

eLEARNING Platform

Cargo Connections is an ISO 9001 and ISO 14001 certified general cargo network established in the summer of 2014 to provide independent freight forwarders access to a trusted, worldwide network of agents who could handle their shipments, whilst working professionally and safely under a strict Code of Conduct.

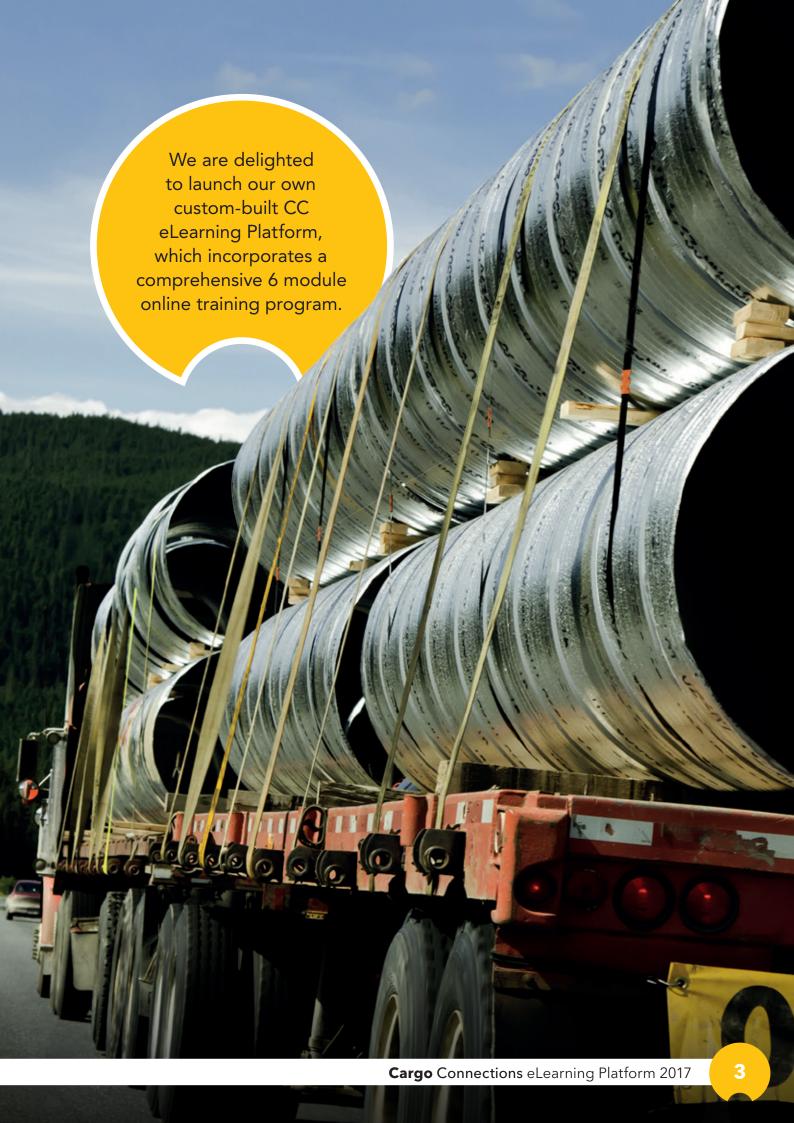

We understand that one of the main challenges in our industry is the lack of training and staff development, especially with new and young staff members. Practical 'on the job' experience needs to be paired with theoretical knowledge, as this leads to a deeper understanding. However, specialist training courses and workshops are often expensive and involve travel and time away from the office. So, we are delighted to launch our own custom-built Cargo Connections eLearning Platform, which incorporates a comprehensive 6 module online training program.

The clear and highly effective video based training includes narration, graphs, diagrams, video footage and photographs. When completed, the user will understand the practical, operational and engineering aspects of heavy transport and lifting projects.

CC works hard to develop new membership benefits and has invested in both the bespoke training and the eLearning platform so that it can be provided at a heavily reduced rate.

Future plans include training related to general cargo.

Our custom built eLearning Platform incorporates a comprehensive 6 module online training program.

Besides the benefits of not having to travel to a training centre and sit in a classroom for long periods, there are additional advantages to eLearning such as being able to stop the training at your convenience and start again when you are ready.

We have taken this a step further by breaking the training into 10 minute sessions which will be long enough to get an important point across but short enough not to disrupt your day.

The training includes 11 multiple

choice tests to ensure that each subject has been fully understood before continuing to the next topic.

Each registered user receives a personal log-in so that they can train at their own pace.

The personal profile page contains a progress bar and a list of achievements so you can track your advancement through the course. Upon completion you will receive a Certificate via courier.

COMPANY WIDE

The training is ideal for staff who are at the beginning of their career in heavy transport, offering employers a time saving and low cost alternative to workshops and seminars. However, as the training is comprehensive, senior level professionals will also benefit from the practical, scenario and video based course as it will encourage reflection on current practices.

MODULES

Here is the schedule of modules and sessions.

MODULE 1: TERMINOLOGY

Session 1 Introduction Session 2 Terminology

MODULE 2: DIMENSIONS, WEIGHTS & FORCES

Session 1 Gravity & Forces
Session 2 Laws of Newton
& Archimedes

Session 3 Principle of Moment Session 4 Wind & WaterForce

MODULE 3: HEAVY TRANSPORT

Session 1 Transporters & Trailers
Session 2 Principle Working (1)
Session 3 Principle Working (2)
Session 4 The Stability Area
(Plan View)

Session 5 3 & 4 Point Suspension
Session 6 The Equalizing Effect

Session 7 The Stability Area

Session 8 Pull Type & SPMT Capacities

Session 9 The Differences

Are Getting Smaller

session 10 Steering Capabilities

Session 11 Naming Conventions

Session 12 The Goose Neck

Session 13 GroundPressures

Session 14 Pull Force/TractiveEffort

Session 13 Tryuraulic &

Structural Stability (1)

Session 16 Hydraulic & Structural Stability (2)

Session 17 Dolly Transport

(Turn Tables)

Session 18 Long Load Vehicles

MODULE 4: HEAVY LIFTING

Session 1 Types Of Cranes
Session 2 What Is A Crane
(Principle Of The Lever)

Session 3 Principle Of The Hoist

Session 4 The Load Chart
Session 5 Types Of Lifts

(Keeping The Load Leve

Session 6 Lifting With 2 Cranes

Session 7 Tailing Arrangements

Session 8 The Tailing Frame

Session 9 Ground Pressures

Session 10 Load Spreading Options

Session 11 Rigging Forces (1)

Session 12 Rigging Forces (2)

Session 13 Spreader Bars

Session 14 A Complex Lift Made Easy

Session 15 Super Lift Attachments

Session 16 Stability Of The Load

Session 17 Erecting Wind Mills

Session 18 The Lift Plan

MODULE 5: JACKING & SKIDDING

Session 1 Types Of Jacking Skidding Methods

Session 2 Jack & Pack

Session 3 Climbing Jacks

Session 4 Strand Jacks Session 5 Strand Jack

Applications

Session 6 What Is

Skidding, Skidding

Session 7 Coefficient

Of Friction,

assion 8 Hydraulic Skid Shoe

Session 8 Hydraulic Skid Sho

Session 9 Hilman Rollers

Session 10 Hydraulic Gantry (1)

session in Tryandane Gantry

Session 12 Airbags

MODULE 6: LOAD OUTS

Session 1 Types of Barges

Session 2 Background History

Session 3 Terminology

Session 4 Barge Stabilit

Session 5 Hydrostatic Particulars

Session 6 Tides

Session 7 5 Types of Load-Out

Operations

Session 8 Type 1: Free Floating

Barge, Tidal Conditions

Session 9 Type 2: Free Floating

Barge, Non-Tidal Conditions

Session 10 Type 3: Steel Plates, Non-

Tidal Conditions

Session 11 Type 4: Barge Fixed

Aground

Session 12 Type 5: Beach Landing
