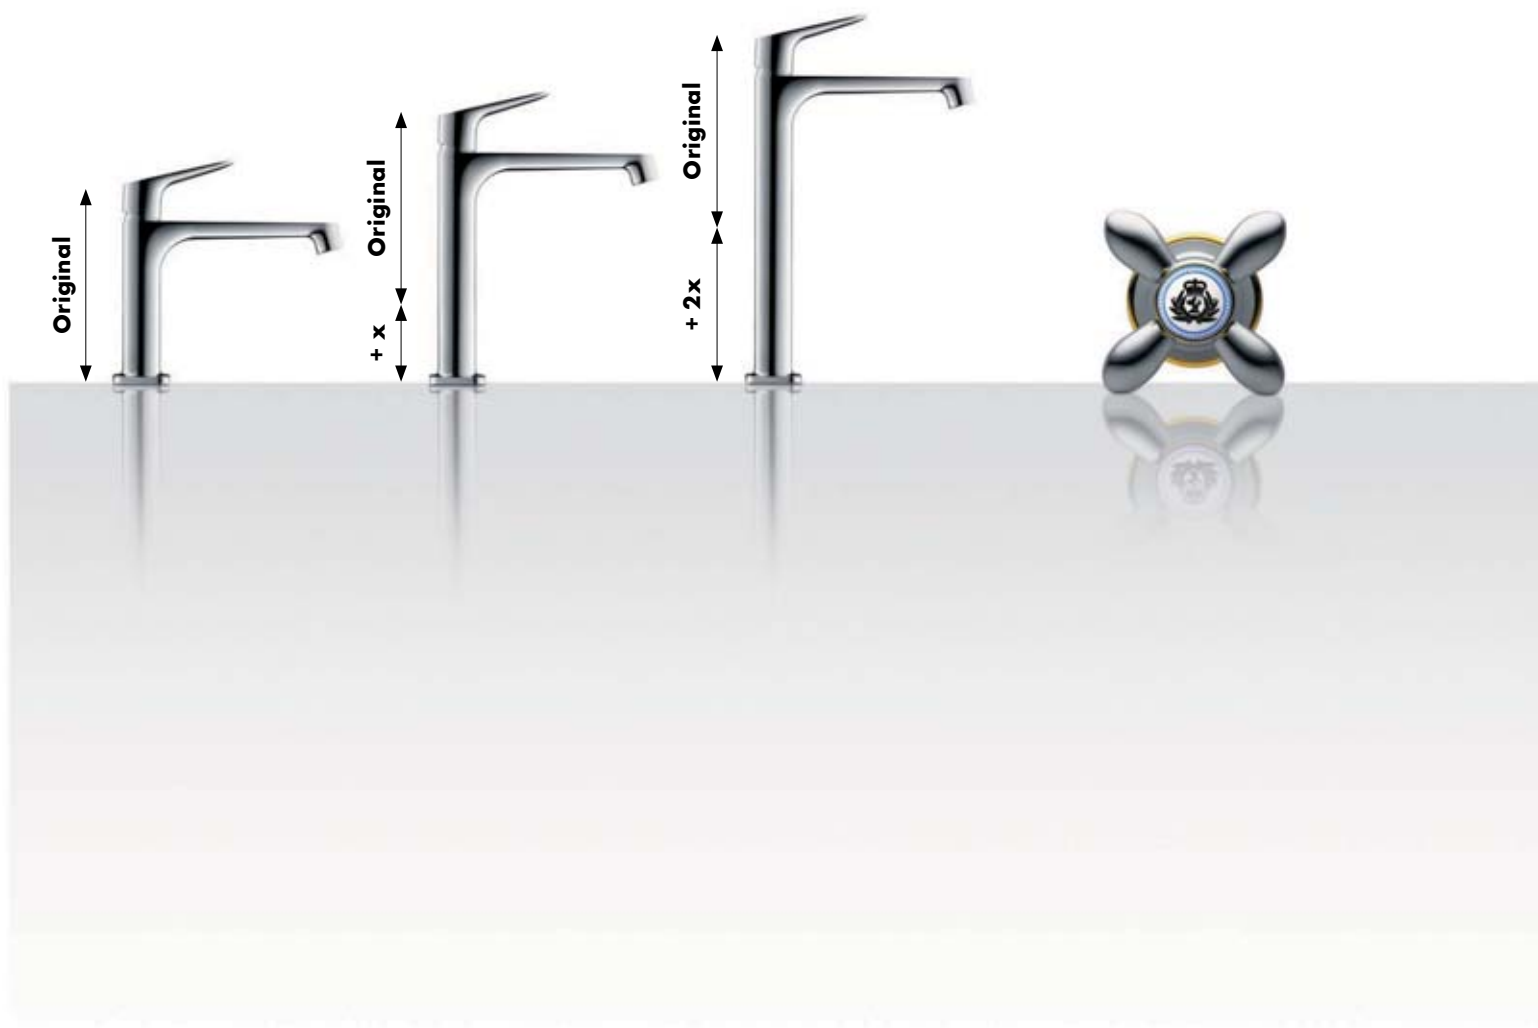

## CHROME CAN ALSO BE GOLD PLATED.

Sometimes an elaborate product or sophisticated collection requires a small modification to better customise the bathroom. The Axor manufacturing team customises the collections with great attention to detail and with personal support, entirely in accordance with customers' personal concepts and requirements. This can mean special finishes or even specially shortened

or extended mixers. If you would like the products to be finished with the company logo or initials, you can consult the experts in the Axor manufacturing team, who will fulfil your special requirement with handcraft quality.

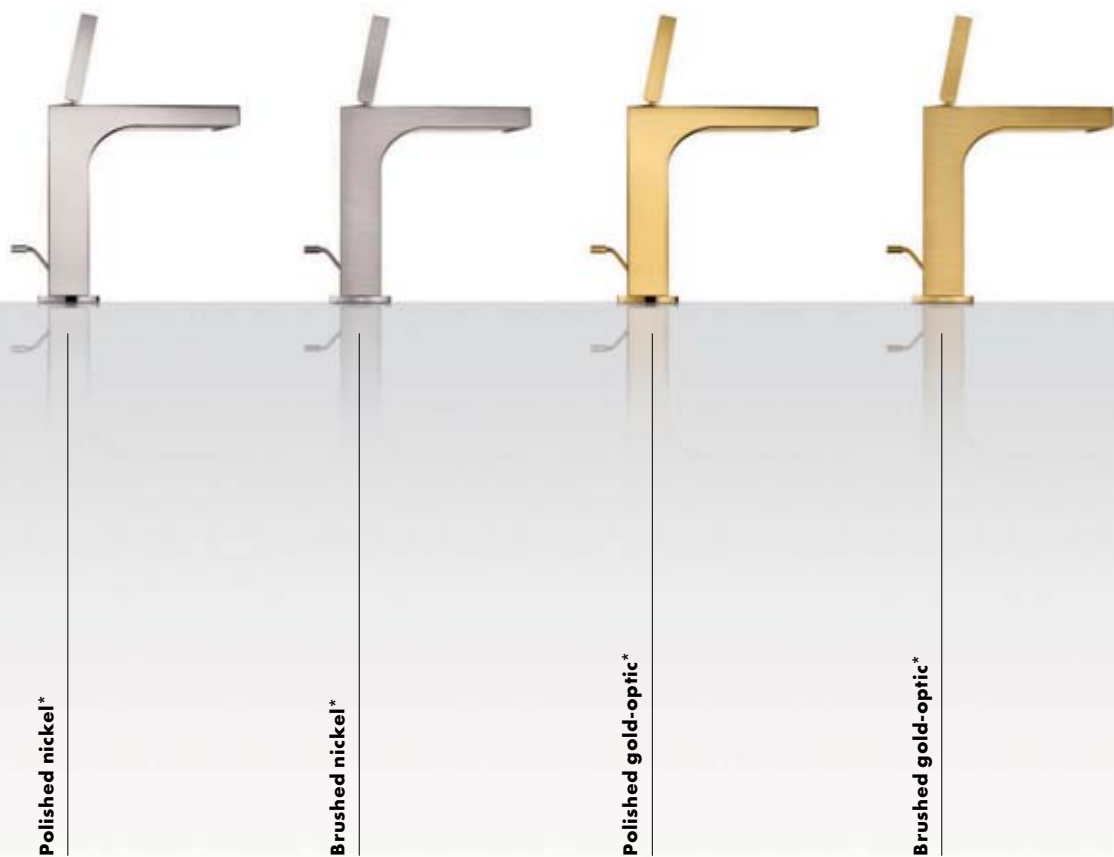

### 1. EXTEND OR SHORTEN THE MIXER

### 2. PRODUCTS WITH INITIALS, LOGOS OR EMBLEMS, ETC.

### 3. SPECIAL FINISHES

\* These finishes are manufactured using PVD technology and are particularly abrasion- and scratch-resistant.
